

**WELDED MESH FENCE
(CLAMP TYPE)**

Reliable Fences Deliver High Protection as Well as Delightful Aesthetics.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

The welded mesh fence from SKYHALL® is produced from low carbon steel wire with a welding strength of over 50%. The fence surface is pre hot dipped galvanized and then polyester powder coated to make the welded fence resistant to rust and corrosion.

Additional V-bending treatment is applied to increase the transverse strength of fence panels. This type of metal fence will be fixed by clamps and you will get full sets of accessories for fastening.

Proper bending brings a unique aesthetic to welded metal fencing. What makes it even more amazing is the wide choice of coating colors. Green, red and blue? Any color is available to achieve different projects' needs by better matching local surroundings.

Protection Level

Applications

Functionalities

DURABLE AND SAFE

The way welded mesh fence is constructed means that it is hard for potential intruders to climb over. It's also tough enough to fight against bad weather and some practical situations such as a ball hitting if installed in a park.

HIGH VISIBILITY

Usually, the welded mesh fencing comes with girds of 200mm*50mm which means you can see the inside views through the welded fence, thus distinguishing welded mesh fence from the dull solid fence.

EASY TO INSTALL

The welded mesh fencing can be erected on any surface quickly and easily. Besides, they can match various types of posts. This obviously means it is incredibly versatile and is suitable for several uses.

AVAILABLE COLORS

Although all colors are available here for the welded mesh fence, we recommend the Dark Green of RAL6005, Jet Black of RAL9005 and Cream White of RAL9001 as reference colors.
