STARS Steering Committee
Association for the Advancement of Sustainability in Higher Education
2401 Walnut Street Suite 102
Philadelphia, PA 19103

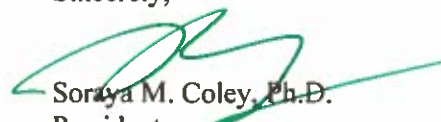

Dear STARS Steering Committee:

I am pleased to forward our latest Association for the Advancement of Sustainability in Higher Education (AASHE) Sustainability Tracking Assessment Rating System (STARS) data report from California State Polytechnic University, Pomona (Cal Poly Pomona). This report was prepared by our Sustainability Office in collaboration with various campus departments.

The data contained in this report reflects our commitment to sustainability. Some of our initiatives include expansion of energy conservation, constructing LEED certified buildings, promoting sustainability research, incorporating sustainability into the broader curriculum, and promoting student outreach programs. We are encouraged by the increased interest and dedication to sustainable themes by every College at the University.

We understand that sustainability is an ongoing process and will continue to provide reports to reaffirm our commitment. Our campus will remain committed to sustainability and recognizes the important role that teaching, research, planning, operations, governance, and engagement play in advancing sustainability more broadly in our local and global communities.

Sincerely,

Soraya M. Coley, Ph.D.
President
