DMV recognizes City of Radford for zero traffic fatalities in 2020

RICHMOND - The Department of Motor Vehicles (DMV) has recognized several jurisdictions across Virginia that achieved zero traffic deaths in 2019 and/or 2020. The City of Radford made the list

Virginia is an active participant in the national "Toward Zero Deaths" initiative, which brings together engineering, enforcement, education, and emergency medical services professionals to work toward a goal of eliminating all traffic fatalities. The adoption and implementation of the Toward

Zero Deaths vision by many highway safety offices across America demonstrates a unified commitment to the effort to transform traffic safety culture.

The unified approach in Virginia also includes Governor Ralph Northam's Executive Leadership Team on Highway Safety, a significant increase in highway safety funding, and a transition to more effective systemic improvements," said Virginia Secretary of Transportation Shannon Valentine. With our commitment and the dedication of communities across

the commonwealth, I believe this milestone is and will continue to be achievable."

In an effort to change public perception that traffic fatalities are unavoidable, DMV annually recognizes jurisdictions that achieved zero traffic fatalities. This year, jurisdictions achieving this status in 2019 are also included since the pandemic preempted last year's

"These jurisdictions have shown us that zero is not impossible, and I am proud to recognize them for their dedication to traffic safety,"

said DMV Commissioner Richard D. Holcomb, the governor's Highway Safety Representative.

The jurisdictions that achieved zero deaths in 2019 only are Alleghany County and the cities of Covington, Harrisonburg and Staunton. The jurisdictions that achieved zero traffic deaths in 2020 only are Highland County and the cities of Colonial Heights, Emporia, Galax, Radford, Salem, and Waynesboro.

The following jurisdictions achieved zero traffic deaths in both 2019 and 2020: Craig County

and the cities of Buena Vista, Falls Church, Franklin, Hopewell, Lexington, Manassas Park, Norton, and Winchester.

The jurisdictions that have achieved zero traffic deaths for at least five consecutive years are the cities of Buena Vista, Falls Church, Hopewell, Lexington, Manassas Park, and Norton. Finally, the City of Buena Vista has achieved zero traffic deaths for 10 consecutive

The Virginia Tech Helmet Ratings have helped protect millions of athletes and reshaped the

Ten years of five-STAR ratings

Stefan Duma has told the story of Lester Karlin's phone call before. One day in 2009, Karlin — then the equipment manager for Virginia Tech Athletics — called him up "and asked what helmets I would recommend that he buy for the football team."

Two years later, Duma's lab published the first independent safety ratings for varsity football helmets. Ten years after that, what became the Virginia Tech Helmet Lab has rated protective headgear for six sports, and more are in the works. The ratings initiated a sea change in how sports equipment is designed and marketed, driving the development of better equipment by shifting the balance of information from companies to consumers.

Duma, the Harry Wyatt Professor of Engineering, had already earned national recognition for his work in injury biomechanics. But he was the one Karlin called for helmet advice that day because, since 2003, the researcher had been working with football team physician Gunnar Brolinson, associate athletics director Mike Goforth, and then-head coach Frank Beamer to study head impacts in college football using a new kind of sensor that could be embedhelmets.

At a time when awareness of concussion was just surfacing as a serious problem in contact sports, these sensors gave researchers the first direct access to quantitative data about the forces players' heads were subjected to on the field. Duma had never evaluated the helmets themselves, though, and wasn't sure what to tell Karlin.

But he was curious. So he went out and bought every model of varsity football helmet on the market and carted them back to the basement lab, then mostly devoted to Duma's auto safety research. Much of the floor space was occupied by a sled designed to simulate car crashes, but Duma and his team carved out space along the back wall for a drop tower that could reproduce football-style impacts with a dummy headform that plummeted like the blade of a guillotine down cables onto an anvil. Sensors hidden inside the head's rubbery blue casing recorded the hit.

Using the thousands of impacts they'd recorded on the field, Duma and a team of graduate students — led by

News Brief: Christiansburg man identified as New River victim

Pulaski County authorities say a body found in the New River by two fishermen earlier this week is that of 45-year-old Vance Austin Eubank of Christiansburg.

He was identified after the sheriff's department released a sketch of the man and several of his tattoos. Foul play is not suspected, and the investigation is still ongoing at this time. Anyone with information should call 980-7800.

The body was discovered on Aug. 29 in the area of Viscoe Road. The Pulaski County Sheriff's Department and the Radford City Police and Radford City Fire departments responded to a call.

Christiansburg man convicted of murder denied parole; board cites reason for refusing Stephen Epperly's petition

The Virginia Parole Board announced Monday the denial of parole for 72-year-old William Michael Knowles, who is serving life plus 81 years.

Knowles was convicted in 1996 of first-degree murder, robbery and attempted aggravated murder of his daughter.

The board's decision stated: "Release at this time would diminish the seriousness of the crime" and concluded he should serve "more of his sentence."

Knowles told the Montgomery County court he talked with angels who said for him to kill his wife, Angie. At the time, his attorneys argued he was mentally ill and should be convicted of a lesser charge. A circuit court jury didn't agree.

On the day of his sentencing, Knowles tried to cut his own throat with a disposable razor he had slipped into the courtroom. Deputies were able to take the razor from him before he was able to do any damage. He later tried a similar incident with a

Details about the shooting were played out over a three-day trial. His daughter attempted to block the shotgun blast during the initial incident and suffered a gunshot wound.

Knowles had traveled out of the country and spent time in Israel sending handwritten letters to the editor of several local

Knowles testified that he had a religious conversion at age 16 and had conversed with angels at times since then. It was an angel, according to Knowles, that told him to make the Middle East trip. When he returned, he discovered his wife and children had moved out of his Christiansburg home.

Following the incident, Knowles even wrote a letter to then-newspaper columnist Ann Landers admitting to the killing. He later filed a suit against the columnist in federal court, saying she changed his words in the

The former postal worker had pleaded not guilty but admitted to police that he shot his wife, Angela, because he loved her and couldn't let her go. He wrote to Landers from the Montgomery County Jail where he was awaiting trial.

In his letter, Knowles said he believed his wife was having an affair with a man she met online but claimed that by publishing his letter, Landers slandered and condemned him without a jury. He sued for nearly \$100 million, but the suit was thrown out.

In her response published below the letter, Landers took Knowles to task for his assertion that the Internet led to the

NRCC welcomes new board members, elects officers

New River Community College recently welcomed Eric Johnsen of Blacksburg and Tosha Mosier of Radford to its college board, and the board elected new officers.

Bill Cunningham of Pulaski County was appointed to serve as chair, and James "Jim" Wheeler of Giles County was reappointed to serve as vice chair. NRCC President Pat Huber will continue to serve as secretary.

Johnsen is the owner of Eric Johnsen State Farm Agency in Christiansburg and is also an adjunct instructor in the finance department at Virginia Tech. He is a graduate of Virginia Tech. He and his wife, Dr. Jennifer Johnsen, and their two children live in Blacksburg.

Mosier is a supervisor at the medical transportation company Medical Transportation Management (MTM). She is

a graduate of Radford University. She and her husband, Jermere Mosier, and their three children live in Radford.

Other current board members are Christopher Calfee, Craig Chancellor, Richard Chidester, Dr. Margaret Dewald-Link, Jessica Littlejohn, Cameron Peel, Bobbie Potter, and Jonathan Sweet.

Each of Virginia's 23 community colleges has a local college board, the purpose of which is to keep the community college responsive to the needs of its service area. Local college boards are not governing boards, but advisory boards and typically meet quarterly. These boards also monitor

college programs, policies, and actions to ensure that they are within statewide policies. Local board members also serve as advocates for the college throughout its service region and assist the college in fundraising efforts.

Board members serve a four-year term and may continue for two consecutive terms. Each local political subdivision sponsoring the college appoints board members to serve in this capacity.

Carilion NRV offering monoclonal antibody treatments to combat COVID-19

Carilion NRV is now offering monoclonal antibody treatments to help reduce local hospitalizations due to COVID-19. "Monoclonal antibodies are ther-

apeutics that have been developed to respond to different parts of your body's defense system or foreign invaders like the coronavirus," said Dorothy Garner, M.D., interim chief of Infectious Diseases.

"The COVID-19 monoclonal antibody treatment is an infusion given by IV over 30 minutes. The monoclonal antibodies bind to the spike proteins on the coronavirus surface so it cannot bind to your cells, and your body can clear the virus more

rapidly," said Garner. According to Carilion, the treatment reduces the likelihood of hos-

pitalization from COVID-19 by

70 to 85 percent if used in eligible

patients early in the course of their

infection. Anyone with risk factors for acute illness from COVID-19 is Given the current increase in CO-

VID-19 community spread, demand for this treatment is high. Carilion teams are working to increase staffing and access to infusions. Other area providers including LewisGale, The Salem VA, and Sovah Health also offer monoclonal antibody infusion services. As is the case for all health care providers, patients must receive a referral from their primary care provider for the treatment. The treatments are available now

in Roanoke and the New River Valley. Referral is required. If patients feel they are eligible, they should talk to their primary care physician. Those without a primary care doctor can call Carilion Direct (800-765-3506 or 540-981-7000) for more information.

is one of two new board members for New River **Community College.**

Tosha Mosier, a Radford University graduate, is a supervisor at the medical transportation company **Medical Transportation who** lives in Radford.

Warm Hearth Village names new director of nursing for **Showalter Center**

nursing for the Showalter Center, the assisted living residence at Warm Hearth Village.

Licensed practical nurse (LPN) Anik Tegegnework has been chosen as the new Director of Nursing for Showalter Center, the assisted living residence at the Warm Hearth Village. She will fill the position vacated by Amanda Cruise, who was promoted within the organization.

Tegegnework has been a member of the Showalter team since November 2006. She started as a certified nursing assistant on night shift and continued for two years while attending New River Community College in the LPN program. She graduated in 2008.

"I cried the first time

I got my paycheck as an LPN," she said. "I could not believe I got paid doing what I loved to do the most. Nursing is my passion and I love taking care of our residents. We see them as our grandparents or parents and treat them as part of our big Warm Hearth family."

Tegegnework lives in Blacksburg and in her free time she enjoys going to the gym and working

Warm Hearth Village is a nonprofit senior living community in Blacksburg that provides a full continuum of living options on its campus and in the

Pictured left to right at the Space Foundation's 36th symposium are Capt. Frank L. Culbertson, Jr., USN (Ret.), former NASA astronaut; Carol W. Caroll, Deputy Center Director, NASA Ames Research Center; Dr. John Olver, President and CEO of Blacksburg's Emisshield, Inc.; and Rear Admiral Tom Zelibor, Space Foundation CEO.

Blacksburg business CEO inducted into Space Technology Hall of Fame

Dr. John Olver, President and CEO of Emisshield, Inc., and a Virginia Tech graduate, was inducted into the Space Technology Hall of Fame in a recent ceremony in Colorado Springs, Colo.

Paul Fisher, founder of Fisher Space Pens was inducted posthumously into the hall of fame. His son, Carey Fisher, president and CEO of Fisher Space Pens, accepted the award on his behalf.

In addition, Emisshield, Inc., and NASA Ames Research Center Entry Systems and Technology Division received the Space Foundation's Organization Award. Carol W. Carroll, deputy director for Ames and a graduate of Virginia Tech, accepted the award on behalf of Ames.

Emisshield manufactures and sells

heat protective coatings throughout the world. The technology behind the coating was invented at NASA's Ames Research Center in the early 1990s as a protective coating for use on spacecraft and was licensed to Emisshield, Inc. in 1996. Both Emisshield, Inc., and Fisher Space Pens met the Space Foundation's judging criteria, "adapting space technologies into commercial products that improve our quality of life on Earth."

In recognizing the new honorees, Space Foundation CEO Tom Zelibor, said, "This year's inductees truly represent the spirit of the Space Technology Hall of Fame. Both produce products that had their beginnings in space exploration and are now found in homes, businesses, and communities around the world. Congratulations to these visionary leaders who had the foresight to develop and market these tools so we can utilize them on earth."

Upon acceptance, Dr. Olver said, "This is a prestigious award, and I am honored to have received it."

Space Foundation, a nonprofit advocate organization founded in 1983 for the global space ecosystem, began the Space Technology Hall of Fame in 1988. It recognizes the life-changing technologies emerging from global space programs, honors the scientists, engineers, and innovators responsible, and communicates to the public the importance of these technologies as a return on investment in space exploration.

Epperly from page 1

"While the Internet may increase opportunities for an affair, the danger to your wife came from you, not the computer," she said. "Blaming

the Internet is a cop-out. You killed your wife because she left you."

Dr. Carl McGraw, a clinical psychologist with the Virginia Highlands Health Association, testified in the trial that Knowles suffered from paranoid schizophrenia.

In a separate matter, the Virginia Parole Board announced its reasoning for denying parole for Stephen Epperly of Radford. It was the same as that in the Knowles case: "Release at this time would diminish the seriousness of the crime."

Epperly was sentenced to life in prison after being convicted in the death and disappearance of then-Radford University coed Gina Hall.

"Service Beyond Expectations"

UPCOMING EVENTS

Saturday, Sept. 4:

PAWS to Read - Dog Edition

At the Blacksburg Library at noon. Come read to Derek the therapy dog. Registration is required.

Saturday, Sept. 4 - Monday, Sept. 6:

Radford Public Library Closed

RPL will be closed in observance of Labor Day on Friday, Saturday, and Sunday, Sept. 4 - 6

Sunday, Sept. 5:

Local chorus to perform at Blacksburg Farmers Market

A local chorus, Blue Ridge Vocal Connection, based in Blacksburg, will perform a free concert titled "Magical Movie Music" at the Blacksburg Farmers Market at 4 p.m.

Monday, Sept. 6:

Montgomery-Floyd Regional Libraries closed All MFRL Libraries will be closed in observance of Labor Day. Also, the libraries will be open on Sundays beginning Sun., Sept. 12.

Town of Blacksburg Administrative Offices Closed

All Town of Blacksburg administrative offices will be closed for the Labor Day holiday. The Blacksburg Community Center will also be closed. The Blacksburg Aquatic Center will be open from 7 a.m. until 5 p.m. Refuse and recycling pickup in the SE quadrant will be on Wed., Sept. 8. Blacksburg Transit will be operating on an intermediate service schedule.

Tuesday, Sept. 7:

Department of Motor Vehicles Connect

At the Jessie Peterman Memorial Library at 10 a.m. DMV will be at the library providing most of its services. By appointment only. To make an appointment, visit www. DMVNOW.com.

Rent Relief Workshop Virginia's Rent Relief Program can provide funds to assist in paying rent, late fees, and other leaserelated costs back to April 2020 for those impacted by COVID-19. Learn about the requirements and get help completing online applications; from 5:30 to 7:30 p.m. at the Christiansburg Montgomery Floyd Regional Library. The workshop is presented by Laurie Sallee, Rent Relief Program Application Manager at Southwest Virginia Legal Aid Society. Register by calling the library or filling out the form online. Space is limited to 10 attendees who should bring a signed, current lease agreement.

Wednesday, Sept. 8:

Rent Relief Workshop Virginia's Rent Relief Program (see details above); from 5:30 to 7:30 p.m. at the Blacksburg Montgomery Floyd Regional Library. Register by calling the library (540-552-8246) or filling out the form online. Space is limited to 10 attendees who should bring a signed,

current lease agreement. Brown Bag Book Club

At the Radford Public Library at noon and at 6 p.m., the Brown Bag Book Club will discuss Kate Moore's "Radium Girls." In keeping with the theme, refreshments will be homemade vanilla cupcakes with glow-in-thedark buttercream frosting. Looking ahead, in October and in keeping with Halloween, the club will discuss Mary Shelley's horror classic, "Frankenstein."

Loops Group with New River Art & Fiber

At 2 p.m., New River Art & Fiber is joining the Blacksburg Library in hosting a weekly loops group. Participants are invited to bring their fiber arts projects. The group will meet every Wednes-

STEM Club: pH Test At the Blacksburg Library at 4:30 p.m. The club will be using cabbage to test the pH of various household liquids. All materials will be provided. Email mroach@mfrl.org

for more information.

Thursday, Sept. 9:

Talking About Books

At the Meadowbrook Public Library at 11 a.m. To be discussed is "Caste" by Isabel Wilkerson. Call the library at 268-1964 to reserve a copy.

Family READS At the Blacksburg Library; at 5:30 p.m. Family READS is an English learning program families. Parents will learn and practice English and learn how to read with their children. Children ages 3-8 will do fun education activities. Families will be provided a free Pre-registration is required. The program runs for seven sessions. To register, contact 540-382-7262, or email Anne Abbott at aabbott@lvnrv.org.

Friday, **Sept. 10:**

Virginia Tech Corps' Cannon to fire

The Virginia Tech Corps of Cadets will hold a formal retreat ceremony at 4:45 p.m. Friday, Sept. 10, on Upper Quad to honor returning alumni. The Color Guard will lower the flag, and the regimental band, the Highty-Tighties, will play. Skipper, the corps cannon, will fire once.

Saturday, **Sept. 11:**

Long Way Brewing Benefit for Radford's First Responders

Ōn Sept. 11, 2001, America watched as firefighters, police officers and rescue workers ran INTO the flames, smoke, and destruction. The bravery exhibited that fateful day by all first responders was a shining example of selflessness that helped us heal, gave us hope, and fortified our nation's re-

This Sept. 11 is First Responders Day and marks the 20th anniversary of the great sacrifice made by those who took an oath to serve and protect.

Long Way Brewing is honored to hold its first annual benefit for Radford's First Responders. On Saturday, Sept. 11, Long Way Brewing will make a donation to the Radford City Fire and Police departments. Several events are planned to mark the remembrance. Long Way Brewing invites everyone to come together, raise a pint, and salute our First Responders, those who served and those who

continue to keep us safe.

NRV Regional Household Hazardous Waste Collection & Document Shredding Residents served by

the New River Resource Authority are invited to participate in the region's Household Hazardous Waste Collection and Document Shredding Event. Residents interested in this event will need to call the New River Resource Authority at 540-674-1677 to schedule an appointment. The event will be held at 7100 Cloyd's Mountain Road, Dublin, Va.; from 9 a.m. until 2 p.m. No commercial waste or commercial vehicles will be accepted.

Tuesday, **Sept. 14:**

The Sons of Confederate Veterans meeting

The Sons of Confederate Veterans, Stuart Horse Artillery Camp 1784 will meet at 7 p.m. at Aly's Family Italian Restaurant on 3204 Riner Road. Members of the United Daughters of the Confederacy (UDC) are invited to attend this meeting. For further information, call 320-4315 or 239-9864.

Radford City Police Department Civilian Response and Casualty Thursday, Care course

The Radford City Police Department is offering a free course to the public designed to present life-saving skills. This in-person course of Civilian Response and Casualty Care (CRCC) provides a coordinated effort through a 'whole community approach' to establish stakeholders within the community to empower citizens to become 'Immediate Responders' who do what they can, where they are, with what they have to work with until first responders arrive. Participants can sign up for the course at www.radford. va.us with the choice or a morning session (8 a.m. Through until noon) or an afternoon session (1 p.m. until 5 p.m.)

Wednesday, **Sept. 15:**

Virginia Tech Women's Club Annual Wel-

come Reception The Virginia Tech Women's Club (VTWC) will host its annual welcome reception at The Holtzman Alumni Center from 4 to 5:30 p.m. Please wear a mask. Honorary president Dr. Laura Sands, and club president Dr. Debra Call will host the event, which includes refreshments. The reception is free and is open to the

All women who are interested in supporting women at VT by awarding scholarships, serving the community, enjoying a multitude of interest groups, traveling to local sights, and listening to engaging community speakers are invited to attend the reception. For more information, or to join the Virginia Tech Women's Club, contact VTWC65@gmail.com.

Loops Group with New River Art & Fiber

At 2 p.m., New River Art & Fiber is joining the Blacksburg Library in hosting a weekly loops group. Participants are invited to bring their fiber arts projects. The group will meet every Wednesday.

Sunday, Sept. 19; Sunday, Sept. 26

Fall Forum: Building Economic Justice in Our Community

All are invited to learn about economic justice issues facing members of our local community during a two-part series sponsored by Blacksburg United Methodist Church's Church and Society Committee.

On Sept. 19: Join a panel discussion with representatives from local organizations about the underlying issues that take home. cause people in our community to need economic assistance. Participating organizations include the Community Health Center, Habitat for Humanity, Montgomery County Emergency Assistance Program, and Montgomery County Public

Sept. 26: Continue the discussion with a focus on ways to take action.

Participants will gather in person in the Whisner Building at the Church Street campus at BUMC (masks and social distancing required), 111 Church St., Blacksburg, from 6:30 to 8:00 p.m both evenings. A Zoom option is available by request. Contact Tindal Snider at tindalsnider@ yahoo.com for more information.

Sept. 23:

What Isn't Remembered

At the Radford Public Library from 7 to 8 p.m. Kristina Gorcheva-Newberry, winner of the 2021 Raz/Shumaker Prairie Schooner Book Prize in Fiction, is a Russian-Armerian emigre, who moved to the U.S. in 1995 after witnessing perestroika and the collapse of the Soviet Empire. She graduated from both Radford and Hollins Universities. She has published over 50 stories and received eight Pushcart nominations.

September:

Blacksburg's Market Square Jam 2021

Market Blacksburg's Square Jam 2021 continues each Wednesday through September from 7 to 9 p.m. at Market Square Park.

COVID update: Health director says COVID-19 cases may peak in region soon

continue to spread throughout the New River Health District as a result of the delta variant. But they may have hit a peak, said Noelle Bissell, the district's health director.

During a recent meeting with news media, Bissell said she expects that cases soon will decline as has happened in some other parts of the country with surging infections.

Late in August, there were about 180 positive COVID-19 cases in the health district, according to district reports.

Also, during the week of Aug. 22 - 29, there were

47 COVID-19 cases in the district's K-12 schools, out of about 20,000 students total. Montgomery County schools had the most cases at 15.

There is not a magic threshold for deciding when to close public schools due to an outbreak, Bissell said. The district looks at various situations differently, such as if there was in-school transmission of the infection and if students or staff were infected. With the cases that we're

seeing, there is nothing that has started to suggest to us that we would need to work with any of our schools to shut down at all," she said.

As of Aug. 30, there were 42 people hospitalized with COVID-19 in the region. Still, hospitalizations are not likely to decrease even if cases decline, Bissell said. That's because there typically is a lag between the time that people test positive for the coronavirus and the time that they enter the hospital. Currently, less than 50

percent of the New River Health District is fully vaccinated for COVID-19.

"We still have a significant portion of our population that is at risk," Bissell said. 'The best way to get out of this is for everyone who is eligible to go ahead and get vaccinated and for everybody to be vigilant with those public health precautions that layer mitigation."

The health district has seen an increase in people who are interested in receiving a vaccine since last week's approval of the Pfizer vaccine by the Federal Drug Administration, the district director told the media. The district also is working with health care providers to offer third vaccine doses to individuals who are

immunocompromised, Bissell said.

general, Bissell In

encouraged everyone to wear a mask when they are indoors. She referred to this idea as

smart masking.

Even so, "we don't want to get into the blaming and shaming of people who are not masking," Bissell said. "People need to do what works for them and their family. We need to get past the judgment. It really is us collectively versus

Virginia Department of Health: COVID-19 testing is readily available

Va. -- The Virginia Department of Health (VDH) reminds everyone that many locations are available

Michael Showell, Publisher

Ed McMinn, Editor.....

throughout the region and across the western region as for individuals seeking CO-VID-19 testing. Testing demand has recently increased

across the Commonwealth cases of COVID-19 are rising due to the more contagious Delta variant.

While vaccination is the most effective strategy to protect individuals, families and communities, testing remains an important tool to help identify individuals with illness, protect those around them, and monitor trends in COVID-19 infec-

"It's critical that we reserve our hospital emergency rooms and rescue squads for medical emergencies, so if you're seeking a COVID test and it is not an emergency, please utilize other testing locations," said Laurie Forlano, deputy director of the VDH Office of Epidemiology. VDH recommends that

the following people be tested for COVID-19: those with symptoms or signs of COVID-19, regardless of vaccination status, those who have had close contact with someone known or suspected to have CO-VID-19, those who participate in activities that are higher risk for COVID-19 exposure (e.g. travel, attending large events where social distancing is not possible, or being in crowded indoor settings), those who have been referred for CO-VID-19 testing by their healthcare provider or the health department, those who plan to travel or who have recently returned from travel with some exceptions for fully vaccinated people, and those who are not fully vaccinated and who plan to visit people at high risk of developing severe CO-VID-19.

Fully vaccinated people should be tested three to five days following a known exposure to someone with suspected or confirmed

People who are not fully vaccinated should be tested immediately after an exposure and again five to seven days following exposure if the first test is negative.

Those who tested positive for COVID-19 within the past three months and recovered do not need to get tested after exposure as long as they do not have symptoms.

VDH has partnered with Walgreens to provide Abbott BinaxNow Rapid antigen testing at no cost at selected locations. Walgreens pharmacy team members will help individuals self-administer their COVID-19 test. Test results will be processed at the pharmacy and provided to patients within 24 hours.

COVID-19 testing is available by appointment to adults and children ages 2 and older who meet screening criteria for testing. An appointment can be made Walgreens.com/CO-VID19Testing. Due to the current surge

in COVID-19 cases, some testing locations may prioritize tests for symptomatic persons or persons with known close contact to a person with COVID-19. For questions about

COVID-19 testing or a list of testing locations, visit the VDH website or call 877-VAX-IN-VA (877-829-4682), Monday through Friday, 8 a.m. to 6

To schedule a vaccination, request a vaccination record, or for more information on COVID-19 vaccines, visit www.vaccinate. virginia.gov. In the New River Health

District, visit www.nrvroadtowellness.com/when-howto-get-tested for additional testing locations.

Ratings from page 1

directs the lab oped a system of impact tests at different forces and angles that reflected how players actually hit their heads. The system, which they called Summation of Tests for the Analysis of Risk — STAR — generated a numerical value that described how effectively each helmet reduced the

pared to wearing no helmet at all. The scores were plotted on a scale from zero to five stars.

"What we were doing was totally different than anything else that was available at the time," Duma said. Since the 1970s, all

football helmets sold in the U.S. have had to clear a pass-fail standard established by the National Operating Committee for Standards on Athletic Equipment (NOCSAE) certifying they could keep forces on a player's head below a threshold associated with catastrophic injuries like skull fractures. But those test results weren't public, and Duma and Rowson's data showed that that simple threshold was obscuring huge variations in performance.

"We were really sur-prised," said Rowson, an associate professor of biomedical engineering and mechanics. "And we realized that no one was putting any of this information out there.'

NOCSAE's standard also didn't address forces below that catastrophic threshold.

Duma and Rowson's

Steve Rowson, who now force on the head, com- rating system was the 1,000 a day. The lab's first to account for these concussion-level forces. When they released their results, Duma said, "It was like a light-switch change in the sport." Colleges collectively ditched their poorly performing helmets (which were a lot of them: about half of varsity squads were playing in a popular helmet that managed only one star) and shelled out for more protective ones.

Once we started talking to parents and coaches, it was obvious that there was an extraordinary demand this information," Duma said. "Helmets are heavily marketed, and people are used to hearing everyone say, 'our helmet's the best.' The independence and the science behind our research really resonated with people." The lab made a point

of not accepting funding from helmet companies, and the researchers, invited all over the country to give talks on the STAR system, donated their speaking fees to buy new helmets for local youth teams.

The ratings are all available publicly, on a website that has racked up more than a million unique visitors at a rate of about

work has been covered in The New York Times, The Washington Post, Sports Illustrated, WIRED, and on hundreds of broadcast channels and ESPN. Major manufacturers use the lab's logo as a point of pride for high-performing products, and a flag football league in Texas mandates headgear that earns at least four stars in the lab's ratings.

Over the next few years, Duma and Rowson hope to extend the ratings to all major helmeted sports; testing is underway for baseball softball, whitewater, and equestrian helmets. The equestrian project, part of a collaboration with the US Equestrian Foundation and the U.S. Hunter Jumper Association, has already attracted more than \$425,000 in private funding.

'When we started we had no idea that helmet research would become as big as it has," Duma said. "We just thought we would help the football team figure out which helmets were better.'

Hundreds of thousands of impacts later, it's safe to say they did.

Celebrate agriculture with creative hay bale displays

The Virginia Farm Bureau Federation Women's Leadership Committee is welcoming individuals and organizations to take part in its annual Hay Bale Decorating Contest. For seven years, the

to highlight their love for agriculture through imaginative and innovative hay bale displays.

"It's great to get people together and have fun with it," said Julia Stephens, New River

VFBF Women's Leader- we're in farm country." ship Committee. "Hay is a major commodity here, accepted through Nov. and it gets people in a 1. The contest is open to conversation who might anyone, including counotherwise not think ty Farm Bureaus, farmabout farming or how ers markets, farm supprevalent it is. They'll ply businesses, student

district leader for the see one and realize, 'Oh,

Applications are being groups, community associations, and individuals.

Entrants can showcase their ingenuity by converting round or square bales into animals, structures, shapes, and farmscapes. Other items such as corn stalks, pallets, and pumpkins can be used alongside bales to create various scenes.

Guidelines and an entry form are available at bit.ly/3icRJqx. Participants are required to include a photograph of the decorated hay bale display with an applica-

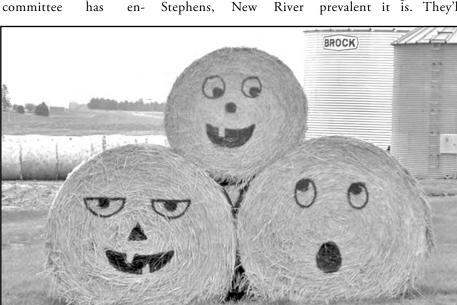

There are five classes: best promotional display for agriculture business or commodity; best promotional display for community spirit; most creative; best agricultural theme; and best agribusiness, FFA, 4-H or school display. Winners will be selected in each category and receive a cash award.

Winners will be notified by mail, and hay bale photo entries will be displayed at the 2021 VFBF Annual Convention in Williamsburg Nov. 30 through Dec. 2.

Last year's contest received 40 submissions. Winning entries included a hay bale honeybee encouraging people to "Bee a friend to pollinators"; a scene celebrating community spirit by honoring first responders; a tractor made of hay bales; and two creative 4-H displays featuring a hay bale cow and a farmer made of straw.

The displays meant to create a lasting impression and typically are placed near schools, outside of banks, at county Farm Bureau offices, and in people's

"We've had people stop by and say, 'We can't wait to see what you're going to put up this year," said Joan Talley, a member of the Fluvanna County Farm Bureau Women's Committee, which participates in the contest every year. "We strive to bring awareness by promoting community service, agriculture, and Farm Bureau. It lets people know that we're not just another business along the road."

RUC biomedical science student aims to alleviate human suffering

University Carilion (RUC) biomedical science student Samarasinghe hopes to one day become a physician, but that wasn't always the path he saw himself following.

Samarasinghe moved to the United States with his family from Sri Lanka when he was 12 years old. As he grew older, he thought that a career as an engineer would be best for him, knowing it could lead to lucrative and stable employment. While those goals were still important to Samarasinghe, as they are to many college students, he soon realized that his destiny lay in healthcare.

"As someone who once lived in a povertystricken country," Sa-marasinghe said, "I am truly blessed to be living in America, the land of ample opportunity. But the qualities that I admire the most about myself, like empathy and the desire to help others be well, were instilled in me by a culture 10,000 miles away."

Samarasinghe those qualities were the driving force in his decision to change majors and focus on developing a career in medicine. He not only changed majors; he left the school where he was studying engineering and enrolled at RUC. Several factors drew him to the small campus in downtown Roanoke.

"I see myself as a native Roanoker, since I have lived here since I was young," Samarasing-

he said. "Transferring to universities." RUC gave me the chance

standing of the material

"RUC has allowed one patient at a time," me to benefit from the wisdom and life experi ences of my professors," he said, "many of whom not only care about my academic success but are also interested in my personal well-being. You can't find that kind of personal investment at many larger colleges and

Samarasinghe said the to be closer to family, RUC biomedical science which is important to program also offers him versatility. As he works Once enrolled, Sama- toward his goal of berasinghe found another coming a physician, the bonus in the smaller size program gives him the of RUC. It allowed him opportunity to conduct to bond more closely important healthcarewith his professors, giv- related research that can ing him a chance to improve the lives of paabsorb a deeper under- tients around the world.

"As a physician, I he was studying and re- hope one day to alleviate the suffering of the sick,

Samarasinghe said. "We are all preoccupied with seeking happiness for ourselves, but rarely do we stop and think about the happiness of others. For myself, I've come to see that true fulfillment can only be achieved by helping others."

At the moment, Samarasinghe is conducting two research projects. The first focuses on investigating a multidrug resistant bacterium associated with both recurrent chronic infections and severe acute infections in immunocompromised patients. The bacterium is one of the major causes of hospital-acquired infections, resulting in high morbidity and mortality

The second project has Samarasinghe investigating the presence of parasitism in the local bumblebee population, leading to a decline of the species.

ONLINE ONLY AUCTION **Investment Properties for Sale in Pulaski VA**

Ends Tuesday September 7th at 4 PM 919 & 929 Newbern Rd Pulaski VA 24301 Bid Now At VaAuctionPro.com

Features +/- 1.29 acres with a 1,084 sq. ft. salon, a 2 bay car wash, a singlewide mobile home and an additional mobile home space currently rented. All properties have public water and sewer. Properties are on same survey and being sold together.

919 Newbern Rd – This property consists of +/- .398 acres with an owned 2 bedroom, 2 bath 1991 singlewide mobile home which is rented for \$350 / mo. There is space for another mobile home on the lot in which renter pays \$175 / mo. for lot rent only. (2nd mobile home is not included in the sale)

929 Newbern Rd - This property consists of a 1,084 sq. ft. salon, a separate carwash and +/- .9 acres. The salon has 1 bath, shampoo area and plenty of storage space. Has a covered porch area, gas furnace and electric wall heater. The car wash has 2 bays and according to owner, brings in around \$800 / mo.

Virginia Cattlemen's Association launches Virginia Cattlemen's Insurance Agency

men's Association (VCA) has launched the Virgin-

ia Cattlemen's Insurance of VCA. The agency was Agency LLC (VCIA), a formed to continue ad-

The Virginia Cattlemen's Association has announced the launch of the Virginia Cattlemen's Insurance Agency as a way to provide the commonwealth's cattle producers with a simple and efficient way to purchase risk management protection.

wholly owned subsidiary vancing the association's purpose of improving the conditions and efficiency of farmers and ranchers involved in cattle production.

By focusing on cattlerelated insurance products, VCA believes that the agency will provide the association with a way to educate cattle producers and provide them with a simple, efficient way to purchase risk management protec-

Virginia Cattlemen's Insurance Agency will focus primarily on offering Livestock Risk Protection (LRP) and Pasture, Range and Forage (PRF) insurance. provides price protection by allowing cattle producers to protect against unexpected market declines. PRF insurance provides protection against the lack of rainfall for land that is grazed or used to make hay. Information about LRP and PRF will be made available to VCA members on the VCA website, through email, and through handouts. LRP policies are made available every day after markets close. PRF policies were offered beginning Sept. 1 and will be offered through the sales closing date on Dec. 1. When VCA began to

develop the idea of offering insurance as a risk protection tool for producers, the board consulted with former Return Merchandise (RMA) Authorization

Administrator Brandon Willis to help guide them through the process of establishing an agency. Willis, who now runs his own livestock insurance business in Utah, continues to help advise and consult with

Currently, Brandon Reeves, the Executive Director of VCA, is the sole insurance agent for VCIA, but VCIA will be exploring the possibility of bringing on additional agents in the future. The agency has been approved to begin writing policies under Rain & Hail's Atlantic Coast Division.

VCA President Jason Pratt said, "VCA continues to look for ways that we can better serve our membership and all Virginia cattle producers. We see risk protection as an incredibly important tool producers should consider to hedge against a volatile market, and I am excited that we are now able to offer these products to help our producers.

Anyone interested in learning more about Virginia Cattlemen's Insurance Agency LLC can visit the VCA website at www.vacattlemen.org or contact Brandon Reeves by email at breeves@ vacattlemen.org or by phone at 540.280.8805.

The Virginia Cattlemen's Association was organized in 1944 and chartered in 1953 to promote the profit potential of Virginia's cattle industry.

Radford WORSHIP DIRECTORY

God Repays

Read Ezekiel 24:1 through 27:36

Why do people sometimes seem to get away with sinning? Does God look away when these evils come against His children?

"'Your wealth, merchandise and wares, your mariners, sailors and shipwrights, your merchants and all your soldiers, and everyone else on board will sink into the heart of the sea on the day of your shipwreck'" (Ezekiel

When Israel turned away from the Lord, the people became prey for the enemies of God. The nations that attacked Israel ssumea Goa woula not juage their sin, but they were mistaken. God watched and recorded every evil deed. A day of accounting was decreed.

In time, Israel's enemies lost wealth, status, and strength. Some even disappeared from the world altogether.

When trials come, Christians should not presume that God is unconcerned with their struggles. He sometimes uses difficulties to discipline and train them for righteousness. As His people wait upon Him, their faith grows.

One day you will be lifted above your trials, and retribution will be given to those who would plunder you.

Prayer Suggestion: Lord, I trust You even now.

Quicklook: Ezekiel 27:26-31

Agee, Vera Pugh

Vera Pugh Agee, 98, of Radford, passed away peacefully on Monday, Aug. 30, 2021.

Vera was born on Easter Creek on Easter Sunday in Floyd County on April 1, 1923. Just six weeks after her birth, her family moved to Radford City, which remained her home for the rest of her life. She was a lifelong member of Carter Street United Methodist Church where she was active

in the Women's Circle.

Vera lived a full life as a loving wife, mother, and nannie to her grandsons and great-grandchildren. She was an ex-

ceptional homemaker, seamstress, and cook. She enjoyed trips with her family to Myrtle Beach and excursions on the Blue Ridge Parkway. She also enjoyed a good game of bridge over the years with her many friends.

Vera had a servant's heart and lovingly took care of her husband when he was terminally ill. She will be dearly missed

Vera was preceded in Aug. 30, 2021. death by her parents, Winfred and India Pugh; death by his parents, Herher husband of 57 years, man and Lessie Price; a sis-Fleetwood Agee; and her sister, Madaline Pugh Ful-

Šurvivors include her granddaughter, daughters and son-in-law, Bonnie and John Millard of Salem and Beverly Singleton of Radford;

grandsons Eric Rush Millard (Melissa) of Harrisonburg and Ryan Agee Millard a daughter and son-in-law, Barbara and (Lindsey) of Salem; great-grandchildren Allen Redden; a son-in-law, Gary Jef-Thomas, Ethan, Ainsley, Claire, and Sa-frey; grandchildren and their spouses Redie; and many friends.

View Cemetery in Radford.

In lieu of flowers, donations may be made to Carter St. UMC, 1219 Second St., Radford, VA 24141.

The Agee family is in the care of Mullins Funeral Home & Crematory in Radford. www.mullinsfuneralhome.com.

Long, Melba Bowling

Melba Bowling Long, 88, of Radford, home to take her place in the body of Christ Jesus her Lord and Savior on Wednesday, Sept. 1, 2021. She was born Aug. 12,

1933, in Smyth Co., Chatham Hill, Va., to Wylie and Thurman Webb Bowling. She was born again in November 1961 and joined the Snowville Baptist Church in June 1962. Twenty years later she moved her mem-

bership to Gethsemane Baptist Church in Radford. She married Nathan Abraham Long on Dec. 16, 1954. He departed this life on Sept. 17, 1964.

Melba is survived by a daughter, Peggy Long Collins, and her husband, Pastor

James Collins of Jupiter, Fla.; a son, Charles Edgar Long, and his wife, Catherine Crute Long of Radford; two grandsons, Derek Nathan Long and Cooper Edward Long of Radford; a great-grandson, Riley Long; a sister, Wanda Bowling Webb of Radford; a sister-in-law, Roxie Long Dishon of Radford; a brother-in-law, Harrison Long of Radford; nieces

Donna Long Conklin (Mike), Nancy Young Newton, and Betty Kaye Young Smith (Curtis), all of Pulaski County.

Services will be private.

The Long family is in the care of Mullins Funeral Home & Crematory in Radford. www.mullinsfuneralhome.com.

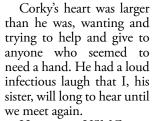

Parcell, Jr., Clayton Eldridge

It is with bittersweet sorrow that I write that my brother, Clayton Eldridge Parcell, Jr., known throughout his life as "Corky," passed through the veil of this world into a place of peace, happiness and learning, on Saturday, Aug. 28, 2021 in Wichita, Kansas. He and our parents are reunited in spirit and just how glorious is this.

He was preceded in death by his son, Shane Shafer, and our parents, Clayton E. Parcell, Sr., and Evelyn 'Pat" Parcell.

Corky is survived by his sister and brother-in-law, Olivia and Darrell Reed; a daughter, Deidre Shawn Parcell Capozzi (Lee); grandchildren Isabella Capozzi, and Vincent and Brayden Shafer; a daughterin-law, Jenny F. Shaffer; nieces and nephews Corey Shannon and Tanoe Reed, Natashia Pierson, and Chelsey and Zayne Hamm; and numerous grand-nieces and

grand-nephews; and many friends. Corky was born in Pearisburg and lived his childhood in Staffordsville. He was an exceptional woodworker and sign writer. He was a history buff, especially Virginia history. He has a book published called

He was a USMC veteran having served in Vietnam. Corky was a soldier at heart, helping and working at the VFW and Ameri-

can Legion in Giles and when he was in Wichita.

I want to take the opportunity to express my love and deepest thank you to the excellent nurses, aides, and Dr. Martinez for the care given Corky in his short last days. Some I remember well are Mary, Pauline, Kim, and Ian.

The family received friends from 11 a.m. until 1 p.m. today, Saturday, Sept. 4, 2021 at the Mullins Funeral Home in Radford. Funeral services began at 1 p.m. Interment with full military honors followed in the Staffordsville Community Cemetery in Staffordsville.

The Parcell family is in the care of Mullins Funeral Home and Crematory in Radford. www.mullinsfuneralhome.com.

Virginia Tech's Sivert Haugli, the team captain, was named the United Soccer Coaches Player of the Week Wednesday afternoon in the wake of his twogoal effort in the 3-2 defeat Sunday of top-ranked

VT's Haugli named **United Soccer Coaches Player of the Week**

Hokie defender and team captain Sivert Haugli was named the United Soccer Coaches Player of the Week Wednesday after-

From Oslo, Norway, Haugli recorded his second and third career goals in quick succession on Sunday in the Hokies 3-2 victory over then-No. 1 Marshall.

Standing firm in the back, the captain also oversaw the defense that limited the Thundering Herd to only two shots in the second half.

Tech trailed by two goals at halftime despite outshooting the defending national champions, 7-5 in the first period. That pressure continued into the second half, eventually leading to a breakthrough for the Hokies.

Danny Flores whipped in a corner in the 64th minute that found Haugli's head for his first goal of the season, giving Virginia Tech a lifeline. Just two minutes later, Tech's press resulted in a handball inside the box. Haugli stepped up to the penalty spot and tied up the match.

The Hokies converted again from the spot in the 73rd minute and saw the game out, giving the program its first win against a No. 1 team since defeating Notre Dame on Sept. 22, 2017.

Earlier this season, Haugli was named to the ACC Preseason Watch

Tech cross-country dominates in season-opening VT Invitational

The Virginia Tech women's cross-country team started strong, placing eight runners in the top 10 finishers in the Virginia Tech Invitational, the season opener.

BLACKSBURG - Cross country returned to Blacksburg Wednesday night as the Hokies hosted their season opener at the Buford Meredith Cross Country Course. Both the men's and women's teams dominated the top ten in the Virginia Tech Invitational.

In the women's 4k race, eight Hokies finished in the top ten, led by junior Lindsey Butler who clocked a time of 14:18.70 to take second place, followed by Grace Boone in third and Ashley Smith in fourth.

After the women's race, the men took to the course for the 6k. Hokies went four-wide at the finish line as Ben Fleming crossed first in 19:07.30, with Antonio Lopez Segura, Tyler Leeser, and Dave Whitfield all finishing within a second of the leader.

"I think it was a good, collective effort, and certainly some people showed some improvement from years past which is great," Head Cross Country and Distance Coach Eric Johannigmeier said. "We just have to keep moving up as a whole because that will be our strength if we can move up as a pack."

A strong start to the season is a promising sign for the Hokies, as competition will toughen and the pace will quicken heading towards

The Hokies will stay in Blacksburg for their next race, hosting the Virginia Tech Alumni Invitational Friday, Sept. 10. An open community and alumni 4k is set for 5:30 p.m. followed by men's and women's competition starting at 6 p.m.

Female 70 and over: 1) Dottie Rottekamp 2) Beth Obenshain.

Outdoor report: How to see Virginia's elk population

Yes, Virginia, there are elk in the commonwealth. The trick is how to see them.

The Virginia Department of Wildlife Resources (DWR) worked with partners to restore elk to Southwest Virginia between 2012 and 2014. Elk historically roamed through Virginia, but by the late 1800s they had gone extinct due to overhunting and loss of habitat. During the restora-

tion, 71 adult elk and four calves (born during that time frame) were relocated into Buchanan County, Va., from Southeast Kentucky. By September 2020, Virginia's restored elk herd was thriving with more than 250 animals.

The restoration of elk to Virginia brought with it a new and exciting opportunity to observe these large, charismatic mammals in the commonwealth. Elk provide awe-inspiring experiences for both the eyes and the ears. The majestic image of a male elk, or bull, sporting his large impressive antlers backdropped by rolling green hills can be outdone only by the experience of hearing that same bull let out a loud and long bugle, the elk's unique bellowing call. Because of their herding mentality, the opportunity to watch a group of 50-plus elk is not uncommon in areas that provide cool temperatures and quality

Here are the best ways to watch them. Elk Cam

Since 2018, DWR has worked with local partners Southwest Virginia Sportsmen, iGo CNXTechnologies, Gas, Vansant Lumber, and Appalachian Power in Buchanan County to operate Elk Cam, a livestreaming webcam that provides a virtual experience to view elk and other wildlife on private property near Grundy, Va. These webcams have attracted over 50,000 views per year and enable people living in other parts of the commonwealth, states, and even other countries the chance to view elk and other wildlife from the comfort of

The elk cam usually broadcasts from late Au-

their home.

gust through November. This time frame provides a look at the female elk, or cows, returning from their calving areas with their young all the way through the peak breeding activity later in the fall. The DWR Elk Cam went live this year the week of Aug. 23. During most of September, the prime hours to tune into the elk cam and see wildlife activity will be early in the morning during the first couple hours after sunrise and at dusk, the last couple hours prior to sunset. As the daytime temperatures turn cooler, that prime time window will expand.

Elk Viewing Area sible from the Southern that is sure to grow. Gap Outdoor Adventure

temperatures turn cooler, that time window will expand.

Guided elk tours

DWR is also offering a new opportunity to view elk this fall, guided elk

tours that will be hosted by DWR and other partners in Buchanan County. These elk tours will be offered on Thursday evenings starting in mid-September and will continue through October. Tours will be limited in capacity, and participants will be required to pre-register through the DWR website. Tour registration will be closed 24 hours prior to any tour date.

record, wins Virginia Tech Invitational

University's Hannah Moran won the Virginia Tech Invitational and set a new school record in the process to lead the Radford University cross-country team to a second-place finish at the Virginia Tech Invitational Wednesday night.

Salem The native quickly separated herself from the rest of the pack and crossed the finish line ahead of all other competitors in the 4k with a time of 14:11.0. The time beats the previous school record of 14:26.8 set by Caitlin Apps at the 2019 Virginia Tech Invitational and establishes Moran as one of the best runners in program history.

Rachel Werking was the next Highlander to finish, making it to the line with a time of 14:40.5 for 11th place. Rachel Millirons posted a personalbest 14:45.0 to take 14th, and MacKenzie Gardner shaved more than 40 seconds off her previous best for a new personal record and a 16th-place finish.

(15:01.2, 18th) had a strong showing in her first race of the year, and Savannah Hoff (15:10.9, 20th) also recorded a personal record. Abby Seigel (15:14.5, 22nd) rounded out the scoring for Rad-

The team's total score was 47 with an average time of 14:41.

On the men's side, Nate Jennings paced the Highlanders in the 6k with a seventh-place finish and a time of 19:18.0, which was the second-fastest time in school history. The only Radford runner to top that is Ryan Farnan, who owns the program record at 18:58.0.

Sam Sikora was next to cross the finish line, placing 11th with a time of 19:53.10 which now stands as the eighth-fastest time in school history. Joshua Daggett took 12th by running a 20:00.70, the 10th-fastest time in the history of the pro-

In his first taste of colle-

Hannah Moran set a school record in leading the Radford University women's cross-country team to a secondplace finish at this past week's Virginia Tech Invitational in Blacksburg.

giate competition, freshman Clay Kelly grabbed 19th place with a time of 20:42.90 while Alejo Cobos (21:00.10) and Nick McCumsey (21:16.50) were just behind. Hayat Khan (21:35.8) was the

final scorer for the Rad-

The Highlanders also took second overall in

the invitational, scoring 54 points with an average time of 20:11.

RU men's soccer team torches Concord 9-0 in season opener

The Radford men's soccer team dominated Concord the full 90 minutes in a 9-0 victory Friday night.

The Radford University men's soccer team dominated Concord the full 90 minutes in a 9-0 victory Friday night. The nine goals are the most scored by the Highlanders in a regular season game since they scored seven against Roanoke in 2015.

Eight different Highlanders recorded goals, but the scoring was kicked off by Octavio Ocampo just two minutes into the game. Juan Benavides the Highlandadded ers' second goal of the game 27 minutes in while freshman Yoshiya Okawa closed out the first half scoring with his first career goal.

The second half was foot to the pedal as the Highlanders ran away with
