SUSTAINABLE COMMUNITIES
& WORKING LANDSCAPES

WELCOME TO YOUR FIELD

Paul Smith's College located in the six-million acre Adirondacks of New York State serves as the living laboratory for this intensive two-week, three-credit field experience that focuses on major issues related to rural sustainability, wilderness management, and resiliency.

PAUL SMITH'S COLLEGE

ASU
Arizona State University

Students will arrive and depart from Montreal, Canada, giving them the opportunity to explore both the francophone culture and a variety of international sustainability issues. From there, students will move to the lakeside mountain campus at Paul Smith's College in northern New York, which will serve as the hub for this experience.

- May 13-26, 2020
- Earn 3-college credits in just 2 weeks
- Cost is $1995 inclusive of all tuition, fees, room, board, and ground transportation. Airfare is not included.
- Open to ASU & PSC students
- Must have Junior standing to be eligible

COURSE HIGHLIGHTS

- Cross-cultural sustainability tour in Montreal, Canada
- Exploring the natural and human history of the Adirondacks
- Working alongside sustainability & natural resource professionals addressing issues related to land and water conservation, renewable energy, and sustainable tourism
- Working on a local, green construction project
- Meeting with local farmers and learning about low-carbon food production and distribution

HOW TO PREPARE

- To familiarize yourself with the region, a series of pre-course materials will be assigned.
- Spring in the Adirondacks can be cool, especially at elevation. You'll need to bring warm, comfortable clothes suitable for being in the field. This includes a raincoat, sturdy shoes or hiking boots. Laundry facilities are available.
- You'll also want to bring a laptop or tablet and a small notebook for when we're in the field.
- Other handy field supplies include bug spray, water bottles, and a flashlight or headlamp.
