

# **Kemetic Spirituality Series - An important part of the KhepRa curriculum by NewEarth University Fellow, Chief Sylvestre Ngakale**

## **Part 4**

### **SIDEREAL CALENDAR – TRADITIONAL TIME DIVISION**

CALENDER TYPES: JULIAN, GREGORIAN, MAYAN

Sidereal Calendar is the most accurate time system found to allow the humanity to have a most astronomically accurate and spiritually correct time relating to nature. Everything is in line with planets and Neteru in M'tam. Every hour is important.

If not conscious of time, then everything is a waste of time.

10 days a week

3 weeks of 30 days

12 months of 30 days

1 month of 5 days

Our approach towards time is extremely important and valuable. With the fall of Misra (the original Mecca), a place where holy Temples resided, the most sacred holy things of Kemet were stolen by the Arabs. This allowed them to have control of the whole world.

Every initiate will need to understand and respect time and space.

When we became aware of time and space traditionally we really needed to understand it. A good time division is one that helps seekers/pilgrims to orientate themselves in the material and non-material space. Time affects all aspects of existence. In Meritah time doesn't kill.

#### **II. ROMAN CALENDAR (325 AD)**

The traditional calendar was important for spiritual work. It was a 10 days week.

A Roman Emperor conquered Meritah and the first thing he changed was the calendar. By changing the 10 days week to 5 days week (Julian calendar) he destabilized Kemetic people's spiritual activities. As in Kemetic spirituality every hour, every week, every month has a god or Goddess. By changing the calendar, it weakened Kemetic people. Our ancestors' way of observing nature determines their way of life. The original 10 days week was called MetHeru (Ten Heru – ten days).

1461 days = small year

13 months = 1 seasonal year

365 days = 13 months = 1 seasonal year

4 seasonal years = 1 small year

(This is initiatic knowledge)

Before the Romans came to contact with the initiatic knowledge, their day was only 12 hours:

If you lived in mountain the time would be 1H = 80mins

If you lived in valley the time would be 1H = 60mins

The purpose of changing the calendar was mainly for control of the Kemetic people. It was political decision. Now we have months of 30 days, months of 31 days, month of 28 days and month of 29 days.

12am = midnight (middle of the night?)

1am = beginning of the day (should still be night...)

The true people with knowledge follow the Sidereal calendar.

Sunrise is for us the 1<sup>st</sup> hour of the day

Sunset, the end of the day – the beginning of the night

### **SIDEREAL CALENDAR**

We aspire to have time & space division which is perfect for us. The reason for this calendar is so we have and know where we are in time & space.

Cosmogony – WSR

Nature – Hapi (Nile)

Space – Septet (Sirius star)

Divine – Divine holy day / prayer

The Neteru play a big part in our lives. They affect time and govern space in time. There is always a Neter involved.

Respecting & valuing Nature is the way to get close to the Divine World.

In the Sidereal calendar, every hour is under a Neter – every aspect will take us from one place to another.

In order for us to know the Neteru, we must understand where we are.

We have days that are considered the birthdays of the Neteru in the calendar. We have the characteristics of the birthday of the Neteru. The European corrupted the calendar by introducing horoscope so people stopped looking at the divine authority.

People also started looking at the calendar as a thing – there is no connection to the divine world.

By doing this, it gives Europeans the appearance of been the holders of knowledge. Horoscope was sent to mislead us from our nature & the Divine.

We worshiped mountains, trees, rivers – we were created by the Neteru. The Neteru presented us with an order of existence. Europeans wanted us to worship what human created – always involve themselves in our decisions & our enlightenment.

Through astrology they were able to turn away our focus from the Neteru and Nature. By not acknowledging our presence in time and space we end up

not acknowledging the Divine world. The Neteru presented us with the order of existence.

When someone wants to dominate you, they say what you are doing is wrong by lying – we pray to the trees and mountains – The Sidereal calendar help us dedicate ourselves to the Divine world, the Roman calendar is forcing you to dedicate yourself to the Vatican.

All the elements of existence have a Neter included in their existence. So, in every element you have 4 elements:

N – NW – Fire

S – SHW – Air

T – Tefnwt – Water

G – Geb – Earth

This is why we should want to worship the divine. Worship in a human being appealing with humility, discipline & dignity to a higher being. We are ancestral worshippers.

In Meritah if you don't have time to pray you go and do some work, preferably in a Temple. Learning 77 commandments, studying notes in every element that is under the Neteru; it means the whole existence belongs to a Neter. So, you should start using the tools that we have 77 commandments, Ablution, ZemZem. We don't worship one Neter because we have a Neter for everything.

### **THE ORIGINAL TIME**

The original instrument in which our ancestors measured time is called **Merhet** This instrument the Europeans found in the Hapi Valley & took it to Strasbourg and from that they made a watch.

Sunrise (between 5 – 6 am) = 1<sup>st</sup> hour of Heru (the day)

Sunset (between 5 – 6 pm) = 1<sup>st</sup> hour of the night

Sunrise to sunset = 12 hours = 1 Heru (day)

Sunset to sunrise = 12 hours

The 1<sup>st</sup> hour of the night is governed by the God WSR

The 1<sup>st</sup> hour of the day is governed by the God HepRa

The middle of the day is governed by the Great God Ra

The middle of the night is governed by the God Atum

Time is divided in 12, the clock goes anti-clock wise.

The Sidereal calendar is based on the Septet star. Also a year is 1461
