

THE POWER OF PAYING IT FORWARD

20X COMPOUNDING EFFECT OF GESA PROGRAM IN CUMULATIVE GHG EMISSION REDUCTIONS

Guaranteed Energy Savings Agreement (GESA) Benefits:

- At worst, GESA provides budget neutral financing of energy and deferred maintenance (DM) projects; at best, it will create energy savings of \$5 million to fund even more DM projects.
- Liberates facilities staff from the headaches of managing many small DM projects each year
- Allows the University to fast-track projects that reduce GHG emissions, and it makes a *huge* difference in the most important metric:

Reducing the total (cumulative) impact of CO₂ dumped into our atmosphere over the next 20 years!

Total Savings: \$21 Million
Net Savings: \$5 Million

How did we spend the \$5 million in net savings? Additional Deferred Maintenance Projects:

• Replace 9 Aging Chillers	\$2,673,273
• Upgrade Central Plant Software	\$48,327
• Replace Window in 3 buildings.....	\$486,653
• Replace Natatorium AHUs	\$201,663
• Install Boiler Plant Water Softener.....	\$94,879
• Provide Additional Building Meters.....	\$254,944
• Rebuild Residence Hall Makeup Air Units.....	\$1,312,030
• Replace Residence Hall E Heat Pump Compressors.....	\$15,234

TOTAL: \$5,086,993

SLIPPERY ROCK UNIVERSITY WILL BE CARBON NEUTRAL BY 2037
