

142 SERIES DECORATIVE FENCE (Self-Lock Type)

DECORATIVE FENCE (SELF-LOCK TYPE)

Amazing Decorative Metal Fences Protect Your Yard Effectively Meanwhile Keep Its Beauty.

PRODUCT DETAIL

Features & Benefits

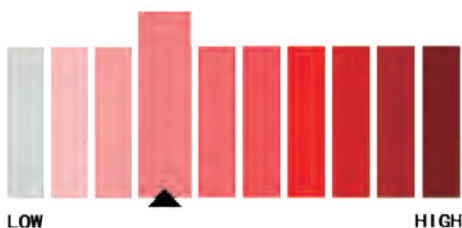

Brief Introduction

Prefer to spare less effort on fence installation? Searching for fences that are more attractive than normal ones? The self-lock decorative fence will meet all your needs.

SKYHALL® possesses advanced coating technology that guarantees a long life for products. A bond coat is applied after galvanization, combining perfectly with the final polyester coat.

Although the decorative fence is characterized by its appearance, you should never neglect its steady and durable performance. The welded wire fence is produced from low carbon steel wire and the double horizontal wire design makes it sturdy.

Protection Level

Applications

Functionalities

ATTRACTIVE DESIGN

You will notice some diamond lattices that are shaped from vertical wires at the top of the fence. And all these diamond lattices are settled in an arc shape to form the fence top. This amazing design is well accepted by Middle East countries, especially Qatar and UAE.

ROBUST STRUCTURE

Its structure is similar to our double wire fence which means two horizontal wires welded to a single vertical one. This artful design largely enhances the transverse strength of fence panels.

EASY INSTALLATION

Many customers prefer this self-lock decorative wire fence because it's much easier to be installed than the clam type fences. You don't need to spend much time on the fixing and the whole process is not complex at all.

AVAILABLE COLORS

All colors are available here for the decorative fencing, however, we recommend the Dark Green of RAL6005 as a reference because it's the most ordered color from our customers.

DECORATIVE FENCE (SELF-LOCK TYPE)
