

DOUBLE WIRE FENCE (QATAR DESIGN)

Customizable Trims on the Top Right and Bottom Left Fence Panel Corners Help to Establish Your Image.

PRODUCT DETAIL

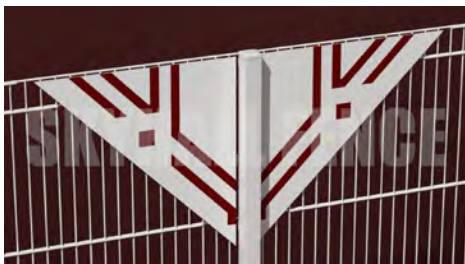

Features & Benefits

Brief Introduction

This Qatar design double wire fence is specially designed for our customers from Qatar. It's similar to the normal double wire fence which has double wires in the horizontal direction. The difference is, you can easily see the trim on the top right and bottom left corners of the fence panels.

At SKYHALL® Fence, the Qatar design double wire fence is produced from low carbon steel wire with a welding strength greater than 50% to increase mesh strength. Two horizontal wires increase the transverse strength of the fence effectively.

Wire fences are fastened to the posts by metal clamps and 304 stainless steel screws. And we use UV-resistant PVC caps to make the fence a longer life.

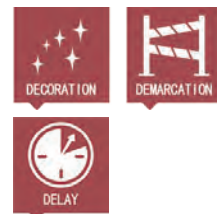

Protection Level

Applications

Functionalities

DOUBLE HORIZONTAL WIRE

The special structure of double horizontal wire welded to a single vertical one makes the fence panel extraordinarily robust.

MATCHABLE TO VARIOUS ACCESSORIES

Since the double wire fence panels are just as normal as others, they can match well with different types of posts and clamps to complete an easy installation.

THICK WIRE DIAMETERS

The maximum wire thickness of horizontal wire may reach up to 8.0mm. Even the vertical wire can be 6.0mm thick. That makes the double wire mesh fence much stronger.

AVAILABLE COLORS

All colors are available here for the Qatar double wire fence, however, the Cream White of RAL9001 is what we highly recommended as it's quite popular among our customers.
