

111 SERIES WELDED MESH FENCE (Self-Lock Type)

**WELDED MESH FENCE
(SELF-LOCK TYPE)**

Reliable Fences Deliver High Protection as Well as Delightful Aesthetics.

PRODUCT DETAIL

Features & Benefits

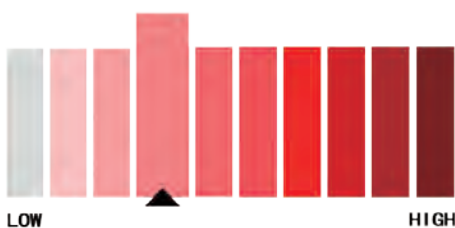

Brief Introduction

Compared to traditional clamp type welded fences, the advantage of self-lock welded mesh fencing is obvious, that is, easy to install.

Just like other mesh fences, the self-lock welded mesh fencing is made from low carbon steel wire. The fence surface is pre hot dipped galvanized and then polyester powder coated to get a rustproof and anti-corrosion performance.

Due to the self-lock character, there are no accessories coming along with the fence for installation. But you will get anti-UV rain caps to match the posts for longer use.

Protection Level

Applications

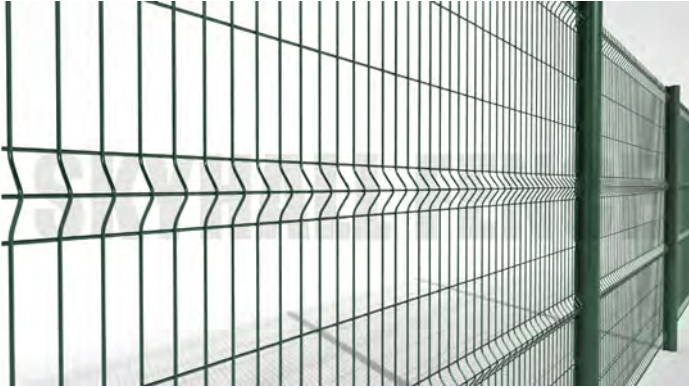

Functionalities

V-BENDING DESIGN

You may notice some V-bending design on the welded mesh panels. This additional treatment is used to increase the transverse strength of welded fences, thus increasing its ability to fight against impact.

EASY TO INSTALL

Just as the name indicates, the self-lock fence is much easier to install because they can “lock themselves” without using any clamps. Just settle the fence panels into the posts and the fence is completed.

HIGH VISIBILITY

Generally, the welded mesh fencing comes with grids of 200mm*50mm which means you can see the inside views through the welded fence, thus distinguishing welded mesh fence from the dull solid fence.

AVAILABLE COLORS

Although all colors are available here for the welded mesh fence, we recommend the Dark Green of RAL6005, Jet Black of RAL9005 and Cream White of RAL9001 as reference colors.

WELDED MESH FENCE (SELF-LOCK TYPE)

PANEL				POST	
PANEL HEIGHT	PANEL WIDTH	WIRE THICKNESS	MESH SIZE	POST SIZE	POST THICKNESS
1630	2000 2200 2500	3.5	200*50	100*70 SELF-LOCK	1.00 1.20 1.50
1830		4.0			
2030		4.5			
2230		5.0			
SURFACE TREATMENT		PRE HOT DIPPED GALVANIZED + POLYESTER POWDER COATED (RAL COLOR)			

CUSTOMIZED specifications acceptable.
