Hello Romy,

I have reviewed the updated report for 2017 GHG Emissions Inventory Summary for MacEwan University. Both areas of conflict from first review have been updated in second version of report, published on the July 20th, 2018 by Energy private limited.

Below is a summary of the review:

1. In Section 2.1 Organizational Boundaries, the Area(sq. ft) defined for each building of the campus is now aligning with the data provided by the space management department according to the BOMA guidelines, which is Gross Area – (Z2 Circulation + Z3 Mechanical + Z4 Building Service/Custodial) , which indicates we are not considering any lobby area, service rooms areas, and Parking. **I recommend that we verify these numbers again, and set up some new boundaries after further discussing what we anticipate from these numbers.**
2. In Section 3.1.2 ,the provider for Natural Gas for our campus is been updated from Enmax to Direct Energy.

The rest of the document is accurate, according to my knowledge. Please let me know if you have any further questions regarding my review.

Thank you for this opportunity.
