Application & Cloud to Cloud Backups	Yes	Yes
Central Portal & Email Notifications	Yes	Yes

All Platforms & Devices Covered

Backup your Servers, Desktops, Laptops and Mobiles across Windows, Mac, Linux, iOS and Android operating systems.

Backup Features

Files

Folders

Hyper-V

VMware

MS SQL

Image Snapshot

Network Devices

MySQL

Microsoft 365

Google Workspace

MS Sharepoint

MS Exchange

MongoDB

OracleDB

Docker

Dropbox

Kubernetes

Box

Other Key Features

Remote Management
Take control of your devices remotely via the web portal to adjust schedules, backups, policies and much more.

Mass Deployment
Use configured scripts to mass deploy the software and apps to thousands of devices quickly and efficiently.

Ransomware Protection
Set your own version/generation limit meaning you can go back to any point in time to restore data.

Cyber Security

- Deployment of WAF Shield
- Implementation of Remote Antivirus Scans
- Antimalware protection and alerts
- Scan Schedules
- Key Files Protection
- Modification of Endpoints
- Device Dashboard
- URL Filtering
- Protection of Key Files using HSM
- Real Time Protection
- Use of Clam AV scanner based REST APIs

Admin & User Mobile Apps

All Admins have a separate mobile app which replicates the master web portal. From this app admins can create users, add backup sets, evoke Disaster Recovery and do much more. There is also an app for each User which allows them to view their account and manage any backups.

Security & Compliance

Our solution is built on the latest coding, security, and compliance protocols, so rest assured your data is securely stored with no 3rd party access.
