

130 SERIES BRC FENCE

BRC FENCE

Triangular Bending Structure at the Fence Top And Bottom Makes Better Performance.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

BRC fencing is also known as roll top fence. It is featured by the triangular bending structure at both top and bottom of the fence. The smart design is not only a decoration improvement in appearance but also provides horizontal support between posts to achieve solid stability.

At SKYHALL® Fence, BRC fencing is welded from low carbon steel wire with a welding strength greater than 50%. The surface of mesh fence will be pre hot dipped galvanized and then polyester powder coated. That effectively strengthens its rustproof and anti-corrosion performance.

Our BRC fencing is well accepted by customers from South Korea, Japan, Singapore, Philippines, and other Southeast Asian countries.

Protection Level

Applications

Functionalities

ROLLING TOP AND BOTTOM

BRC fence is distinguished for the rolling top and bottom design. This artful structure makes the mesh fence much stronger and more stable, meanwhile, largely improving its beauty.

ECONOMICAL

BRC fence is a kind of cost-effective fence. Compared to other security fencings like 358 mesh fence and steel palisade fence, BRC mesh fence is much cheaper but still plays an anti-theft function.

HIGH VISIBILITY

BRC fencing is not only beautiful but also with high visibility. If you are looking for see-through fences to show attractive views of parks or gardens, then this BRC fence is a perfect option.

AVAILABLE COLORS

All colors are available here for the BRC fence, however, we recommend the Dark Green of RAL6005 and Silver as reference colors because they are the most ordered colors by our customers.
