

Dear Valued Customer:

Thank you for your purchase of our Gold Standard ETDRS Illuminator Cabinet™.

Your cabinet and all its components, including bulbs have been very specifically calibrated to suit your ETDRS testing needs.

We'd like to take this opportunity to caution you regarding substandard counterfeit bulbs and components. We have been made aware of bulbs very similar to those we provide that are marketed as suitable replacements for an ETDRS cabinet utilizing two bulbs. Be aware that bulbs from a source other than Precision Vision, Inc. are very likely not going to produce the proper light level or uniformity. When utilizing a Precision Vision Cabinet, please be sure to only use replacement parts and consumable products from Precision Vision, Inc.

When ordering replacement bulbs, please include your cabinet voltage, model number and Lot number found on your cabinet label near the on/off switch. See below for reference.

If you have concerns or questions regarding counterfeit bulbs or other components, please contact our office and we'd be happy to discuss this in further detail and make sure you get the proper products.

Very Best Regards,

The Precision Vision, Inc. Team
