Letter of Affirmation

Innovation B – Development of engineered mulch for removal of metals and phosphate from stormwater in raingardens.

Innovation D – Development of a green filter media for use in catch basin inserts in storm drains for metals and petroleum hydrocarbon removal.

This letter is meant to ensure that the policies, practices, or outcomes that the institution is claiming for these innovation credits are truly innovative. It also affirms how the innovations meet the criteria outlined below.

Which of the following STARS subcategories does the innovation most closely relate to?

1. Research
2. Water

Please do not hesitate to contact me should you have any questions or concerns.

Sincerely,

Dibyendu Sarkar, PhD, PG
Professor of Environmental Engineering
