

**STOCK PROOF FENCE
ANIMAL FENCE**

**Stop Animal Attacks Meanwhile Manage
Animals Effectively.**

PRODUCT DETAIL

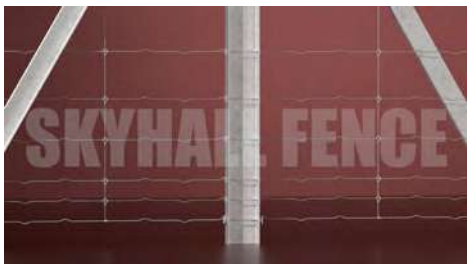

Features & Benefits

Brief Introduction

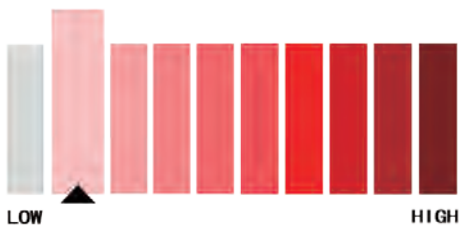

Stock proof fence from SKYHALL® Fence is woven by high tensile and low carbon steel wire at regularly spaced intervals for the purpose of preventing animals from passing through.

In some Middle East countries, customers tend to use the stock proof fences to stop camels from running onto roads. Thus reducing accidents effectively. That's why our stock proof fence is also called camel fence.

SKYHALL® Fence applies pre hot dipped galvanized treatment to the mesh fence surface. That makes the stock proof fence last for long.

Protection Level

Applications

Functionalities

ECONOMICAL

Unlike welded mesh fences, the stock proof fence is woven automatically by machine, which is less complicated in the production therefore reducing the cost largely and making it one of the economical fences.

DENSITY DIFFERERENCE

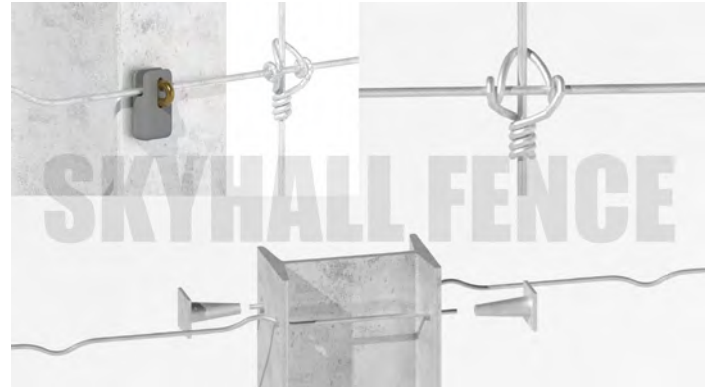

Spacing between the horizontal wires increases gradually from the bottom to the top of mesh panels. The density difference is designed to prevent the little rodents or animals from getting through.

DURABLE

Processed in a rolling way, the farm fences are characterized by high elasticity and buffering function, enabling the fence to keep a tight state whatever the temperature is.

EASY TO INSTALL

It's quite easy to install this type of stock proof fence. You just need to fix the mesh panels onto the post by a wire vise and the corresponding clamps.

AVAILABLE COLORS

All colors are available here for the stock proof fence, however, we recommend Silver as the reference color since it's classical and ordered most by our customers.

STOCK PROOF FENCE / ANIMAL FENCE

SELVEDGE WIRE	TENSILE STRENGTH	LINE WIRE	TENSILE STRENGTH	STAY WIRE	TENSILE STRENGTH	KNOT WIRE	TENSILE STRENGTH
