Volume 131 No. 20

Wednesday, May 20, 2026

\$1.50 (tax incl.)

Students from Upperside Down Secondary School in Davis presented their vision for a skatepark for Riverfront Park in Davis to the Davis Town Council May 13th.

Students from Upperside Down Secondary School in Davis brought a model of their proposed "Pipe Dream Skatepark" to the Davis Town Council May 13th to accompany their presentation. The project is proposed to occur in three phases.

Skatepark More Than A 'Pipe Dream' for Davis Students

By: Lydia Crawley
The Parsons Advocate

For students of the Upperside Down Secondary School in Davis, thoughts of a Skatepark for Davis are more than a "Pipe Dream." A group of 13 and 14 year old 7th and 8th grade students, along with their instructor Hanna Tierney, met with the Davis Town Council on May 13th to discuss a three phase plan for the Riverfront Park.

"This is an opportunity to invest in our town, our businesses, our community, and our future," one student said.

The Skatepark project, called the "Pipe Dream Skatepark," came about as a result

of a Civics study by the students.

"Somehow we have spiraled into this research project about one or two opportunities that could be coming to Davis and how we could support the creation of those and make our community better," Tierney said.

Over the past six weeks, the students have met with County Commissioners and non-profit organizations in order to learn more about the relationships between government and organizations, as well as strategic planning. The students also prepared and submitted a survey to local businesses that showed that 90% of local businesses

Public Service Commission to Hold Public Comment Hearing on Davis Solar Project

By: Lydia Crawley
The Parsons Advocate

Following a session of the Public Service Commission of West Virginia in the City of Charleston on May 15th, a Commission Order was given that scheduled a virtual and in person public comment hearing in the matter of a Mon Power and Potomac Edison Company energy project that includes a solar project adjacent to the Town of Davis for July 15th at 5:30 p.m.

The History

An application was filed on February 13th by Monongahela Power Company (Mon Power) and The Potomac Edison Company (PE) for a certificate of public convenience and necessity to construct a 1,200 MW combined cycle gas turbine plant and 70 MW of solar capacity, according to the Commission Order. The project is reported to be proposed to be built at the Fort Martin site at a cost of \$2.48 billion. The Davis project is part of the solar capacity, which is divided into three parts and is proposed to be constructed at: Valley Point near Albright; Davis, adjacent to the Town of Davis and Wylie Ridge near Weirton, at an estimated \$182 million.

The project's application was reported to be made in anticipation of an expected shortfall in capacity to begin in 2029 and estimated to continue through 2045. A Notice of Filing with the application and their direct testimony was submitted by the companies, along with a request for expedited treatment, within reason. The filing also included a request for approval of a transmission project interconnect of less than one mile, with an anticipated cost of over \$20 million.

A Generation Projects Surcharge was requested by the companies (GP Surcharge) to become effective on the first day of the month following the conclusion of the proceeding and to remain in effect until each asset was placed into service. The

investment return would then continue to be recovered through the surcharge, once in service, until incorporated into base rates in the next rate case. The GP Surcharge was designed to recover the full amount of the Allowance for Funds Used During Construction (AFUDC) financing costs, according to the documents. The surcharge was estimated to result in a rate increase for residential customers of \$1.18 per month or 0.9 percent.

The Commission established notice requirements, procedural schedule and granted petitions to intervene filed by the West Virginia Citizens Action Group, Solar United Neighbors and Energy Efficient West Virginia, along with the Commission's Consumer Advocate Division, the West Virginia Energy Users Group, Longview Power LLC, Mountain State Clean Energy LLC and the West Virginia Building and Construction Trades Council AFL - CIO on March 17th.

Additional petitions to intervene were granted on April 22nd by the Commission. Those petitions were filed by the Sierra Club, the West Virginia Chamber of Commerce Inc., the Gas and Oil Association of West Virginia Inc, the West Virginia Manufacturers Association, the West Virginia Coal Association Inc. and the United Mine Workers of America.

In the beginning, the proceeding did not raise substantial protest, the documents state. However, to date, 74 letters of protest have been filed and counting.

"We believe that it is reasonable to schedule a public comment hearing to ensure the affected members of the public are fully aware of this proceeding and have an opportunity to participate," the ruling reads.

The Order

The Commission ordered that the matter be set for a virtual and in person public

Town of Davis Hosts Representatives from Fundamental Data at Second Town Hall on Data Centers

Fundamental Data Representative Lewis Reynolds addresses the crowd at the Davis Fire Hall Saturday.

Fundamental Data Representative, attorney Scott Wyland, outlined the Ridgeline Power Plant Project to the assembled crowd at the Davis Fire Hall and answered questions from the mostly civil crowd.

By: Lydia Crawley
The Parsons Advocate

The Town of Davis Mayor Al Tomson hosted the second Davis Town Hall on Data Centers at the Davis Fire Hall Saturday, May 16th. At the event, speakers included representatives from Tucker United and Fundamental Data, the com-

pany behind the controversial proposed Ridgeline Power Plant project outside the towns of Davis and Thomas.

The meeting began with opening remarks by Mayor Al Tomson. He spoke about his

West Virginia Governor's Highway Safety Program Joins National EMS Week to Celebrate Life-Saving Partnerships on the Road

CHARLESTON, WV — The West Virginia Governor's Highway Safety Program (GHSP) is proud to observe National EMS Week, running May 17–23, 2026. This year's national theme, "Improving Outcomes, Together," highlights the critical partnership between traffic safety initiatives and the first responders who provide life-saving care on West Virginia's roadways.

While the GHSP focuses on preventing crashes through education and enforcement, EMS professionals are the essential "Fifth E" of highway safety – providing the post-crash care that often makes the difference between a tragedy and a recovery.

"Our mission is to ensure that every West Virginian reaches their destination safely, but when the unthinkable happens, we rely on the expertise and courage of our EMS partners," said Jack McNeely, Director of the

GHSP. "The theme 'Improving Outcomes, Together' is more than just a slogan; it's a reminder that safety is a shared responsibility. When drivers choose to buckle up and put their phones away, they aren't just protecting themselves – they are helping our EMS providers do their jobs more effectively."

"The road is an EMS provider's office, and it can be a dangerous one," McNeely added. "As we celebrate their dedication this week, we ask every driver to honor them by staying alert, driving sober, and giving them the space they need to save lives."

During National EMS Week and every day, the GHSP encourages West Virginians to:

- **Move Over and Slow Down:** It's the law. Protect those who are protecting us on the roadside.
- **Always Wear a Seat belt:** Proper restraint significantly improves patient outcomes by reducing

the severity of injuries before EMS arrives.

- **Thank a First Responder:** Acknowledge the EMTs and paramedics in your community who work 24/7 to keep our state safe.

For more information about the West Virginia Governor's Highway Safety Program, please visit highway-safety.wv.gov.

Letters of Intent to Apply for POWER Funding Due May 22

Are you planning to apply for economic development funding through our POWER Initiative for coal communities? Letters of intent (LOI) are due May 22 at 5:00 p.m. ET! Submitting an LOI is required before applying for POWER funding.

Visit our application information page for important details, including the notice of solicitation of applications (NOSA) and resources to ensure your application is the best it can be — including a pre-application webinar with common questions — <https://www.arc.gov/grants-and-opportunities/power/>.

Chief Justice Bunn Statement on Death of U.S. District Judge John T. Copenhaver, Jr.

CHARLESTON, W.Va. – Supreme Court of Appeals of West Virginia Chief Justice C. Haley Bunn today issued the following statement on the passing of U.S. District Judge John T. Copenhaver, Jr.

"Judge Copenhaver's positive impact on generations of lawyers, litigants, and fellow judges cannot be overstated," Chief Justice Bunn said. "His lifetime of service to the public and unprecedented work ethic will continue to inspire us for decades to come.

"As with countless others in the profession, I experienced some of my most significant professional moments inside his courtroom while he presided with discipline, precision, and a resolute commitment to the Rule of Law," Chief Justice Bunn said. "His legal acumen was unmatched and did not diminish with age. While he

always presided with grace and never spoke an unkind word to any practitioner or party, an appearance in Judge Copenhaver's courtroom required an extra measure of preparation because any tiny discrepancy in the record or a case citation would surely be met with his patient but firm correction.

"On a personal level, I will always treasure the last time I interacted with him when he graciously agreed to administer the oath when I began my 12-year term on the Court," Chief Justice Bunn said. "I will never forget his kind words and encouragement, and will strive to follow his example of exemplary public service for the rest of my career. The entire West Virginia Judiciary mourns with our sisters and brothers on the federal bench, and our hearts and prayers go out to the Copenhaver family."

SKATEPARK

Cont. From Front Page 1

Students from Upperside Down Secondary School answered questions from the Davis Town Council May 13th.

would like to see additional foot traffic in Davis. The survey also showed that 95% of businesses would like to see more activities in the Town, as well.

During their presentation, the students presented a series of statistics including that for every dollar invested into the skatepark, three to four dollars in return from economic benefits were estimated to be gained from the project. Other statements made during the presentation included those on the benefits to tourism from skatepark festivals.

The students also conducted a teen survey in which they concluded that 82% of teens living in Tucker County do not use their local park very often. The survey also concluded that 83% of teens did not feel there was not enough to do in Davis for those their age and 78% responded that if there was more to do, they felt they would spend less time on their phones.

The students passed out a flier to the Council that outlined the plan for the park and brought with them a table top model to showcase their vision for the future of the project. In the flier they list partnerships with the Tucker County Convention and Visitors Bureau, Woodlands Development Group, National Youth Science Foundation, WVU Community Engagement Lab and Mon Forest Towns on the project. The WVU Community Engagement Lab is supporting with a conceptual site design, visualiza-

tion and city planning which is slated to include grading, planting and storm water mitigation at at \$5,000 in kind value, according to the group.

In all, the project is slated to be completed in three phases. Phase One of the project is to be a Beginner Skatepark. This phase will include a Freshpark kit and concrete pad, as well as the Entry Way, which will include the stairway, slide signage and lighting. The estimated cost of Phase One is \$213,000. Phase Two of the project will include a Skatepark Roller Pad, Gaga Ball and Hammock Hang Zone at a cost of \$61,200. Phase Three is a Concrete Skatepark that is slated to cost \$500,000. Total cost for all three completed phases is estimated at \$800,000.

The group has completed some fund raising and will be applying for funding grants and other funding opportunities, they said. Part of the group's plans included accessibility to the site via stairs and a path. Town of Davis Mayor Al Tomson told the students to let the Town "worry" about the accessibility issue, which would decrease the amount of funding the group would need to raise for the project.

The only official request the students made of the Council was a letter of support. The Council made a motion during session that the Council would send a letter of support to meet the groups funding application obligations the end of May.

Mt. Lions Make Their Mark: Tucker County Track Claims Multiple Titles, Sends Strong Contingent to States

By: Adam Freeman

The Tucker County High School Mt. Lions track and field teams turned in a dominant showing at the Regional 2 Championship, with both the boys and girls teams earning runner-up finishes overall while collecting a remarkable number of individual and relay titles along the way.

The Mt. Lions showcased their depth in nearly every event category, producing multiple regional champions, All-Region honorees, and state qualifiers as they now prepare for the upcoming WVSSAC State Track Meet.

The boys team was led by several regional champions. Nate Ricottilli sprinted to a first-place finish in the 400-meter dash to earn All-Region honors, while Alex Collar captured the regional title in the 800-meter run and added a third-place finish in the 300-meter hurdles.

Distance standout Lynk Suesli delivered one of the meet's most impressive performances, winning both the 1600-meter and 3200-meter runs to secure double All-Region honors. Suesli also placed third in the 800-meter run. Luke Barb added another regional title in the high jump and finished third in the long jump.

The Mt. Lions also saw fierce finishes from Reid Kisamore,

who earned second place in both the 100-meter and 400-meter dashes, while Cameron Judy claimed runner-up finishes in both the 1600-meter and 3200-meter runs. Draven Bunnell added points with a third-place finish in the 1600-meter run and fourth in the 3200-meter run.

Additional top performances came from Landon Wilfong, who placed fifth in the 200-meter dash, and Evan Hexom, who finished third in the 110-meter hurdles.

Tucker County's relay teams proved especially dominant. The quartet of Luke Barb, Keelyn Eichelberger, Nate Ricottilli, and Reid Kisamore captured the regional championship in the 4x200-meter relay, while Ricottilli, Eichelberger, Barb, and Kisamore also won the 4x400-meter relay title. Cameron Judy, Landon Wilfong, Alex Collar, and Lynk Suesli earned another regional crown in the 4x800-meter relay.

The Mt. Lions also secured third-place finishes in both the 4x100-meter relay and the 4x110 shuttle hurdles relay.

On the girls side, Tucker County continued its strong display with multiple regional championships and All-Region honors. Lela Wright sprinted to regional titles in both the 100-meter and 200-meter dashes, cementing herself as one of the area's top

sprinters.

Estoria Chase added another regional championship by winning the 3200-meter run, while Mayah Gross earned second place in the 400-meter dash and third in discus. Juniper Judy added runner-up honors in the 1600-meter run and placed fourth in the 3200-meter run. Lively Mayne also contributed with a sixth-place finish in the long jump.

The Lady Mt. Lions relay teams dominated throughout the meet. The team of Mayah Gross, Addi Moats, Rachel Hile, and Lela Wright captured regional championships in both the 4x100-meter and 4x200-meter relays. Addi Moats, Kenah Griffith, Lively Mayne, and Rachel Hile claimed first place in the 4x400-meter relay, while Moats, Mayne, Griffith, and Hile added another title in the 4x102.5 shuttle hurdles relay.

All first-place finishers earned All-Region honors, while all first- and second-place finishers automatically qualified for the WVSSAC State Track Meet.

With momentum building and numerous athletes advancing, the Tucker County Mt. Lions now set their sights on competing against the state's best as they head to Charleston for the state championships.

Tucker Valley Wildcats Continue Strong Track Season

Legend Harper

Layne Suesli

Kennedy Aker

By: Adam Freeman

The Tucker Valley Wildcats track and field team turned in another impressive week of competition at the Morgantown Running Invitational on May 8 and the Elkins Middle School Invitational on May 11.

Facing 14 schools at the Morgantown Running Invitational, Tucker Valley athletes earned eight top-10 finishes while posting 16

personal-best performances.

Legend Harper led the Wildcats with a pair of second-place finishes in the hurdles events. Harper finished second in the 100-meter hurdles with a time of 17.29 and added another runner-up finish in the 200-meter hurdles in 28.61. His time in the 200-meter hurdles also established a new Tucker Valley school record.

The Wildcats followed that effort with

another successful outing at the Elkins Middle School Invitational, where 10 schools competed. Tucker Valley collected 17 top-10 finishes, including 13 top-eight performances, while athletes achieved 12 personal bests.

Layne Suesli paced the distance runners with three top-three finishes. Suesli placed third in the 800-meter run with a time of 2:41.29, earned second in the 1600-meter run

in 5:46.26, and added another second-place finish in the 3200-meter run with a time of 12:16.30.

Harper continued his strong performances in Elkins, taking third in the 100-meter hurdles with a time of 17.00 and second in the 200-meter hurdles in 28.74. He also captured first place in the high jump after clearing 5 feet, 2 inches.

Five Rivers Public Library Summer Reading Program

YOU MUST REGISTER TO PARTICIPATE. LAST DAY TO REGISTER IS MAY 30, 2026. You can register by stopping in at the library, calling 304-478-3880, message on Facebook, or on library web page. Readers will have an exciting time this summer as we have fun with Unearth a Story. Our themes this year are Dino-Mite Adventures, Construction: Dig, Dump Build, and Soil & Roots: Down in the dirt – where roots begin. Five Rivers Public Library presents "Unearth a Story" during their summer library program. Wednesdays @ 10 a.m., June 10th, 17th, 24th, June 26th (Party @ the park). Activities may include crafts, games, a story, and snacks! The 2026 Summer Reading Program is open to preschool through 5th grade (Younger and older siblings welcome) with programs, prize basket, reading time, and more. For more information, call the library at 304-478-3880 or visit our website, <https://fiverivers.wvlibrary.info>. All programs are free of charge.

Momma Said

This column is about tips, helpful hints, recipes and words of wisdom. I dedicate this column to my mother.

By Teri Cayton
The Parsons Advocate

I cannot believe how fast time is flying by this spring it seems as if we are in a time warp or something. I've always heard that time goes faster the older you get but if it goes any faster it will be going backward. **Momma Said**, "In some aspects, that might not be a bad thing."

When we were in grade school, which was right across from our house, the last week of May was our big school picnic. The whole community would make food and we would have a big spread in the shade on the school playground. It was such a big event because that meant we only had one week of school left.

We never got snow days so we always had an early out for summer. It meant playing all day, of course after we got our chores done. We each had something we had to do like help mow grass. And in those days, we didn't have a weed-eater. We had a

long pair of shears, like scissors, that were hand operated. We had to cut everything that mom couldn't mow.

We did mostly outside chores but when the indoor chores came around, I hated it. I always had to dust and mom had so many knick-knacks sitting around that it was tiresome. I just didn't like being indoors. We didn't have air conditioning and I really liked to have the windows open, especially at night. The sounds of nature would woo me to sleep. **Momma Said**, "The best way to go to sleep is to be tired from a hard day's work."

Crockpot Mac and Cheese

Ingredients

- Cooking spray
- 8 ounces elbow macaroni, uncooked
- 1 (12-ounce) can evaporated milk
- 2 1/2 cups whole milk
- 1/4 cup butter, melted (1/2 stick)
- 2 (10-ounce) bricks sharp Cheddar cheese, grated (about 5 cups)
- 1 tsp salt
- Dash pepper
- Dash paprika
- 3 egg yolks, optional

Instructions

- Spray the crockpot with cooking spray.
- Add the macaroni, evaporated milk, milk, butter, salt, pepper, and all but 1/2 cup of the grated cheese. Mix in the egg yolks, if using, and stir until well combined.
- Spread the left-over cheese on top and sprinkle with paprika.
- Cover and cook on low for 2 hours. Check the pasta and stir everything well. Depending on the size of the crockpot, it may be ready to serve. If not, cook for another 30-60 minutes.
- Stir, serve hot, and enjoy!

May 26, 1923: Playwright Maryat Lee was born in Kentucky. In 1970, she moved to Summers County and developed her Eco Theater into a national organization.

Charleston WV – The following events happened on these dates in West Virginia history. To read more, go to e-WV: The West Virginia Encyclopedia at www.wvencyclopedia.org.

May 20, 1949: Nick Joe Rahall II was born in Beckley. When Rahall first entered Congress in 1977, he was its youngest member. He remained in office until 2015.

May 21, 1853: William M. O. Dawson was born in Bloomington, Maryland, just across the Potomac River from what is now the Eastern Panhandle. In 1905, he became West Virginia's 12th governor.

May 22, 1880: West Virginia businessman and politician Vernon E. Johnson was born in Berkeley Springs. He served six terms in the legislature, including twice as Speaker—one of only three West Virginians to hold that office on non-consecutive occasions. At 34, he was the youngest Speaker ever elected in state history.

May 22, 1947: Supreme Court Justice Margaret "Peggy" Workman was born in Charleston. In November 1988, she became the first woman elected to the West Virginia Supreme Court of Appeals and to statewide office in West Virginia.

May 23, 1862: In what became known as the Battle of Lewisburg, Union troops repelled a Confederate advance, killing 38 and wounding 66, while losing only 13 men. Following the battle, Confederate dead lay in the sanctuary of the Old Stone Presbyterian Church.

May 23, 1941: Rod Thorn was born in Princeton. Declared by the legislature a

McDonough built a Fortune 500 company with operations in hand tools, building materials and barge building. The Bernard McDonough Foundation remains one of the largest private foundations in West Virginia.

May 25, 1937: William H. "Teepi" Kendrick died in Morgantown. Kendrick was a pioneer in West Virginia's 4-H program. He broadened the program to emphasize more than just agriculture, and he was primarily responsible for establishing the state 4-H camp at Jackson's Mill.

May 26, 1802: City founder Alfred Beckley was born in Washington, D.C., where his father, John, was serving as the nation's first Librarian of Congress. John Beckley established what would become the Raleigh County seat in 1838 and named it for his father.

May 26, 1895: Athlete Ira Errett "Rat" Rodgers was born in Bethany. He was WVU's first football All-American, lettering in 1915–17 and 1919.

e-WV: The West Virginia Encyclopedia is a project of the West Virginia Humanities Council. For more information contact the West Virginia Humanities Council, 1310 Kanawha Blvd. E., Charleston, WV 25301; (304) 346-8500; or visit e-WV at www.wvencyclopedia.org.

state "natural resource," Thorn attended West Virginia University, where he was an All-American guard. Thorn had a distinguished NBA career as a player and executive, which included drafting Michael Jordan.

May 24, 1896: Confederate General John Echols died in Staunton, Virginia. Echols served in the Kanawha Valley in 1862 and commanded Confederate forces at their defeat at the Battle of Droop Mountain in November 1863.

May 25, 1903: Industrialist and philanthropist Bernard Patrick McDonough Jr. was born in Texas. Starting with a Parkersburg construction business in the 1930s,

The sheriff, after ascertaining which of the taxes assessed in his or her county are delinquent, shall, on or before the first day of May next succeeding the year for which the taxes were assessed, prepare the following delinquent lists, arranged by districts and alphabetically by name of the person charged, and showing in respect to each the amount of taxes remaining delinquent on April thirtieth: (1) A list of property in the landbook improperly entered or not ascertainable; (2) a list of other delinquent real estate; and (3) a list of all other delinquent taxes: Provided, that the list shall conclude with a notice, substantially as follows: "Any person holding a West Virginia business registration certificate under the authority of article twelve, chapter eleven of this code who does not pay all delinquent personal property taxes shall have his or her license to do business in this State suspended until the delinquency is cured."

The sheriff on returning each list shall, at the foot thereof, subscribe an oath, which shall be subscribed before and certified by some person duly authorized to administer oaths, in form or effect as follows:
I, Jacob E. Kopec, Sheriff, Sheriff and Treasurer of TUCKER County, do swear that the foregoing list is to the best of my knowledge, complete and accurate, and that I have received none of the taxes listed above.

**WEST VIRGINIA DEPARTMENT OF TRANSPORTATION
Division of Highways
NOTICE TO CONTRACTORS**

Bids will be received electronically by the West Virginia Department of Transportation, Division of Highways through the Bid Express Bidding Service (www.bidx.com) and by sealed proposals (only when prequalification is waived) being received at its office in Building 5, Room 843, 1900 Kanawha Boulevard East, Charleston, West Virginia until June 09, 2026 at 10:00 AM (Eastern Standard Time). The bids will be downloaded and/or opened and read publicly thereafter for the constructions of the following project(s):

<u>Call Contract</u>	<u>State Project</u>	<u>Federal Project</u>	<u>Description</u>
018	2024990269	S399-RPAVE-26 00	STBG-2026(070)D PAVEMENT MARKINGS
			2026 RPM
			Various Locations Statewide
			COUNTY: TUCKER

Proposals will be received from prequalified and West Virginia licensed contractors only except that on Federal-Aid Projects a contractors' license is not required at time of bid, but will be required before work can begin. Registration is required with the Department of Administration, Division of Purchasing, in accordance with Chapter 5A, Article 3, Section 12 of the West Virginia Code. All contractors submitting bids on project(s) must include one of the following forms properly executed with each proposal: Proposal Guaranty Bond, Cashier's Check, or Certified Check for \$500.00 or 5% of the total bid, whichever is greater.

The West Virginia Department of Transportation, Division of Highways reserves the right to defer, delay or postpone the date for receiving and publicly opening proposals for any project designated in this advertisement, without the necessity of renewing such advertisement. The deferment, delay, postponement, and the date that proposals will be received and publicly opened will be available on www.bidx.com.

The West Virginia Department of Transportation, Division of Highways hereby notifies all bidders that it will affirmatively ensure that in any contract entered into pursuant to this advertisement, minority business enterprises will be afforded full opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, religion, sex or national origin in consideration for an award.

LEGAL

Pursuant to W.Va. Code § 20-5-16, the West Virginia Division of Natural Resources plans to enter a contract with a third party for the financing, construction, and operation of new lodging facilities at Blackwater Falls State Park, Lost River State Park, and Pipestem Resort State Park, and has scheduled a public hearing on this matter, to be held in open house format from 2:00 - 4:00 p.m. on the following dates and at the following locations:

- Blackwater Falls State Park; Main Lodge
1584 Blackwater Lodge Rd
Davis, WV 26260

Mountaineer Garden Club preps for American 250th Anniversary

MGC members, Crystal Bilby Nelson, Linda Shahan Sherman, and Faith Moore, pulled weeds, trimmed bushes and cut multiflora away from Rt 72 welcome area and Blue Star Memorial marker. A memorial flag was placed that thanked Veterans for 250 years of service. Floral tributes will be added this week.

Opinion

Before the Sirens: Questions Tucker County Must Ask About Ridgeline

By Zina Raye

Resident of Tucker County and a PMP-certified project manager who specializes in IT infrastructure and software development.

Please don't get starry-eyed over the prospect of tax revenue from the Ridgeline Facility. Ask the harder question first: who will pay for the burden of a firefighter response when 30 million gallons of diesel fuel, stored at the top of the Pendleton Creek watershed, catches fire?

My questions were shaped by my professional bias as a risk-averse project manager. I know some people think these concerns are overblown, even though the proposed storage volume is roughly equivalent to three Exxon Valdez tanker spills. Some people continue to point out that the power plant is proposed on industrial reclaimed land, as if putting three 10-million-gallon tanks on top of an old mine labyrinth makes it somehow safer.

Now, a year later and with some changes in the world, I want to revisit the topic, because it is rare to be able to observe the consequences of such a scenario without it happening to you or on your own land. To see what a fire at the Ridgeline Facility could look like all you have to do is type “drones oil refinery Tuapse” into a Google search.

The massive fire and billowing dark clouds above storage tanks that have a total capacity comparable to Ridgeline (1.5 million cubic meters in Tuapse case) show the scale of what could happen right here in Tucker County.

It is an unnerving but informative image for any community that's considering large-scale infrastructure development. With so many facets of the Ridgeline proposal being unknown or explicitly kept secret, and regardless of whether or where such a facility is planned in Tucker County, it behooves us and our elected officials to look beyond the vague promises of jobs and revenue.

You don't need to go too far for the public risk examples. In March 2026, Iran directly struck two Amazon Web Services (AWS) data centers in the United Arab Emirates, while a near-miss from a one-way attack drone damaged a third AWS facility in Bahrain. According to AWS, the attacks caused structural damage, disrupted power delivery, and triggered fire suppression systems that led to significant water damage. This appears to be the first documented instance of a data center being a direct target rather than collateral damage.

War is the extreme example of public risk from data center developments, but the full picture is painted with more common strokes: a mechanical failure, a once-in-a-generation storm, mine subsidence, and the ever-present risk of human error.

We love our local volunteer firefighters. But are they truly prepared for this? And more importantly, is the developer prepared to support them?

If we are going to ask local emergency services to respond to an industrial fire of a

scale never before seen in this region, then the dialogue needs to happen now, during the planning and permitting phase.

Questions that should be asked and answered publicly, on the record, include:

Water

1. What is the estimated daily water demand to fight a full-surface, diesel-tank fire, and where exactly will that water come from during drought conditions?

2. What are the estimated downstream impacts if firefighting runoff enters the Pendleton Creek watershed, which feeds into the Blackwater and ultimately the Cheat River?

3. What redundancy exists if on-site fire-suppression systems fail due to a power loss, sabotage, a lightning strike, or a cyberattack?

Funding

4. Will the developer purchase and dedicate specialized apparatus for local departments, or will taxpayers be on the hook for those costs?

5. Who bears financial responsibility for long-term environmental remediation after a catastrophic fire?

6. Where will firefighting foam be stored, in what quantities, and who pays to maintain and replace it?

Training and Infrastructure Needs

7. How many hours of specialized industrial-fire training will local volunteer departments receive annually, and who funds that training?

8. How often will multi-county joint exercises be conducted with Grant County, Randolph County, and the state emergency management?

9. How many additional tanker trucks, pumpers, foam tenders, and water-supply vehicles are required to sustain a response to a multi-day, diesel tank fire?

10. How quickly can outside industrial firefighting teams realistically reach Tucker County in winter weather?

11. Are local hospitals equipped to handle mass casualty burn and smoke inhalation incidents?

Planning

12. Has an evacuation model been completed for Parsons and downstream communities in the event of toxic smoke plume or contaminated runoff?

13. Has the developer demonstrated the ability to contain boilover events, cascading tank failures, or secondary explosions?

14. What setbacks and blast-radius calculations were used in the site layout?

15. Will there be hardened infrastructure, counter-drone capability, or merely chain-link fencing and cameras?

16. What is the worst-case scenario modeled by the developer, and will the public be allowed to review it?

And perhaps the most important question of all: if this facility generates private profit but creates public risk, who is being asked to subsidize whom?

These are not anti-development questions. These are governance questions. They are the kinds of questions responsible elected officials are to ask before, not after, the sirens begin to wail.

WVDNR Urges Life Jacket Use During National Safe Boating Week

Agency promotes safe boating practices as summer season begins

CHARLESTON, W.Va. — To help promote National Safe Boating Week, the West Virginia Division of Natural Resources (WVDNR), in partnership with its Law Enforcement Section, is reminding boaters about the importance of wearing life jackets and safe boating practices.

National Safe Boating Week, observed this year from May 16-22, marks the start of the summer boating season and promotes the Safe Boating Campaign, a global initiative funded by the Sport Fish Restoration and Boating Trust Fund and administered by the U.S. Coast Guard.

“As we head into the summer boating season, wearing a life jacket is one of the simplest and most effective ways to protect yourself and your loved ones on the water,” said WVDNR Director Brett McMillion. “We encourage everyone in West Virginia to make safety a priority every time they go boating.”

One of the most common issues Natural Resources Police encounter during the boating season is compliance with the state’s life jacket laws. Under West Virginia law, every person aboard a boat must have a properly sized U.S. Coast Guard-

approved life jacket that is readily accessible and in good condition. Children under 13 must wear a life jacket while the boat is underway, unless they are below deck or in an enclosed cabin.

“There are a lot of myths about life jackets, but the reality is they save lives,” said Natural Resources Police Captain Warren Goodson, who oversees the WVDNR’s Boating Education Program. “New life jackets are more comfortable, lightweight and stylish than the bulky orange style most boaters are familiar with.”

According to the U.S. Coast Guard, drowning was the reported cause of death in three out of every four recreational boating fatalities in 2024, and 87 percent of those who drowned were not wearing life jackets.

West Virginia law requires anyone born on or after Dec. 31, 1986, to complete a boater education course approved by the National Association of State Boating Law Administrators before operating a motorboat. To learn more about boating rules and laws, safe boating practices and the WVDNR’s boater education program, visit WVdnr.gov/boating.

Legal Aid of West Virginia Welcomes Three Attorneys to Board of Directors

Charleston, W.Va. – Legal Aid of West Virginia (LAWV) announced today the appointment of three attorney members to their Board of Directors following an election. Harry Deitzler of Parkersburg, Connor Thomas of Weston and Anita Casey of Charleston were elected by fellow attorneys in their regions.

Harry Deitzler is a returning board member who ran unopposed for Region four, covering the Northwest corner of the state surrounding Parkersburg.

“Legal Aid protects and guides our most deserving citizens at the time in their lives when all hope would otherwise have been lost,” says Deitzler. “Without Legal Aid, the most vulnerable among us—abused women and children, forgotten veterans—would be abandoned to injustice.”

Connor Thomas was elected for his first term in Region five, covering North-Central West Virginia around Clarksburg and Elkins areas. Thomas is a long-time Weston resident, with a law practice in Lewis County focusing on court-appointed juvenile abuse and neglect matters, criminal defense and bankruptcy.

“I have been practicing law in Lewis County for almost two years, and many of my clients are below the poverty line,” says Thomas. “My interest in LAWV and its services was a natural result of seeing the need in my community for help with legal issues.”

Anita Casey is a newly elected former board member who represents Region eight in the Charleston area. She previously served on the LAWV board in the seat reserved for executive director of the West Virginia State Bar.

“This is the first time I have been elected instead of appointed to the board, and I’m happy to be back,” says Casey. “I love working with Legal Aid, but my region’s position was held by Andy Nason—a pillar of the Legal Aid community. After his decision to retire this year, I ran and got elected. Service to this board is significant enough to me I that I was willing to wait for the opportunity.”

LAWV’s Board of Directors consists of a mix of attorney and non-attorney roles. You can see the full list of current members at <https://legalaidwv.org/about-us/our-board/>.

Lest We Forget
 Celebrate • Honor • Remember

On Memorial Day, we pay tribute to those who fought and made the ultimate sacrifice for our country. Their courage and service will never be forgotten, and we owe them and their loved ones a debt of gratitude that can never be repaid. Let us always remember that freedom is not free.

TOWN OF DAVIS

Cont. From Front Page 1

parents life in pre and post war Estonia and Europe, as well as how America has always been a beacon of freedom. This anecdote he used to tie into his talk on HB 2014 and how he saw the law as stripping locals of their freedom, power and control. Tomson said he felt the law was unconstitutional and undemocratic, as well as he saw it as needing changed in the future.

“Politics are local, government is local,” Tomson said. “If you all have a problem, you’re knocking on the door of the Town Hall and the next thing you know, you and I are talking. You’re either telling me things are going great or there are some things you’re not happy with, but the further you get removed, the less we really have that political dialogue occurring. Not a lot of people drive down to Charleston to express their thoughts and feelings and even fewer go to Washington D.C.”

Beth Boehme of Tucker United spoke on the Harvard Study conducted on behalf of the citizen action group. She said that according to the study, the highest concentrations of particulate matter would be dispersed throughout the Davis, Thomas and Canaan Valley area, but it would also spread and impact Petersburg, Mt. Storm and even as far east as areas of Virginia.

Boehme said that the first major impacts would come to those with underlying respiratory issues such as asthma and COPD. The particulate matter released by the proposed plant, Boehme said, was a “well documented contaminant” that contributes to premature death. She also said that the area could see an increase in hospital admissions, a strain on the local healthcare providers with increases in patient needs and an overall increase in healthcare costs per year. Boehme emphasized that the DEP never said the power plant project was safe for the area, only that it “met requirements” and that the language was far different.

However, representatives from Fundamental Data, the company behind the Ridgeline Power Plant Project were on hand at the meeting and disputed the claims raised in the report and by Tucker United and other opponents of the project. Scott Wyland, an attorney by trade and representative of Fundamental Data, said that reports such as the Harvard study were often skewed and more PM 2.5 is released from wood burning stoves, fireplaces and gas furnaces than would be impacted by the new power plant due to the chimney proximity.

At the core of the project is the need for to produce power. Currently, the push from the government is for A.I. development, Wytland said, with China as the U.S.’s major competitor in the digital market. With the sudden surge for demand, the company saw an opportunity for what Wyland called “bring your own power.”

While the project is not designed to supply power to the grid, the “bring your

Candidate for Member of House of Delegates 85th District Deborah Stiles spoke to the assembled crowd at the Davis Fire Hall Saturday on the issue of data centers. Stiles said she opposes data centers in Tucker County.

own” design will supply power to other buildings. Currently, Wyland said when pushed, the plan is for data centers to be those buildings. However, should energy needs shift in the future, the plant could supply power to any industry. When asked who the data center buyer was, Wyland said he could not even disclose if there was even yet a buyer.

One of the largest points the representatives wanted to make clear to the group was the misconception in the public over the size of the proposed power plant. While it has long been reported that the plant would be a 1600 megawatt facility, it is in fact designed to be an 860 megawatt facility.

Wyland and Reynolds said that all environmental and other considerations have been well thought out and taken into account in the design process. While most modern Data Centers are air cooled, the power plant is designed to be a closed loop system which they said would mean minimal if no water impact on the aquifer and ground water. When asked where water sources would come from, the representatives said that issue was still being sorted out, but that recycled water pumped from disused mines and treated prior to release into the environment was being considered as a viable option to avoid disruption to the local water systems. Any water released into the environment, Wyland said, would be returned to the temperature in which it was originally sourced prior to release.

When asked “why here?” Wyland and Reynolds provided many reasons. Top on the list was proximity to the Columbia natural gas pipeline. The representatives said that a natural gas plant needs gas in order to operate and the main fuel for the plant was natural gas. Diesel was only stored in two of the three tanks as a backup fuel. The third tank was being left empty as part of an emergency measure.

The project was also large, the representatives said. The project is slated to occupy 10,000 contiguous acres in Tucker and Grant Counties. The location was prime due to its available land,

Tucker United Member Beth Boehme spoke on the results of the Harvard Dispersement Study during the second Davis Town Hall on Data Centers.

Davis Mayor Al Tomson was the Master of Ceremonies at the second Davis Town Hall on Data Centers Saturday, May 16th.

Town of Davis Mayor Al Tomson hosted a second Town Hall Meeting on Data Centers at the Davis Fire Hall Saturday, May 16th. The meeting also included a Zoom link. Among guests who spoke at the event were representatives of Fundamental Data, the company behind the controversial Ridgeline Power Plant project.

as well as its proximity to a key internet switching place 99 miles away, Wyland said. Favorable laws by the State also led into the company’s decision, though the representatives did state that paperwork and the project was started before HB 2014.

The project is slated to be composed of 1500 acres to data centers. An additional 300 acre complex will house the power generation plant and the balance of acreage will comprise solar generation.

The project, Wyland and Reynolds said, could bring as much as an estimated \$27 million a year into Tucker County. That figure, the representatives said, was after the 70/30 split from the controversial law. Currently, the duo said, Tucker County currently has a budget of \$8 million.

One of the points that Mayor Al Tomson has been putting forth since almost the beginning has been to move the plant. Wyland and Reynolds addressed this simply, it is matter of ground stability. Like much of West Virginia, Tucker County is built on a series of mine tunnels. The proposed site is one of the few sites that is not undermined. The ground is stable, that is one of the reasons it could not be 12 miles away. There is also an issue with impact on the watershed, should the plant move to the east, the representatives said.

The representatives agreed to keep the lines of communication open on a couple

of issues that they were not familiar with such as that of a “Heat Island.” The issue was raised in response to the proposal of air cooled data centers that could create artificially hotter air than the surrounding communities. A heat island is defined as occurring when an area experiences significantly warmer temperatures than its surrounding areas due to human modification of the land surface, in some cases 15 to 20 degrees. However, it must be said, the effect is most commonly associated with urban communities. Another issue that will be communicated between the entities is that of salvage tax.

Wyland and Reynolds said that Fundamental Data plans a three phase project in the area. Tucker County is Phase One. Phase Two will be a second natural gas plant. However, Phase Three was confirmed to be explored as a possible nuclear facility for Grant County.

Wyland and Reynolds said that Fundamental Data acknowledges that a general dialogue with the community should have occurred sooner, but they felt it was better to wait until more concrete measures were in place, since plans are still fluid at this stage in the process. The representatives also stated that it was never the company’s intention to deceive the public through redactions and that they existed only for proprietary purposes. The representatives also said that they are committed to a dialogue with the community.

Foundation campaigns: past and present

GC highlights previous initiatives, announces latest campaign phase

Biology Assistant Professor Alyssa Tichinel summarized the many uses of the Anatomage digital dissection table at last Friday’s Garrett College Foundation President’s Circle.

McHenry, MD – Garrett College celebrated past capital campaigns and announced a new phase of its current capital campaign at last Friday’s President’s Circle event.

The President’s Circle – individuals and groups who give at least \$1,000 annually to the Garrett College Foundation – heard from five Science Technology Engineering Math (STEM) faculty members regarding what their gifts to the STEM Capital Campaign provided GC students. The 2018-19 campaign raised \$2.5 million for STEM initiatives to support the Daniel E. Offutt STEM Center.

Mathematics Professor Tim Foster, STEM academic program director, talked about how his students fired rockets and maneuvered drones to document their grasp of mathematical principles. Activi-

Janet Kepple of the Garrett College Foundation announced the final stage of the GCF Athletics Capital Campaign, a locker-naming initiative in the new men’s and women’s soccer, softball, baseball, and wrestling locker rooms. The announcement came during last Friday’s GCF President’s Circle breakfast.

ties included student-driven drone flights that identified and reported back on commands found on basketball backboards and in the stands during controlled flights inside the Edwards CARC Morin Family Gymnasium.

Assistant Professor of Biology Alyssa Tichinel displayed student comments to document the importance of the Anatomage digital dissection table – which Garrett College acquired before any other Maryland institution of higher education thanks to the STEM capital campaign.

“The table solidifies my abilities to see normal versus abnormal, something most models cannot do,” wrote an Anatomy and

comment hearing on July 15th at 5:30 p.m. in the Howard M. Cunningham Hearing Room of the Public Service Commission located at 201 Brooks Street in Charleston. A press release will be issued at later date to detail the process to register to speak at the virtual comment hearing. Those interested may also attend the hearing in person, as well.

It was further ordered that Mon Power and PE publish notice of the public comment hearing as a Class I legal advertisement throughout the area served, one time, not more than 20 day and not less than 10 day prior to July 15th in the qualified daily newspapers published in the counties which serve the customers. A legible copy was to be submitted within three days of each publication of notice, as it appeared in the newspaper.

Conclusion

Those interested in participating in the hearing via Teams, must register with the Commission by 4 p.m. on Friday, July 10th. Registration may be made by any of the following methods:

(1) Through the Microsoft Teams meeting link located on the Commission’s website, <http://www.psc.state.wv.us> under the “PSC Hot Topics” section located at the top of the homepage.

Physiology II student.

“It allows us to think critically about clinical cases and prepares students for real injuries and situations we might see in our careers in healthcare,” wrote an Anatomy and Physiology I student.

Another A and P student said the table raised awareness of real-world medical implications.

“Sometimes it is hard for me to grasp how illnesses or injuries actually affect the body,” wrote the student, “so the table has really helped make that clear.”

Wendy James, assistant professor of radiologic technology, talked about the impact GC’s new rad tech program is expected to have on the region.

“We’re the only Western Maryland college with a radiologic technology program,” said James, who guided the selection of 15 first-year students last fall – out of almost 50 qualified applicants. GC

(2) By calling 304-340-0822 (Alexis Weimer) or 304-340-0820 (Andrew Gallagher)

(3) By emailing aweimer@psc.state.wv.us or agallagher@psc.state.wv.us.

Those interested in commenting in person at the hearing during the hearing should attend and can sign up to speak at 5:30 p.m. at the Public Service Commission, Howard M. Cunningham Hearing Room, 201 Brooks Street, Charleston.

Alternatively, written comments may be submitted by individuals or entities to the Commission prior to the hearing. Those interested in submitting written comments on the case may submit by mail or hand deliver to: Executive Secretary, P.O. Box 812, Charleston, West Virginia 25323, or on-line at <http://www.psc.state.wv.us> by clicking on “Submit a Comment” in the left column and following the directions provided. All written comments should reference Case No. 26-0108-E-CN.

Interested persons may also attend the public comment hearing in-person or via webcast to observe the public comment hearing. The webcast may be viewed by clicking “Commission Webcast” located under the “Inside the PSC” section in the left column on the Commission’s website: www.psc.state.wv.us.

hopes to expand the number of students who may be accepted into the program as the program matures.

Two faculty members – Computer Science Professor Rich Lewis and Cybersecurity Assistant Professor Kenny Allman – discussed the program enhancements in both computer science and cybersecurity as a result of Garrett College Foundation funding. Lewis and Allman used GCF gifts to increase student access by permitting students to use any device – Windows, Mac, Linux, or Chromebook – to develop and submit coursework.

“Our faculty and academic administration are clearly using the \$2.5 million endowment established through the STEM campaign to enhance curriculum and increase access to STEM education,” said Dr. Richard Midcap, Garrett College’s president. “We took it a step further while

Mt. Lions Softball Season Comes to an End in Regional Championship at Pendleton

By: Adam Freeman

Tucker County High School's 2026 softball season has come to an end. The Mt. Lions wouldn't go down without a fight as they dispatched their first-round opponent, the Pocahontas County Warriors. Tucker pounded the ball in the first two innings, earning five runs in each to go up 10-0 early. Keisha Arnold led all batters with three hits and an RBI, while Peyton Hicks and Bella Loucks notched two hits each. Hicks had the hot hand on the night, as the junior righty tossed a no-hitter, allowing zero hits, zero runs, and zero errors. With the 11-0 victory, Tucker took to the road to take on the #1 seed in the region, Pendleton County. The Mt. Lions failed to collect a hit in the game, which led to their ultimate downfall in a 15-0 loss.

With the loss, Tucker was scheduled to return home for a second bout with Pocahontas County. The Warriors chose not to make the trip or partake in the matchup, giving Tucker the win and setting up a regional championship match with Pendleton. Tucker did collect two hits, one each from Hicks and Loucks, but again, Pendleton was too much for Tucker, ending the Mt. Lions' season with a 12-0 loss.

The Mt. Lions finished the season with an overall record of 6-14 and look forward to their 2027 campaign.

Nine Tucker baseball players participate in Elkins Babe Ruth Opening Day Ceremony and will be representing Tucker County this season

L-R: Braylon Simmons, Wade Boyles, Zane Carr, Quinton Teter, Sawyer Supak, Bentley Haddix, Luke Lantz, Rylan Sexton and Matthew Barkley.

FOUNDATION

STEM Program Director Tim Foster explains to attendees of last Friday's President's Circle how rockets purchased through Garrett College Foundation donor gifts are incorporated into mathematics courses at Garrett College.

raising \$3.6 million for a performing arts endowment, ensuring residents have the opportunity to enjoy per-

forming arts, and students have the capability to pursue their artistic interests." Janet Kepple, the Garrett

College Foundation's representative at the President's Circle, then updated attendees on the Foundation's latest capital campaign, a \$1 million initiative to support the College's expansion of intercollegiate athletics.

"Due to increased enrollment, sparked in large part by expansion of our intercollegiate athletics program, our current athletic facilities in the Edwards CARC are no longer sufficient – we're simply out of space," said Kepple.

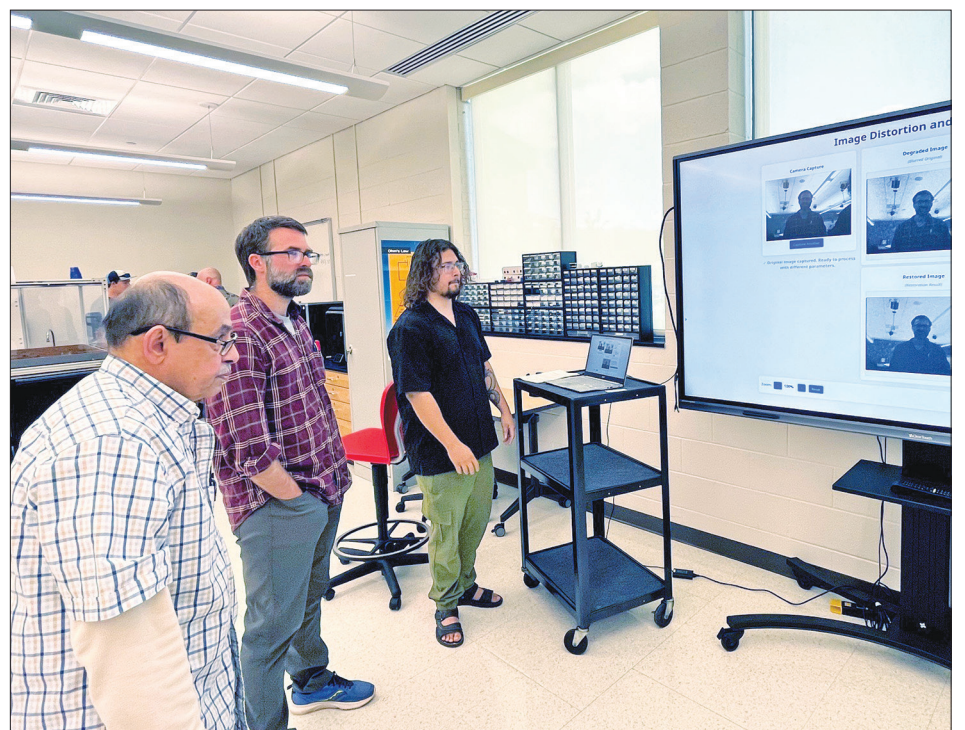

"We are currently renovating the 700 Building to house our men's and women's soccer, softball, baseball, and wrestling teams," added Kepple, noting 23 of the campaign's 27 major naming opportunities have already been acquired.

"We're excited to launch two new initiatives as part of the Athletics Capital Campaign: a donor wall and a locker-naming opportunity," Kepple said. "The locker-naming initiative will be similar to the seat-naming opportunity offered during the Performing Arts Center campaign. The donor wall will resemble the one outside the PAC conference center, but with a design reflecting the Lakers' athletic spirit."

Kepple said individuals or families can reserve baseball, softball, men's soccer, and women's soccer lockers with a \$300 gift, and wrestling lockers with a \$250 gift.

"Naming a locker offers more than just a plaque," said Kepple. "It gives a student-athlete a sense of belonging – a dedicated space to prepare, focus, and call their own. Each time they enter the locker room, your name will remind them of your support and encouragement."

"We're really pleased to be able to offer this opportunity to community members," said Kepple. "We want everyone to feel like they're a part of this campaign."

Garrett College faculty members Pramod Kapoor, foreground, and Joel Bostic, center, listen to Elijah Hansen as he explains his differential equations project.

Differential equations roar to life at Garrett

Students present capstone projects proving course concepts

McHenry, MD – Differential equations aren't normally considered exciting.

Unless you're at Garrett College.

Three students taking Differential Equations with Assistant Professor Bryan Lewis presented their course projects to faculty, staff, and administrators last Thursday.

"This is totally nontraditional for differential equations classes," said Lewis. "In classic differential equations, you learn the math; in this course students actually use it. It's great to have the flexibility to use that approach."

Sophomore Everett Nichols created a building model to explain a mass damper spring system's practical applications.

"In my model, the building has a pendulum attached to the top of it, and the spring system represents the shaking force that makes it move side to side from wind or from an earthquake," explained Nichols. "The pendulum at the top acts like a counterweight – a tuned mass damper – swinging in the opposite direction to reduce the building's motion

and help it stay more stable."

While Nichols was interested in reducing destruction, Parker Ferraro decided to break some glass – with sound waves.

"I just thought the idea of resonance was the most interesting concept in the class," said Ferraro, referring to the phenomenon that occurs when a system or object is driven to oscillate at its natural frequency. This results in a significant increase in amplitude – and a lot of broken glass when that glass is subject to certain frequencies.

"It's fascinating to me that a bridge or a building – or glass – can self-destruct based on frequency," said Ferraro.

Elijah Hansen's project focused on image-restoration techniques. While he demonstrated the principle with basic photographic images, Hansen noted there are more important applications for this activity.

"Restoration tools are used in medical technology to provide doctors with better images of medical conditions," said Hansen, who is planning to pursue a career as an MRI field service engineer.
