RE: Affirmation, Western Michigan University EV Charging Infrastructure - for STARS

To Whom It May Concern:

Clean Energy Coalition is a nonprofit, nonpartisan organization dedicated to promoting clean energy technologies as a way to create healthier, energy independent communities. Our work at the state and regional level has allowed us to observe and engage with entities in the rapidly evolving space of renewable energy infrastructure technologies.

Western Michigan University has been an early adopter of cutting edge technologies. We have witnessed this firsthand, through the installation of a solar photovoltaic array and electric vehicle charging stations, and the deployment of electric and hybrid electric fleet vehicles. It was the University's established commitment to sustainability, as demonstrated by their previous installation of electric vehicle charging infrastructure, that drew us to partner with them in the first place. We regard Western Michigan University as a pioneer not just in promoting, but also in acting upon, the values of sustainability.

Sincerely,

A handwritten signature in blue ink that reads "Aaron Champion". The signature is fluid and cursive.
