\$1.00 Volume 112, Number 45

Franklin, Pendleton County, West Virginia 26807

Thursday November 6, 2025

On Oct. 31, Pendleton County's first snowfall of the season created a winter wonderland on Spruce Knob. According to the woolly bear, there are 61 more days of snow to come this winter.

## Woolly Bear Predictions — An Appalachian Mountain Tradition 62 Days of Snow Predicted This Winter

By Stephen Smoot

One of the regular autumnal rituals in the mountains is observing woolly bears, or worms, to discern the likelihood of a rough or mild winter.

It is unlikely that American Indians used these observations, but the tradition dates back to the original frontier

Pendleton County, like so many other communities in West Virginia, has its own expert who applies countless time of study and application of a "secret formula" to provide a prediction.

Robin Kile has shared her prediction for the upcoming

The Woolly Bears Have Returned! Woolly Bear Winter Weather Forecast for 2025-26

in Pendleton County since 2013-14, except for last

winter when none of the caterpillars could be found to make a forecast," Kile reports. "This fall, however, the little fuzzy ones returned and once again have made their prediction. Twenty-five woolies were captured by Jack Hedrick and delivered to Kiser Gap where the black and brown bands on each caterpillar were counted. The caterpillars were then released. This information was plugged into the "secret formula" and according to that data, Pendleton County should have 62 days of snow falling from the sky this winter (Nov. 1 - March 31). Based on 11 years of woolly bear information, 62 is the average number of snow days for this area. Whether a snow lover or hater this should bring one joy, as it also means there will be 89 days of no snow!"

#### **Board of Health** To Hold Meeting

The Pendleton County Board of Health will conduct a meeting at 5 p.m. Nov. 13 at the health department located at 274 Mill Road in Franklin.

### **Ouilters To Meet**

The Sew and Sews Quilt Guild will gather at 6 p.m. Monday at Faith Lutheran Church in Franklin. Activity will be ornament making. Anyone interested quilting is invited to attend.

### **Veterans Day Program Planned**

A Veterans Day ceremony will be held at 11 a.m. Tuesday at the Richard Homan Memorial Park in Sugar Grove. Attendees are invited to enjoy refreshments following the ceremony. The event is being sponsored by the VFW Post 9666.

A North Carolina State University publication several years ago explored the use of woolly worms as prediction devices. They wished to determine if the traditional Appalachian lore regarding them held up to academic inquiry.

Traditionally, black stripes are said to predict more cold and snow. Brown stripes indicate milder conditions. The Old Farmer's Almanac suggests that "if their rusty band is wide, it will be a mild winter." In fact, it issued a prediction that the Northeast will have a mild winter based on observations.

When the woolly worm sports narrow bands, that indicates a harsh winter. Also, as the Farmer's Almanac states, "the more black there is, the more severe the winter," according to tradition. Its usual 13 bands of color are said to represent the 13 weeks of traditional winter, according to Appalachian History.net

In 1948, Dr. C. H. Curran of the American Museum of Natural History in New York City decided to test the tradition of woolly worms and weather. The long-term study also gave him a professional excuse to go on many excursions deep into the New York State countryside during leaf changing season.

He and the friends and colleagues who accompanied him styled themselves the "Original Society of the Friends of the Woolly Bear."

Whether one calls it the woolly worm or bear, this species has one characteristic that sets it apart. It is one of the few North American animals to practice "freeze tolerance." It pumps itself full of cryoprotectants when the cold season approaches. This enables it to not just hibernate, but to freeze itself in its larval stage throughout the winter. It then thaws in the spring to form a pupa and transform further.

After eight years of study, Dr. Curran established that he needed a much larger sample size over a longer term to truly establish a connection. He did say that his work did not rule out the possibility that the tradition was, in fact

Exactly 50 years ago, Appalachian State University's students established a Center for Woolly Worm Study, originally to compare new specimens with those collected during 10 years

Lack of resolution only makes this unusual little insect that much more interesting to scientists and natural observers alike.

# WVU Medicine's Bonnie's Bus And LUCAS Scheduled Visits To Pendleton County Released

By Stephen Smoot

One of the major challenges of rural health care lies in barriers to access. For a long time, overcoming those meant finding ways to get the patients from home to health care.

In recent years, that dynamic has reversed. Increasingly health care, within reasonable limits, can come as close as possible to one's home. For example, Potomac Highlands Guild has started offering virtual mental health services from mobile

WVU Medicine has also pioneered bringing health care services on mobile physical platforms, like the LUCAS lung cancer screening facility and Bonnie's Bus, equipped

Bonnie's Bus and her "colleague," LUCAS, take essential cancer screenings into remote areas.

with breast cancer screening equipment. A bus calendar for both Bonnie's Bus and LUCAS is offered. Scheduling is already set through the end of 2026. Screening appointments need to be scheduled a month in advance.

In 2026, Bonnie's Bus will

run to Parsons on March 24 and 25, then again on June 23 and 24, St. George on March 26, Thomas on April 29, Harman on June 12, Moorefield on July 22 and again on Oct. 22, Harman on Oct. 23, and Petersburg

# Earle's Service to WELD, Dedication During Flood of '85 Leads to Broadcasting Hall of Fame

During the Flood of 1985, all access out of Franklin was blocked, including Rt. 220 north of Franklin at Ruddle.

By Stephen Smoot

"Well that high tide's risin'/ Mama don't you let me down/ Pack up your suitcase/ Mama don't you make a sound/ Now it's king for king/ Queen for Queen/It's gonna be the meanest flood/ That anybody's seen/Oh mama, ain't you gonna miss your best friend now?

Yes, you're gonna have to find yourself Another best friend, somehow.'

And those who lived through the terrible nights and days, those who remember the fifth of November, but different from the English, they all recall who their best friend was, even for just a few days, as the death throes of a powerful hurricane strangled communities up and down the South Branch Valley.

That was Willard Earle, already a familiar voice for a quarter of a century on WELD.

While 1985 served as a focal point for flood and natural disaster memories, horrific floods had plagued the South Branch Valley and wa-

Remote communities and residences facing destruction and isolation relied on Willard Earle at WELD for information.

tershed since settlement.

In 1877, according to records, the South Branch River crested at 34 feet at Springfield in Hampshire County, March of 1936 witnessed a flood that slightly exceeded that mark. According to a contemporary Moorefield Examiner account, "Moorefield was cut off from the outside world for two days by a flood that suddenly swept down the valley.'

Franklin saw the river crest seven feet above flood stage in that incident, Petersburg and Moorefield both endured flooding 10 feet higher. Storms hit in the middle of one of the hottest and driest decades in West Virginia and American

Unlike in 1877 and 1936, officials had somewhat more warning about the weather to come in 1985. Called "the Election Day Flood" in Virginia and "the Flood of '85" in the Mountain State, the origins came in the Caribbean Sea. On Oct. 26, a tropical storm named Juan

# Chesapeake Bay Foundation Releases Draft of Proposed Final Watershed Agreement

By Stephen Smoot

More than 40 years ago, the Chesapeake Bay Program emerged as the foundation of efforts to reduce pollutants in its watershed with the goal of restoring wildlife in the bay and in streams emptying into it.

Under Governor Cecil Underwood almost 30 years ago, West Virginia joined the coalition of jurisdictions within the watershed, Virginia, New York, Delaware, Maryland, the District of Columbia, and Pennsylvania. In exchange for access to grant funding that has helped, for example, to upgrade sewer systems waste treatment plants, the Mountain State wedded itself to the program and its efforts.

By 2014, the program included a Chesapeake Bay Watershed Agreement that established goals, expected outcomes, management practices, and more to "protect, restore, and enhance finfish, shellfish, and other living resources, their habitats, and ecological relationships to sustain all fisheries and provide for a balanced ecosystem in the watershed and bay."

This year will see an updated watershed draft agreement come up for approval.

Chesapeake Bay's watershed includes all normally contiguous bodies of water, approximately 180,000 miles total, that flow towards

and into the Chesapeake Bay. Notably, West Virginia during much of the past decade has outperformed all other states

in the program in terms of reducing pollutants from industrial, agricultural, and other sources. At the same time, algae blooms that fed off of pollutants have decreased while populations of

blue crab and other species expanded. The West Virginia Department of Environmental Protection and the West Virginia Department of Agriculture had partners in achieving this success. Under Dale Walker and other leaders, the West Virginia Poultry Association worked with members to successfully implement techniques that more precisely deployed manure into fields to reduce runoff into streams eventually feeding the bay.

All other states followed the United States Environmental Protection Agency recommended punitive laws, regulations, and rules that emphasized punishing polluters, even accidental ones. West Virginia wisely refused the federal advice and has seen its system of incentives, reliance on third-party organizations instead of government agencies, inclusion of cooperating local governments and institutions, and voluntary participation fare much better.

The new draft agreement's opening statement would seem to reflect that, stating "one of the most important lessons the partners have learned from the past four decades is that although watershed-wide partnerships can help to coordinate and catalyze progress, implementation is locally inspired and driven."

As other states continue to struggle to meet Continued on Page 8

# **OBITUARIES**

Amy Nichole (Hull) Vaus

Amy Nichole (Hull) Vaus, 29, of Monterey, Virginia, passed away Oct. 29, 2025, at the home of her motherin-law, Lorrie Vaus in Monterey, Virginia.

She was born April 19, 1996, in Harrisonburg, Virginia, the second daughter to Melissa (Wright) Hull and the late Russell "Beatle" Lee

Mrs. Vaus graduated from Highland High School in 2014 and worked as a waitress before going on to become a pharmaceutical technician. She worked at Highland Medical Center Pharmacy from March 2016 until October 2019, when she

was diagnosed with cancer. If one was lucky enough to have known her before she was sick, one knows she was the life of the party, funny, wild, carefree, down for whatever girl. But if one knew her after she got sick, that's the real blessing to one's life. She was the strongest, bravest, most selfless person many have ever known. Through the entire six-year battle with her cancer, she fought. The first time she chose her baby girl over herself was when she received her diagnosis during her pregnancy. She continued to choose that baby girl for the next six years. Against everything doctors told her was possible, she lived. One would find her at truck pulls, cookouts, camping, and carrying that wild and precious little girl wherever she wanted to go. She did all of this while fighting through chemo, radiation, gamma knife, etc. One would even find her trying to make one a plate of food first before herself; if that's not courage and selflessness at its fin-

what is. The most incredible thing about her was that she fought her battle with joy and hope like never seen before.

One can learn from her to face life's trials with grace and faith in God. If one leans into Him and trusts His plan, one can truly have peace no matter what is coming. One can run straight into the fire with full confidence in the One who made everyone.

On Oct. 6, 2018, she married her high school sweetheart, Evan Alan Vaus, and in 2020 together, they welcomed their greatest blessing, Lorrissa Nichole.

Left to cherish her memory are her husband of seven years, Evan; their daughter, Lorrissa Nichole; mother, old, 74 of Dayton, Virginia, Melissa Hull of Monterey Virginia; sisters, Emily Stephenson and husband, William "Wilber," and Andrea Hull, all of Monterey, Virginia, and Chasity Godshall and husband, Steve of Rockingham, Virginia; Virginia; nephews, Wesand Isiah and Quintin Garland; niece, Kaitlyn Wilson; land; mother-in-law, Lorrie Vaus of Monterey, Virginia; cousins; and many countless

She was also preceded in death by her grandparents, Carolyn Kay Wright, Thelma "Mae" (Doyle) Hull, and Russell Edward Hull.

A funeral service was held Sunday at the Obaugh Funeral Home in McDowell, Virginia, with pastor Ronnie Breen officiating. Burial followed in Chapman Halterman Cemetery (aka, Anice Hevener Cemterey) located on Forks of Water Road.

Pallbearers were her husband, Evan, along with William Stephenson, Robert Moyers, Elliott Boyd, Chad Lightner, Christian Brock, Daniel Dudley, and Hunter Propst.

Memorial contributions may be made to Lorrissa Vaus Education Fund, c/o Blue Grass Valley Bank, PO Box 516, Monterey, VA

Condolences and memories may be shared with the family at www.obaughfuneral home.com.

# WELD, Earle

picked up enough warm water "fuel" to elevate the storm to hurricane status. Hurricane Juan's track took it first to the Louisiana coast on the 28th. It returned to the Gulf of Mexico, then made landfall once again on the 31st.

Throughout Hardy, Grant, Pendleton, Tucker, Pocahontas, Randolph, and other counties on the periphery of the region, children and their families happily enjoyed a tranquil night of trick or treat as the storm formed and evolved.

Franklin High School only endured its second loss of a solid season the week before, falling to St. Francis 41-6. On the same weekend, Petersburg High School bested their most fierce rival, the Moorefield Yellow Jackets.

Each of those communities would soon face challenges much deeper than how to stop the I formation and option running games prominent in the time.

And Earle, as he always did, manned his post in downtown Fisher at the venerable studios of WELD.

As Chip Combs, WELD radio personality, shared, Earle "started his career in 1960." He went on to explain that "long before his group purchased the station, he set an example of work ethic that was unparalleled." Just as many cash-strapped small town newspaper and broadcaster outlets have had to return to doing, Earle in those days "split (his) time between on-air duties and sales and nobody wore both

Eight months before the deluge, Earle purchased WELD AM 690, assuming the role as captain of that ship. Noting the popularity of clear FM broadcast radio, Earle "and his group took the plunge and created WELD 101.7, ushering in a new era of radio, right here in our little valley" said Combs.

As Earle's daughter, Sarah, shared with the Grant County Press last week, "Community was always important to my father." His voice carried the community news to radio sets far and wide. In those days, listeners in 12 counties in three states relied on WELD broadcasts for news and entertainment. Earle's stentorian voice also served as that of area high school sports that he broadcast during the decades.

Sarah Earle also told the Grant County Press that her father provided much of the information that Facebook community pages share one fourth of the way through the 21st century. "When I was in high school, I used to think some of these programs were silly in a way," she admitted, but has since concluded, "maybe dad was actually ahead of social media."

As children in West Virginia's Potomac Highlands enjoyed Halloween, those in Gulf Shores, Alabama, endured a different fright night. Between 10 and 12 inches of rain forced families to flee their homes as floodwaters rose along with sustained winds between 60 and 70 miles per hour.

The historical retrospect of the National Weather Service on the "slow and erratic motion of Hurricane Juan" stated that it "made

for a forecasting nightmare." Meteorologists struggled to determine the path and expected impact of the "meandering" system that "drifted slowly north into the Tennessee Valley over the next several days."

A combination of normal mid fall conditions combined with an abnormal storm system formed a recipe for destruction. Peter Corrigan, a senior service hydrologist with the National Weather Service in Blacksburg, Virginia, described how "dormant" vegetation, overcast skies, and "feeble November sunlight," "reduced evaporation to the point that nearly all the rain that fell in the days preceding the flood" prevented water evaporation that might have mitigated the impact of the rains somewhat.

Juan's remains formed a weak low pressure system that collided with an "upper level trough" from the central United States that put the still-powerful storms into a holding pattern over the central Appalachians. Nothing cut off the northward flowing stream of warm, moist tropical air keeping those storms so unusually strong.

When floods come to the Potomac Highlands, they follow a general pattern. Many floods that could happen do not, thanks to the extensive system of National Resources Conservation Service small watershed flood control dams. They take on significant stormwater burdens that protect lives and property downstream. Even during major floods, they reduce the potential damage to property and loss of life.

Streams swell first upstream in the south. Flood waters move relentlessly north through communities on and near the rivers.

John O'Brien, an Appalachian scholar who

grew up in Piedmont and eventually took residence in Pendleton County, recalled initial signs of trouble in his book "At Home in the Heart of Appalachia."

He wrote that Ruskin Murphy, Pendleton County is aller and member of Pendleton County

County jailer and member of Pendleton County Emergency Rescue, shared with him that weekdays are normally bereft of calls, but the monitor had been "cracking with calls since he woke up and they are coming faster all the time." The entire county seemed afflicted by whatever was happening, forcing Murphy to conclude, "Something is way out of line here."

O'Brien recalled as the flooding opened in Franklin "Dyer Avenue has become a shallow stream with a quarter-inch sheet of water gliding down." Through Franklin's historic downtown, stricken by fire just over six decades prior, O'Brien noted that "Main Street is a larger stream."

Emergency phones and HAM radio broadcasts continued to reach out to the county's command center. Calls came in of trapped families terrified of rising water, the South Branch extending from valley wall to valley wall in Ruddle, and a threat to the safety of the people not seen since armies traversed the county in the Civil War afflicted the area. Power lines failed, leaving broad swaths of the Potomac Highlands in the dark.

And the waters surged northward. Upstream, the damage intensified as the loss of life and property focused on Hardy, Grant,

and Pendleton. As the first Pendleton Times published in the wake of the recession of floodwaters stated, "Hundreds of homes were washed away and hundreds more were destroyed as walls of water struck with unyielding force."

The account also noted the severe damage to farms along the river, including the stripping of "thousands of acres of rich top soil," as well as countless dead livestock and destroyed equipment and other assets.

More importantly, as the Times recalled, "The county was isolated from the outside world for three days with 18 bridges washed out and massive slides. With electric power out nearly everywhere and smart phones still more prominent in science fiction than anywhere else, Pendleton County's battery-powered transistor and automobile radios brought in the only reliable source of news, Earle broadcasting from WELD.

Rick Gillespie currently serves as the emergency services coordinator for Pendleton County, but in 1985 he had six years under his belt as a West Virginia State Trooper. One of the most important aspects of keeping the area as safe and as well-informed as possible was Earle and WELD radio.

With television and electric powered communications equipment unavailable, all anyone had in those days was radio, whether battery operated or in a vehicle. "I recall WELD and Willard doing stellar work in keeping the public informed," Gillespie said.

That amounted to more than simply reading the news, however. Earle served as a literal lifeline. Even as his grandson, Jesse Earle, shared, he had to set aside whatever concerns he had about the safety of himself and his own to serve the region in one of its most desperate times.

First, WELD sent a request to the Federal Communications Commission as the scale of the disaster became apparent. Some smaller AM radio stations had restrictions on night hours broadcasting, including WELD. Quickly, they received a waiver for 24-hour operation for the duration.

Earle took full opportunity, staying in the studio, behind the microphone. As Gillespie remembered, "I recall his 'made for radio voice' passing many important messages related to welfare, recovery, and other important matters to the public." As his daughter, Sarah, related to the Grant County Press, this included the very human effort to keep families apprised of each other's safety.

In her book "No Road Maps," Margaret Allen wrote about hearing WELD utter "the F word - FLOOD" while providing warnings to residents to get clear of rising water.

At the center of the destruction, residents saw conditions almost unforeseeable. Idelta Lambert of Circleville and her husband, Keith, saw the waters rising in one of the harder hit areas. She remembered that "the water took all the farms. I had three feet of water in my basement." The location of Lambert's home, built by her father with his own two hands in the 1930s, is situated on the opposite hillside from the North Fork near Circleville, quite far from the riverbed.

She recalled that her husband lost about

20 head of sheep. Rising waters also swept up one of the family's vehicles, a Volkswagen, and pushed it far downstream. "The ground was so saturated," Lambert remembered, adding that without electricity or telephone, the family used a kerosene heater for the basics, such as cooking food and brewing coffee."

When the Red Cross set up at the school in Circleville and started serving hot meals, Lambert shared that "food never tasted so good." Only from word of mouth and WELD could residents learn of help.

To WELD, messages would come from individuals seeking to find family members, or others looking to make sure their families knew they were okay. The diary of Mary Kellar, reprinted in part in the Moorefield Examiner's flood retrospective, shared that "W.E.L.D. is running messages so folks can learn if friends and relatives survived." She also contacted WELD because "I want Mother and my boys in Virginia to know that we are alive."

Throughout, Earle would relay these messages in the hope that they would provide a little comfort in a terrible time. Those broadcasts combined with countless other efforts to help, but also forged a bond between those who went through it that will never break.

Dave Workman, West Virginia University Extension Service agent then and Hardy County commissioner now, stated in an Examiner retrospective that "we grew closer as a community. It became a community, not just an agricultural community or a town community but an entire community."

Others agreed. Peggy Hawse was principal of Moorefield Elementary School, then later served as a representative for the Office of U.S. Senator Joe Manchin. In the same retrospective, she shared that "you can't go through something like that and not come together as a community."

For his decades of service to WELD and those days of dedication during the Flood of '85, Earle earned induction into the West Virginia Broadcasting Hall of Fame. He took his place alongside state legends, such as Nick Fantasia Sr., Hoppy Kercheval, Jack Flemming, Woody O'Hara, and Tony Caridi, as well as nationally known figures such as Bob Denver, Soupy Sales, and "Little" Jimmy Dickens.

Earle has long since retired, but his legacy lived on. Those who remembered his daily news broadcasts, as well as the dark days of the flood, banded together long after he was gone to save the station he served so well for so long. Likely, without Earle building the bond between station and community, WELD would have faded away

like so many rural media outlets.

That said, his legend will still find as its foundation his voice's ability to keep a community hopeful and connected. Just as it will always remain a part of the life of those who endured it, his legacy will ever after be intertwined with his contributions.

That magical connection that still endures inspired Combs to share that "WELD enters your life one of two ways; you either grow up

on it or grow into it."
"A lot of us grew into it on Nov. 4, 1985."

We are seeking additional housing for our Moorefield, WV facility

#### 'Flood of '85' Wreaked Havoc

Some area residents are recalling one of the most devastating natural disasters to strike Pendleton and surrounding counties in the last century. This week marks the 30th anniversary of the 'Flood of '85.'

On Monday, Nov. 4, 1985, over 7.5 inches of rain fell on the ground that was already saturated from above average precipitation in the weeks leading up to the flood. George Hammer, official weather observer for the US Weather Bureau, reported amounts from his station one mile east of Franklin. Some sections of the county reported as much as 12.5 inches of rain over the four-day period preceding the flood. Hammer commented that the 7.5 inches that fell on Nov. 4 was the most rainfall in a single day that he recalled during his 30 years of keeping records.

The ensuing flood waters ravaged homes, businesses and farmland causing hundreds of millions of dollars in damages and loss. Over 350 single family homes and 190 trailer homes were affected by the high water. Also impaired were some 39 businesses, 18 public buildings, 60 private bridges and culverts, 206 outbuildings, 51 barns and 204 recreational campers.

Pendleton County was essentially isolated from the outside world for three days. Road damage, washed-out bridges and massive slides made travel impossible. Otis Harper, Jr., Pendleton County road maintenance supervisor, estimated damages to primary roads at \$34 million and damages of secondary roads at \$20 million.

Electricity and telephone service was unavailable. The only form of communication out of the county was provided by ham operators, who worked tirelessly 24 hours a day relaying emergency

Franklin Elementary School and Dixie School in Riverton were set up as evacuation centers to provide shelter for those losing homes to the raging waters.

Communities within the county were isolated from each other making it impossible for local service organizations to render assistance to many areas. The Franklin Fire Department sent teams of members to try to get to isolated areas to assess their needs and get emergency supplies to them. Attempts were made to obtain help from the National Guard at Buckhannon and the Elkins Fire Department, but volunteers were unable to

travel past Harman. Sanitation and health problems posed a threat until the National Guard came in with helicopters and began airlifting medical supplies to isolated areas. Of particular concern were shortages of insulin and nitroglycerin and a means of distributing the

MECHANICAL CONTRACTORS "Enriching Lives" supplies that were available.

Water supplies throughout the county either were destroyed or the water was rendered unfit for drinking. All community water systems in the county were knocked

The swinging bridge spanning the South Branch of the Potomac River in South Franklin, which had survived floods for 45 years, was washed away, and the approach to the bridge a half-mile south of Franklin leading to Propst Gap was also washed away.

Pendleton, along with seven other counties was declared a federal disaster area by then-President Ronald Reagan, making it eligible for federal assistance. Two weeks after the flood, nearly 700 county residents had applied for some form of federal assistance.

Sixteen deaths in the county were attributed to the flood. Two of the deaths, Ivan Stone, 58, and Jody Whiteside, 16, occurred as they were attempting to rescue other victims.

County school students were dismissed early the afternoon of Nov. 4 and did not return to class until Dec. 3. Due to location, some students were not able to return until much later.

The Pendleton Times was not published the week of Nov. 7, because of the electricity outage and lack of distribution facilities. A special reprint of the edition following the flood was distributed the week of

Despite 30 years of repair and rebuilding, the Pendleton County landscape still reflects the devastation caused, and lives were forever changed, by the raging waters from the "Flood of '85.'

#### **EDITORIALS**

#### Keep Funds Intact ---

One of the major problems which has faced the County Court of Pendleton County in recent years has been the problem created by the declining need for the county parish farm and the

increasing cost of operating it. A number of years ago when the county government had the full responsibility of caring for the indigent, the parish farm was a much needed possession of the county. But in recent years the state and federal governments have largely taken over the responsibility of caring for the needy, and as a result, the county no longer has the need for the farm that it once had.

Although the need for the parish farm has been declining, in recent years the cost of operating it has increased to the point where it was becoming a burden upon the county to maintain it. It had, indeed, become a problem. But the county court faced up to the problem and resolved it by selling the farm. We believe the court acted wisely in taking this decisive

**NOW SERVING** 

**PENDLETON COUNTY** 

But in solving one problem, another was created. The farm was sold for \$74,600 and the personal property brought about \$17,400 more, bringing the total proceeds of the sale to approximately \$92,000. The problem now is what is the best use that can be made of these funds.

We are fortunate in having county officials with sound judgment. We are confident that they will see the merit in using the monies now under their control for something big, something that will be a significant and lasting benefit for the county, rather than in dribbling it away, little by little, so that there will be nothing to show for it 10 years from now.

70 Years Ago Week of November 3, 1955

#### Firemen's Hallowe'en Parade, Party Draw Large Attendance

Approximately 200 youngsters from throughout the Pendleton County, dressed in costumes ranging all the way from Cinderella to Satan, and from Davy Crockett to 20th Century Mechanical Men, marched in the firemen's annual Hallowe'en parade in Franklin Monday night.

Following the parade, the firemen threw a big party for the youngsters at the fire station including contests and entertainment by the band, capped off with hotdogs, coffee and Kool-aid for everyone.

It was estimated that from 1500 to 2000 persons lined both sides of Main Street and parts of High Street. Approximately 1000 of them followed the paraders to the fire station.

Braving a chilly 40 degrees temperature, they saw Ervin Dale Lambert get his face well smeared with chocolate pie as he won the first pie eating contest. Jean Ann Simmons and Bill Cunningham tied in a second pie eating contest later in the evening.

Carrol Thompson won an apple eating contest, and Loren Bryan succeeded in blowing up a balloon until it burst quicker than his competitors. Roy Hartman revealed a good baritone voice to win the hog calling contest, and Dale Thompson was the champion bubble gum blower. Johnny Murphy won the hotdog eating contest.

Prizes were awarded for the prettiest, most original and ugliest costumes. Winners of the prizes were as follows: Prettiest costume-Candy Dalen, who was dressed as a fairy; most original costume-Sue Hiser, who was rigged up as a mechanical man; ugliest costume-Charlie Sites, who represented a scarecrow. Runner-up for the ugliest costume was Linda Stump, who was dressed as a tramp, and Carolyn Simmons who represented a television set, was runner-up for the most original costume.

#### CLINTON HEDRICK AWARDED MEDAL

"Technical Sergeant Clinton M. Hedrick, glider infantryman of Riverton, Pendleton County, West Virginia, who gave his life covering the retreat of his comrades from German treachery last March 28, has been posthumously awarded the Medal of Honor, the War Department announced October 26.

Sergeant Hedrick died inside the court of an ancient castle at Lembeck, Germany, facing the Germans with a Browning automatic rifle while his comrades withdrew to return with reinforcements. When the reenforced infantrymen stormed the castle shortly afterward, they found him dying from

The medal will be presented to Sergeant Hedrick's father, Preston Hedrick of Riverton.

"Sergeant Hedrick was fearless through two days of fighting," Staff Sergeant Richard L. McKelvie of Eggertsville, New York, reported. "We made our landing near Wesel the day before and after gathering in a woods, set out on the attack on Lembeck. We came out into a field and attacked heavily defended positions. But when we were among the enemy they opened up with two machine-guns that pinned our men to the ground.

"There was a trench leading close to the machinegun positions and I begged Sergeant Hedrick to use it when he said he was going out to silence the guns. But he got up and went at them with the automatic rifle firing from his hip. He knocked out

"When we ready to take up the assault on Lembeck he knew a frontal assault would be costly, so he took a squad around to the flank and opened a diversionary attack. When we started our attack he was fighting more than 100 Germans with his little squad."

"In the final drive, Sergeant Hedrick again advanced alone against two machine-guns and blasted them out of action with his BAR," Sergeant McKelvie related. "A sixman patrol, all armed with automatic weapons, appeared on our flank in a surprise move and Sergeant Hedrick killed them all with a burst from his rifle."

Sergeant Hedrick was born on May 1, 1918, at Cherry Grove, and attended rural school. His parents later moved to their present farm home at Riverton.

A veteran of fighting in Africa, Italy, France and Belgium, he entered the Army on September 5, 1940, and participated in the landing at Oran. He wore battle stars for the Rome-Arno, Southern France and Germany campaigns, in addition to the Combat Infantryman Badge, awarded him for exemplary conduct in action against the enemy.

CARL E. BURGTORF FOREST RANGER

Arlie Warner of Cherry Grove, is now on duty at the Gatewood fire tower helping to protect the Monongahela National Forest from fire. He is one of the more fortunate veterans since he found a home for his family at Harman.

Arlie says that life at the fire tower before he entered the Army seemed quite rugged though it now seems somewhat refined. Undoubtedly this impression is due to the fact that Arlie has spent day after day lying in the mud, eating K-Rations when he could get them, and living out in all kind of weather.

Perhaps some of us would appreciate our beds more if we too had been in France and Germany when raincoats and blankets froze in the mud and snow, and just standing up was a luxury.

If you pass through the Spruce Mountain or Hunting Ground country, you are invited to stop at the Gatewood fire tower where veteran Warner will gladly take time off from baking biscuits or running his weather station to show you the highest mountain in West Virginia and other points of interest.

## Smith Creek/ Friends Run

by Dave Ellis

Another month has started, and it is getting closer to the start of a new year, less than two months away. It seems that at the end of this year, there are more events to send the old year out.

Veterans Day is Tuesday. There are many veterans in this county. This is the only day of the year devoted to them. If one knows a veteran, give them thanks for their service. They made the sacrifice for this country, so give them respect. Smith Creek and Friends Run

Churches of the Brethren: shutins — Bucky Moyers, Pam Riner, Anna Tesi, Larry Movers, Sandy Washburn, Mary Alice Simmons, Anna Lee Mitchell and Carol Propst; prayer list — Richard Campbell, Joshua Shirk, Ava George, Kenny Williams, Dennis Mitchell, Debbie Horst, Neal Eye, Donald Burns, Ruth Bauer, Rick Waggy, Gloria Moats, Ruthalene Judy, Frankie Judy, David Berg, Tim and Dee McCormick, Jim Judy, Jessie Simmons, Minny Rhoads, Larry Rexrode, Troy Bennett, Jim Fawley, Tom and Judy Borror, Judith Ours, Bob and Brenda Sites, Nancy and Toney George, David M. # Steaming Soup Kettle Aromas Create Warmth this Time of the Year

#### Sugar Grove

By Paula Mitchell

November is spreading its brownness over the hills in this community, muting the colors and bringing an end to warm weather. This month is sometimes described as bleak. November is lulling the land to rest, covering the ground with a blanket of brown leaves. Very soon, the ground will be blanketed with a counterpane of white. Wood smoke from chimneys promises warmth and cheer within the dwellings. November is closing its door on summer, bringing that cheery warmth inside.

This is the time for soups, bubbling and steaming on the back burner of the stove. The cellar is stuffed with ripe apples, potatoes, and jars of vegetables. Crocks of sauerkraut are stored in the corner, and the deep freezer is full to the brim with meats. This is the time for warm fuzzy blankets, when dry leaves skitter across the road like small, frightened animals, when the emerald green of the pines stands out amid the brownness of the hills, when trees with their bony arms reach skyward and shiver when the cold winds blow, when night comes earlier and delays its departure a little more each morning.

Perhaps it is November that brings about the longing for home, which is one of the most ingrained instincts there is. The old farm may be sold, the homeplace torn down or burned, yet there is still that desire to go back home again. Yes, there is a fierce pull to these hills. Returning home to a pot of soup would be a nice homecoming welcome:

Blended Vegetable Soup

- Ingredients: 2 tablespoons extra virgin olive oil
- 1 tablespoon butter
- 2-1/2 medium vellow onions, peeled
- 2-3 medium waxy potatoes
- 5 medium carrots, peeled 2 teaspoons fine grain sea salt
- 6 cloves garlic, peeled and sliced
- 5-1/2 cups vegetable broth
- 3 cups broccoli, florets and stems
- Juice of a lemon
- Instructions:

Chop the onions, potatoes, and carrots into (roughly) 1-inch

Heat the olive oil and butter. In a large soup pot over medium-high, add the onions and salt, stir to coat. Cover and cook for 5-10 minutes, stirring occasionally until onions soften completely. Add the garlic, and cook for another minute or so. Add the potatoes and carrots along with the broth. Bring to a boil then reduce to a simmer.

After 5 minutes of simmering, add the broccoli and boil another 7-10 minutes or so. Everything needs to be tender. Always test the potato and broccoli. Remove from heat.

Season the soup well to one's liking with more salt, if needed, and the lemon juice. (Option: soup may be blended, if a smoother consistency is desired.)

Life's little lessons include the following:

- 1. Practice teamwork. 2. Keep noise down.

# Pendleton County Serves Up Hat Trick Against Rival Moorefield

By Stephen Smoot

Two years ago, Moorefield looked to wrap up a difficult season with a win over adversarial rival Pendleton County. The Wildcats had grit, toughness, and determination, but that had not translated into a record that would get the team into the postseason.

For both teams, senior night in Moorefield represented the closest to a playoff atmosphere either team would see all year. The Wildcats silenced the crowd, overcame a mountain of a lead in the fourth quarter, and stole a win that served as a "best moment" for many of their entire playing careers.

Runs at States

By Stephen Smoot

Pendleton County's vol-

leyball team opened up the postseason last week in solid style, taking a workmanlike attitude toward

dispatching opponents in an effort to punch a ticket to Charleston later this

The West Virginia Secondary School Activities Commission changed its postseason arrangement, moving to a superregional tournament format instead of opening with sectional games. East Hardy as the one seed in Class A Region II hosted one portion while second seed Pendleton County welcomed opponents to Franklin to compete in its bracket.

A double elimination format means that the regionals have two rounds, with the championship rounds coming this week.

Alyssa Bennett opened the first set with a serve that caromed off a Tygarts Valley Bulldog player and sailed out of bounds, establishing the tone of the contest.

"Serving has been a priority for us," explained Madison Day, head coach. She added that "it's one of the few things in volleyball you can control."

Continued on Page 7

Conference champion Wildcat cheerleaders seek to collect more post season hardware at regionals.

# A Pendleton County Program in the Making **Dominates Potomac Valley Conference Meet**

By Stephen Smoot

At the Potomac Valley Conference cheerleading championships, the Wildcats roared, as they did in 2024.

This year, the team enjoyed home court advantage with the competition taking place at Pendleton County Middle/High School. Both Division I, encompassing schools larger than Class A, and Division II, the Class A cheer squads, came to Franklin.

"I am so proud of them!" exclaimed Rebecca Miller. Her Wildcats took on Union, Tygarts Valley and claimed the crown. She stated that they performed at the "best they ever looked when they needed to be."

"They did everything their coaches asked them to do," Miller added. "I cannot say enough good things."

Miller praised her three seniors, who "are the leaders of this team." This role

they understood well since no seniors competed on the team last year. Two of them, Jaiden Mitts and Katelyn McQuain, took home individual all Potomac Valley Conference awards. Mc-Kinley Hedrick helped to provide the leadership that kept the team at what Miller described as "peak performance."

At the meet, the team "absolutely peaked. They didn't have any deductions and the judges only had good things to sav."

This year differed from last year in that half the total roster had gone to states last year. "There was a lot of pressure last year," explained Miller, who added that they felt the nerves of a team looking to break a 21-year streak of not going to compete at state championship level competition.

She noted that although some of the girls go their separate ways outside of

the sport, they share a tight bond within the team. They help and support each other, which builds an atmosphere of family and contributes to making the squad more than the sum of their parts.

As the team builds on its success year after year and reloads instead of rebuilds, Miller's vision has emerged. She shared that "it was my goal to build a program, my mission to build a successful cheer program."

On Nov. 8, the girls make the three-hour trek to Lincoln High School to compete in cheer regionals. The top two squads will go on to Charleston in December to compete with other regional winners for a state title.

For the third year in a row, Miller took home Coach of the Year honors, but stressed that the award "would not be possible without the girls. This is just as much their award as mine."

# Pendleton County Too Much For Prideful Paw Paw in Second Round Regional Action

By Stephen Smoot

The Wildcats' trip to Paw Paw last month does not inspire a lot of positive memories, despite the win. Pugnacious Pirates pushed Pendleton County to the brink in nearly every set. The three to one victory did not fully reflect how well the home team played in that match as they tried to flip the script on the state tournament qualifiers during the past three years.

"They're good. They're solid," noted Madison Day, Wildcat head coach. "They deserve all the accolades they get."

Kinsley Price and Carolyn Varner elevate at the net while Emily Poling plays a supporting role behind them against Paw Paw

She is on the homecoming and prom committee and is vice president of the class of 2026. She has been recognized for her high SAT scores and being on the A-Honor Roll. She has received an academic letter and has read to Franklin Elementary School students. She was also recently awarded Homecoming Queen 2025. She has worked at the Korner Shop and Franklin Florist. Her plans are to go to college to pursue a career to help others in a positive way. She is the daughter of Rene Hinkle and Justin Bowers.

Pownell, a senior, is the James Huffman Responsible Student of the Month at PCHS. She is the daughter of Rick Pownell and Carrie Ruddle of Franklin. She is a member of Edu-

cators Rising, National Honor Society, choir,

FFA, 4-H, and West Virginia Theater East.

She was an Educator's Rising state champion and national semi-finalist, author and illustrator of the K-3 Literature Contest. She was a member of the West Virginia 4-H state champion horticulture and poultry judging teams and was a 4-H Club Congress delegate. She volunteers for Energy Express. She plans to attend Eastern Community and Technical College and Concord to finish the Grow Your Own Program and become a kindergarten teacher, as well as write and illustrate children's books and art.

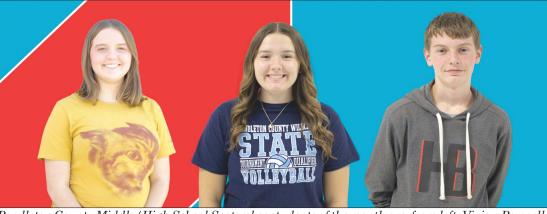

Whetzel, an eighth grader, is the Pendleton County Middle School Student of the Month. He is the son of Jared and Bethany Whetzel of Franklin. What he enjoys most about school is participating in sports with his friends. His hobbies outside of school are sports-based, and his future goal is to play a collegiate sport.

# **UT Producers Collect Donations for PAWS**

Upper Tract Producers 4-H club members held a pet supply donation drive to benefit Pendleton Animal Welfare Shelter. Members brought in cat and dog toys, food, kitty litter, and other various supplies for PAWS. Kristen Dingess and Lauren Hagman, representatives of PAWS, talked about the operations of their organization with the 4-H members. Pictured are, from left, Katie Keyser, Lydia Heavner, Lauren Hagman, Kristen Dingess, and Addie Rexrode. Submitted by Katie Keyser, club reporter.

## Pendleton Vs. Moorefield

Continued From Page 6

field won a single solitary game so far this season, which was a huge triumph over Tucker County.

How would the spirits and ghosts of Moorefield games past affect the relentless drive of the 2025 Wildcats as they faced a highly motivated and deceptively talented Moorefield Yellow Jackets team?

The first quarter showed the level of fight in both teams with each squad probably amped up too much. Both sides struggled to hold onto the ball. The Wildcats would see turnovers end drives quickly, while the Yellow Jackets would hold onto the ball far longer before turning it over.

The Yellow Jackets probed the Wildcat

defense often with the run early. At the 2:34 mark in the first quarter, on third and six, they crossed the goal line first. With the kick successful, Moorefield took an early 7-0 lead.

For those whose favorite play in foot-

ball is the onside kick, this game would have been highly entertaining. Moorefield threatens an onside kick at every opportunity. They will line up in a bunch formation behind the ball and will softly boot the ball directly forward, anticipating that the receiving team will feel intimidated by 11 screaming football players converging quickly on the ball.

If they do not onside kick, then they will shift into a traditional kickoff, and either kick it deep or execute an onside kick. Pendleton County, when receiving, executed their own set of shifts to get the right personnel in the right place.

Zac Smith, Pendleton County head

coach, and his assistants worked the various kickoff options, as well as a package of different plays and defensive formations, into the game.

Moorefield tried to cap off their score

with an onside kick, but the Wildcats came up with the ball. On third down, quarterback Colton Roberson rolled right, then tucked the ball under his arm and streaked for the sticks.

At first, officials called him inches shy of a first down. Then, to the intense displeasure of the home side, the call was reversed, recognizing that the Wildcats had picked up a first down. A personal foul by the Yellow Jackets on a subsequent play pushed Pendleton County closer. Though they got second and goal at the seven, a holding call pushed the Wildcats back to the 15.

The call was of little consequence as Roberson's pass found Cameron Wyatt's hands, letting him take the ball in for a touchdown. Kam Redman's kick tied the contest at seven.

Pendleton County then mimicked Moorefield's onside kick routine and successfully popped one up that landed in the control of Chase Owens. Typical of the first half of the game, as soon as the Wildcats seemed to find a rhythm, hard luck dealt a blow.

With first and 10 at midfield, a Roberson pass caromed off a receiver's hands at an odd angle. A Moorefield defensive back wound up with the ball deflected right at him and did not fail to secure the interception.

The Yellow Jackets took the ball to the Wildcat 46 and opened up shop there. A personal foul called on them pushed the team back to their own 36-yard line. Four plays later, they launched a punt that drove the Wildcats back to their own 27. Pushed back to the 14 by a penalty call,

Roberson on second and 24 faked a short pass to Owens and delivered a midrange ball to Britton Lough over the middle, who worked his way to the team's own 34. Facing third and four, Roberson drew the defense offside with a hard call and picked up a first down.

At midfield on third and three, Roberson again showed the Yellow Jackets a short fake, then fired the ball downfield to Owens, who took the ball to the Moorefield 30. Five plays later, with 3:33 left in the second quarter, Roberson flipped a pass to Travis Owens for a Wildcat touchdown. The kick was no good and the score was set at 13-7.

Moorefield, fueled by flags, quickly got back up the field into Wildcat territory. On first and 10 at the visiting team's 36, Wyatt shut down a sweep left with a massive hit. On the very next play, Moorefield ran a sweep again, but the running back lofted a pass over the aggressive Wildcat defense, hit a target, scored a touchdown, and with the kight required the load 14, 12,

defense, hit a target, scored a touchdown, and with the kick, regained the lead 14-13.

Pendleton County received the kickoff at the 2:35 mark. They took over at the Moorefield 47. Roberson arced a pass

deep over the middle that allowed Travis Owens to sprint under it, then continue on to a touchdown. Redman's kick made the score 20-14.

Though the Wildcats did not attempt an onside kick, the Moorefield player to whom it went extended high in the air to catch, but muffed the play. Pendleton County pounced at the Moorefield 26 and took over there at the 2:26 mark.

A bubble screen to Travis Owens on the right sideline went to the 17. Next, Roberson hit Chase Owens and moved the team to the 10. From there, the quarterback faked a handoff and wove his way through defenders to grab another score. The kick set the score at 27-14.

Regardless of record, the Yellow Jackets

play with pride. Despite the disastrous turn of events, they took the kickoff to field goal range and missed with no time remaining in the first half. Moorefield kicked off, booting an onside

kick off of a Wildcat player and taking

over to start the half. Three plays into

the drive, a big Wildcat hit dislodged the

ball, allowing the defense to gather up the fumble. Roberson with first and 10 at midfield found a crease and ran through it to the home team 30.

Two plays later with 9:13 left in the third, Roberson ran right. As he crossed the line of scrimmage and drew the de-

Owens, who pushed up the right sideline 13 yards to the Yellow Jacket 14.

It allowed all there a sighting of the now endangered and nearly extinct, but once flourishing, quarterback option play.

fense, he pitched the ball outside to Chase

On second and five, Roberson threw left and hit Wyatt at the goal line for a touchdown. The kick by Redman made the score 34-14.

The specter of two straight years of double overtime improbable comebacks prevented anyone from thinking the game over. Coach Smith dialed up an onside kick to try and keep momentum in the hands of his offense, but the Yellow Jackets got the ball at midfield.

Their run oriented offense ground out 32

yards on 10 plays, erasing seven minutes off the clock. The Wildcats stood strong at their own 24, shutting down the offense on fourth down and taking the ball back. Moorefield's defense held and forced a punt with 10:38 left in the game.

Despite the one win record, Moorefield

brought in talented runners, an aggressive defense, and a decent offensive line. They had the talent to sting the Wildcats and did so early in the final quarter.

A Wyatt punt to midfield set up Moore-

field with 10:30 left. The first play broke into the open field and looked to be going far, but Albert Ramos-Rivera sprinted in and rolled the runner to the turf, perhaps preventing a touchdown.

That touchdown came three minutes

later, but Ramos-Rivera's big play meant that Moorefield had to spend precious time to get it as the game wound down. Pendleton County expected the onside kick, but the attempt bounced off a Yellow Jacket too early, giving the Wildcats possession with 7:26 left in the game.

One side would look at that and say "plenty of time." Those on the west side of the field thought "way too much time." The difference between a good team and

a great team lies in the shifting of the gears. Great teams can find that higher gear at the right moment, elevating their performance to shut down the other side's chances and even hope.

Pendleton County's offensive line set

its face to the opposing side, knowing that it and the skilled players who relied on them simply needed to do one of two things, either run out the clock, or score. The Wildcat offensive line forgot about "either" and aspired to do both.

Braylon Willis and Roberson relentlessly ran at and attacked holes made by the Wildcat linemen. Six yards here, three yards there, steadily closing in on the goal line while chomping on the clock. With just under two minutes left, Willis rewarded the line by cutting through a hole, running six yards, and putting an exclamation point on the conclusion of it.

Coach Smith gave "credit to Moorefield" who battled the whole game without quit. He also praised his kicker Redman who connected on most of his attempts of the day

"After the team finally settled in in the second quarter," Smith stated, "we definitely played well, I'm really proud."

# GMH Improves Medication Safety WVU Medicine Grant Memorial Hospital tion safety, increased availability of a wider

range of medications after pharmacy hours, and alignment with the medication management systems used across all WVU Medicine hospitals.

This upgrade represents a significant step forward in ensuring consistent, efficient, and safe medication dispensing for patients at GMH.

# Volleyball First Regional Win

Continued From Page 6

That especially serves as the case when Chesnee Colaw steps behind the line. She served second against Tygarts Valley. Out of 11 serves, eight drew an ace. Colaw approaches serving like Orel Hershiser did pitching for the Los Angeles Dodgers. Calm, cool, collected, but with the precision of a surgeon, Colaw fires serves for both placement and speed while also sometimes working in curving motions.

When Colaw completed her service, the

Wildcats had assumed a commanding 13-2 advantage. Not long after, Callie Judy stepped forward to serve with the score 16-3.

At that point, set one developed into a

clinic. Judy, as she often did in last year's state tournament, sliced and diced the defense with effective serving. Defenders fed sets to Brynlynn Waggy who dominated play at the net, alternating vicious spikes with soft directed taps.

Set one closed with a 25-4 score. The Bulldogs started off serving in set

two, but lost it quickly as Kinsley Price fired the ball back for the first score of the set. Price later took over the serve with her team up 4-1 and promptly scored an ace.

In many sports, the players who escape

mention are the ones working the hardest to make big plays. Like a football offensive line, the middle and back row players in volleyball have to grind on every play. Colaw, Breena Bowers, Clara Raines, Carolyn Varner, and others did well all night tracking down balls and setting up teammates for scoring plays.

Front line players got into the act, self-

lessly setting each other up as well.

With the score 5-3, Waggy fielded a shot and pushed the ball to Varner, who returned the set for Waggy to spike it to the back row. Later, Judy set up Bennett for a precise shot to the left sideline for an 8-4 lead.

Bowers took the serve with the Wildcats up 12-6 and scored three straight aces. That was followed by Judy setting up Price for a spike. The set ended on five aces in seven plays by Bennett and Colaw, who closed the set with an ace and a 25-7 score.

The Wildcats served first in the final set, but it went errant and gave the Bulldogs their first lead of the game. That quickly evaporated as they served into the net. On the next play, Varner delivered a set to Colbie Wimer at the far left of the net where she fired a hard spike.

Wimer has honed her own style of spiking from that side of the net, angling it all the way across the court to the right sideline.

Varner got into the spiking when she de-

livered one to give the Wildcats a 6-1 lead. Not long after, Tia Heavner displayed her serving skill by scoring her own ace for an 11-2 advantage. A few plays later, Emily Poling fielded

a serve, popping the ball to Varner who then set up Wimer for another spike.

Toward the end of the set, Bowers moved the ball to Phoebe Pownell, who got the ball to Heavner for a shot to the middle of the defense and a 23-7 lead. Laney Bowers, who worked capably at the net when in, scored the winning play of the set and the game, 25-7.

# Volleyball Second Regional Win

By virtue of dispatching Pocahontas

County in the game after Pendleton County's victory over Tygarts Valley, they took on the Wildcats again. In the matchup in Morgan County, the

Pirates established leads at the outset, forcing the Wildcats to keep their claws out and use them to inch back into the game, then take the lead as the sets came to a close.

Pendleton County had no intention of allowing that kind of advantage this time.

Alyssa Bennett took the opening serve. When the Pirates fired the ball back, she set up Carolyn Varner for a tap to the middle for the initial score. Bennett's ace made that 2-0. The Wildcats quickly raced out to a 9-1 advantage. Three consecutive aces by Chesnee Colaw fueled the run.

Phoebe Pownell nearly repeated the feat with two of her own later on to put the score at 14-5, picking up a third not long after. Colbie Wimer's spike moved the lead to 16-5. Two plays later, Colaw fielded a shot, moved the ball to Pownell, who set up Wimer for yet another spike.

Paw Paw started to settle in. They play

consistently well on defense, making few errors. With the exception of two quite capable players who can elevate and power the ball down into the defense, the Pirates play a dink and dunk, "hit it where they ain't" kind of offense. From the middle of the first set on, they proved resilient against the net power of Pendleton County.

But Pendleton County had adjusted to Paw Paw's strengths as well, fielding the Pirate spike attempts better than in the first match. This resulted in countless lengthy volleys in which each side resorted to probing for weaknesses rather than overpowering the opponent.

The Wildcats advantage lay in having a

deep bench with experienced players that Day could endlessly run in and out, creating matchups and keeping her team fresh. Paw Paw plays ironman volleyball. Who one sees on the court at the opening of the set is usually the same the entire game.

Set one ended in a 25-11 win for the

Wildcats, who then proceeded to open up a 7-0 advantage, seemingly on the way to another easy set.

An odd dynamic with Paw Paw lies in

the fact that as their chances to win decrease, the team plays better. They appear loosest and seem to have the most fun as victory recedes further from reach. They proved it by going on an eight to five run that brought them within three of the home team.

Pendleton County tried to stave off the

closing Pirates, keeping a three-point lead, but then seeing two straight Paw Paw points to set the score at 14-12. Kinsley Price responded with a spike that gave a bit more room to breathe for the home squad.

a bit more room to breathe for the home squad.

Paw Paw scored two more, cutting the lead to a single point. The Wildcats scored on a bad serve, then Price delivered an ace to push the lead out to 17-15. Then,

a collision of Wildcats trying to make a hustle play gave Paw Paw the point and the serve.

Pirate efficiency had started to erode the

focus of the home team, leading to more at-

tempts to make the big play to shut down the seemingly endless volleys.

Paw Paw could come no closer, though. A Price spike late in the set put the team up 23-18. It should be noted that Laney Bowers continued to man the left side of the net effectively. As sports journalists often say, she played within herself. That meant keeping the ball in play without risking mistakes attempting a killing strike, the best strategy for her with Paw Paw playing very efficiently defending their floor.

Bennett opened the set by helping her team score first. She ended it with an ace and a score of 25-20.

As they did at home, Paw Paw turned up the intensity in set three. They poured all of their pride and what they physically had left into winning one set. At home, they did triumph in the next to last set, leaving their fans screaming in support. They tried to pull off the same feat in Franklin.

The Pirates swiped the opening two points of the set, but Carolyn Varner set up a Bowers spike that cut the lead in half. A Colaw ace tied the set, then a Varner set of a Wimer spike put the Wildcats in front briefly. Not long after, Paw Paw moved back into the lead, 6-5. A hard Brynlynn Waggy spike knotted the game at five. Next came an ace from Wimer to

take the lead.
Paw Paw scored three in a row to retake the advantage.

Once again, credit the middle and back row players. They adjusted to Paw Paw's assault on their middle and started getting to holes found by the Pirates previously. Breena Bowers and Colaw in particular dove to the hard floor repeatedly to keep plays going.

Down 9-7, the Wildcats found that higher gear and shifted into it. Waggy tapped a ball to the middle to close the lead to one. Next, Breena Bowers tied the set with an ace. Paw Paw responded and retook the lead, but a big spike from Bennett tied it up again. Next, Bennett served an ace that put her team on top for good.

Clara Raines fielded a hit, got the ball over to Varner, who set up a Price spike. Bennett followed that with an ace that set the score at 13-10. Sensing trouble, Paw Paw called timeout. Then Bennett fired a sidewinder serve that nicked the left sideline and put the team up 14-10.

But the ironman Pirates had finally succumbed to just enough fatigue that they could not contain the surging Wildcats. Aces that had been few and far between since the start of the opening set now came in bunches. Colaw served five times late, only two came back from the defense. Waggy also played big on the front line in

the closing action of the last set.

Pendleton County outscored Paw Paw 18
to five after finding themselves down 9-7.
The last two points came from Waggy and

Bennett spikes, ending the match at 25-15. Losing bracket teams, Tygarts Valley, Pocahontas and Paw Paw, played on Monday. Paw Paw returned Wednesday to Franklin to take on the by-then-well-

A victory sent Pendleton County to Charleston. A loss meant another match to determine who advanced to states.

rested Wildcats.

# National Guard Emergency Food Distribution Provides Needed Bridge as Food Stamp Program Sets to Resume

By Stephen Smoot

As October ended and November began, millions of Americans depending on food stamps, also known as the SNAP program, seemed to face a near future with little or no food.

For decades, the United States Congress has failed to pass a budget according to established legal processes. "Regular order" requires the House of Representatives to assemble 15 budget bills, each containing funding orders for a number of related purposes. Congress has months in which to create these bills and give each chamber an opportunity to weigh in prior to passage.

Unable to perform this function, Congress has resorted to "stopgap" funding bills. These arrive quickly, receive no debate, and are pushed hard at the last minute. During particularly intense political battles, these get weaponized to attack the other side. This fall, the shutdown has affected military pay and now

Republicans favor a "clean" bill that funds the government until the next stopgap bill is needed. Democrats wish to keep in place programs that use budget moves in certain states to provide Medicaid to illegal aliens. They also wish to keep subsidies of selected Obamacare insurance packages in place that date back to the pandemic years and remain one of the few remaining supports for the once-touted health care reform act.

Food stamp payments halted on Nov. 1 with federal judges stepping in to order the Trump Administration to resume payments. President Donald Trump responded by stating online "I do not want Americans to go hungry" and publicly requested judicial guidance to resume the payments legally, saying, "if we are given the appropriate legal direction by the court, it will BE MY HONOR to provide the funding."

In question is contingency funding set aside for the program. The United States Department of Agriculture has a reserve of \$5.25 billion it can tap, but the need could top \$8.5 billion.

Judge John J. McConnell, who issued the order, replied that "the court greatly appreciates the president's quick and definitive response to this court's order and his desire to provide the necessary SNAP funding.'

United States Secretary of the Treasury Scott Bessent stated that SNAP payments will likely resume by Nov. 5 with the USDA requested to immediately provide a plan of action. The

court order states that payments must resume by the end of day Wednesday, Nov. 5.

Fears of a cutoff of benefits sparked a response from West Virginia Governor Patrick Morrisey. His administration had moved previously to mitigate impacts of the shutdown by assigning state workers to help keep national parks within the state operational.

On Oct. 28, Morrisey announced that the state could provide \$13 million toward helping West Virginia residents obtain food if needed. He requested a match of donations from individuals and organizations statewide. He stated last week that "we're not going to let our people go

hungry. West Virginians take care of our neighbors. It's times like these that we need to come together as Team West Virginia to help those in need." By the 31st, more than \$8 million in assistance had come from

the state to support food banks.

The next day, speculation that the program would halt indefinitely became fact as more than 270,000 people in West Virginia did not receive their food stamps. Morrissey also activated the

West Virginia National Guard to distribute food at key points

on the bus through the generosity of grant

funding and donations," stated the WVU

Said Hannah Hazard-Jenkins, M.D., direc-

tor of the WVU Cancer Institute, Jean and

Laurence DeLynn chair of Oncology, and

associate professor of surgery at the WVU

School of Medicine, at a recent Bonnie's

Bus fundraising event, "I have the distinct

honor of witnessing the tremendous work of

the director of the WVU Cancer Institute, I

see the profound impact Bonnie's Bus has

on raising awareness, educating about early

detection, and meeting our goal of providing

lifesaving care to some of the more remote

lifesaving work of Bonnie's Bus as I treat

women who have been diagnosed as a result

of screening mammograms done on the unit.'

In 17 years of operation, Bonnie's Bus has

provided more than 33,000 screenings and

diagnosed approximately 200 cases of cancer.

As in most cancers, early detection serves as

the most important factor in overcoming the

Bonnie's Bus staff work to get the facility

on the road regularly to visit remote and

rural areas of the state with underserved

populations. In 2024, it traveled 26,420 miles

to 46 counties, screened 4,404 patients, and

provided approximately \$48,000 in mam-

mograms and also LUCAS lung screenings.

disease and recovering.

Bonnie's Bus from two vantage points -

Medicine website on the mobile facility.

"We stand ready to support our state partner agencies, local food banks and non-profit organizations with critical logistical support to keep food on the table for West Virginia families," West Virginia National Guard Adjutant General Maj. Gen. Jim Seward was quoted in a release as saying. "Point us at a task, no matter how small or difficult and our soldiers and airmen can get it done."

On Sunday, the National Guard did get the job done in Franklin as part of Operation Feeding Families. More than 230 soldiers across the Mountain State participated in the operation.

They worked with the Pendleton County Office of Emergency Management to use social media to spread word about food distribution. With the rush into action, delays occurred and trucks intended to arrive at the community building at 10 a.m. did not make it until about two o' clock in the afternoon and remained in place until 4 p.m.

After conclusion of the operation, the OEM announced that 145 boxes of food made it into the hands of those who needed it. Also, the Facebook page shared "thank you to the National Guard personnel."

Beyond the National Guard's efforts, emergency services personnel worked to help make sure that food went to those who needed it most. Dr. King Seegar lauded their efforts to help the most vulnerable in the area.

A large amount of food did not get handed out in Franklin, so emergency management personnel took it to different locations

Pendleton County's OEM on Facebook stated, "Our National Guard undertakes many difficult tasks in service to our entire state. Please understand that the logistics of this task, on short notice, is huge. Thank you WFVANG!"

# **Chesapeak Bay Foundation**

mandates, West Virginia's success would seem

to be a vital factor in returning populations of wildlife in the bay to more sustainable levels. The new agreement looks ahead to a major

reassessment milestone, stating that "in 2040, the partnership will come together to formally assess our progress and amend this agreement to ensure work reflects our shared vision." As the program looks to 2040, it will seek to

expand some of the mandates and standards that govern the amount of "load" of pollutants that the watershed can carry to the bay. The program lists in both the 2014 and 2025

drafts a number of principles that will guide its activities. Most of them cover the same ground and some build upon ideas stated earlier. For example, in 2014 the program sought to explore the use of social science techniques to assist with implementation and community reaction. The 2025 document shares that the program

will integrate social science into administration, outreach, and implementation. In general, the principles are drawn from three categories: science (including social), working with changing environment, social, and government conditions to promote restoration and conservation, and partnerships. An odd addition to the draft agreement

states that it will "include tribal nations in the partnership in a manner that appropriately considers their unique status as independent sovereign nations and as original stewards of the land" without defining precisely what that means under law. It could potentially open the door to vague legal issues involving American Indian nations outside of the lands currently reserved for their use.

Goals and outcomes form the next of the draft. The first of the four addresses "thriving habitat, fisheries, and wildlife." Under the overall stated goal of "protect, restore and sustain fisheries and wildlife, as well as the network of land and water habitats they depend on," the draft lists desired outcomes for a number of different important species in both the bay and the watershed.

In 2014, the desired outcome for blue crab lay in keeping "a sustainable blue crab population based on the current 2012 target of 215 million adult females." This year and moving forward, the abundance and harvest rate desired outcomes will come from "the most recent benchmark status assessment.' An outcome aimed more at West Virginia and

other mountain areas with cold water streams more than the bay focuses on brook trout. The Mountain State's official state fish has seen its habitat and numbers expand in the South Branch Valley and other areas. Fish habitats in tidal and non-tidal streams

have specific benchmarks to meet. The agreement calls for improvement of "270 miles of waters impaired by acid mine damage," to "restore passage and connectivity to at least 150 miles of aquatic habitat every two years," and "improve the health and the ecological integrity of at least an additional 4,340 (approximately three percent) nontidal stream miles every six years.

Other outcomes focused on oyster populations, submerged aquatic vegetation in salt water, and to "restore or create at least 3.000 acres and enhance 15,000 acres" of both tidal and nontidal wetlands by 2040.

Another major goal could affect municipal and public service district wastewater facilities throughout the Chesapeake Bay region. That lies in "reducing excess nitrogen, phosphorus, and sediment.'

Frank Wehrle, Town of Franklin administrator, in recent years has warned residents and elected officials alike that new phosphorus targets would eventually come from the federal government. He and Town of Franklin officials have worked to upgrade Franklin's wastewater treatment plant to meet or exceed expected standards before the new mandates come into

Officials expect the needed upgrades to be costly. Town officials have worked with Thrasher to come up with a plan that meets town needs and can attract funding. Some state sources, however, mandate that those utilities getting help raise rates on customers as part

A major problem facing a municipality like Franklin is this. The town must upgrade its sewage facility to meet future standards, but they will have difficulty planning for 2040 standards that will not even be created until

According to the 2025 Chesapeake Bay Watershed Agreement, "those water quality standards support living resources and protect human health, as required by the Clean Water Act.

By 2030, interim water quality planning targets must be met through "implementation of. . . two-year milestone commitments and other innovative strategies to achieve and maintain reduced levels of nitrogen, phosphorus, and sediment."

In 2030, federal officials will "revise the planning targets approved . . . for nitrogen, phosphorus, and sediment incorporating the latest watershed modeling" and also "develop new or amended Watershed Implementation Plans to meet the updated targets by 2040." In general, the goal is to "maintain or exceed the rate of improvement" seen in the years between 1985 and 2022.

An area in which West Virginia already contributes to good outcomes lies in healthy forests and landscape outcomes. The agreement foresees "a net gain in forests over the longterm by reducing the rate of forest conversion to other land uses by 33 percent" and "planting, maintaining, and managing 202,000 acres of new forests by 2040.

For many years, the Mountain State has seen trees reproducing at twice the rate of cutting and natural death, even as blights laid waste to entire species of trees in parts of eastern West Virginia. It currently ranks as one of the most forested states in the union at just under 80 percent forest coverage. Other outcomes and goals focused on com-

munity relations and similar themes.

Eastern Action 304-538-7711 Ext.. 4 or emmullenax@easternaction.org The need is great! Pendleton County children without winter clothing will be cold without

your help. What Is Warm the Children Program?

#### It's neighbors helping neighbors. Pendleton Times readers are asked to donate to the

fund, with all proceeds being used to buy new winter clothing for Pendleton County children in need. None of the donations will be used for administrative costs. All money donated is used to purchase new warm winter clothing and footwear. How will children be identified?

#### Applications will be available at the Pendleton County Family Support Center November 1,

2025 thru November 30, 2025. Children from Birth through age 18 (If in School or Home Schooled) are eligible. Applications can be completed by visiting the Family Support Center located at 22 N. Main Street in Franklin. How will the clothing be purchased?

Family Support Center staff will coordinate families and volunteers to shop on-line for

## their winter clothing and footwear.

How can I help? By donating time, money or both! Contact the Family Support Center at 304 538-7711 Ext. 4 or simply complete the coupon and mail it to:

101 Alt Ave., Petersburg, WV 26847

is the quality of being thankful and showing appreciation for what we have. At a time when many of us are struggling to adapt to a new normal, practicing gratitude is more important than ever.

- Expressing gratitude can improve your mood. Showing gratitude can make you more optimistic.
- Sharing gratitude can improve social bonds.
- Practicing gratitude can improve your physical health.

## Full Beaver Moon...

November's Full Moon is traditionally called the Beaver Moon.

Why this name? In the colonial era, this was the month to set one's beaver traps before

the swamps froze and beavers retired to their lodges, to ensure a supply of warm winter furs. November's Full Beaver Moon orbits closer to Earth than any of the other full moons this

year, making it one of the three Supermoons of 2025! At its nearest point, the Beaver Moon will be 221,817 miles from Earth... this is the closest Supermoon of the year!

The Full Beaver Supermoon reached peak illumination on Nov. 5. — The Old Farmer's Almanac

# FHS Classmates of '75 Gather for Reunion

Franklin High School Class of 1975 members gathered July 19 at the Wood Grill in Harrisonburg, Viriginia, to celebrate the 50th-year class reunion. After a warm welcome, Stephen Teter offered the blessing before the meal. As the buffet-style dinner was enjoyed, 29 classmates and their guests reminisced about their high school days and updated friends about life events. A special booklet was distributed in memory of deceased classmates. Andrew Eye, Zelene Harman, Michael Hartman, Rodney Hedrick, John Herrera, Steven Judy, James McLaughlin, Hugh Mitchell, Dennis Pennington, and Marie (Simmons) Roop along with Jefferson Byers and Carl Ray Homan were fondly remembered. Classmates received small favors and door prizes as keepsakes. Gratitude was expressed for all who came. Those present plan to meet again in five years. Classmates attending the reunion were, from left, front row, Mike Shanholtz, Dennis Hevener, Angela (Mowery) Vance, Teresa (Kile) Bowers, Jodie (Kimble) Thomas, Shalee (Dunkle) Wilburn, Angela Propst, Teresa Kimble, Gail (Mallow) Simmons and Mary (Propst) 61 Chestnut St., Franklin, WV 26807 Fern; middle row, Janet (Simmons) Roberson, Judy (Kiser) Grimm, Sheila (Wimer) Rexrode, Tana (Pitsenbarger) Good and Kelly Pitsenbarger; and back row, Raymond Mowery, John Ruddle, Stephen
