WHAT DOES KORDSPACE DO?

Kordspace is a **Web Application Development Agency,** and **Kollaborative Workplace, Tech Accelerator Group,** that partners with **Students, Entrepreneurs, Leaders, and Investors,** by designing and implementing the ideal application to help **scale your unique idea.**

Our **collective** is built upon a **decentralized membership model** which grants **freedom and creativity** centered around the cutting edge technologies of our future. We focus on applying **exponential technologies** to all aspects of **operations.**

ORIGIN, MISSION & APPROACH

"My phone battery is almost dead. Can I get some **Kordspace,** here?"

Our team and partners look back **4 years ago** when this business first began and it was all about making websites **affordable for business owners.** We are **committed** to that cause everyday, and excited to usher in the **New Era of Internet** (and all that is possible with **chips**).

Our approach is to start with your **neighborhood** and **expand to new cities**, spreading our **message of accessibility and feasibility** for web tech projects that **help scale supply chains in the heart of america.**

OUR PARTNERS & SPONSORS

Google

SADA systems

pondata

FLASHRATE

LTR
Load to Ride Transportation & Logistics

MAGIC

BEAM

OUR PILLARS OF DEVELOPMENT: DESIGN, CODE, TEST

1. PROJECT DISCOVERY

Our **initial conversations** help us learn about your idea so we can decide how to **architect** the solution using **modern app frameworks**. **Get away from** the **LAMP Stack** and go **3.0!**

2. DESIGN & CONCEPTING

We have a passionate **design team** and very creative **interface developers**. Our **user flows** are designed to be **intuitive** for those that wish to **wield the power of exponential tech!**

4. TESTING & TRAINING

After we have finished developing the **turnkey app solution** you desire to **supplement** your **current app ecosystem**, we dispense videos for staff to receive **training on the new systems.**

3. CODE & DEVELOPMENT

We use **JavaScript & Python** for most things. This is accented by our **open source stack of proprietary code** that we develop continuously in our **data lake.** From here we **version** our commits in **GitLab**.

TECH STACK, DEVOPS & GOOGLE CLOUD

Express

We know the most desirable stack is **MonogDB, Express, React, & Node (MERN).** Easily **migrate** your infrastructure with **SADA Systems** to modern **Kubernetes, Kafka, Spark** to run persistent **Hybrid Web applications** like **Netflix, Lyft, Google, LinkedIn, & Instagram.**

We love **Google Firebase** managed services **(FERN),** for us the ideal stack takes advantage of the **G Suite's Business Systems** to run marketing on a **native level** with **Google's** assistive app cluster. **Upgrade from Microsoft** and go **3.0!**

KORDSPACE GOOGLE PHEONIX PACKAGE

Ever wish you could just update your applications with everything that's in your **Spreadsheets**? You can now do that, with our **CMS**, send **live updates** to your app from your **copywriting team** instantly without refreshing the pages.

We take care of staging your environment inside **Google Cloud Platform (GCP).**

With the **Pheonix CMS in Google Sheets**, we also include basic **Google Analytics.** This is a great way to kickstart your business into **Web 3.0 Modern App Development.**

KORDSPACE GOOGLE INSIGHT PACKAGE

GDPR COMPLIANT

Google

facebook

Kordspace offers **JavaScript & Google Tag Manager** automation for carving **user experiences** in **tag tracking** between **Facebook Pixel Ads, LinkedIn, & Google Ads** as well as filtering **Google Dash Metrics.**

We are **GDPR compliant** & ensure your business purchases demographic isolated influencer advertising to maximize your profitability up to **3 times** greater return than regular digital advertising.

Kordspace also does targeted **business intelligence research** for lead lists with targeted demographics towards key issues of interest. This includes cross referencing our **private databases** against **public records.**

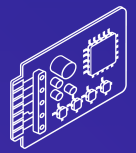
KORDSPACE GOOGLE ATTRACT PACKAGE

By utilizing **Twilio & SendGrid,** we can **Python & JavaScipt** your customer directories. Connect with your larger teams on massive **Zoom / Hangouts** conferences pushed through **SMS,** scheduled regularly each work week.

Our attractive automation persistently engages users with one another.

We partner all attract packages into the platform of your choice. Whether that be **WordPress, Shopify, Lead Pages, Hubspot, Web Flows, or Wix!**

EQUIPMENT & HARDWARE OFFERINGS



FLASHRATE

We have hardware partnerships with manufacturers based in Taiwan and Singapore for engineering lower cost bulk hardware for scaled operations. We can engineer **RAM, ASICS, Raspberry Pi's, Receivers, Transmitters, Bluetooth, Sensors, & Robotics Hardware**, direct from our partnered source. Our hardware is affordable and of superior quality. Our researchers can offer more effective solutions based on decades of **silicon chip engineering** experience. Ask us about an introduction!

OUR TEAM & TALENTED CONTRACTOR NETWORK

Marco Lopes
Chief Executive Officer **(CEO)**

Vatt Saycocie
Chief Technology Officer **(CTO)**

Matt Cahn
Blockchain Platform Engineer **(BPE)**

Katie Dawe
Digital Media Creative *Director* **(MCD)**

Chris Thobaben

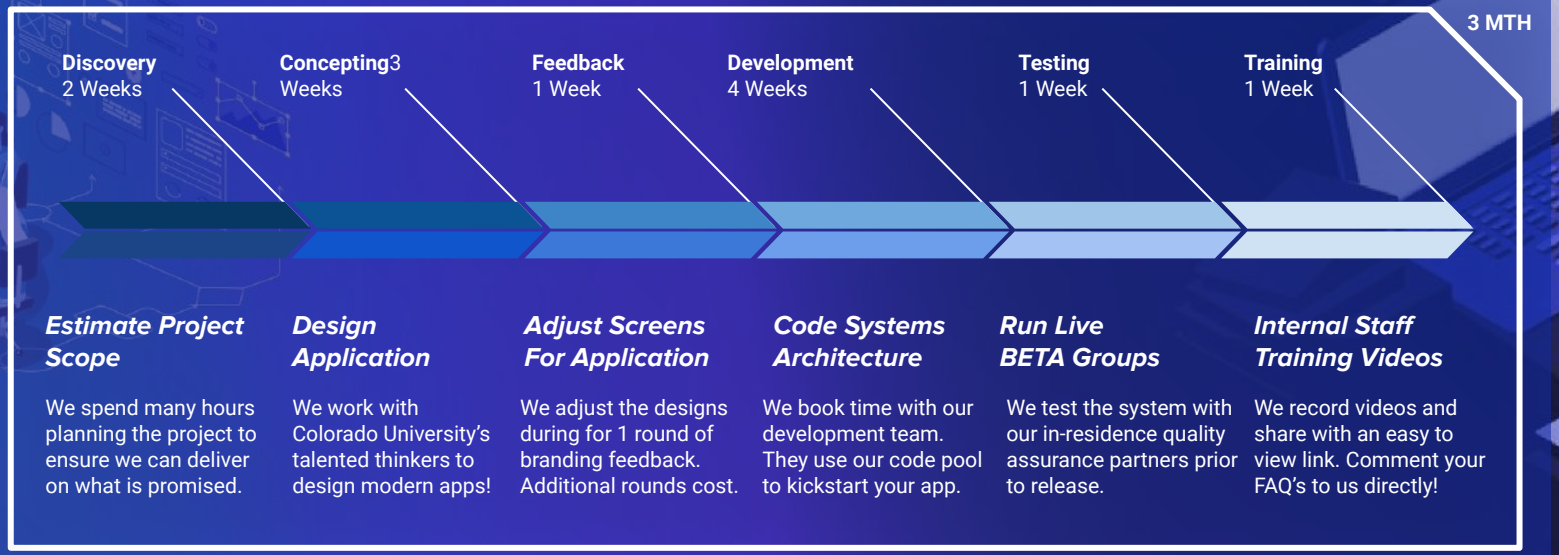
Abe Abushmais
(CMO) *Chief Marketing Officer*

Jennifer Rygh
(CBD) *Chief Business Development*

Emily Shelton
(GDE) *Geospatial Database Engineer*

AVERAGE PROJECT IMPLEMENTATION TIMELINE



Estimate Project Scope

We spend many hours planning the project to ensure we can deliver on what is promised.

Design Application

We work with Colorado University's talented thinkers to design modern apps!

Adjust Screens For Application

We adjust the designs during for 1 round of branding feedback. Additional rounds cost.

Code Systems Architecture

We book time with our development team. They use our code pool to kickstart your app.

Run Live BETA Groups

We test the system with our in-residence quality assurance partners prior to release.

Internal Staff Training Videos

We record videos and share with an easy to view link. Comment your FAQ's to us directly!

KOLLABORATIVE DESIGN HEADQUARTERS

Our collaborative workspace in **Denver, CO** opening **June 15th, 2019** will be a gathering place for **design students, development communities, and business owners** to get sound advice on how to scale their ideas and passions into **exponential technologies.**

We are located down the block from **Westminster Station & Federal Blvd!** Our goal is to service **supply chain partners** across the USA! We see opportunity for **freight and logistics** businesses to invest in **AI, Blockchain, Machine Learning, VR/AR** workrooms, and flex our creative muscles at 3D interface design.

Kordspace Kollaborative will host meetups for the public, to connect instantly with **innovative thinkers** that **accelerate** business statewide!

OUR PORTFOLIO OF WORK

Over the last **8 years**, **Marco Lopes, CX Designer** has produced a collection of **template designs, grids, and feedback** from **CEOs** and **Entrepreneurs** across **all industries**, learning about what makes the most **intuitive UI**. Partnered **Developer, Justin Oberg,** has assisted extensively in **tech stack management** and **development.** Special thanks for all our successes!

"The key to unlocking exponential technologies for all lies within the user interface."

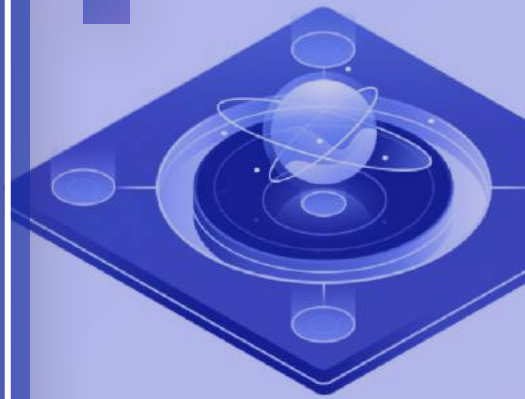
- Peter H. Diamandis

DEMO PROPOSAL

WEB PORTFOLIO

XYO NETWORK: BLOCKCHAIN IOT

Power Your Distribution With Reliable Blockchain Hardware!



"By partnering **App Development** with **Kordspace & Pondata**, we have experienced **new revenue streams** in **data collection** and **verification** via the **hardware and sensor** market. **XYO and other manufacturers** have sent us **hardware to test** & demo on our trucks and we have elevated our business into **freight tech!**"

- Load To Ride

PONDATA: SCRIPTING & APP DEVELOPMENT

Benefit From Process Scripting & Staff Workflow Automation!

pondata

"Pondata is a **big data infrastructure consulting agency** focused on providing modular, **automated education & service platform solutions** for regional and international commerce. Over the past 5 years, the founders have worked on big data systems at **DiscoverOrg**, **Google**, and **SAP**.

They use the **power of technology** to **increase efficiency** across every department, while helping people **reach international audiences** by connecting businesses with their **network of partners."**

- Foundation For Purposeful Organizations

MAGIC: DIGITAL MARKETING AUTOMATION

Experience Strong Retention
And Customer Sales Growth!

MAGIC

"**Magic** set up **Social Media** and **Google Advertising** for our **6 eCommerce** businesses. The ads they created were animated and eye-catching! The team developed the identity of our business as well as enhanced our library of imagery surrounding **the brand.**

They did **A/B Conversion Testing** and **Analytics,** many of our old customers **engaged** with us during the time our ads were running. We also **tripled the number** of original contacts we had."

- Hydros Life

VECHAIN: BLOCKCHAIN SMART CONTRACTS

Automate Value Transfer With Your Network In Supply Chain!

Vechain

"Vechain is a **leading global enterprise level public blockchain platform.** They aim to connect **blockchain technology** to the real world by providing a comprehensive governance structure, a robust economic model as well as **advanced IoT integration** and **real world applications.**

The main token is **VET**. The gas token is called **VeThor (VTHO)**. **VeThor** is the energy that powers the **VeChainThor** network and is **used to pay for all transactions**. **VTHO** is **generated by holding VET** in a qualifying wallet. You may also **buy VTHO** on OceanEx."
- VeChain Docs
