

310 SERIES CONVENTIONAL BARBED WIRE

CONVENTIONAL BARBED WIRE

Upgrade Your Metal Fences to a Higher Security Level With Barbed Wires.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

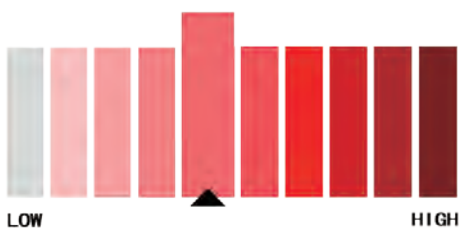

Traditional twist barbed wires, also known as conventional barbed wire, are composed of two strands twisted together in a single direction.

They are commonly used to secure perimeters and create fencing in some restricted areas.

Conventional barbed wires from SKYHALL® Fence are produced from low-carbon or high-carbon steel wires to provide sturdy and durable performance. They are favored by customers worldwide.

Protection Level

Applications

Functionalities

DURABLE AND LOW MAINTENANCE

Our conventional barbed wire is pre hot dipped galvanized, which means there is a layer of zinc on the wire to make it resistant to corrosion and rust. This helps your fence last longer and maintained less.

INTRUSION PREVENTION

The sharp edges of traditional barbed wires make them great for surrounding areas of restricted access, especially for blocking off properties and buildings to prevent any unauthorized entering or exiting.

WIDE APPLICATION

Conventional barbed wire is economical and easy to be installed on any surface, thus preferred by farmers and ranchers for cattle and bison use. Besides, they are adaptable for diverse fencing needs so that you can combine them with various fences for different uses.

SUITABLE FOR VARIOUS FENCES

Traditional barbed wires could be combined with various fences like high security fence or anti-climb fence for advanced security barriers.

TWISTED STRUCTURE

The traditional barbed wire is made by twisting the galvanized barbed wire around the two-strand main wire. The compactly twisted structure makes the barbed wire firm enough and won't get loose easily.

SURFACE TREATMENT

Conventional barbed wire is economical and easy to be installed on any surface, thus preferred by farmers and ranchers for cattle and bison use. Besides, they are adaptable for diverse fencing needs so that you can combine them with various fences for different uses.

CONVENTIONAL BARBED WIRE

LINE WIRE DIAMETER	TENSILE STRENGTH	BARB WIRE DIAMETER	TENSILE STRENGTH	BARB SPACING	SURFACE TREATMENT
2.2	350	2.0	350	75 100	GALVANIZED
2.4	350	2.0	350		
2.5	350	2.0	350		
2.7	350	2.0	350		

CUSTOMIZED specifications acceptable.
