

112 SERIES PEDESTRAIN FENCE (Clamp Type)

PEDESTRAIN FENCE (CLAMP TYPE)

Manage Pedestrian Flow Successfully and Make Effective Protection.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

Pedestrian fencing is an effective way to keep pedestrians safe from streams of cars in high-traffic areas and busy streets and guide people to where they are expected in case of major events.

Any type of pedestrian fencing should be of high quality to perform its crucial role. That's why many customers trust SKYHALL® Fence as their pedestrian fence supply.

The mesh structure is simple, elegant, durable, convenient for transportation, loading and unloading, and the installation is not limited by topographic relief.

This type of pedestrian fencing is designed to be fixed by clamps. With the corresponding accessories and instruction, fence installation will be a piece of cake for you.

Protection Level

Applications

Functionalities

M-BENDING

Special treatment of M-bending is applied to the metal fence, thus increasing the transverse strength of pedestrian fencing to a large degree.

MULTIFUNCTIONAL

Pedestrian fencing can be used to guide pedestrians to the safe points to cross the road, to control human traffic during major events, and to mark separate queuing areas. In short, where there is human traffic management, there is pedestrian fencing.

TOP ARC DESIGN

Unlike traditional stiff metal fences, this pedestrian fence is designed with an arc top, therefore highly enhancing its beauty meanwhile adding art decorations to your projects. The special design is quite popular among the Middle East, especially in Qatar and UAE.

AVAILABLE COLORS

All colors are available here for pedestrian fencing, however, the Dark Green of RAL6005 is highly recommended as it's quite popular among our customers.
