

SKYHALL FENCE

411 SERIES GRANITE BOLLARD

GRANITE BOLLARD

Physical and Visual Barriers Directing Vehicles and Pedestrians Effectively.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

After years of evolution, the granite bollards are making their way to both the public and private environment. They have become decorative elements for street furniture from the previous dissuasive function.

The granite bollard from SKYHALL® Fence is a perfect combination of a granite bollard body and stainless steel frame. It balances aesthetics and function simultaneously.

After a series of brightening or brushing processes, the stainless steel frame will be applied with nano coating, making it anti-fouling and requiring less maintenance. You may also make a comparison between granite bollards and stainless steel bollards before deciding which one is more suitable.

Protection Level

Applications

Functionalities

NO NEED FOR INSTALLATION

Granite bollards do not require any installation, just put them in the place where you want and there they are.

LESS MAINTENANCE

One of the most attractive virtues of granite bollard is that it doesn't need any maintenance, saving you a lot of time and expenditure that is supposed to be spent on normal maintenance.

NATURAL DESIGN

The natural feature of granite gifts the bollards an ingenious and natural design, enabling the artificial items well integrated into the nature while playing its important role as expected.

COST EFFECTIVE

Granite is a kind of excellent material that is rich in minerals. It meets quality requirements meanwhile can be purchased in large quantities at a relatively low price.

PREMIUM MATERIAL

We use premium granite with high compressive strength and low water absorption to provide quality traffic bollards with good performance.
