## Radford Spirit of America festival set for July 4

RADFORD – The City of Radford and the Department of Parks and Recreation are gearing up for this year’s Spirit of America Festival, set for Thursday, July 4, 1 – 10 p.m. in Bisset Park.

The fan favorite July 4th Dog Show will be making a return to the event line-up, with registration at 1 p.m. and the show at 2 p.m.

“Please make sure you register as soon as you arrive,” the Parks and recreation department announced regarding the dog show. “Due to no parking at the Shelter #1 Parking Lot, dog show parking will be located at the first parking lot to the right on New River Drive behind the old clothing bank. It is a short walk to the dog show area. The show is at 2 p.m.

There will be a first and second place awarded in each of three categories: Most Patriotic Costume (Dog); Most

Patriotic Costume (Dog & Owner) and Best Trick on command, as well as other categories. First place prize is a gift card and second place prize is a medal. All dogs must be on a leash. Please provide water for your dog and pick up after them.

“We hope you will come out and show your Patriotic Spirit and help us celebrate July 4th,” announced Parks and Rec.

The festival also features a line-up of live music, including Cat5 Band, Motown Revue and the Embers. Children’s games are set up from 1 – 8 p.m. There will be tons of vendors, from food and drink to crafts, clothing, jewelry and more. The city will run shuttle buses to the site from 4 – 10 p.m.

Staff report

## New residency program to enrich medical education at Carilion Clinic, Virginia Tech Carilion School of Medicine

Carilion Clinic recently received accreditation to start an orthopaedic surgery residency program that will enhance the academic learning environments among its other residency programs as well as clinical rotations for students at the Virginia Tech Carilion School of Medicine.

“It’s the next progression of our commitment to education as well as training our future generations of orthopaedic surgeons,” said Joseph Moskal, professor and chair of the Carilion Clinic and the medical school’s Department of Orthopaedic Surgery. “The new residency program will enrich the academic learning environment across our graduate medical education programs [GME] and will foster collaboration and enhance educational opportunities for all residents.”

Four residents have been accepted to the five-year residency in July. Four additional residents will be added each year for a total of 20 orthopaedic surgery residents at any given time.

Medical students rotate through nine clinical areas at Carilion during the final two years of medical school. This is an integral transition from theoretical

learning to practical, hands-on medical practice. After graduation, students pursue residency programs that last from three to seven years depending upon the specialty. Last May, eight graduates matched to do their residencies at Carilion.

The new residency adds to an already robust program at Carilion that has its roots back to the early 1970s, when Roanoke Memorial Hospital established one of the nation’s first family practice residencies. This will be Carilion’s 30th residency program.

“Educating new doctors keeps the GME faculty at the top of our game, too,” said Jesse Seamon, program director, assistant professor, and orthopaedic surgeon. “It’s good for us. It helps make us better doctors and helps us train better doctors.”

Seamon said the program is good for the community because some of the residents will want to stay in the region after residency. About a quarter of Carilion’s residency graduates stay in the area each year.

“Residency programs help us attract

## NRV destinations and businesses win Best of Virginia 2024 Awards

NEW RIVER VALLEY – Virginia Living magazine recently recognized 69 destinations and businesses in the New River Valley with Best of Virginia 2024 awards for Southwest Virginia.

This annual contest invites the magazine’s readers to vote for the top destinations and businesses across the five regions of Virginia. The impressive number of winners from the New River Valley highlights how the NRV is a natural fit for anyone looking to live like a local.

The Best of Virginia 2024 award winners from Virginia’s New River Valley are listed below in their respective categories.

- Best Food & Drink
- Best Barbecue Restaurant – Bluegrass BBQ, Pembroke
- Best Breakfast/Bruch Restaurant – Palisades, Eggleston
- Best Burger Joint – Dude’s Drive In, Christiansburg
- Best Coffee shop or Roaster – Sugar and Flour, Pearisburg
- Best Fine Dining – The Palisades Restaurant, Eggleston
- Best Food Truck – Cabo Fish Taco, multiple Locations
- Best Ice Cream Shop – Scoops Arcade, Pembroke

PHOTOS COURTESY OF LEAP PERFORMING ARTS ACADEMY

Fiona Jackson (left) and Savannah Beasley have been selected to perform with the New York City Ballet this summer.

## Local talents to perform with New York City Ballet

BLACKSBURG – In an extraordinary testament to their prodigious talent, Savannah Beasley and Fiona Jackson from the LEAP Performing Arts Academy have been selected to perform with the illustrious New York City Ballet this summer. This exceptional duo will grace the stage in Saratoga, New York, in the renowned ballet “Coppélia,” showcasing their artistry alongside some of the world’s preeminent dancers.

The selection process was fiercely competitive, with over 300 young dancers auditioning and fewer than 30 making the final cut.

Savannah and Fiona’s achievement underscores their extraordinary dedication, skill, and passion for ballet, nurtured through years of disciplined training and unwavering commitment.

Nine-year-old Fiona Jackson, who performed with the children’s corps de ballet in “Swan Lake” with the New York City Ballet last summer, is thrilled to return to this esteemed stage. Her previous experience with the company has finely honed her skills for this exciting opportunity, marking another significant milestone in her burgeoning career.

Savannah Beasley, 14, who was chosen

to perform in “Swan Lake” last year but was unable to participate, is eagerly anticipating her debut with the New York City Ballet. Her journey, marked by remarkable perseverance and steadfast dedication, culminates in this richly deserved opportunity to shine on one of the ballet world’s most prestigious platforms.

The duo will be performing in George Balanchine’s “Coppélia,” considered one of the greatest comedic ballets of the 19th century.

“Coppélia” premiered in Saratoga in 1974 and was co-commissioned by the Saratoga Performing Arts Center (SPAC). Choreographed by George Balanchine and Alexandra Danilova after Marius Petipa, it has remained one of the most beloved classical works in the ballet repertory. Savannah and Fiona will participate in the program on Friday, July 12, and Saturday, July 13, in addition to the opening night’s NYCB On and Off Stage program on Tuesday, July 9, at the Saratoga Performing Arts Center (SPAC).

## Radford officer ready to teach next generation of DARE graduates

PHOTO COURTESY OF THE RADFORD CITY POLICE DEPARTMENT

The Radford City Police Department congratulates Officer J. Rose on graduating from the Virginia D.A.R.E. Training Center in Culpeper, Va. Officer Rose successfully completed an intensive two-week training course that focused on educating our youth about drug and alcohol awareness, vaping, online and social media safety, bullying prevention, and teen mental health.

# UPCOMING EVENTS

## Saturday, June 29:

### Blacksburg Farmers Market

At Market Square Park, 100 Draper Rd SW, Blacksburg; 8 a.m. - 2 p.m. The Blacksburg Farmers Market is a local, family-friendly gathering place in downtown Blacksburg featuring farmers of locally grown produce and meats, alongside artisans of baked goods and handmade crafts. For more information, visit <http://blacksburgfarmersmarket.com>.

### Radford Farmer's Market

Every Saturday through October; 9 a.m. - 1 p.m. on the grounds of Glencoe Mansion, 600 Unruh Dr. Visit weekly for an ever-changing supply of homemade goodies, crafts, plants, meats, produce, and more.

## Sunday, June 30:

### Vintage Market

At Market Square Park, 100 Draper Rd SW, Blacksburg; 10 a.m. - 5 p.m. The market is made up of a carefully chosen group of vendors selling a wide selection of quality vintage items, upcycled crafts, and occasional antiques. For more information, visit [blacksburgfarmersmarket.com/vintage-market/](http://blacksburgfarmersmarket.com/vintage-market/).

## Wednesday, July 3:

### Blacksburg Farmers Market

At Market Square Park, 100 Draper Rd SW, Blacksburg; 2 - 6 p.m. The Blacksburg Farmers Market is a local, family-friendly gathering place in downtown Blacksburg featuring farmers of locally grown produce and meats, alongside artisans of baked goods and handmade crafts. For more information, visit <http://blacksburgfarmersmarket.com>.

### Market Square Jam

Blacksburg's Market Square Jam is an official Crooked Road affiliated venue that provides fun and entertainment on Wednesday evenings, June through September. The Jam takes place at Market Square Park from 7-9 p.m. For more information and a list of hosts, please visit [blacksburg.gov/marketsquarejam](http://blacksburg.gov/marketsquarejam).

## Thursday, July 4:

## Blacksburg Fourth of July

Fourth of July parade, organized by the Mount Tabor Ruritan Club, "A Child's Fourth of July" parade starts at 2 p.m. on Eheart Street, runs through downtown on Main Street, and ends on Alumni Mall. The Town of Blacksburg will have music and fireworks at the Municipal Park, near the Rec. Center: Live music 6 -9:30 p.m. and fireworks at 9:30 p.m. (even if raining).

## Christiansburg Fourth of July Celebration

Come out and celebrate our nation's Independence Day by attending the festival on Main Street from 10 a.m. to 4 p.m. There will be live music performances by Lonesome Heart (10 a.m.), Solacousix (noon) and Isaac Hayden (2 p.m.) Food trucks and arts and crafts vendors will be along Main Street and a special kids' zone with Touch-A-Trucks will be available, too. Enjoy this free event with your family and friends all day, and at 9:15 p.m., go to the Uptown Mall or Walmart parking lots to watch the fireworks!

## Radford's Spirit of America Celebration

At Bisset Park, 49 Berkley Williams Dr., Radford, 1 - 10 p.m. This is a free event. Dog show, kids' zone, vendors and food trucks, live music, including Cat 5, Motown Revue and The Embers, and fireworks.

## Shawsville 4th of July Parade and festival

Shawsville Ruritan Club's 4th of July Parade will begin at 4 p.m. After the parade, there will be a concert with Big Daddy Ray and special guest Jerry Wimmer before the Independence Day fireworks show. There will also be a car show by E&E Automotive and a cornhole tournament by Shawsville Ruritan Club during the in-field concert festivities. The Shawsville Ruritan's will host the 4th of July Cornhole Tournament, sponsored by First Bank and Trust, on Old Town Fields at 6 p.m.

## Monday, July 8:

### Montgomery County Board of Supervisors meeting

Public meetings are normally held the second and fourth Monday of each month at the Montgomery County Government Center, 755 Roanoke St. in Christiansburg. Closed sessions begin at 6 p.m. if needed. Open sessions begin at 7:15 p.m. Citizens are invited to attend and allowed to speak at each meeting.

All regular meetings of the Board of Supervisors are rebroadcast on Montgomery County Comcast and Shentel Channels 190 daily.

### Radford City Council meeting

The Radford City Council will hold its regularly scheduled meeting at 7 p.m. in council chambers at the Radford Municipal Building, 10 Robertson St., Radford. Citizens are invited to attend and allowed to speak at each meeting. See the agenda at [www.radfordva.gov](http://www.radfordva.gov).

## Tuesday, July 9:

### Blacksburg Town Council meeting

The council meets in regular session the second and fourth Tuesdays of each month at 6:30 p.m. in the Roger E. Hedgepeth Chambers of the Blacksburg Municipal Building, 300 S. Main St. These meetings are open to the public and televised live on WTOB Channel 2.

### Christiansburg Town Council meeting

Regular town council meetings are held on the second and fourth Tuesday of each month beginning at 7 p.m. in the Council Chambers of Town Hall (100 E. Main St.). The public is welcome and encouraged to attend, with a citizen hearing time reserved at each meeting for residents to bring any matter they desire before the entire council.

## On-going:

### Applications open for healthcare workshop for people with disabilities

Individuals with disabilities who live in Radford City and Floyd County can apply for a program presented by the New River Valley Disability Resource Center. "Improving Health Literacy Through Technology" is a program help people with disabilities gain better access to healthcare. Participants receive a free iPad after completing six weekly, one-hour workshops exploring how to use technology to take better control of health and social support needs. Workshops run Aug. 1 through Sept. 5. Applications available at [www.nrvdc.org](http://www.nrvdc.org) or by calling 540-266-1435 or email at [outreach@nrvdc.org](mailto:outreach@nrvdc.org), and at the Radford and Floyd libraries. The application deadline is Fri., July 12.

## Lightning Safety Awareness Week: Keep yourself and your property safe

RICHMOND—With lightning five times hotter than the surface of the sun and reaching temperatures of 50,000°, the effects of a lightning strike can be devastating.

That's why the National Lightning Safety Council is sharing information on how to stay safe during thunderstorms and lightning events during National Lightning Safety Awareness Week, June 23-29.

"Lightning is the weather threat that affects most people, most of the time, in most regions of the U.S.," said Kimberly Loehr, a lightning protection specialist and NLSC member. "Although approximately 90% of lightning victims survive being struck, injuries can be

severe and debilitating."

The NLSC warns that no place outside is safe during a thunderstorm, and June, July and August are peak months for lightning activity across the U.S. This time of year also is peak time for outside summer fun, and almost two-thirds of lightning deaths from 2006-2023 occurred when people were enjoying outdoor activities.

To help keep yourself safe both outside and indoors, take the following precautions:

If you hear thunder, quickly get to a substantial building or hard-topped metal vehicle.

Avoid open areas, and don't be the tallest object.

Stay away from isolated tall trees, towers, utility poles and metal conductors like wires or fences.

When with a group of people, spread out.

Avoid contact with water, plumbing and anything plugged into an electrical outlet.

Stay away from outside doors and windows.

Wait at least 30 minutes after the last thunder before returning outside.

Additionally, lightning is a leading cause of property loss in the U.S. The Insurance Information Institute reported there were over 62,000 lightning claims in 2022, totaling \$950 million. Virginia ranked in the top 10 states for homeowners insurance lightning loss claims.

"In our experience handling lightning-related claims, the one thing we see is the damage is always catastrophic," said James Walker, senior claims investigator for Virginia Farm Bureau Mutual Insurance Co. "From causing fires in

structures to destroying electrical systems and electronic equipment, the effects of lightning are costly."

Lightning can strike directly or strike nearby structures and travel underground into phone, cable and electrical lines. To protect houses, property and the people inside, homeowners can have lightning protection systems professionally installed to ground and dissipate lightning's electrical discharge.

"Lightning just wants to get to the ground, and a safety standard-compliant lightning protection system helps it get there without harmful impact to the structure, contents or building systems," Loehr said.

For more information on lightning facts and safety, visit [lightningsafetycouncil.org](http://lightningsafetycouncil.org). To learn about lightning protection systems, visit the Lightning Protection Institute at [lightning.org/technical/#how-system-works](http://lightning.org/technical/#how-system-works).

Virginia Farm Bureau

## Virginia farmers brace for drought as hot, dry weather persists

RICHMOND—While summer drought conditions are not uncommon in pockets of Virginia, farmers statewide are expressing concern about the forecast. An ongoing string of hot days with low humidity will likely affect their crops.

Those abnormally dry drought conditions are persistent throughout the commonwealth, according to a recent crop progress report from the National Agricultural Statistic Service's Virginia Field Office. Temperatures are expected to reach highs in the upper 90s in coming weeks.

"We were getting rain, rain, rain every weekend," said Danielle Bappert, regional crop agent for Virginia Farm Bureau Crop Insurance. "Then it just cut off. The farmers I talk to are nervous, looking at their weather apps, with not a drop of rain in sight."

However, some crops thrive in this weather.

"There was a very good first cutting of hay around the state, and some farmers have already gotten a good-quality second cutting," noted Robert Harper, Virginia Farm Bureau Federation grain division manager.

Since Virginia's wheat and hayfields received significant rain in the spring, they are faring well.

"Everyone is telling me it's their best hay crop in years," explained Bappert. "And it's ideal for wheat to be dry when

it's cut. Last year it rained a lot during that time frame, which lowers quality. But for most farmers, corn and soybeans are the big money makers."

With long summer days, "photosynthesis is wide open," Harper said. "When water cuts off, it puts those crops under stress."

The lack of rain already has prevented some growers from double-cropping—growing two or more crops in the same area during a single crop year, like planting soybeans after harvesting winter wheat.

"Farmers are telling me they are not planting them," Harper said. "They are waiting for rain because they can't hammer seed into ground that's hard as a brick!"

The unusual weather may be attributed to the shift from El Niño to La Niña.

The summer will bring a climatic pattern change, said U.S. Department of Agriculture meteorologist Brad Rippey. El Niño is the climate phenomenon warming equatorial waters in the Pacific.

"The transition has already begun to the opposite conditions, known as La Niña, with colder-than-normal waters in the same region," he said. "The shift is coming."

The climate transition can result in "super-dry conditions" followed by a highly active hurricane season predicted this year, Bappert noted.

# Recognizing heat-related illness signs and symptoms

While heat is the number one weather-related cause of death in the United States, many of these deaths are preventable, says an emergency medicine doctor at the Virginia Tech Carilion School of Medicine.

Dr. Stephanie Lareau says it is vital to recognize signs and symptoms of heat-related illness.

“Understanding the symptoms of exposure to extreme heat and managing the effects is crucial and that includes knowing early signs of heat exhaustion to prevent progression to heatstroke,” said Lareau.

According to the U.S. Department of Health and Human Services, there were more than 2,300 heat-related deaths in 2023, compared to just over 1,600 in 2021. “Being prepared and educating yourself on the effects of heat are key to prevention,” says Lareau.

Heat exhaustion vs. heatstroke  
“The CDC considers heat exhaustion a less severe precursor to heatstroke,” said Dr. Lareau. “To help an individual suffering from heat exhaustion first prevent further exposure by getting them into the shade or air conditioning if possible. Then begin cooling them with immersion in cold water or misting them with cool water.”

Symptoms of heat exhaustion include:  
• Feeling faint or dizzy  
• Sweating profusely  
• Cool, pale, clammy skin  
• Vomiting, nausea  
• Rapid pulse  
• Muscle cramps  
“The hallmark of heatstroke is an altered mental state, such as confusion

or inability to walk,” said Lareau. “This is a potentially life-threatening medical emergency, so you should call 911 and work on cooling the person down. Simple things such as getting them out of direct sun, spraying them with cool water, and immersing them in water (if they are awake and able to help) can help while you are awaiting more aid. The fastest and preferred way to cool someone is immersion in cold water.”

Symptoms of heatstroke include:  
• Pulsating headache  
• Loss of consciousness  
• Hot, red, dry skin  
• Temperature above 103  
• Vomiting, nausea  
• Rapid, weak pulse  
• Keeping hydrated  
“If you’re working outdoors under the summer sun, it’s important to stay well hydrated,” says Lareau. “Make sure you have water available and are drinking it at regular intervals. A good rule of thumb is to make sure your urine looks light yellow to clear. Take frequent breaks and get out of the sun. If possible, try to get your work done during early morning or late evening when the temperatures are lower.”

Exercise early to avoid the midday heat  
Dr. Lareau stresses that just as with work, get outside early for workouts to avoid midday heat. “Wear light-colored, breathable clothing and be sure to drink plenty of fluids. Exercise tolerance can decrease when it’s hot, so plan accordingly. Slowly increase exercise to help your body become acclimatized to increasing temperatures. On a day with

PHOTO BY PHEELINGSMEDIA / ADOBE STOCK VIA VIRGINIA TECH

a high heat index, consider going for a swim or running on a treadmill indoors instead of running outdoors.”

If you plan to hike or participate in another longer outdoor activity, remember that in hot weather, you need more water than usual. “If you expect to rely on streams or creeks for your water supply, talk to those familiar with the area to make sure they aren’t dry. If you’ll be doing strenuous activities, it’s essential to bring electrolyte drinks as well to avoid exercise-induced hyponatremia, which is low sodium or salt levels that can lead to confusion and even seizures.”

“As with any outdoor activity, it’s also helpful to get acclimated to the heat before embarking on ambitious

adventures. If you are on medications for blood pressure, heart problems, or psychiatric conditions, you should talk to your doctor about these medications and your outdoor plans. Some medications can predispose individuals to heat illness or dehydration,” says Lareau.

In addition to her work in the Carilion Clinic emergency department and teaching at Virginia Tech, Dr. Stephanie Lareau is a board member of the Wilderness Medicine Society, which helps medical professionals get additional training in environmental emergencies such as hypothermia, hyperthermia, and other weather-related outdoor problems. Campers gather for a group photo after a fun day at Buddy Camp.

# Jill's Buddy Camps combine at Huckleberry Park for fun-filled day

**Angelica Ramos**  
Contributing Writer

CHRISTIANSBURG- For the first time in many years, Christiansburg Jill's Buddy Camp and Salem Jill's Buddy Camp have come together for summertime fun.

Jill's Buddy Camp is a one week summer program for children with special needs where they are paired with a "buddy" who is a teenage volunteer. Jill's Buddy Camp was originally founded as "Buddy Camp" by Dr. Tommy Barber in 1981 and was brought to Salem in 1984. "Buddy Camp" wasn't renamed until 2013 after a former "buddy" who had gone on to become a teacher and reading specialist for hearing-impaired children in Washington D.C., Jill Bailey Chenet, had passed away tragically. Dr. Barber and his team renamed it "Jill's Buddy Camp" and started the "Jill's Buddy Camp Foundation" in 2013 in her honor.

With the help of Christiansburg Parks and Recreation through Montgomery County Public Schools, Jill's Buddy Camp has a Christiansburg branch as well. For the first time in 10 years, according to Christiansburg Parks and Recreation Director Brad Epperley, the Salem and Christiansburg branches held their first combined camp day at the new Huckleberry Park on June 26, 2024. This combined event hosted both chapters and their buddies, a petting zoo, fun in the sun on the splash pad, smiles and laughter on the playground and plenty of pizza for lunch. Mayor Micheal Barber was in attendance and enjoyed spending the morning with the buddies on the playground and even enjoying some pizza himself.

With Christiansburg Parks and Recreations mission including accessibility and inclusivity, their involvement with Jill's Buddy Camp aligns with that as the events and camp activities both branches host have a long lasting effect on children with special

needs and the volunteers that care for them.

"This camp is very special to me," said Epperley, "as it provides an opportunity for children with disabilities to enjoy the camp experience and form lifelong friends with their buddies. This is our 10th year in Christiansburg. When we started the camp 10 years ago, my plan was for the camp to make a great impact on the campers. What I have found over the past 10 years is that the campers have made just great of an impact on the buddies, teachers, staff and myself.

Being able to share today with Salem's Jill's Buddy Camp was very special for me. Tommy Barber and I worked on this for a while and even spoke at the NRPA (National Recreation and Parks Association) and VRPS (Virginia Recreation Parks Society) about the camp and the impacts it can make within the community. We were able to get other similar camps started in other areas as our ultimate goal is to see growth of the camp. Having both of our camps together today [June 26] really brought a great deal of joy to me."

# Christiansburg Town Council hears amendment on subdivisions

**Angelica Ramos**  
Contributing Writer

CHRISTIANSBURG- The Christiansburg Town Council held a public hearing on June 25, 2024 regarding subdivisions of property to align with the Code of Virginia.

According to a staff report provided by the Planning Commission, a request was made in 2023 to amend a Chapter 40 of the town code regarding subdivision of lots. The staff report claims that the amendment aims to "streamline the approval process" and align the code with current Code of Virginia standards.

The amendment, according to the ordinance, now defines 'plat' as "a schematic representation of land which is to be or which has been divided."

The amendment also states, "The town council may appoint an agent to administer this chapter. The agent shall review subdivision plats as described in this section. Final approval of disapproval shall be made by the town council through the agent of the planning commission, unless otherwise stated in this chapter. The agent or planning commission may approve lot line revisions, lot line vacations, and accept on the behalf of the town publicly dedicated easements including, but not limited to, utility, access, and drainage easements."

According to the presentation given to town council, the agent appointed can approve subdivisions up to ten lots and approve lot line adjustments. This also allows the planning commission to potentially approve preliminary subdivisions up to 49 lots and approve public rights-of-way. The presentation also stated that the town council would be able to approve streets less than 50 feet in width, all new one-way streets, and may require subdividers of residential lots to set aside land for public or semipublic use like parks. The idea behind the amendment is to help make it more efficient for the town to approve or disapprove subdivision of land.

Council Member Kim Bowman spoke to some citizen concerns regarding the amendment and what that would mean. She said she will not be voting to approve this amendment.

"Some of them have said," Bowman said, "that they don't want, first of all, the elected officials giving over the power that they appointed you [the town council] to. Some of them have said they've had trouble in other areas and they don't want power going to one person if that person does not favor them for any reason."

Christiansburg Town Council is scheduled to vote on this amendment July 11, 2024.

# OBITUARIES

Dr. Douglas Delano Warren passed away peacefully at home with his wife of 61 years by his side Tuesday, June 25, 2024, at 83 years old.

Born Aug. 2, 1940, Doug met the love of his life, Lydia Lee Harley, at Claytor Lake State Park while he was "studying" with fellow Virginia Tech students who had been friends since childhood. He and Lydia married in 1963 and lovingly raised three sons. As a young father, Doug gave his life to Jesus Christ who always remained his Lord and Master.

Most of Doug's childhood was spent in Blacksburg, and he graduated from Blacksburg High School in 1958. Upon receiving his bachelor's degree from Virginia Tech, Doug began his long teaching career instructing math, English, and blueprint reading. While teaching both day and night classes to support his family, Doug pursued his master's degree, also from Virginia Tech. He then accepted the opportunity to further his education with a doctoral degree in Vocational Administration at Auburn University.

Doug was respected by many in the community beginning with his service to the area's students through

## Warren, Dr. Douglas Delano

his career with New River Community College. He began as one of six faculty members at New River Vocational-Technical School, served as Chief Executive Officer in the transition as it developed into the community college, eventually serving as a dean until his retirement in 1996. His service to the community didn't end there, as he also served on the Pulaski County Planning Commission (1986-2021), Pulaski County Public Service Authority (2003-2020), New River Valley Resource Commission (2010-2024), the Board of Directors for the Pulaski County Fair, and as an integral member and technician of the sound board at First Baptist Church of Radford. He served people beyond his own community on mission trips to South Dakota and Czech Republic, and on the Virginia Baptist Disaster Relief Team, serving as a lead kitchen chief in disaster-stricken areas such as Brooklyn, N.Y.; Toronto, Canada; Punta Gordo, Fla.; Picayune, Miss., and several locations in W.V.

Beyond his career and service, Doug was a man of many talents and hobbies. He built his own home in Snowville, Va., known to many for the pick-your-own Blueberry Hill Farm - bushes he planted over 40 years ago. He learned to weave, filling their home with beautiful rugs. Never one to sit still, Doug could play an assortment of musical instruments: piano, guitar, autoharp, banjo, harp, violin, trumpet, and clarinet. Always an adventurer, he completed a cross-country

bicycle trek from Seattle, Wash. to Asbury Park, N.J., and he was co-owner and pilot of a small plane, with which he enjoyed flying family and friends to various parts of the country.

Doug is preceded in death by his parents and two grandsons, Bryson Hall and Jacob Pedigo. He is survived by his loving wife, Lydia Warren; three sons, Douglas "Rusty" Warren, Jr. (Shanda), Brandon Warren (Jill), and Travis Warren (Sarah); six grandchildren, Colleen Warren Bays (Robert), Victoria Pedigo, Ben Warren, Bergren Cliff, Elliott Pedigo (Shelby), and Phoebe Warren; great-granddaughter, Adalynn Pedigo; and sister, Joyce Ellis (Chris).

A celebration of life is scheduled for today, Saturday, June 29 at First Baptist Church in Radford, at the corner of Third and Downey St. The family will receive visitors from 12:30 to 1:45 p.m., followed by a funeral service at 2 p.m.

In lieu of flowers, the family requests that donations be made to the Dr. Douglas D. Warren Endowed Scholarship fund at New River Community College. Contributions may be made online ([www.nr.edu/giveonline](http://www.nr.edu/giveonline)) or by mail (New River Community College, Educational Foundation, 5251 College Drive, Dublin VA 24084). Please reference "Doug Warren" on your gift.

The Warren family is in the care of Mullins Funeral Home & Crematory in Radford.

### NON-DENOMINATIONAL

**Central Church**, 803 Wadsworth Street, Radford. 639-3529. Sunday Services 10:30am Sunday School 9:00am. Child care is provided. [www.centralchurchradford.org](http://www.centralchurchradford.org).

# Radford

## WORSHIP DIRECTORY

### Avoid the Mistakes

Read Judges 7:1 through 8:35

Does the following scenario point to any common details in people's lives?

Do people often pray hard and study Scripture in order to seek God's provision when struggling financially? Do these same people attend church weekly and ask other believers to pray for their needs. As their accounts increase to a comfortable amount, do they begin getting an early start on their workdays to put in more hours at the office. Do they cut back on prayer and Bible study.

Gideon made the gold into an ephod, which he placed in Ophrah, his town. All Israel prostituted themselves by worshiping it there, and it became a snare to Gideon and his family (Judges 8:27).

Gideon, as a young and inexperienced warrior, was called by God to engage a vast invading army. Gideon's life had been tough, and his circumstances forced him to draw close to God. But, with the enemy's defeat and the rich spoils of the battle, Gideon misused his blessing.

Prayer Suggestion: When you enjoy a season of success, pray even harder that God will keep you in a deep relationship with himself.

Quicklook: Judges 8:22-27

# OBITUARIES

## Akers, Donald “Bub” Eugene

Donald “Bub” Eugene Akers, 75, of Christiansburg, passed away Sunday, June 23, 2024.

Bub was an auto mechanic for over 50 years and had owned his own shop at one time. He was very involved in auto racing and passed his love of that down to his son “Bubby.” Don loved farming and raising cow/calf pairs. He loved watching his grandson, Tayt, rodeo and rope and loved nothing more than being around his loving family. He was preceded in death by his parents, Archie Ervin and Frances Lytton Akers; and his brother, Ronald Dean Akers.

Survivors include his loving wife of 56 years, Carolyn Lester Akers; son, Don “Bubby” Akers; daughter and son-in-law, Tracy Trump (Ricky); grandson and his pride and joy, Tayt Trump; step-grandchildren, Katie Trump (Seth)

and Ellie Trump; great-grandchildren, Arcadia, Liam and Ava; beloved canine companion and farm buddy, Gracie; siblings and their spouses, Dana Lester (Tommy), Dale “Brown” Akers (Sarah) and Teresa Hall (Perry); special nephew, Zach Thornton (Jamee); special niece, Emily Duncan (Dylan); sister-in-law and brother-in-law, Kathy and Steve Thompson; and many other nieces, nephews, relatives and special friends.

The family received friends Thursday, June 27, 2024, at the Mullins Funeral Home in Radford. Funeral services followed with Pastor T. Michael Bond and Perry Hall officiating. Burial followed in Lytton Cemetery in Walton.

The Akers family is in the care of Mullins Funeral Home & Crematory in Radford.

## Slusher, Sr., James “Jim” Phillip

James “Jim” Phillip Slusher, Sr., 76, of Radford, passed away at his home surrounded by his family Saturday, June 22, 2024.

He was a Class of '65 graduate of Radford High School where he was an outstanding athlete and defensive end who was selected to represent the State of Virginia in the Virginia-West Virginia All-Star Football Game. He was a graduate of New River Community College and completed his four-year electrician apprenticeship at Lynchburg Foundry. Over the years he was employed with AT&T, Volvo, and retired as maintenance manager at the VA Western Regional Jail.

He was a longtime member of Grace Episcopal Church where he served as Jr. Warden for many years, taking care of the buildings and grounds and upgrading the facilities.

In his youth, Jim was a guitarist for “Little Dave and the Chancellors,” a local band loved by the area teenagers. Music, especially bluegrass, was always a part of his life. He never met a stranger, was humble, kind, quick-witted, and so very proud of his growing family. He adored his wife, three children, and nine grandchildren, excitedly waiting for grand #10 in October. He worked hard to provide for his family and only missed five days in a 58-year career! A gentle giant and funny dad to his children's friends.

He loved his church family, fishing, golf, and, most of all, playing with and teasing his grandchildren. A master electrician who could fix anything and was always willing to help someone else.

Jim fought major illnesses for the last five years, but never complained and always said, “Some folks are in worse shape than I am.” He will be greatly missed by all who loved him!

He was preceded in death by his parents, Jake C. and Frances T. Slusher; and brother, Jake R. Slusher.

Jim is survived by his loving wife of 58 years, Lee Jordan Slusher;

daughters, Beth Slusher Davis (Bobby) of Radford, and Dr. Jennifer Slusher (Annie) of Roanoke; son, James P. Slusher, Jr., P.E. (Kim) of Charlotte, N.C.; granddaughters, Lauren Shifflett (John) of Radford, Haley Davis (Daniel) of Dandridge, Tenn., Livie Harvey-Slusher of Roanoke, Rae Harvey-Slusher of Roanoke, Jordan Harvey-Slusher of Roanoke, Maggie Slusher of Charlotte, N. C., and Allie Slusher of Charlotte, N. C.; great grandsons, Clayton Shifflett and Cooper Tweed; sister-in-law, Julie Slusher of Roanoke; nephew, Richie Slusher; and many other relatives and friends.

The family received friends Friday, June 28 at the Mullins Funeral Home in Radford. A celebration of Jim's life will be held at 11 a.m. today, Saturday, June 29 at Grace Episcopal Church in Radford with Rev. William Yagel officiating. A reception will immediately follow the service.

In lieu of flowers, please make donations in Jim's memory to Grace Episcopal Church, Fourth Street, Radford, VA 24141.

The Slusher family is in the care of Mullins Funeral Home & Crematory in Radford.

PHOTO BY MAX ESTERHUIZEN FOR VIRGINIA TECH

**Sydney Johnson (at left) and Pablo Sobrado found a way to synthesize on a large scale a naturally occurring compound that hasn't previously been used for antibacterial applications.**

## There's more to blue cheese than just the stench

Marbled veins of blue line the otherwise antique white surface.

As you approach, the pungent smell fills your nostrils, akin to gym socks for some.

But there's far more to blue cheese than just the stink. The marbled veins of blue, which are edible *Penicillium* molds, produce compounds with antifungal, antibacterial, and other biological properties in high doses also known as natural products.

Virginia Tech researchers found a new, efficient way to synthesize some of these beneficial blue cheese compounds in a way that avoids the use of harmful chemicals. Previously, the synthesization of these compounds was either extremely low in yield or required the use of harmful or dangerous chemicals.

“This discovery explains the mechanism behind a new reaction in our field, filling a knowledge gap,” said Sydney Johnson Ph.D. '24, the lead author who earned her doctorate in biochemistry.

Antibacterial resistance has become a growing problem for society, which was caused by the overuse of natural products used on the market for decades, Johnson said.

By finding a way to synthesize on a large scale a naturally occurring compound that hasn't previously been used for antibacterial applications, Virginia Tech researchers were able to evade the existing antibacterial resistances.

“We work with an enzyme that can help create a natural product that has a unique structure that would make it very difficult for pathogens to become resistant,” Johnson said. “Existing pathogens would have to evolve to be resistant to this new compound.”

The paper was recently published in *ACS Biochemistry*.

“This publication lays the foundation to utilize the enzyme to synthesize the natural products,” Johnson said.

“This publication lays the foundation to utilize the enzyme to synthesize the natural products,” Sydney Johnson said.

“I like to train innovative scientists that work on trying to move the science

forward by developing projects that move the entire field forward,” said Pablo Sobrado, professor of biochemistry who leads the Sobrado Lab and is also a researcher on the paper. “Sydney achieved that with this research.”

Enzymes are proteins that help speed up chemical reactions. For their experiment, researchers used an enzyme that produces something called roquefortine L. Parts of its chemical structure are biologically active, which means that it can have beneficial properties such as antimicrobial activities.

In addition, the production of roquefortine L is central to the production of other molecules called glandiclone, meleganin, and oxaline, which have been shown to have broad antimicrobial properties and promising anticancer effects against human breast and leukemia cancer cells.

This enzyme attaches two hydroxyl groups to a nitrogen atom, which are functional groups found in sugars and alcohols. A hydroxyl group consists of one hydrogen and one oxygen atom. Through a complex chemical process, the hydroxyl groups then develop an entirely different functionality.

“This has not been studied in detail before, and Sydney showed how the enzyme holds on first to the product that has the one hydroxyl group, attaches the second group, and then obtains the final product,” Sobrado said.

Many fungal species make this compound naturally, and it's relatively new in the biochemistry field to research how to synthesize these processes at a large scale. According to the researchers, the reaction mechanism and the actual chemistry that takes place on the involved nitrogen atom is completely novel from other publications.

“This publication lays the foundation to utilize the enzyme to synthesize the natural products,” Johnson said. “The improvements make this process much more marketable. Eventually, we could get a drug containing one of these compounds or something similar to it to the market.”

Tom Soladay for Virginia Tech

## Controlling timing of electrical pulses may offer promise for treating brain injury

An awkward beat doesn't help on the dance floor, but it could help people who are recovering from mild traumatic brain injury.

Publishing in the *Journal of Neurotrauma*, Virginia Tech scientists with the Fralin Biomedical Research Institute at VTC show that specifying the timing pattern of neurostimulation — impulses used to activate the brain's own electrical signaling mechanisms — can rebalance the strength of synaptic connections between nerve cells, selectively up- or down-regulating those connections.

While the timing pattern of electrical signaling is important in the normal brain, it also plays a role in regulating the strength of synaptic connections after brain injury, particularly strengthening them with the same patterns that would otherwise weaken those connections in the normal brain.

The study underscores the importance of considering the use of more natural, noisier patterns of impulses of activity for neurostimulation in attempts to more effectively treat brain disorders including, but not limited to, concussions and other mild traumatic brain injuries in people. More than 2.1 million head traumas are treated in U.S. emergency departments each year, according to the Centers for Disease Control and Prevention, with many other such injuries occurring without medical attention.

“Our results suggest that we may be able to use different patterns of brain stimulation to help treat mild traumatic brain injuries,” said Michael Friedlander, a co-corresponding author on the paper in whose laboratory the work was carried out. Friedlander is the executive director of the Fralin Biomedical Research Institute at VTC and Virginia Tech's vice president for health sciences and

technology.

“By adjusting things like the timing, frequency, and consistency of the stimulation, we might be able to strengthen specific connections in the brain, which could help improve brain function after injury. It has not escaped our attention that the electrical and synaptic signaling in the living brain is generally anything but regular,” Friedlander said. “Thus, we wanted to build on that natural noisiness that the brain uses to see if patterns that mimic those might have some intrinsic capacity to activate signaling pathways to re-adjust strengths between nodes in living neuronal networks that have otherwise been functionally compromised such as occurs after injury.”

Brain stimulation is increasingly being used in the clinic to treat a variety of neurological and psychiatric disorders such as depression, Parkinson's disease, chronic pain, and Alzheimer's disease but little attention has been paid to the patterns of the stimulation other than frequency.

“While our study in laboratory rats is directed specifically at mild traumatic brain injury, it may also provide useful information to be applied to treatments of other brain conditions in people,” Friedlander said.

The study is among the first to look at the effects of systematically and precisely controlling the timing patterns of neurostimulation.

Notably, the researchers found that irregular patterns at certain frequencies appear to affect injured brains differently than normal brains, strengthening their connections with other nerve cells, while in the normal brain, those same patterns weakened the connections.

“Neurostimulation can be delivered in regular intervals like a metronome,

IMAGE COURTESY OF ADOBE STOCK

**Virginia Tech scientists with the Fralin Biomedical Research Institute at VTC have published a study in the *Journal of Neurotrauma* that shows that certain timing patterns of neurostimulation — impulses used to activate the brain's own electrical signaling mechanisms — can play a role in rebalancing the strength of connections between nerve cells, particularly after brain injury.**

but it can also be delivered in a way that is more irregular,” said Quentin Fischer, research assistant professor at the Fralin Biomedical Research Institute in the Friedlander laboratory and co-corresponding author of the study.

“It is somewhat like the difference between a very organized concerto piece and jazz, where the musicians are playing around with the patterns,” Fischer said. “We found that highly irregular patterns of stimulation in the normal brain led to a decrease in the strength of connections between neurons, but in the injured brain, that same irregular pattern of stimulation, at the same frequency and continuity, resulted in a strengthening of those connections.”

The findings underscore the importance of timing signals to optimize neurostimulation therapies for mild traumatic brain injury and other brain disorders, suggesting potential avenues for more effective treatment strategies.

“There is a dramatic difference between the normal brain and the injured brain in respect to how the synapses respond to different patterns of stimulation,” Friedlander said. “A mild traumatic brain injury, despite its name, can have serious and lasting effects on cognitive function, mood, and overall quality of life. This highlights the critical importance of understanding the best approaches for delivering optimized therapeutic neurostimulation.”

## Kanipe headed to diamond at Butler

Marty Gordon

NRVsports@ourvalley.org

A former Radford High School (21) hurler is on the move.

Alex Kanipe will play this coming fall at Butler.

He spent last season at Bluefield State, where he pitched 72.2 innings with an 8-3 record, 3.84 earned run average, 89 strikeouts and only 27 walks. The 6-2, 200-pound rightie also held opposing batters to a .252 clip.

Kanipe cited the Butler coaching staff for a recent in choosing the school.

"They (the coaches) can help me to get where I want to be, and also, Butler is a very good academic school," he said.

Kanipe, who previously started his career at Patrick

PHOTO COURTESY OF ALEX KANIPE

### Alex Kanipe

Henry Community College, has summer league experience with the Martinsville Mustangs. So far this season, he has pitched 22.2 innings with a 1-0 record, 4.36 ERA and 24 strikeouts.

Butler University is a private university in Indianapolis, Indiana.

Butler's athletic teams, known as the Bulldogs, compete in Division I of the NCAA. In 2013, Butler became a founding member of the reconfigured Big East Conference.

The baseball team finished 20-25 this past spring with only a 5-16

record in the conference.

"My goals on the diamond are to help Butler win a Big East title, get to the professional level and impact my teammates and people around me in a positive way," Kanipe said.

At Butler, Kanipe plans on majoring in either engineering or business.

## Light MED player of year

Marty Gordon

NRVsports@ourvalley.org

Auburn High School dominated almost every Mt. Empire District Spring all-star teams announced on Wednesday.

Katie Light was player of the year for girls' soccer, while Brody Hensel was the player of the year for baseball.

In addition, Adam Ritchie was the MED's girls' soccer coach of the year, while Eric Altizer took the similar honor for baseball.

Light was joined on the first-team All MED girls' soccer list by teammates Grace Harris, Kenleigh Smith, Logan Mundy and Jillian Tucker. Second team honors were given to Stacy Lewis, Kristen Pack, Beverly Warner, Rowan Price, Allison Funk and goalkeeper Kennedy Marshall.

Hensel was joined on the first-team all-MED baseball by pitcher Josh Givens, first baseman Zac McGlothlin, outfielder Jared Lavergne and DH Brady Hale. Graham Alley and Mitchell Hale were named to the second team.

Four players from Auburn were named to the first-team boys' soccer squad. The list included Jared Bradley, Nick Millirons, Cole Jones and Jude Mear.

Seven players from Auburn were named to the All-MED softball squad. First teamers included pitcher McKenzie Booth, second base Kayle Ramrattan, outfielder Ariel Mullins and Hope Wilson.

The second team list included pitcher Faith Wilson, outfielder Johnnie Gaynor and Leah Wimmer.

## Teams vie for spring softball tourney championship

Team Laser took the championship in the spring softball tournament completed Wednesday night by the Blacksburg Parks and Recreation department.

## 'Enter Sandman' electric entrance in college football

It's a Saturday night in Lane Stadium, just minutes before kickoff.

Players begin filing into the narrow tunnel. Anticipation is building among the thousands of excited fans packed in the stands. Cheerleaders hold up "LET'S GO" and "HOKIES" signs as the crowd chants.

Then, the first note of heavy metal band Metallica's 'Enter Sandman' plays, and the crowd erupts with excitement as the entire stadium jumps in unison. The Hokies' head coach takes a deep breath, reaches up to touch the

legendary Hokie Stone above the tunnel's exit, and finally – it's time.

The team bursts out of the tunnel and onto the field while fireworks and pyrotechnics ignite, electrifying the crowd and sending waves of exhilaration and goosebumps through every person in the stadium.

"It's just a different type of feeling," wide receiver Ali Jennings explained when describing the experience. "I get chills every time I think about it — the stadium actually shakes."

Regarded as college

football's greatest entrance, 'Enter Sandman' dates back to Aug. 27, 2000, when Virginia Tech installed the first videoboard in Lane Stadium. A new videoboard means a new walkout song, and 'Enter Sandman' won out over 'Welcome to the Jungle' by Guns N' Roses and 'Sirius' by The Alan Parsons Project.

However, the first time the team actually used it in a game was against Georgia Tech, and the game itself was delayed then canceled due to thunderstorms. In fact, ESPN analyst Lee

Corso's rental car was struck by lightning as the announcer was preparing for the game.

'Enter Sandman' got its "jump" start a few years later on a chilly night when one band member started jumping to warm up. Before long, several other band members joined in, and the spontaneous act evolved into the legendary entrance.

"The next thing you know, the whole band is jumping up and down, and then the next thing you know, the whole stadium is jumping up and down," former director of the Marching

Virginians David McKee said in an interview with the Washington Post in 2009. "It was one of those accidental traditions."

What started as a few band members jumping up and down led to an entire stadium of 66K bouncing fans – and seismographs have actually registered the shaking and noise.

In 2011, against major ACC rival, Miami (Fla.), a seismograph detected noticeable activity centered on when the team entered the stadium. Similar situations occurred in 2015 during a game against Ohio State and again in 2021 during the home opener against the nationally ranked North Carolina.

While the readings weren't quite at the level of an earthquake, it's safe to say that Hokie fans were loud.

'Enter Sandman' eventually carried over to both the men's and women's Virginia Tech basketball teams, and even some graduations. The excitement behind the movement took a turn when the Hokies hosted the first round of the NCAA Women's Basketball Tournament at Cassell Coliseum in 2023.

Due to the NCAA tournament being viewed as a neutral site game, 'Enter Sandman' was banned from being played by the NCAA at the event to keep the game as neutral as possible. However, that

didn't stop Hokie Nation from singing the lyrics themselves to create a home-court advantage.

Even Metallica has expressed its support for the iconic tradition. Prior to football's 2011 Miami game, the band recorded a video that was placed alongside the entrance hype video and music.

"The stadium was ... probably as loud as it has ever been," Virginia Tech football's legendary former coach Frank Beamer said. "I appreciate that part."

Now entering its 25th year of existence, the iconic 'Enter Sandman' has become synonymous with Virginia Tech football and Hokie pride. The hype-filled walkout energizes the crowd of Hokies, intimidates opponents and helps create a gameday experience unlike any other.

"It all starts with 'Enter Sandman,'" current head coach Brent Pry said. "There's no better entrance in college football."

## Boyer appointed CHS cheer coach

**Marty Gordon**  
NRVsports@ourvalley.org

The new cheer coach at Christiansburg High School brings lots of experience to the sidelines.

Lindsey Boyer, who is a counselor at the school, started cheerleading at a very young age as a Christiansburg little league cheerleader.

From there, she said she was fortunate enough to have a family who allowed her to do All-Star Competitive cheerleading. During her time in All-Star, she was on two local teams, while also continuing to cheer for Christiansburg Middle School and Christiansburg High School.

She now has come full circle.

"I applied to be the head Varsity Sideline and Competition Coach at CHS because I believe in the program," she said. "I have had the honor of watching the CHS Cheer program grow and rebuild after COVID hit. These girls have so much talent and are amazing athletes."

Unfortunately, many people still have the belief, according to Boyer, that cheer is not a sport.

"However, these girls embody what it means to be a true athlete," she said. "I want to make sure that gets showcased. Whether that be under the Friday night lights, or on the competition mat. CHS is capable of becoming a powerhouse in the cheer world, and I feel

honored to be a part of it."

Boyer looks back on her former mentors.

"I had so many amazing coaches along the way, and my family has always been so supportive, which has allowed me to take my love for cheer and share that with the current CHS cheerleaders. I have been a cheer coach at CHS for the past three years as the Assistant Coach for the CHS Competition Cheer team. Additionally, for the past 1.5 years, I have also been the head JV sideline coach. I love my cheer family and I'm very honored to continue being a part of it," she said.

As a counselor, Boyer works directly with the school's current seniors, the class of 2025.

"It's pretty amazing to be able to work alongside my seniors during the school day and be in the position to support them through athletics outside of school hours. I am very proud of the class of 2025, and I will always be their biggest cheerleader," she said.

The new coach hopes to take the cheer program to a higher level, both on and off the mat.

"I want my athletes to be all around positive influences on the world, showcase true sportsmanship, and represent the core values of CHS: respectful, responsible, connected, while also growing as athletes. I want to elevate their cheer skills so when people hear Christiansburg High School Cheerleading they will respect our name and our abilities. As our theme for the year states, "unleash your champion."

## Lady Hokies part of Florida tip-off

South Carolina, winner of two of the last three national championships, headlines the eight teams participating in the 2024 Elevance Health Women's Fort Myers Tip-Off.

This year's event will be held Nov. 28-30 on the campus of Florida Southwestern State College.

South Carolina, Iowa State, Purdue and Middle Tennessee make up the four teams of the Island Division and Virginia Tech, Michigan, Belmont and Davidson are the quartet making up the Shell Division. The teams of the Island Division will play two games each against pre-determined opponents while the Shell Division will be a traditional bracketed tournament.

Additionally, it was announced that Elevance Health will continue as the title sponsor of the event, agreeing to a multi-year extension that first began with the launch of the Elevance Health Women's Fort Myers Tip-Off in 2022.

The Lady Hokies will play Davidson on Friday, Nov. 29.

The collective power of the programs will make the Elevance Health Women's Fort Myers Tip-Off one of the strongest early season tournament fields this year. The teams have combined for 122 NCAA Tournament appearances. The four teams of the Island Division combine for 90 NCAA berths and four national titles between them - South Carolina owning three and Purdue having claimed one. In addition to the Gamecocks, Iowa State, Middle Tennessee, Michigan and Virginia Tech were selected to the NCAA Tournament last year.

Travel packages for fans looking to join their favorite team at the Elevance Health Women's Fort Myers Tip-Off will be available on July 16 at [www.womensfortmyerstipoff.com/travel](http://www.womensfortmyerstipoff.com/travel). The Westin Cape Coral and Marina Village and the Marriott Sanibel Harbour are the event's host hotels and fans will have the opportunity to stay where the teams stay and experience resort life to the fullest.

Virginia Tech Athletics

## Holiday Hoopfest vs. Saint Joseph's

Virginia Tech and Saint Joseph's are set to clash in the 2024 Holiday Hoopfest, December 21, at The Palestra in Philadelphia, Pa., as announced by tournament officials Monday afternoon.

It will mark the seventh all-time meeting between the two former Atlantic 10 Conference rivals. Each side has won three times. Tech last squared off against SJU on Dec. 22, 2015 in Brooklyn, N.Y. The Hokies dropped a 79-62 decision. Tech returns to The Palestra for the first time since it went 1-1 in the 2009 Philly Hoop Group Classic. VT is 5-16 all-time in the City of Brotherly Love.

"Playing Saint Joseph's at The Palestra in December as part of Holiday Hoopfest is a tremendous opportunity for our team," Tech head coach Mike Young said. "It's

a historic venue with such great basketball tradition, and facing a quality opponent like St. Joe's will be a great test for us. We're excited for the challenge and look forward to competing in the cathedral of college basketball."

Senior point guard Hysier Miller, a Philly native, will get an opportunity to play in his hometown for the Hokies' 2024 nonconference finale. Prior to transferring to Tech, Miller competed for three seasons at Temple.

The Hawks finished the 2023-24 season at 21-14 overall and 9-9 in A-10 play. Like the Hokies, they advanced to the NIT where they suffered a 75-72 overtime loss to Seton Hall in the opening round.

## Local Talents

from page 1

revered as one of the foremost dance companies in the world, known for its unparalleled artistic excellence, innovative choreography, and influential repertory. Performing with the NYCB is a distinguished honor, a dream realized by few, and a testament to the exceptional caliber of Savannah and Fiona's talents. This opportunity places them among the elite, providing a platform to perform at a level synonymous with the highest standards of the ballet world.

"We are immensely proud of Savannah and Fiona for their outstanding achievements," said Heather Leeper, Director of the LEAP Performing Arts Academy. "Their selection to perform with the New York City Ballet is a profound reflection of their hard work,

dedication, and passion for dance, as well as the exceptional guidance of our teaching staff. It is an honor for our academy to see our students recognized on such a prestigious stage."

This remarkable opportunity not only highlights the exceptional talent cultivated at the LEAP Performing Arts Academy but also serves as an inspiration to young dancers everywhere. The achievements of Savannah and Fiona exemplify the heights that can be reached with determination, support, and a nurturing community.
