

311 SERIES REVERSE TWIST BARBED WIRE

REVERSE TWIST BARBED WIRE

Upgrade Your Metal Fences to a Higher Security Level With Barbed Wires.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

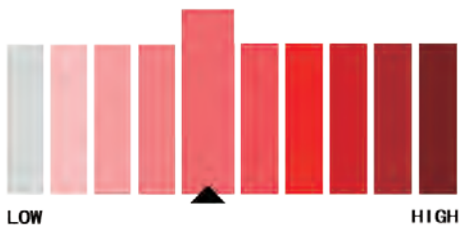

The reverse twist barbed wires are different from the traditional twist barbed wire. They are made of two-strand wires that are twisted together in the opposite direction.

The barb wires are twisted between the two strand wires in a traditional twist barbed wire while on top of the twisted strand wires in the reverse twist barbed wire.

The reverse twist barbed wires from SKYHALL® Fence are made from low carbon or high carbon steel wires. They are excellent with high durability performance, thus favored by customers all over the world.

Protection Level

Applications

Functionalities

HIGH STABILITY

Two-strand wires are twisted together in an opposition direction, making the strands bind together tightly and not easy to be separated. And the barb wires are twisted on top of the strand wires, further increasing the hold of the twist.

HIGH PROTECTION

The sharp edges of reverse twist barbed wires can frighten intruders and thieves, especially when they are combined with other fences for security barrier. That makes them great for surrounding areas of restricted access.

DURABLE AND LOW MAINTENANCE

Our reverse twist barbed wire is pre hot dipped galvanized, which means there is a layer of zinc on the wire, making it resistant to corrosion and rust. This helps your fence last longer with low maintenance.

UPGRADE SECURITY LEVEL

The reverse twisted barbed wires can be combined with various fences like high security fence or anti-climb fence for advanced security barriers.

WIDE APPLICATION

Reverse barbed wires are economical and easy to be installed on any surface, thus preferred by farmers and ranchers for cattle and bison use. Besides, they are adaptable for diverse fencing needs so that you can combine them with various fences for different uses.

SURFACE TREATMENT

Reverse twist barbed wires are pre hot dipped galvanized to fight against corrosion and provide longer service.

REVERSE TWIST BARBED WIRE

LINE WIRE DIAMETER	TENSILE STRENGTH	BARB WIRE DIAMETER	TENSILE STRENGTH	BARB SPACING	SURFACE TREATMENT
1.7	950	1.5	350	75	GALVANIZED
2.5	350	2.0	350	100
