

# Sherman Alternate Care Facility

**CONTRIBUTORS:**

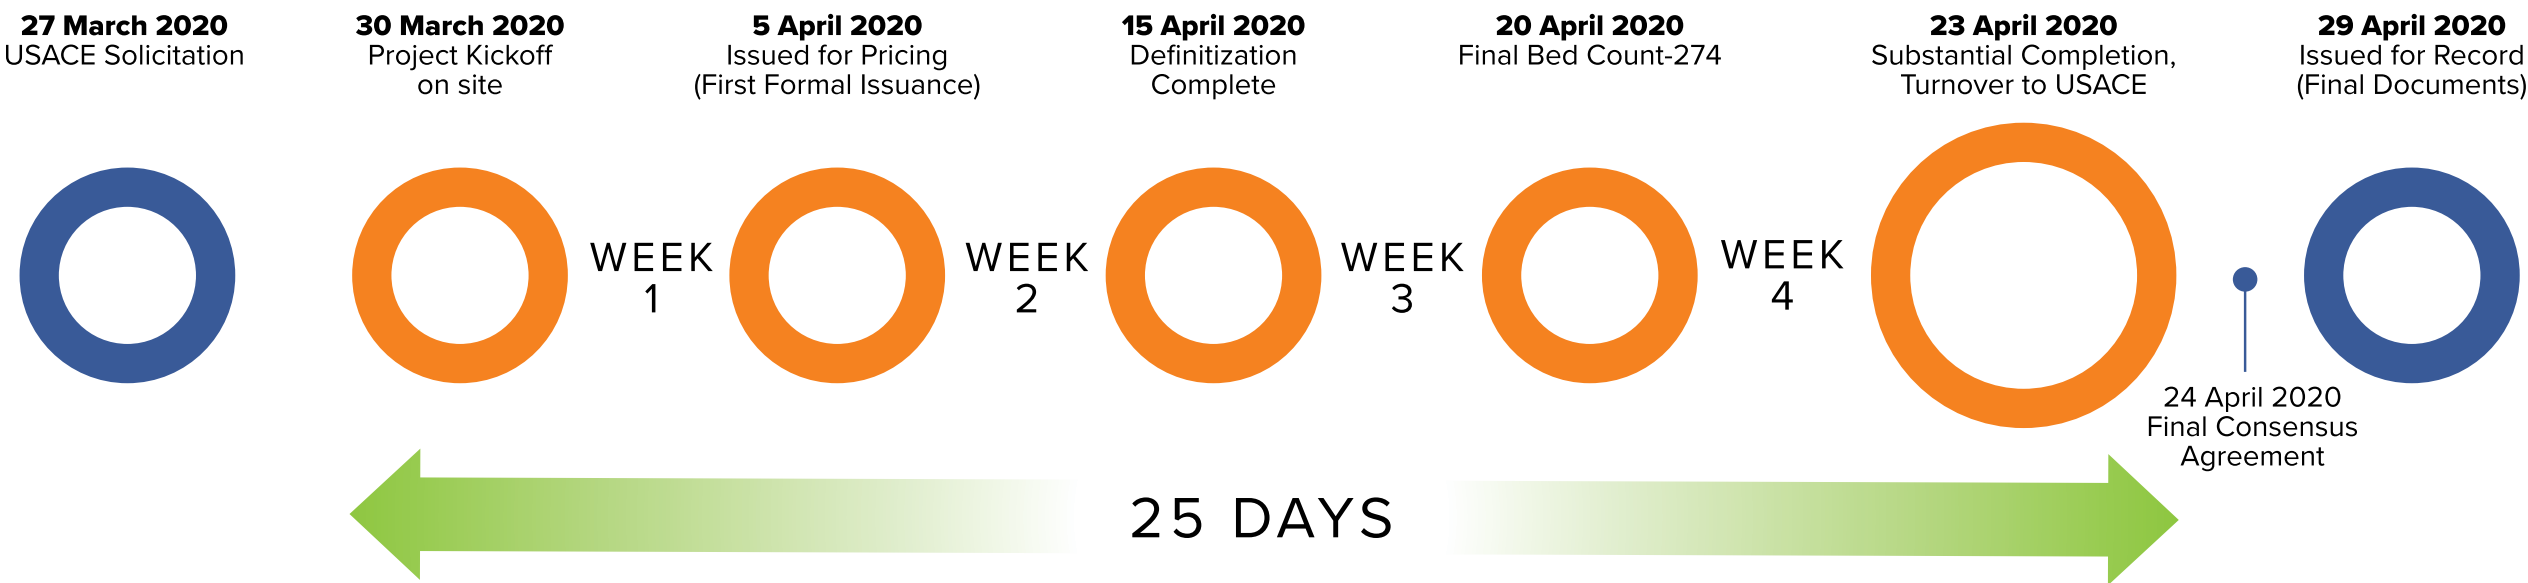

U.S Army Core of Engineers, Turner Construction Company, Perkins+Will

**LOCATION:**

Elgin, IL

**PROJECT TIMELINE:**

**DESCRIPTION:**

An extraordinarily ambitious project that hit all of the goals they set out and then some, the United States Army Corps of Engineers – Sherman Alternate Care Facility project was completed in April 2020, during the height of the COVID-19 pandemic. This 274-bed, 100,000 GSF healthcare renovation was completed in just 25 days thanks to Lean thinking. A building that was essentially unusable for a decade due to disrepair is now a thriving ACF.

**LEAN CONCEPT OR TOOL UTILIZED:**

Visual Management, Lean Leadership, Respect for People
