

June 28, 2022.

Executive Board AASHE STARS:

The challenges faced today require the collaborative work of all actors in the community. The 2030 Agenda and the sustainable development goals represent an agenda for change that requires collective participation in which the Universidad Autónoma de Tamaulipas (UAT), in search of a fair transition for all, plays a transcendental role.

Created on February 4, 1956, the UAT is currently the strongest, largest, and most prestigious Higher Education Institution in Tamaulipas. Likewise, it is one of the 33 institutions that make up the Consortium of Mexican Universities (CUMEX) which brings together the universities with the highest academic competitiveness in the country.

Our University has acquired a great commitment to sustainable development and that is why, in the 2022-2025 institutional development plan, it takes the 2030 Agenda and its sustainable development goals as a reference in its substantive functions. Aware of the great responsibility that our institution has with our region and its sustainable development.

For all of the above, and in my capacity as rector of the institution, I am very pleased to confirm that the information and data presented in this "AASHE-STARS" network regarding sustainability issues is accurate; and it was gathered through the participation of the various secretariats, directorates, areas, and departments of the UAT. In addition, support was

obtained from each of the faculties and academic units, and from the professors and researchers who are related to these topics.

For the Universidad Autónoma de Tamaulipas (UAT) it is a privilege to be part of the STARS Evaluation and Monitoring System of its program; that in this evaluation, it will provide us with valuable information, and will give us the opportunity to concentrate efforts and make integrated advances in sustainable matters in all areas, faculties, campuses and academic units.

We thank AASHE in advance for their leadership in creating a system that objectively captures sustainability performance in all areas of higher education institutions.

Sincerely

C.P Guillermo Mendoza Cavazos
Rector
