

TRAFFIC CONE

PE Body, Rubber Base, Bright Reflective Sticker.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

From lanes of traffic to surrounding construction sites, traffic cones are widely used in many areas where pedestrians and drivers need to be warned of danger.

Traffic cones from SKYHALL® Fence come with a PE (polyethylene) body and a black rubber base. There are highlighted reflective collars on the cones to make them visible while used at night.

Our traffic cones are mainly used for construction or traffic control zones. They are well accepted by worldwide customers due to their reliable quality.

Protection Level

Applications

Functionalities

REUSABLE

Traffic cones are reusable. They can be removed and applied to another construction site or traffic area for danger warning once the current environment doesn't need them anymore.

PRACTICAL

Vibrant colors of traffic cones convey warning of danger to pedestrians or drivers easily. The reflective collars on them make the cones visible even at night.

CUSTOMIZABLE

A traffic cone is more than a danger alerting. One of our favorite things to do with the traffic cone is to add a custom logo or stencil to the cone body thus making promotions for our customers.

CONVENIENT TRANSPORTATION

It can be packaged and stacked to save space and transportation costs, and it is more convenient to load and unload, and easy to realize repeated use.

DURABLE

The PE body and rubber base make our traffic cone flexible and resistant to being crushed by cars. No need to worry about its lifespan, because its good performance makes it not afraid of hot and cold environments.

AVAILABLE COLORS

All colors are available here for the traffic cones, however, we recommend red and orange as the reference colors since they're classical and ordered most by our customers.

TRAFFIC CONE

HEIGHT	MATERIAL	BASE SIZE	BASE MATERIAL
1000	PE	490*490	RUBBER

CUSTOMIZED specifications acceptable.
