STARS Steering Committee
Association for the Advancement of Sustainability in Higher Education
2401 Walnut Street, Suite 102
Philadelphia, PA 19103

Dear AASHE STARS Committee:

The University of Alabama in Huntsville (UAH) recently utilized AASHE's Sustainability Tracking Assessment and Rating System (STARS) to submit its second comprehensive performance assessment for renewal.

Our new Director of Utilities and Sustainability, Claire Jackson, and Student Sustainability Specialist, Sameera White, coordinated with individuals from multiple departments around campus to gather, compile, and distill the data necessary for this report. I have confidence that the team's submittal represents an accurate account of UAH's current sustainability initiatives.

UAH's commitment to sustainability and the efforts of many stakeholders to bring it to completion is exemplified in this report. We look forward to using this tool to strengthen our current and future sustainability efforts in order to achieve a higher rating.

Sincerely,

Greg L. Smith, CFM, AAE
Assistant Vice President of Facilities & Operations
The University of Alabama in Huntsville
