

Sustainability at Cal State LA

Campus Sustainability Committee

The Campus Sustainability Committee (CSC) promotes collaboration among faculty, students, and staff in the adoption of best practices and policies to improve the environmental, social, and economic sustainability of the campus community. Cal State LA's CSC is charged with educating and engaging campus and community stakeholders on sustainability issues, integrating sustainability into campus policies and procedures, and facilitating communication of initiatives and updates on campus sustainability efforts.

Green Revolving Fund

Cal State LA's Green Revolving Fund looks to the university's students, faculty and staff to contribute ideas on the best ways to invest in energy and sustainability projects. The Green Revolving Fund financially support projects that promote energy efficiency, renewable energy, water conservation, waste reduction and other sustainability initiatives with a demonstrated return on investment.

Second Nature Climate Commitment

As a signatory member of Second Nature's Climate Commitment, Cal State LA is committed to achieving operational carbon neutrality by 2040, full carbon neutrality by 2045, and to remain carbon neutral in perpetuity thereafter. Cal State LA is also committed to achieving climate resilience, by actively adapting to Los Angeles's changing climate, with the completion of its strategic adaptation priorities by 2040.

Zero Waste

Cal State LA is committed to achieving the zero waste goals of the California State University Sustainability Policy, which are to reduce solid waste disposal by 50% by 2016, reduce solid waste disposal by 80% by 2020, and move to zero waste. In 2016, Cal State LA created the Cal State LA Zero Waste Plan to achieve this goal by maximizing recycling, minimizing waste, and ensuring the purchasing of products that are made to be reused or recycled back into nature or the marketplace.
