

**Kemetic Spirituality Series** - An important part of the KhepRa curriculum (Law of Becoming) by NewEarth University Fellow, Chief Sylvestre Ngakale

## **Part 2**

# **THE 77 COMMANDMENTS**

One who is aware of the **Day of Tehuti** and that humanity chose to duplicate the world of the Gods, would focus on purity. It is of utmost importance to focus on our purity in order to come close to the Gods and venerate our Ancestors.

There is a difference between walking the path and knowing the path. For one to grow spiritually, there must be application. What choices are you making to get closer to being Godlike?

According to the teachings of the school of M'TAM, besides the Gods [Neteru] of the first trinities, there are no other Gods that were born Gods. The law of Khepra (becoming) determines the path used by everything that exists. The Gods are not Gods; they became Gods. They all started as mortals; weak and corruptible; they advanced on the path of becoming, helped by the 77 commandments. They purified themselves and increased their powers. They built their world and their values which became, for us, the example and perfect model that we now want to copy. We see, then, that we came into being in order to imitate the perfect model.

On the Day of Tehuti humanity was presented with the 77 Commandments. Our Ancestral God Wsr (Osiris) took upon himself the task of civilizing humanity. The Gods presented themselves to us and asked us what our goal is. Inspired by their perfect world, humanity decided that we wanted to duplicate that Divine Model. Wsr gathered 77 Commandments from various Gods as a guide for humanity in our quest to perfect ourselves.

Family, take the time each night or day to reflect how you can perfect your qualities. Before you go to sleep or when you wake up, take the time to go over your actions and thoughts of the day and see how constructive and/or destructive you were that day. Strive for perfection and constructive qualities. The systems have divided us enough already, have broken families apart, turned us into enemies, destroyed our communities, brainwashed us, and have corrupted our lives and our children's lives. Those that will come after us are

the future. It is now time we fight our own battles. We are our own worst enemy and we must try to contain our self-destructive aspects. First, let's take the responsibility to make this world a better place by starting with our own selves.

The uphill path is filled with a multitude of challenges we will face in everyday life and our actions/thoughts will be a reflection whether we made a constructive choice or destructive choice. In our path to work on the perfection of self, we must think logically and control our emotions. It is when we think illogically that we are on the side of **Seth**, the force of destruction. By focusing on our survival and on acknowledging the 77 Divine Codes of Human Behaviour, we will not only focus on living constructively, it will also assist us on our path to being Godlike. One who is aware of how our actions can affect our reincarnation would focus on acknowledging the 77 commandments.

Please take the time to reflect on how you can live constructively so we as humanity have a better chance of survival. "Death will come to all of us...it is only to be feared if you fear what's on the other side of it. If you see darkness in your soul rather than light. You give your life away so others will live in peace. Even if it's only fleeting. The ones that live carry part of you with them. Your deeds become seeds for theirs. The sacrifice carries forward. And in their final moments as a warrior, you know they will have to answer the same question that you did in yours. With your life will you only create death, or with your death will you create life?"

"A Kem is defined by his/her commitment to perfection at all times. To resist the temptation to do evil truly requires a strong mind. It is the effort to build this mental strength by every individual of a society that is needed to establish a stable and lasting civilization. The advancement of a civilization can only happen as a result of the efforts of the entire population to duplicate the perfect model." – Neb Naba Lamoussa Morodenibig
