

151 SERIES SEGMENTAL FENCE (Double Wire Type)

SEGMENTAL FENCE (DOUBLE WIRE TYPE)

Excellent Choice for a Durable and Inexpensive Fence Solution.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

The segmental fence is the fastest and easiest way to mark the edges of one's property. It is an excellent choice for those who want a durable and inexpensive fence.

At SKYHALL® Fence, we make segmental fences from low-carbon steel wire with a welding strength of over 50%. Besides, double horizontal wires are welded to the fence to increase the transverse strength of the panel.

Segmental fences are normally connected to the posts by claw clamps and anti-theft bolts, largely increasing their security level.

Protection Level

Applications

Functionalities

STRONG STRUCTURE

Our segmental fences are welded with double horizontal wires, making the fence structure strong enough to withstand heavy bump.

EASY INSTALLATION

The double wire segmental fence can be erected on any surface quickly and easily. All you need is to connect the panels to the posts by the corresponding clamps and bolts.

HIGH DURABILITY

The fence surface is pre hot dipped galvanized and then polyester powder coated to get outstanding anti-rust and anti-corrosion performance. This protective treatment makes our fence strong and durable.

AVAILABLE COLORS

All colors are available here for the double wire segmental fence, however, we recommend Dark Green of RAL6005, Granite Gray of RAL-7026, Telegrey 2 of RAL-7046, Beige of RAL-1001, and Silver as the reference colors since they're marketable among our customers.
