Bulletin: High Performance Building Standards			
Effective Date: March 12, 2020			
From: Energy, Sustainability and Transportation			
Item No.: Information			

This CPDC Technical Bulletin supersedes A/E Bulletin 14-037 and is a follow up to the letter dated August 5, 2019 regarding High Performance Building Standards.

CSU's policy has been updated to require all future CSU new construction, remodeling, renovation, and repair projects to be designed with consideration of optimum energy utilization and low life-cycle operating costs and shall exceed all applicable energy codes and regulations (Title 24, Part 6) by ten percent.

This policy and the compliance requirements document developed by CSU's Mechanical Review Board cover the 2016 and 2019 Title 24 Building Energy Efficiency standards. The requirements described are to ensure that each building assembly (building envelope, lighting and HVAC systems) pass the energy efficiency standard on their own merits.

The compliance requirements document is provided to inform design teams of the modelling necessary to demonstrate compliance with this policy.
