# Rebuilding Confidence

BROWN & NEWIRTH  
LONDON

## Jewellery Manufacturing

Company: Brown & Newirth  
Location: London  
Size: 40 employees

## The challenge

- Expert handcraftsmanship is a key part of the manufacturing process
- Close working proximity of employees across multiple sites
- Continued need for in-person engagement with wider team, suppliers and customers

*"At Brown & Newirth, the wellbeing of our employees has always come first. As such, finding a COVID-19 testing solution that could ensure their safety as well enable us to continue servicing our customers was a real priority.*

*"Following a successful trial of Medusa 19's Rapid Saliva Protein Test, we are now increasing the scale and frequency of our order. The tests are easy-to-use, provide results quickly and received positive feedback from our employees."*

**John Ball, Managing Director**
