Radford City Council chooses interim council member

Heather Bell
communitynews@ourvalley.org

RADFORD— Radford City Council has chosen Charley Cosmato, director of the Center for Innovative Teaching and Learning at Radford University and a longtime Radford resident, as the interim council member to replace former council member Forrest Hite.

At Monday's Radford City Council meeting, Cosmato said he moved to Radford in 1989 to attend Radford University and is happy to have called the city home ever since.

"I came to Radford to attend Radford University; I graduated and never left," he said. "I'm so privileged to have raised my family here."

Cosmato will serve until the upcoming city council election in November.

"I hope to help keep the wheels turning until the election," he said.

The Radford City Council began the process to fill the vacancy left by Hite's resignation in mid-July.

"Throughout the process, the city council engaged with citizens seeking nominations and letters of interest

and support before deliberating and selecting the interim member," according to a statement released by the City of Radford.

Cosmato has lived in Radford for more than 30 years, and "he and his family have created meaningful relationships with all those they interact with; their stories of Radford are endearing," the statement said. "Mr. Cosmato brings a wealth of knowledge, experience, professionalism, engagement, and passion for Radford that will align with the council's vision and will continue to move Radford forward."

Several people volunteered for the interim position, and the city council thanked all of the prospective candidates.

"The city council would be remiss not to mention the others who stepped up and volunteered to serve in this interim role; there were a number of excellent and well-qualified nominees who came forward," the statement reads. "These individuals are already vital to the community and certainly have a future in this city. The city council is immensely grateful to each of them for their service and their willingness to serve more, as well as to the citizens of Radford for their input. This entire process, especially the city council's interactions with each of these prospective nominees, has only strengthened the current council's

Interim Radford City Council Member Charley Cosmato conviction that Radford has a very strong future."

Dr. Richard Harshberger is also currently serving in an interim role due to the earlier resignation of former Council Member Onassis Burress, and that seat will also be decided in the upcoming election.

Glencoe Mansion, Museum and Gallery to sponsor launch of Civil-War era book

Ed McMinn
Editor, News Journal

RADFORD – Glencoe Mansion, Museum, and Gallery will launch a Civil-War era book, "The Whartons' War" on Aug. 19 at 5 p.m. in the Radford City Council chambers at 10 Robertson St.

The book is nearly 160 years in the making and illuminates life during the Civil War in Southwest Virginia. Recently released by the University of North Carolina Press, "The Whartons' War" features extensive wartime correspondence between Confederate newlyweds Brigadier General Gabriel C. Wharton and Anne Radford Wharton.

Co-edited by William C. Davis, a former professor of history at Virginia Tech and the author or editor of 50 books on Civil War and Southern history, and Sue Heth Bell, the Whartons' great-great granddaughter, "The Whartons' War" is one of the fullest known sets of correspondence by a high-level officer and his wife from the time of their courtship to the end of the war when

New Radford University President addresses community at council meeting

Heather Bell
communitynews@ourvalley.org

RADFORD - The Radford City Council officially welcomed Radford University President Bret Danilowicz to the city on Monday with a reception held prior to the council meeting and remarks by Danilowicz during the meeting.

Danilowicz, who officially began his role as the eighth president of Radford University on July 1, most recently served as provost and vice president for academic affairs at Florida Atlantic University before coming to Radford.

On Monday, Danilowicz said he has enjoyed a return to

small-town living since his move to Radford and thinks a strong cooperative relationship between the city and the university is imperative to the success of both, particularly in the area of economic development.

"I'm very interested in economic development," he said. "Every chance we get to use a state dollar to not only educate our students but to also use that same dollar to leverage it to increase the economic development of the area is a dollar better spent."

"The types of partnerships that are possible between us are really limitless," he said, mentioning, for example, an amphitheater project that has been in the

comprehensive plan for both the city and the university for years.

"What's good for the university is also good for the city," he said, as an increase in students and more alumni returning to Radford helps increase economic development.

"It's about community, it's about stretching our dollars so it's best for both of us, and it's about making the best university and city partnership that we can," he said.

According to RU, Danilowicz earned a doctor of philosophy degree in zoology from Duke University, a master of business administration from

VT scientists: Chemotherapy to treat breast cancer may aid in its spread

Breast cancer is the second-leading cause of cancer death among women in America, according to the Centers for Disease Control and Prevention.

Platinum-based chemotherapy drugs are regularly prescribed to treat the cancer, but in a first-of-its-kind finding, Virginia Tech researchers have found these drugs may activate the patient's lymphatic system and help tumor cells to spread to healthy parts of the body.

A new study, published in *Frontiers in Oncology*, by a multi-institutional team of researchers led by Jennifer Munson, associate professor at the Fralin Biomedical Research Institute at VTC, helps explain how platinum-based chemotherapies might be made more effective if the changes to the lymphatic system caused by the chemotherapy can be blocked or even reversed by an additional therapy.

Because the lymphatic system contributes to the body's immune response, it's possible that growth of the lymphatics has a positive effect on fighting tumors, an aspect the study did not explore. More research is needed, said Munson, who is also an associate professor in Virginia Tech's Department of Biomedical Engineering and Mechanics and co-director of the Virginia Tech Cancer Research Alliance.

She said the findings highlight the incomplete understanding of the impact of chemotherapy on tissues in the body and that more study is crucial to advancing the treatment of aggressive breast cancers.

"These chemotherapy drugs do work," Munson said. "They kill tumor cells. What's needed is a combination of the

Study: Christiansburg, Radford have among the lowest known 'stressflation' rates in Virginia

MyBioSource.com, a biotechnical products distribution company, conducted a study of physical and mental distress data from County Health Rankings over the last 5 years (from 2017 to 2021) in counties across Virginia.

From longer work hours to increased demands at home, the COVID-19 pandemic exposed Americans to new levels of stress in almost every aspect of their lives. And now after two years of COVID-related health worries, Americans are faced with financial concerns as high inflation leads to a cost of living

crisis for many. Study data revealed that Christiansburg has a stress inflation rate of 4 percent, among the lowest in the commonwealth. Radford's stress inflation rate, according to the study, is 2 percent, also among the lowest in Virginia.

According to the study, the Virginia county with the highest 'stressflation' over the last 5 years was found to be Buchanan County, with a 12% increase. More specifically, citizens there had a 6% increase in physical stress, as well as 6% increase in mental stress. The only place in the commonwealth with a

reduced stressflation, and comparatively Zen-like citizens, according to study data, was Falls Church City which had a 1% decrease in rate of physical stress and a 0% change in mental stress.

MyBioSource.com also broke down the data at a national/state level, which revealed the state with the highest stress inflation rate over the past 5 years was Maine (6%). On the other end of the ranking, New York had the lowest stress inflation rate in the country. In fact, The Empire State actually experienced a stress deflation rate of 2%! See **Rates**, page 4

Radford photographer captures beauty of Claytor Lake

PHOTO BY REBECCA HARRIS

Radford News Journal reader Rebecca Harris, an avid photographer, captured the beauty of Claytor Lake with her photograph of a flock of ducks making their way across the lake last week.

UPCOMING EVENTS

Saturday, Aug. 13:

Mount Tabor Ruritan fish fry:

The Mount Tabor Ruritan Club will hold its August Fish Fry today, Aug. 13, from 5 to 7 p.m. at Slusser's Chapel Picnic Shelter, 1543 Mount Tabor Rd, Blacksburg. NRCC offering new African American literature course this fall

New River Community College is offering a new English course in African American literature this fall.

African American Literature (ENG 258) explores the stories African American authors tell about themselves, their communities, and the world. Students will examine common and diverging themes within African American literary traditions through the study of diverse authors, genres, and literary movements from a variety of time periods.

Course content emphasizes interpretive and critical analysis skills developed through close reading and

consideration of historical and cultural contexts. ENG 258 is a transferable course.

The class will meet on Tuesdays and Thursdays from 9:30 a.m. to 10:50 a.m. in person at NRCC's campus in Dublin with the first day of class on Tuesday, Aug. 23. Susan Lazear, assistant professor of English at NRCC, will be teaching the 14-week course.

Lazear earned her bachelor's degree in English with a concentration in African American women's literature. She also holds master's degrees in English and education. Lazear has taught English full time at NRCC since 2017.

She writes poetry and narrative non-fiction, and her essay "Goose" was selected for presentation by New River Valley Voices.

Current NRCC students may register for classes online by visiting their student accounts.

New students or those who may need additional support to register can reach out to an advisor by emailing advising@nr.edu or by calling (540) 674-3609.

Prospective NRCC students may visit www.nr.edu/registernow for enrollment information.

The class schedule is available at www.nr.edu/schedule.

ACADEMIC ACHIEVEMENTS

Local students earn Emerson College dean's list honors

Diego Centeno and Ethan McDowell, both of Blacksburg, have earned dean's list honors at Emerson College for Spring 2022. The requirement to make the dean's list is a grade point average of 3.7 or higher for the semester.

Centeno is majoring in media arts production and is a member of the Class of 2025.

McDowell is majoring in journalism and is a member of the Class of 2022.

Based in Boston opposite historic Boston Common and in the heart of the city's theater district, Emerson College educates individuals who will solve problems and change the world through engaged leadership in communication and the arts, a mission informed by liberal learning.

The college has 3,780 undergraduates and 670 graduate students from across the United States and 50 countries.

Cube Fest 2022 offers stellar sonic adventures

Presenting the latest innovations in sound and musical composition, Virginia Tech's immersive music festival offers a sonic adventure that can only be properly experienced in one place in the entire world — the Cube.

Presented by the Institute for Creativity, Arts, and Technology and the Moss Arts Center, the festival runs from Friday, Aug. 19, through Sunday, Aug. 21, with events taking place in the Cube and Perform Studio, located in the Moss Arts Center at 190 Alumni Mall.

Cube Fest 2022 is a series of concerts featuring music that moves around, above, and through the listener. Impossible to re-create at home listening on a stereo system or with headphones, these works were created specifically for the Cube's world-leading audio system, complete with over 140 loudspeakers.

This year's Cube Fest celebrates immersive Afrofuturist music with works from leading artists selected from an international pool of submissions.

Many of the events are free and all events are free for Virginia Tech students.

The Cube Fest 2022 schedule is as follows:

Friday, Aug. 19

Digging in the Crates: "The Sankofa Tape" (fixed)

Cube 5 p.m. \$10; free for current Virginia Tech students

"The Other Wakanda" (fixed) Stephen James Taylor

Cube 7 p.m. \$10; free for current Virginia Tech students

Saturday, Aug. 20

"Sounds in Focus I" Fixed works by Dexter van der Schyff, Roxanne Tuotte, Ryne Sieske, João Pedro Oliveira, and Simon Le Boggit Perform Studio 3 p.m. Free

"Sounds Cubed I" Jupiter Blue and Sea Novaa (live) and fixed works by Yvette Janine Jackson and King Britt Cube

7 p.m. \$10; free for current Virginia Tech students

Sunday, Aug. 21

Keynote: "You Haven't Met the Captain of the Spaceship ... Yet" Thomas Stanley Perform Studio 1 p.m. Free

"Sounds in Focus II" Fixed works by Barry Truax, John Young, and Lidia Zielinska Perform Studio 3 p.m. Free

"Sounds Cubed II" Fixed works by James Bagshaw, Christophe Lengelé, Nikos Stavropoulos, Orestis Karamanlis, Chris Coleman, and Philippe-Aubert Gauthier Cube 7 p.m. \$10; free for current Virginia Tech students

"Listening Lounge" Spatialization of Sun Ra's "Space Is the Place" Cube 9 p.m. \$10; free for current Virginia Tech students

A special Cube event puts the spotlight on Virginia Tech student musicians, showcasing new spatial hip-hop music created by members of Virginia Tech Digging in the Crates (#VTDITC), the university's student-led hip-hop studies program while the keynote talk, "You Haven't Met the Captain of the Spaceship ... Yet," delivered by Thomas Stanley of George Mason University, will precede a spatialized experience of the influential Afrofuturist album "Space Is the Place" by visionary composer and Afrofuturism pioneer Sun Ra.

All of the works featured in the "Sounds in Focus" and "Sounds Cubed" concerts are designed for an immersive listening experience. "Sounds Cubed" concerts are created to be experienced in the vast sonic environment of the Cube while the "Sounds in Focus" concerts benefit from the more intimate and concentrated immersive sound setting of the Perform Studio.

"Since its inception in 2016, Cube Fest has invited artists from all over the world to share their sound- and space-focused artistic creations in collaboration with audio technologists at Virginia Tech," said

Eric Lyon, professor in Virginia Tech's School of Performing Arts and Cube Fest artistic co-director.

"Given this natural affinity between Afrofuturism and the aesthetic research objectives of the Cube, we have invited Afrofuturist artists to share their spatial/musical visions, creating experiences that are possible only on high-density loudspeaker arrays, going well beyond what is currently achievable on stereo sound systems or headphones in terms of spatial richness, presence, complexity, and depth," said Tyechia Thompson, assistant professor in the Department of English at Virginia Tech and Cube Fest artistic co-director.

Want to colonize Mars? Talk to this outer space anthropologist first

SUBMITTED PHOTO

'Rising star' Ph.D. student Savannah Mandel brings the social sciences to human space exploration.

By Andrew G Adkins

Maybe infinity and beyond should wait.

Prominent physicists and wealthy tycoons envision life scattered across the solar system. Elon Musk wants humans to become a multiplanetary species. Jeff Bezos pictures floating space colonies home to billions.

Simulated-gravity ecosystems powered by the sun. Giant corporations drilling into moons and Mars. Children born on spaceships. Earth turning into a tourist destination.

Ripped from the pages of sci-fi novels, the future of humanity could exist beyond Earth.

But first, Savannah Mandel would like a word.

"Before we embark on this new journey to outer space, before we build colonies and extract resources from another planet, we must be intentional about improving our relationship with Earth — and with one another."

Mandel is an outer space anthropologist and a doctoral student in the Science and Technology Studies program at Virginia Tech. Her research centers on human space exploration.

She's delivered talks at NASA and the National Air and Space Museum. Connected with colleagues throughout the space industry. Interned with the Commercial Spaceflight Federation. Studied congressional hearings. Researched at Spaceport America, the world's first purpose-built commercial spaceport.

She earned the title of rising star and "the vanguard of researchers looking at the human side of leaving Earth" from Ozy Magazine.

She's worked alongside physicists and space technology scholars with the goal of ensuring humanity stands at the forefront.

On the side, she's a budding novelist.

All this, and yet Mandel's career is still in its early stages. Through her research, Mandel reinforces the concepts of collaboration, social awareness, and reflexivity.

"I want to make sure we explore space responsibly, with equity and a caretaker's mindset," she said. "Is human space travel worth it, right now, when climate change is devastating the natural world? When there's so much social and political turmoil here on Earth? That's a question we must address."

Chemotherapy from page 1

right co-treatments and the right dosing strategies for patients.”

Munson’s team focused on triple-negative breast cancers — tumors that lack receptors for the three most common and effective breast cancer treatments, leaving doctors to rely on surgeries, radiation, and chemotherapy as front-line treatments.

Studying tissue-engineered and animal

models, as well as tissue samples from human patients, Munson and her research team found the chemotherapy drugs triggered systemic growth and activation of lymphatic vessels throughout the body, including sites vulnerable to the spread of cancer cells such as the lungs.

“If you have more lymphatics, it will actually kind of prime your body for metastatic spread,” Munson said.

“While this can sound like bad news, it’s important to know in order to make informed decisions about treating patients with breast cancer. By knowing this, physicians can better formulate treatments for their patients to kill tumors without these side effects.”

Munson’s study offers a solution: Treating patients who receive these chemotherapies with a drug that

inhibits a protein called VEGFR3, which is important to the growth and proliferation of lymphatic vessels.

The research found the chemotherapy-induced growth of the vessels depended on the protein. Alternating the chemotherapy with the protein-inhibiting drug prevented the side effect and even reversed it.

Radford University President Bret Danilowicz gathers with members of the Radford City Council Monday prior to the council meeting. Pictured are (left to right) Council Member Dr. Richard Harshberger, Mayor David Horton, Danilowicz, Council Member Jessie Foster, Council Member Charley Cosmato, and Vice Mayor Naomi Huntington.

Georgia Southern University, a master of arts in education leadership from Open University, U.K., and his bachelor of science in biology with a computer science minor from Utica College of Syracuse University. Additionally, he held two postdoctoral fellowships at the University of Windsor, Canada.

He is married to Kay Danilowicz, a pediatric speech language pathologist who has worked extensively with early intervention and school-aged children. They have

four children: Torin, Brynn, Teagan, and Cullen. They co-trained a therapy dog and served as a pet therapy team at universities and in healthcare settings. They have built sets, worked backstage, and performed onstage in local theater, coached soccer, and served on non-profit and educational boards. When not at work or with the community, both enjoy exploring the outdoors, riding their horses, and spoiling their dogs, Bainne and Koda.

Book from page 1

returning to his home in Radford.

Separated by 20 years in age and differing opinions on many subjects, these two well-educated and articulate Virginians frankly discussed their thoughts on generals and politicians, the course of the war, the fate of the Confederacy, life at home, and their wavering loyalties. They also explored the shifting gender roles brought on by the war, changing relations between slave owners and enslaved people and much more.

The new home they eventually built in Radford just above the New River is today the Glencoe Mansion, Museum & Gallery.

At the book launch, the authors will provide insight into the couple’s correspondence and how the book developed during a multi-year process. A book signing will follow, and copies will be available to purchase.

Glencoe’s executive director Scott Gardner, who gets to share the story of the Whartons daily, said, “We’re excited to kick off the promotion of this book.” According to Gardner, “General Wharton graduated from Virginia Military Institute and began his career as an engineer.

When war broke out in 1861, he enlisted and was deployed to Southwest Virginia where he met an independent-minded, feisty young woman who would change his life forever. In turn, General Wharton forever transformed Southwest Virginia’s development.

“One of my favorite aspects of history,” Gardner said, “is pulling information out from the shadows. This information helps illustrate how life really was and challenges our conventional views.”

OBITUARIES

Blume, George Terrill

George Terrill Blume, 96, this, and he asked that contributions of Blacksburg, died Sunday, Aug. 7, 2022.

He was born in Richmond on Sept. 20, 1925, to the late George Washington Jones and Ruth Bowman Blume. He was also preceded in death by his wife, Edna Earl Blume, and a sister, Margaret Wendt.

He was a European theater World War II veteran having served in the US Army. He was also a graduate of Virginia Tech Class of 1950 and received his Doctorate in Sociology. He was a longtime member and dedicated volunteer at Blacksburg Baptist Church, was a member of American Legion Post 182, and served the Legion for 79 years.

George chose to sponsor African-American male and female students in the leadership program of the Corps of Cadets at Virginia Tech. He contributed funds to accomplish

be made to extend this effort. He is survived by his brother-in-law, Bennie Akers; special friends Darron and Elaine Byrd, and Robert and Priscilla Noel; and Edna's cousins, Pauline Robinson, Mike Webb, Teddy Webb, and their families.

Funeral services were conducted Wednesday, Aug. 10, 2022 at 1 p.m. in the McCoy Funeral Home Chapel with Dr. Tommy McDearis and the Rev. Todd Milsap officiating. The family received friends on Wednesday prior to the service at the McCoy Funeral Home.

The family requested that memorial contributions be made to the George T. and Edna E. Blume '50 Emerging Leaders Scholarship, Attn: Sandi Bliss, 902 Prices Fork Rd., Blacksburg, VA 24061.

McGuyer, Shirley Jean Dove

Shirley Jean Dove McGuyer, 70, of Fairlawn, passed away with her loved ones by her side on Saturday, Aug. 6, 2022.

Services will be held at a later

date. The McGuyer family is in the care of Mullins Funeral Home & Crematory in Radford, www.mullinsfuneralhome.com.

Moore, Janet LaVone

Janet LaVone Moore, 70, of end, Nancy Hardymon; and many other nieces, nephews, relatives, and friends.

She was preceded in death by her parents, Alonzo Mathew Moore and Edith Hamilton Mills; a brother, Tony Mills; and her stepfather, Rob Mills.

Survivors include her son and daughter-in-law, Brad and Jennifer Roop; her daughter and son-in-law, Tammy and Alan Surface; grandchildren Brandon, Paige, Brett, and Annabel; brothers and sisters-in-law Danny Hamilton, Randy Moore, Stanley and Ernestine Moore, and Robert and Pam Mills; a sister, Candace Mills; a special aunt, Nancy Miano; a best friend until the

Brad and Tammy would like to specially thank Janet's neighbors for their love and support during this time.

The family will receive friends from 11 a.m. until 12 p.m. today, Saturday, Aug. 13, 2022, at the Mullins Funeral Home in Radford. Memorial services will begin at noon with Pastor Joe Collins officiating. Burial will follow in Sunrise Burial Park in Radford.

The Moore family is in the care of Mullins Funeral Home and Crematory in Radford.

WORSHIP DIRECTORY

Stolen Hearts

Read 2 Samuel 14:1 through 15:37

Absalom, King David's son, did not have an easy life. He fled from home after killing his half brother for raping his sister. Eventually he was allowed to return home, but his relationship with his father was strained. Absalom undermined his father's authority by promising that he would be a more compassionate ruler than David.

Absalom behaved in this way toward all the Israelites who came to the king asking for justice, and so he stole the hearts of the people of Israel (2 Samuel 15:6).

Just as Absalom worked to

steal the hearts of the people from David, so the devil works to steal the hearts of people from God. The devil tries to get people, even Christians, to doubt God's justice or care and make them think they would be better off without God. God never promised that hard times wouldn't come, but He has promised to be with believers and help them make it through trials. Knowing He will never leave or forsake believers can help us dispel doubts and keep our hearts true to God.

Prayer for Today: Lord, help me guard my heart so I will never doubt Your love and care for me.

Quicklook: 2 Samuel 15:1-6

If your church is not listed and if you are interested, call Randy Thompson at 540-389-9355 or email at advertise@ourvalley.org

2671.

Our Saviour Lutheran Church ELCA, 1845 Cambria St NE, Christiansburg. Worship each Sunday at 10 am, in person and online at <https://www.youtube.com/channel/UCMsB-gbyjmV5ce9mr43dbCw>. Obituaries from page 5

Wright, William "Hootie" Houghton

William "Hootie" Houghton father, Bill Wright.

Wright, 73, passed away Monday, Aug. 8, 2022.

William was known by several nicknames, the first being Snider, named by family members. When playing football at Radford High School, his football coach could not pronounce his middle name and ended up with the nickname of Hootie.

Survivors include his wife, Sandy Wright; his mother, Bette Wright; a brother, Dr. G. Todd (Colleen) Wright; a sister, Rebecca (Jerry) Markert; and many other relatives and friends.

The family received friends on Thursday, Aug. 11, at the Mullins

Funeral Home in Radford. Funeral services were held on Friday, Aug. 12, at 11 a.m. at Grace Episcopal Church with Deacon William Yagel. Interment was private.

In lieu of flowers, please consider donations to Grace Episcopal Church, 210 Fourth St., Radford, Virginia 24141.

The Wright family is in the care of Mullins Funeral Home and Crematory in Radford.

While working for the Corps of Engineers for 30 years, he was Bill.

Hootie was born and raised in Radford. He graduated in 1967 from Radford High School where he played fullback. In 1977 he graduated from Radford College with a bachelor's degree in geology. He was a member of Grace Episcopal Church in Radford and was an active member of the Club Mac.

He was preceded in death by his

Transplant patients inspired third-year medical student

By Catherine Doss

Born and raised in Mount Airy, North Carolina, Kelly Ingram's life experiences differ greatly from many of her classmates who hail from more urban settings. Mount Airy is a town of 10,000 at the foot of the Blue Ridge Mountains, 38 miles north of Winston-Salem.

Ingram currently is a third-year student at the Virginia Tech Carilion School of Medicine.

According to 2021 U.S. Census Bureau statistics, 30 percent of Mount Airy's population lives in poverty and 17 percent of people under the age of 65 are without health insurance.

"I have always believed that talent is equally distributed but opportunity is not," Ingram said. "There are few places more emblematic of this than rural America. Growing up in a small, relatively poor town provided little in the way of opportunity. We had a local community hospital, but for anything remotely emergent, patients were sent over an hour away. This was also the case with specialty medical care."

When she was young, Ingram's mother needed to see multiple medical specialists, and her family quickly experienced the burden of traveling long distances for care.

"Traveling an hour, one way, to see a doctor can quickly turn into an entire-day event," she said. "Public transportation is nonexistent, so if you don't have a car, these appointments are often unattainable. This is where a sense of community is vital, and it is important that neighbors take care of one another."

Ingram's fascination with the human body began at age 6, when she memorized the bones of the body on her LeapPad learning tablet. She thought she wanted

Kelly Ingram

SUBMITTED PHOTO

to be an orthopedic surgeon, but that changed later.

After graduating from North Carolina State University with a degree in biological sciences, Ingram took a job at Wake Forest Baptist Medical Center's HLA Immunogenetics Lab, which provides testing services for people awaiting kidney, pancreas, heart, and bone marrow transplants. She also earned a master's degree online in microbiology from the University of Florida.

The notion of becoming an orthopedic surgeon changed over time as she worked in the transplant lab.

"Now I think I want to do something more with transplant patients to continue what I was doing at Wake Forest," she said. "I think that would be a really meaningful career. There are several patients from the lab that I want to be able to help and continue to help others like them."

But first, medical school.

Ingram's VTSCOM class began that

The Virginia Farm Bureau's hay bale decorating contest is back and is seeking imaginative hay bale displays.

Farm Bureau's hay bale decorating contest showcases agriculture

The Virginia Farm Bureau Federation Women's Leadership Committee's Hay Bale Decorating Contest is back, and individuals and organizations are invited to help celebrate agriculture with imaginative hay bale displays.

For eight years, the committee has encouraged communities across Virginia to highlight their love for farming through creative displays.

"It's a fun way for people to come together, build something out of hay bales and express their voices and artistic side," said Susan Harrell, Southeast District leader for the Virginia Farm Bureau Federation's Women's Leadership Committee. "It's not just for the kids. Adults enjoy getting involved too and sharing their creativity through agriculture."

Applications will be accepted from Sept. 1 through Nov. 1. The contest is open to anyone, including

farmers markets, farm supply businesses, student groups, community associations, individuals and county Farm Bureaus.

Participants can showcase their ingenuity by converting round or square bales into animals, structures, shapes and farmscapes. Other items such as corn stalks, farm tools, pallets and pumpkins can be used alongside bales to create various scenes.

Guidelines and an entry form are available at bit.ly/3Q9gNyB. Participants are required to include a photograph of the hay bale display with each application.

The contest features five classes: best promotional display for agriculture business or commodity; best promotional display for community spirit; most creative; best agricultural theme; and best agribusiness, FFA, 4-H or school display.

Winners will be selected in each category and will receive a cash award.

Photos of contest

entries will be displayed in late November at the 2022 Farm Bureau Federation's annual convention in White Sulphur Springs, West Virginia.

Last year's contest received a record 52 entries, with displays encompassing farm animals, aquaculture, horticulture, farm machinery and farm safety. Winning entries included a scene encouraging people to drive carefully during fall harvest season; a train made of hay bales celebrating Farm Bureau and other agricultural organizations like FFA and Agriculture in the Classroom; and two creative displays of a fish and an owl made of round bales.

The displays typically are placed near schools, outside of businesses, at county Farm Bureau offices and in people's yards.

"It's fun for everyone to ride around and see the different displays throughout the counties and state," Harrell said.

particular journey in the throes of a global pandemic in the summer of 2020. Heeding guidance from the Centers for Disease Control and the governor of Virginia, classes and small group learning sessions went virtual. Clinical rotation schedules for upper classmates were disrupted. The medical school itself looked like a ghost town.

"All of my medical school experience has been during the pandemic," Ingram said. "But I feel like we've adapted really well."

When asked about the biggest surprise of medical school, Ingram said, without hesitation, the time commitment.

"I've always been really dedicated to my school work, but for medical school, I feel like I spend most of my time studying," she said. "It's all things that I really enjoy, so it doesn't bother me that much, but it's all I do."

Ingram was the recipient of the Dr. Sidney C. and Mrs. Lucy O. Smith Scholarship that supports VTCSOM students who demonstrate a financial

need. Sid Smith, a graduate of Virginia Tech, is professor of medicine at the University of North Carolina at Chapel Hill.

"I was extremely thankful," Ingram said. "It's especially helpful because I surpassed the age limit that I could be on my parents' health insurance, so that was an added expense that I have incurred."

Ingram's parents, Jean and Steve, a retired teacher's aide and a retired office equipment service engineer, respectively, are proud of their daughter.

"From a very young age, Kelly always wanted to be a doctor," Steve Ingram said. "She has the heart of a teacher, and she could always explain complex issues in ways even I could understand. I know she will be an amazing doctor."

Jean Ingram agreed. "When Kelly sets her mind to something, she gets it done," she said. "I love to watch her when she talks about what she is studying. Her eyes have a sparkle in them. I am so very proud of what she has accomplished and look forward to her future."

Former Hokie slugger Kerry Carpenter promoted by Detroit Tigers

Ranked as the No. 22 prospect in the Detroit Tigers organization this season, former Virginia Tech slugger Kerry Carpenter earned his major league promotion late Tuesday night in anticipation of making his MLB debut on Wednesday night when Detroit hosted Cleveland at Comerica Park (7:10 p.m. EDT, Bally Sports affiliates).

As of Tuesday night, Carpenter was leading all levels of Minor League Baseball this year with his 30 combined home runs, having hit 22 homers with the Erie SeaWolves (Class AA) prior to receiving his June 25 call-up to the Toledo Mud Hens (Class AAA). After 34 Triple-A appearances, the left-handed batter had a .331 batting average with a 1.064 OPS. He had 11 doubles, a triple, and eight home runs and had drawn 17 walks against 17 strikeouts.

Spending his freshman and sophomore seasons at St. John's River State College in Palatka, Fla., Carpenter transferred to Virginia Tech ahead of the 2019 season. Syncing up with the Hokies during head coach John Szefc's second season in Blacksburg, the 6-foot-2 native of Eustis, Fla. started each of the team's 53 games, leading Tech's maturing offense in doubles (13), home runs (10) and RBIs (45).

Leading the Hokies' 2019 MLB Draft

class, Carpenter was selected during the 19th round by the Tigers, elevating his batting average from .272 at Tech to .319 at the rookie level with the Gulf Coast League Tigers. Following the cancellation of the 2020 Minor League Baseball season due to the COVID-19 pandemic, he began the 2021 campaign in Double-A with Erie, recording 24 doubles and 15 home runs, scoring 57 runs with 74 RBIs across 112 appearances in the Eastern League.

Finding a new gear to his game during 2022, Carpenter improved tremendously during his second Double-A campaign in Erie, batting .411 with 13 home runs and a 1.393 OPS during the month of May. With the pro club stumbling through June, he was bumped up to join Toledo during the last week of June, delivering nine hits during his first six games with the Mud Hens (.474 batting average).

Detroit appears to be selecting Carpenter's contract at the right time. On Sunday in Iowa, he connected on a second-inning grand slam that sent Toledo out to an early 8-0 lead against the Iowa Cubs.

Carpenter is seeking to become the 22nd Virginia Tech baseball alumnus to make his MLB debut, following reliever Packy Naughton (2021 debut, Los Angeles Angels).

VDOT ROAD WATCH

The following is a list of forecasted highway projects that may impact traffic traveling in the 12-county Salem Transportation District this week. Work schedules and construction project timelines are always subject to change and weather dependent. The Salem District covers Bedford, Botetourt, Carroll, Craig, Floyd, Franklin, Giles, Henry, Montgomery, Patrick, Pulaski and Roanoke counties

Weather permitting, crews will pave, patch and repair pavement on various routes. Lane closures may be in place and flaggers may control traffic at times during daylight hours. Drivers should watch for signs and expect possible delays.

INTERSTATE 81

INTERSTATE 81 LANE WIDENING CONSTRUCTION PROJECT EXIT 137 TO EXIT 141 – A \$179 million design-build project to widen both directions of I-81 between mile markers 136.6 and 141.8 from two to three lanes is set to begin. Work will be performed on the inside and outside shoulders along a five mile section of both northbound and southbound Interstate 81 in Roanoke County and the city of Salem. The shoulders will be built up before a barrier wall can be installed for road crews to work behind. The barrier wall will be installed along the shoulders in the spring and summer. Two lanes of I-81 traffic in each direction will remain open during the project with periodic lane closures scheduled during nighttime hours or outside of peak travel times as needed. Drivers can expect the following lane closures and upcoming impacts on northbound and southbound I-81:

The project also includes replacing six bridges, widening two bridges, installing approximately 2.6 miles of sound barrier walls along northbound I-81, improving the southbound exit 137 off-ramp intersection at Wildwood Road and adding interchange lighting at exits 137, 140 and 141 are also included in the project. Expected completion in early 2026.

I-81 TROUTVILLE REST AREA CLOSURE - The Troutville Rest Area located on southbound Interstate 81 near mile marker 158 in Botetourt County is currently closed until Sept. 2, 2022. Signage indicating the closure has been posted in the rest area. During the closure, a temporary concrete barrier wall will be installed in front of the facility. The rest area facility, ramps and parking lot will be closed to the public. This project will extend the ramp into the rest area by 500 feet and the ramp out of the rest area by 2,100 feet. It will also include expanding the truck parking area at the facility by about 10-13 spaces. Work is expected to be completed in the early fall of 2022.

REST AREA OPTIONS: While the Troutville Rest Area is closed, southbound I-81 drivers can use the Fairfield Rest Area at mile marker 195 in Rockbridge County or the Radford Rest Area at mile marker 108 in Montgomery County. In addition, the Troutville Weigh Station, located on southbound I-81 at mile marker 149, will have portable toilets and parking will be temporarily available for commercial vehicles.

INTERSTATE 81 LANE WIDENING CONSTRUCTION EXIT 141 TO EXIT 143 – A project to widen the lanes on I-81 in Roanoke in both northbound and southbound directions between Exit 141 to Exit 143 has been underway. All lanes now open and will remain open through winter with periodic lane closures at night as needed. The final surface paving and markings for northbound is underway this summer during nighttime hours, 8 p.m. to 6 a.m. Drivers can expect rough pavement. Estimated completion date of the project is summer 2022.

MONTGOMERY COUNTY

I-81 NORTHBOUND AT EXIT 105 NEW RIVER BRIDGE REPLACEMENT IN MONTGOMERY COUNTY – Traffic on northbound I-81 has been switched onto the newly constructed bridge over the New River at the Montgomery/Pulaski County line. The old bridge is being demolished. Lane and shoulder closures may be in place near exit 105. Lane closure may be in effect during the week from 8 p.m. to 7 a.m. Shoulder closures may be in effect at any time during the week. Slow rolls may be performed on I-81 in the north and southbound lanes from mile marker 98 to 109. Speed limit is reduced to 60 miles per hour in the work zone. Shoulder closures will remain in place though the duration of the project. Project completion is estimated by summer 2023.

LANE CLOSURES: Nighttime alternating lane closures will be in place on I-81 northbound between mile markers 104-106 from 7 p.m. to 6 a.m. the following morning.

SLOW ROLLS: Slow rolls may be utilized periodically on both the northbound and southbound lanes from mile marker 98-109 for structural steel deliveries and setting beams.

ROUTE 615 CULVERT REPLACEMENT – As of April 11, 2022, Route 615 (Pilot Road) will undergo a culvert replacement located at the intersection of Pilot Road and Old Pike Road, across from the Pilot Post Office. Lane closures on Route 615 maintained by utilizing temporary traffic signals are expected to begin on May 9 and will be in place through August 2022. Flagging operations may be in place. Route 615 will be limited to one 10 foot lane. Expected completion is October 2022.

PATTERSON DRIVE BRIDGE WORK IN MONTGOMERY COUNTY TO DETOUR TRAFFIC NEAR ROANOKE COUNTY LINE – Through Sept. 2, Route 669 (Patterson Drive) will be closed to through traffic due to work on the bridge over Bottom Creek. The bridge is located about 0.1 mile west of the Roanoke County line near Route 669's intersection with Route 637 (Bottom Creek Lane). Traffic can detour around the closure using Route 607 (Bottom Creek Road) and Route 637 (Bottom Creek Lane). Electronic message boards will be in place to alert drivers to the upcoming bridge closure.

ROUTE 114 TURN LANE CONSTRUCTION - Road improvement construction on Route 114 (Peppers Ferry Road) of a new entrance to Belview Elementary School is underway. Motorists should expect daily lane closures controlled by flagging forces.

PAVING OPERATIONS –

RU women's soccer picked third in Big South poll

The Big South Conference released its 2022 women's soccer preseason poll Monday afternoon with Radford University selected to finish third among the conference's 10 members.

A majority of Radford's votes came in the third spot with seven total and only two votes selecting the team to finish lower than that. Radford also received one vote to finish second.

The team's 79 points were seven higher than fourth-place Longwood and 11 points behind second-place High Point. Campbell was named the preseason favorite with seven of the ten first-place votes while High Point received the other three first-place

votes.

The Highlanders are a regular near the top of the conference's annual preseason poll, being selected to finish within the predicted top-five now for 14 straight seasons. Radford is one of just two preseason favorites to win the tournament title in the last five seasons with High Point being the last program to accomplish the feat in 2021.

Radford is scheduled to open Big South play with a massive home match on Sept. 21 against Campbell, last season's Big South regular season champions Campbell. The trend of big-time home opponents continues with Longwood (Oct. 12) and High Point (Oct. 26) both coming to Cupp Stadium.
