

321 SERIES CONCERTINA RAZOR WIRE (DOUBLE COIL TYPE)

CONCERTINA RAZOR WIRE (DOUBLE COIL TYPE)

Upgrade Fences' Security Level With Double Coil Concertina Razor Wires.

PRODUCT DETAIL

Features & Benefits

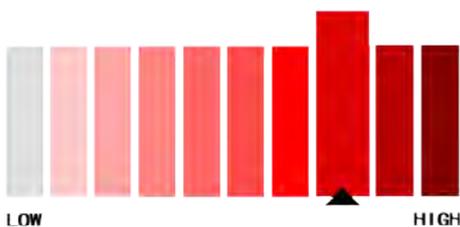

Brief Introduction

Double coil concertina razor wire is a new product. It is characterized by a smaller razor wire coil inserted inside a bigger one. The double coil design highly increases razor wire's defensive function.

Various types of blades are available at SKYHALL® Fence for the concertina razor wire and the wire surface is pre hot dipped galvanized to provide anti-corrosion and anti-rust performance.

Many customers prefer this double coil concertina razor wire to the single type in pursuit of higher-level security.

Protection Level

Applications

Functionalities

HIGH SECURITY

Unlike normal concertina razor wire, the double coil type is distinguished by an extra smaller razor wire coil inserted inside a bigger one. Double layers of sharp edges make the razor wire more defensive which prevent any unauthorized entering and exiting effectively.

DIVERSE RAZORS

A variety of razor types with different specifications are available at SKYHALL® Fence to meet different projects' needs. Should you have any special requests, just contact our sales team for support.

UNIQUE DESIGN

This type of concertina razor wire is distinguished by the double coil razor wires presented in a spiral. The unique design is not only an innovation in appearance but also enhances its defensive function.

SUITABLE FOR VARIOUS FENCES

The double coil concertina razor wires could be combined with various fences to become a high security fence system, for instance, chain link fences, palisade fences, welded wire fences.

SURFACE TREATMENT

Double coil concertina razor wires are pre hot dipped galvanized to fight against corrosion and provide longer service.
