what you bring forth will save you.**

**If you do not bring forth what is inside you  
what you do not bring forth will destroy you"  
Gospel of Thomas**

# THE SPIRIT OF DISEASE

## INTRODUCTION

At the beginning time of the age of Lemuria, our planet Earth still existed in a heavenly state and humans existed as they were created to - harmoniously, in divine image and in divine right order. Contrary to popular myth, Lemuria, like Atlantis, was not a country or a territory, but an era of civilizations that covered many eras and multi-national territories, civilisations that lived in peace until darkness overcame this higher consciousness and humanity was plummeted into a descent cycle of war, corruption and greed.

In the solar system's cycle known as the precession of the equinox, our planet is once again at the end of an era - a time of massive upheaval and transformation as we attempt to transition once again into an era of light. We are at twelve o'clock, way past the eleventh hour, in terms of the "shift of the ages" long predicted by the ancients according to the precessional calendar.

We are also at an ascension point that seemingly has more power and potential to it, and more threads of possibility, than any other time-space continuum event in our solar system during the last 200,000 years.

During most of the Lemurian age, human consciousness was not separate from Divine Consciousness. It was not split or fragmented, it was harmonic. We lived in a harmonious universe for a period of time.

# THE SPIRIT OF DISEASE

The planet was populated with three kinds of human beings who were seedling descendants of the original blueprint for divine humans on the planet: divine devic and angelic blueprints, designed to 'intermix' and evolve with earth humans so that through time human Dna would continue to develop in a harmonious balance encompassing these three essences, (or essential aspects of spirit), that were deemed the most beautiful creative aspects of all divine consciousness to populate the earth. The plan was to seed this beautiful planet with a divine, evolutionary blueprint of Source emanations living in a full, physical, divine 3d form of Source reality made manifest. The result: Holy Spirit in human form. This is our spiritual heritage. This is our spiritual and ancestral Dna.

# THE SPIRIT OF DISEASE

## PART I

### THE CAUSES OF DIS-EASE

# THE SPIRIT OF DISEASE

## CHAPTER 1 SPIRITUALITY AND DIS-EASE

Spirituality, i.e. the actuality of spirit, is the connected embodiment of the individual human's particular emanation of the Holy Spirit, (of The Divine, God, Goddess) in this incarnational reality. The inherent awareness of this profound connection to something greater than mundane human consciousness, spirituality, is the cognizance of our own innate divinity, recognition of the Holy Spirit within.

We have all had experiences of this, an illuminating awareness of something other than/greater than normal daily consciousness, the 'smaller' us. At times in 'normal' daily life we feel far from that divine aspect of ourselves. We are varying degrees of consciousness experiencing varying degrees of lack of ease, or dis-ease. Spiritual dis-ease is the dark mother of disease. It is separation from the Holy Spirit, or, to be exact, the loss of one or more senses of connection, or natural inner knowing (instinct) of our own divine essence buried somewhere deep within, beyond conscious memory even of how, when, where or which life it was lost.

Disease, (dis-ease) always originates in the realm of the spiritual, then mental and emotional. Disease merely shows us where, how or why Holy Spirit is not functioning truly and wholly in a particular area of our existence. Anyone who has any form of disease (or dis-ease) has lost the ability to stay connected to the Holy Spirit in that aspect of his or her consciousness or part of the body, or at least, that fragmented consciousness has been relegated to levels of the

# THE SPIRIT OF DISEASE

subconscious or unconscious, polarized from super-consciousness.

The absence of the Holy Spirit in any dis-eased part or aspect of self is a vacation of possession of this relevant part of self, leaving itself open to intruders, squatters, (form/s of spirit or energy invasion, possession or attachment which are divorced from holy (whole) aspect of self). If the Holy Spirit is not happily residing in any part of us then it leaves a “hole” into which spirits and/or entities (renegade aspects of Holy Spirit”), elementals or other energy forms then take up residence.

Joseph Campbell contends, "A deity that is not recognized and revered and allowed to play into our conscious life becomes an idol. It closes itself and is no longer transparent to transcendence. It is as easy as that. The energy gets blocked and becomes what we loosely call a devil.”

The deity powers are reversed, become negatively polarized, a ‘threatening’ and maleficent power as opposed to beneficent. Campbell goes on to say, “When we forget the deities, we build life on a program run by the smaller mind. The energies coming from the body are ignored and become threatening to the values of the mind, the head values, which we have chosen to live for.”

Herein lies the key to understanding the cause of all dis-ease and, ultimately, the healing of humanity and the re-creation of ourselves as divine humans. It is the key to our divine embodiment and ‘upliftment’, our ascension, the higher consciousness that is enlightenment.

Every living thing has a spirit - an emanation and an extension of Great Spirit, Source (The Divine). We are

# THE SPIRIT OF DISEASE

electromagnetic, spirit-embodied beings who emit, as well as receive, a force-field of light, information, sound and thought on many levels simultaneously. Simultaneously, a) because we are multidimensional beings and time is multidimensional, and b), because we have any number of strains of consciousness from the time-space continuum running in our human psyche and existence at any given time.

# THE SPIRIT OF DISEASE

## CHAPTER 2 DNA

The aspects that comprise our consciousness in this particular incarnational form are multifaceted, many-helixed strands of Dna that can only manifest into human form through our physicality. Such is the make-up, the structure and consciousness of our cells. When we are birthed, we give birth to our composite selves as relevant or necessary for the current life. We are birthing ourselves continuously every second and every nanosecond of every day in our thoughts and our feelings, and, to the degree of either our connection or separation of consciousness from the Holy Spirit or The Divine, we create ourselves correspondingly. Into the physical this plays out.

"The world is but a stage and we are but players upon it," said William Shakespeare. In fact, the physical is the last bastion of our emanation from Source, the last frontier of manifestation of separation, the densest expression of ourselves at the level of human matter as individual emanations of the Holy Spirit, and our 'dis--ease' the symptom of any self's, or aspect of self's misplaced spirituality and our personal, multi-dimensional play.

What truly lies within, when we have painstakingly excavated the layers of dis-ease, delving deeper and deeper into the illusion of separation until we realize our loss then find ourselves again, is that all our consciousness lives through, and lives on, in the cells and through the soul. This is the true manifestation of disease and definition of our dis-ease in the human journey.

# THE SPIRIT OF DISEASE

Mircea Eliade, a twentieth century Romanian religious historian, professor and philosopher and leading interpreter of religious experience, established paradigms in religious studies that hierophanies (breakthroughs of the sacred (or the 'supernatural') into the World) form the foundations of religion, splitting human experience of reality into a duality of sacred and profane space and time.

Eliade purported that religion is based on a sharp distinction between the sacred (God, gods, mythical ancestors, etc.) and the profane. In the hierophanies as recorded in myth, the sacred appears in the form of ideal models (the actions and commandments of gods, heroes, etc.). By manifesting itself as ideal models, the sacred gives the world value, direction, and purpose.

Eliade said, "The manifestation of the sacred ontologically founds the world." According to this view, all things need to imitate or conform to the sacred models established by hierophanies in order to have true reality: to traditional man, things "acquire their reality, their identity, only to the extent of their participation in a transcendent reality." Eliade also said, "the recovery of physical health is closely dependent on restoring the balance of spiritual forces."

# THE SPIRIT OF DISEASE

## CHAPTER 3 DEFICIENCY AND EFFICACY

Everything in existence contains (or is an expression, an extension, of) Spirit - every human, every plant, flower and tree, every beast, two, four or multi-legged, every medicine. Therefore every thing we put in our bodies is also an aspect of Spirit energy and consciousness.

Depending on the source of the product or substance being taken or put in or on to the body, its original energetic blueprint, the spiritual authenticity and/or connectedness to Spirit and the energetic influence of all that it has passed through on its journey from its origin to human hand, an assessment can be made as to the quality of energy and Spirit we are putting into the body.

It is possible to gauge this very accurately and simply with kinesiology, muscle-testing or even more accurately by dowsing in the case of a highly proficient, clearly attuned dowser. Percentages, or a simple scale, can be used to determine suitability, quality, quantity and even absorption compatibility of any intake to achieve the perfect nourishment or healing without creating imbalance on any level. Excessive consumption of any ingredient can cause a whole range of imbalances, leading to a plethora of dis-ease.

At the extreme point of the spectrum, addiction or spiritual possession occur when the substance's energy and/or spirit invades aspects of the human's physical, emotional, spiritual, intellectual, energetic or psychic reality, outweighing human will or power, and inexorably dominates, becoming master.

## THE SPIRIT OF DISEASE

When there is found to be a deficiency of any particular vital energetic or cellular component of Spirit energy in someone, it is valuable to ensure that the ingestion/quantities/dosages of any product, food, medicine or remedy are a) beneficial, b) harmonious and, c) appropriate. If there is found to be any such deficiency in the product or prescription, (i.e. in the case of chemical content, negative spirit energy, mood-altering qualities, imported, dried or preserved and yes, even bar-coding) it behooves us to determine whether or not this is the best solution, an appropriate short or long-term product or remedy, whether any negative effects can be balanced or re-programmed energetically, moderated or modified, and whether or not indeed it is appropriate and in the best interests of the person's well-being to ingest any product or follow such a protocol.

Also to be remembered is that as immune system, absorption and cellular levels fluctuate, recognition or immunity are built up and increasing use of any one product or substance, natural or altered, can lead to inner disharmony and serious imbalances, as overloads of energy negativity develop; deep discernment and consultation with Spirit (or spirit energy), ideally at the level of the Akashic\*(see \*p33) field or Divine Realm are therefore required to ensure a beneficial outcome of anything and everything we partake of or participate in.

Everything and everyone, from birth to death and beyond, down to soul and cellular levels, must be considered an energetic, living intelligence, in an ever changing, organically unfolding, cosmic interactive dance. A note off-key or a step out of time can disturb the flow and disrupt the harmony. The more vulnerable or sensitive the protagonist the greater the disruptive effect will be. Herein, it would seem, lies the basic spiritual dysfunction in the innate intelligence of our

# THE SPIRIT OF DISEASE

spirit and bimolecular culture that underlies the core of illness, addictions, allergies, depression, menopause, aging and, in most cases, even death.

In *The Cosmic Serpent*, Jeremy Narby takes a serious look at how neuro-genetic consciousness informs awareness, knowledge, symbolism and culture. His comparison of the ancient cosmic serpent myths to the genetic situation in every living cell reveals the immortal bimolecular wizard intelligence behind the curtain of everyday life. Intelligence comes from the Latin 'inter-legere', to choose, or read, between. There seems to be a capacity to make choices operating inside each cell in our body, down to the level of individual proteins and enzymes.

Dna itself is a kind of 'text' that functions through a coding system, a 'genetic code'. Some enzymes edit the Rna transcript of the DNA text and add new letters to it; any error made during this editing can be fatal to the entire organism; so these enzymes are consistently making the right choices; if they don't, something often goes wrong leading to cancer and other diseases.

Cells send one another signals, in the form of proteins and molecules, which are also electro-magnetic. These signals mean: divide, or don't divide, move, or don't move, die or stay alive. Any one cell is listening to hundreds of signals at the same time, from different times, spaces and dimensions, and has to integrate them and decide what to do. How this intelligence operates is the question. The answer is Dna and electro-magnetics.

# THE SPIRIT OF DISEASE

## CHAPTER 4 MULTI-STRANDING & CREATION

Highly aware and attuned spiritual initiates have known for some time what scientists now also recognize - that Dna has more than two strands. The amount of *active* Dna strands in any human being depends on the individual's level of spiritual, emotional, mental and physical evolution and conscious awareness. A spiritual master at a fundamental level of enlightenment and ascension, like Jesus Christ, would have at least twelve strands (twenty-four helixes) of whole and active Dna.

As we grow in awareness, emotional intelligence, physical refinement and mental acuity, our energetic fields expand and extend into higher consciousness and our intuitive or psychic abilities increase exponentially. In order to reach these higher levels of active embodied Dna there is a little known and even less understood initiatory process. The initiate has to pass through many initiatory gateways, rites of passage, experiencing intensely dark nights of the soul in the process of surrendering their egoic consciousness time and time again to pass through the mythic eye of the needle and receive ever-increasing levels of illumination. These are the purges and purifications of the dark initiations.

Rumi scholar, teacher, mystic, writer Andrew Harvey speaks powerfully of the dark and light initiations that lead to enlightenment in "Son of Man". The path decrees that the initiate will first have experiences of illumination then initiation and this cycle repeats itself, spiraling through space, time and dimensional reality.

## THE SPIRIT OF DISEASE

Once one has an experience of great light, more layers of the shadow within are revealed which again have to be brought to the light - transformed. To transform the Dna, the shadow, the dark feeling or pain within must be felt and connected to, and the related emotion released, the context and/or lesson known and understood, in order for the light to be reabsorbed into the Dna thus transforming it. Literally in bringing attention to it, the inner light is turned on!

Blocked feeling, or pain, shows us where aspects of self have lost their conscious awareness of higher connectedness, have sunk into denser consciousness and separation from the divine. These areas then become 'vacant possession' and magnetic to other disconnected or lost spirits. {The term 'spirits' is used loosely here as an umbrella for all discarnate or disconnected energies: entities and demons, as well as beings of different planetary dimensional frequency such as gnomes and pixies, other dimensional beings such as astral, and even non-planetary (e.t.) and alien beings who are not in harmony with divine light (our true essence frequency), that vibrate at a lower frequency which resonates with denser emotions such as fear and anger}.

As electromagnetic current vibrates to whatever frequency (and all thought and emotion are frequency) we are vibrating, it emits a signal, like light or sound waves, which repel or attract according to the message we are signaling the most intensely.

All consciousness, thought and emotion are alive and carry a dynamic, active, and powerfully magnetic frequency; conscious, subconscious or completely unconscious - they are still active and transmitting! Often the unconscious will emit the strongest signal as the unconscious creates outside of itself in order to be recognised, healed and released, so the

# THE SPIRIT OF DISEASE

larger the unconscious issue (or shadow) the more loudly it will seek to gain attention. We therefore often repel what we most desire, because need begets more need, lack manifests more lack, and loss needs more loss paradoxically in order to heal, attracting what we most desire not to experience because the unconscious self needs to be made known to be transformed.

Desires, wants and needs (unless a natural expression of divine soul, or soul purpose) invariably stem from a painful feeling or fear, or of lack of what we do want and this 'wanting' is an expression of the unconscious fear or frustration at not having. Lack is a magnetic frequency that therefore negatively magnetizes, literally pushes away what we are most wanting, because it is emphatically stressing and therefore perpetuating, the deep unconscious state of 'not having'.

When we are emitting negative states of being, frequencies such as guilt and anger, "I am bad" or "I am in trouble," revenge or bitterness, fear and lack, to name but a few, not only will we push away what we most desire which is the opposite of those experiences, but we will also attract more of the same in order to catalyze this shadow recognition, healing and transformation.

Whatever frequency is vibrating the most powerfully, whether consciously or unconsciously, will therefore be the strongest, most powerful creative force we are unleashing on a universe that feels and hears then accordingly responds magnetically and com-mensurately! "Ask and ye shall receive!" We are constantly unconsciously asking and receiving.

## THE SPIRIT OF DISEASE

If thoughts and feelings are not true to words yet carry a stronger charge, they will prevail. Unacknowledged, internalized or introflected emotions will escalate, crying out for attention in order to be healed, until they are properly addressed, because this is the soul's journey of evolution into greater consciousness which is our sole purpose in incarnation. Continued ignorance, denial or suppression of any dis-ease causes dis-ease. The prevailing frequencies of our bodies, minds and psyches are the ruling powerhouses of our lives and this applies to all sentient creation.

# THE SPIRIT OF DISEASE

## CHAPTER 5 CONSCIOUSNESS RELATIVITY

Everything that is alive has consciousness - in actuality everything that is alive is consciousness. Consciousness is always alive and from time to time manifests in different forms. The plant kingdom, the animal kingdom, the human kingdom, the spirit kingdom, all that exists, exists as consciousness and is a part of all consciousness, super-consciousness and the Great Unconscious, the individual and the collective.

Consciousness palpates a vibratory force that is a live, proactive electromagnetic frequency and like attracts like. How consciousness relates to consciousness determines the health and harmony of the relationship or connection, and how vibrant, effective and abundant its innate expression might be. The relativity of any sentient communication between any two forms of existence directly decrees its result, be it detrimental or beneficial.

In simple terms, we know that when you speak lovingly to a plant its health and growth increase exponentially. Similarly the treatment of a child will absolutely reflect in his or her behavior their dominating influences. Why we feel better worse after certain experiences or encounters, why we are revived and uplifted after time in vibrant nature, or frayed and depleted after excessive exposure to stressful environments, situations or people, is implicit in the nature of interaction that has taken place.

The vibration we are at in any given time/space continuum is magnetic and will attract more of the same to us. Spirits,

# THE SPIRIT OF DISEASE

entities, demons and other dimensional beings vibrate to, and travel along, electromagnetic frequencies. They respond to our feelings and even our thoughts. The lower density the being the more it loves lower frequencies such as anger and fear. The more fear we run (whatever level of consciousness or unconsciousness, real or subliminal) and vibrate, the harder it is for us to stay higher-self connected and in the body, literally, and when we are not occupying our entire body we basically leave the afore-mentioned vacant space for other dimensional beings and energies to occupy, and we know that nature abhors a vacuum! These beings in turn merge their own low frequency with ours, compounding fears or negative thoughts and perpetuating that energy around us.

Furthermore, love brings up anything unlike itself for the purpose of healing and release. Compound this with 'our unconscious creating outside of self in order to be recognized and healed or transformed,' and it is clear that it becomes increasingly critical to be vigilant constantly, and cognisant of our conscious thoughts and feelings, and feeling into our unconscious, in order for them not to be perpetuated and/or compounded.

*"If you do not bring forth what is inside you  
what you do not bring forth will destroy you."*

# THE SPIRIT OF DISEASE

## PART II

### THE HEALING AND TRANSFORMATION OF DIS-EASE

# THE SPIRIT OF DISEASE

## CHAPTER 6 THE TWELVE KEYS

There are certain spiritual, mental, physical and emotional triggers or scenarios that often cause the loss of personal spirit leading to possession.

For a completely thorough clearing and healing it is imperative to clear not only the invading body or energy, but also the original cause (original sin - 'sin' meaning without!). If the underlying issue that magnetized the invading entity in the first place is not wholly and effectively dealt with, disease, i.e. an impulse to require healing, remains. As the unconscious creates outside of itself in order to be healed and transformed it will more powerfully generate, or re-create, the same scenario or dis-ease increasingly intensively in order for it to be released and transcended, (for the unconscious to transform that wounded aspect of self into super-consciousness).

Conversely, evil spirits can actually be the cause of disease or increased dis-ease, however, they cannot be present unless there is a resonant space made available or they are able to create it through domination or abuse, however, in these cases there still must exist an underlying predisposition at some level to the invasion. Instances of such phenomena are frequently referred to in the Bible.

There are many possible causes of inner disturbance. To name principal possible or multiple causes:

1. Shock/trauma/abuse: disassociation/intense grief, fear, anger, hurt etc.

# THE SPIRIT OF DISEASE

2. Death/fear of death/ not transitioning wholly through the astral at death.
3. Non-immaculate birth\* (see\*p32)/conception (sexual problems, negative energetic interference, disharmony incarnating).
4. Unfinished business from past/other lives.
5. Karmic rebalancing or legacy.
6. Telegomy\* (see\*p32)/ancestry.
7. Dense family constellations and family drama.
8. Dark technology/emf – (negative electromagnetic frequencies) which can cause damage to auric and etheric bodies and fields, and other subtle body fields, brain, central nervous, endocrine and immune systems.
9. Multi-dimensional lives and consciousness/realms of astral, archetypal, drama, underworld, shamanic, devic etc.
10. Imprints, overlays, negative interference.
11. Alcohol, hallucinogenic and recreational drugs, pharmaceuticals, vaccinations, chemicals; (also nuclear, biological and haarp weapons as per point 8).
12. Contracts, agreements and\* (see \*p32).

There is one more main cause which is so fundamental I call it the 1 Major Key, and this is covered at the end of the thesis.

In dealing with the problems of these keys, certain factors require addressing.

The basic tenets of full and successful healing are as follows:

## FAITH

First and foremost it is helpful if the 'patient' has faith, except on the rare occasion where a "miracle" is called for in order to demonstrate an act of faith. Otherwise healing is

# THE SPIRIT OF DISEASE

required to find the reasons for absence of faith or to heal the wounds of disillusioned faith. As innately spiritually connected beings at original spiritual source, faith is an intrinsic aspect of human's forgotten divine heritage.

## MIRACLES

Miracles can never be manifested to satisfy challenges presented by the ego mind. One of Jesus's famous initiations was the temptation to prove his powers by the devil in the desert, which he refused. Likewise, faith cannot be falsely proclaimed and receive full and successful healing. Spiritual connection, too, is ultimately prerequisite in healing as consciousness becomes more evolved. Ultimate healing requires ultimate faith. In Matthew 15:22:28 "Jesus answered and said unto her, O woman, great is thy faith: be it unto thee even as thou wilt. And her daughter was made whole from that very hour."

## EXORCISM, LIBERATION AND HEALING

A complete clearing of possession will involve exorcism or liberation and healing. Exorcism is a major theme of the Christian Scriptures and was performed by both Jesus and his disciples/apostles. There are many accounts of these in the synoptic gospels (Matthew, Mark, and Luke). Again in Matthew (8:16) we hear "they brought unto him many that were possessed with devils and he cast out the spirits with his word and healed all that were sick." (Process defined in more detail below)

# THE SPIRIT OF DISEASE

## DIVINE AUTHORITY

Divine authority must, and can only, be bestowed. The clearing of spirits, entities, etc., can only successfully (and should only ever be done) by those who have been given divine authority. Divine authority is only given to those who have achieved and embodied a high enough level of consciousness, who are of sufficient physical, emotional, mental and spiritual clarity to be clear vessels, and who have themselves passed the extenuating tests of faith, awareness and spiritual connectedness. Once bestowed, the healer can then effectively carry out the necessary procedures. Matthew (10:1) wrote "he had called unto him his twelve disciples and he gave them power against unclean spirits, to cast them out, and to heal all manner of sickness and all manner of disease" and in Mark (6:7), "He called unto him the twelve and began to send them forth by two and two and gave them power over unclean spirits".

In "Binding the Devil " by Roger Baker is a perfect illustration of what happens when there is not divine authority. "A young Soldier suddenly started displaying all the classic symptoms of possession - screaming, writhing, throwing himself onto the ground and apparently, trying to kill himself. His colleagues held him down while the Doctor was summoned. The Doctor intuitively felt that the Padre would be more helpful, but when the Padre arrived he felt out of his depth. However he made the sign of the cross over the man and said, "In the name of Jesus Christ I command this thing to come out of you!" Whereupon the soldier recovered his senses, but the Padre dropped dead! This is a somewhat drastic demonstration of the danger in attempting to enter into a Divine work without the required authority. More prevalent is the deterioration, on one or more levels, of the healer as he/she is unconsciously attached to or

# THE SPIRIT OF DISEASE

possessed by the very beings and symptoms they are attempting to heal or remove.

Additionally, upon being exorcised a spirit needs to be bound and "sent" to a designated place, otherwise transference takes place. It is not sufficient or advisable merely to cast it out - it must be sent to a definite location or it floats in the ethers until it finds another unsuspecting or vulnerable host! The healer working under the Authority of God is aware of where the Spirit needs to be sent and will have this awareness and receive instruction through their inner senses. It is noteworthy that being a Padre did not in itself give him the right to perform such a Divine task.

## CLEARING AND HEALING

Clearing always involves healing. Many patients will complain that they are not miraculously, instantly healed, but the healing can only succeed to the patient's degree of faith and level of emotional, physical, mental and spiritual awareness and readiness. When one is completely clear, there can be no dis-ease. However during the human evolutionary process of consciousness, many layers of dis-ease and even disease may be experience as a portal of transformation. Where any causes of disease have not been made properly cognisant, the inherent lessons understood and learnt, past digressions amended or forgiven and emotional wounds or scars healed, then there can only be a level of healing commensurate to that current level of awareness. The lessons must be learned, the growth opportunities risen to and transcended.

In the Aquarian Gospel of Christ (Levi Dowling) it is said that Jesus did not even attempt miracle healings on those

# THE SPIRIT OF DISEASE

who were unprepared or unready. Once all related experiences have been realized and healed full cleansing can take place. There are many illustrations that this was a central part of Jesus's healing in the New Testament. In occasional cases evil Spirits can themselves be the cause of illness and need to be exorcised, with a person's physical or mental complaint being seen to dissipate very quickly following the Spirit's departure and healing administered to the fertile condition that allowed this to take place.

## ACCURATE DIAGNOSIS & RECOGNITION OF INVADING BEINGS

These can be basically divided into two categories - Celestial Spirits and Incarnated Spirits. Celestial Spirits have never incarnated in a physical body or lived on the Earth before, whereas Incarnated Spirits have. All people who have lived on Earth, who have what we would accept as a physical body or who are living on Earth, are Incarnated Spirits. All beings who exist in realms of duality may be polarized. A spirit, or other being can be defined somewhat simplistically as incarnated if it inhabits the first five dimensions: earthly, inner earth, ordinary physical reality, astral and etheric (5th dimension, including Pleiadian). The activities of both types of Spirit can be very similar to each other and unless a person has the gift of Clairvoyance or Clairaudience they will be unable to establish what type of Spirit is troubling them. A Celestial Spirit will, due to its power, be more problematic than its Incarnated counterpart. Included in these categories are demons, entities, dark angels, dark beings of the devic realm (faeries, gnomes, pixies), elementals, dark e.t.'s and aliens.

# THE SPIRIT OF DISEASE

## CHAPTER 7 RESOLUTION

There are many holistic healing procedures that can be employed. It is vital that the cause of any dis-ease be looked at metaphysically. Given that physical symptoms are the densest manifestation of spiritual consciousness, the spiritual consciousness being the highest, with the mental and emotional between, all levels must be reviewed and understood. Whether possession or dis-ease is the cause, the issue is indubitably always a reflection of the spiritual, mental and/or emotional bodies, and these dynamics are entirely symbiotic.

Spiritual healing depends in absolute terms on Divine Will. Accurate interpretation of any case or situation depends on the clarity, connectedness and level of achievement of the healer. However strong personal will or high the intention, ultimately, healing can only be achieved if it is appropriate, aligned and in divine right order and commensurate to the practitioner's level of personal transcendence. The patient cannot be healed if it is not in their highest good because in such an instance there is an unresolved prevailing reason for them to experience the disorder. If one is not connected to one's own spirit, and is neither ready to do so, no amount of healing will work for long.

There journey into dis-ease is something many chose to experience in order to know themselves and attain higher levels of consciousness. To know dis-ease (separation) in order to know ease (oneness) is to experience the journey of separation and achieve re-connection to the Divine.

# THE SPIRIT OF DISEASE

There are mainly three divinely given talents for which the master Jesus was known – healing, teaching and exorcism. Evil Spirits recognise one who has been given the Divine authority to remove them. Once commanded under the Authority of God to leave, unwanted Spirits must leave immediately.

## PROCEDURES TO REMOVE INVADING ENERGIES

### EXORCISM

Exorcism is a Divine procedure, which is used for the removal, and expulsion of demonic Evil Spirits (by an individual appointed to Divine ministry by the God force. 1 Corinthians 12 v 10 – 11 states that exorcism is therefore a Divine ministry given to certain people, with such Gifts of the Spirit being allotted by God himself." Exorcism is a healing process bestowed to certain individuals to remove malevolent Spirits to be sent to an appropriate place where they can cause no more harm. Exorcism is one of the highest gifts to be bestowed by the Divine.

### LIBERATION

Liberation is a process whereby previously incarnated spirits have not been able to pass fully through the veils of death whether through trauma, emotional attachment or fear. These are known as earthbound spirits. They need assistance to continue their evolutionary path. The host body may have attracted these spirits through some form of psychosis: emotional attachment, fear, trauma or other causes. Healing must take place in both or all beings involved.

# THE SPIRIT OF DISEASE

## SUMMARY

### THE ONE MAJOR KEY

In my own lifetimes and in the last 25 years of healing experience in this life, I have experienced many forms of disease, mental, emotional, physical and spiritual as an intrinsic part of my own understanding of the current human condition and appropriate, relevant current paths to higher consciousness. I conclude that everything is Spirit. Everything has a spirit, everything comes from Spirit, and everything is a part of Spirit. Ultimately it is all one. Through the process of incarnation we experience separation. In separation we experience dis-ease. The only way to experience full ease is to fully embody Spirit, The Holy Spirit. Only the re-instating of the Holy Spirit within will liberate us from human bondage. Only full embodiment of Great Spirit will set us free, free us from dis-ease. This is the re-creation of Man, connecting to and activating the Christ within, Christ being the anointed one, one who has been anointed (made whole) by God. Christ is who we truly are, what is inside us, way down below the layers of dis-ease. Christ Consciousness is awaiting all of us – that is the meaning of the second coming.

# THE SPIRIT OF DISEASE

"If you bring forth what is inside you  
what you bring forth will save you"

# THE SPIRIT OF DISEASE

Through sacred veils  
divine soul hails  
many lives many tales  
spirit vessel sails.

Remember who you are  
Essence extending afar.

# THE SPIRIT OF DISEASE

- \* Akashic – the Realm of Divine Knowing, beyond the auric, etheric and astral realms, exists in the 8<sup>th</sup> Dimension, a dimension beyond polarity/duality, where the records of all Universal Knowledge are held. Only one who has passed the Akashic Initiation and been given the keys has access to amounts of the records relative to his or her evolution. The seven gateways and initiations to the Akasha are protected and sealed by The Seven Veils of Isis.
- \* Immaculate – the distinction that differentiates between conception through sacred union and/or divine love and union in the absence of sacredness or divine love
- \* Telegomy – the concept of telegomy first implied by Aristotle, suggesting that characteristics of the individual are not only inherited from his parents, but also from other males, from which his/her mother had a previous pregnancy or mating. The theory, expounded as natural history by Aristotle, was accepted throughout Antiquity and revived with the rediscovery of Aristotle in the Middle Ages. It is a rarely-known phenomena but a proven fact not only in anomalies in human births, but also animals.
- \* Sacred contracts, agreements and vows, binding through space and time, keeping the soul trapped in a feudal paradigm, being beholden to limitations of rules and laws that become outmoded and redundant once spiritual evolution and divine empowerment take place, when only the highest choice exists.
