

**SEGMENTAL FENCE
(OPPOSITE WELDING TYPE)**

Excellent Choice for a Durable and Inexpensive Fence Solution.

PRODUCT DETAIL

Features & Benefits

Brief Introduction

Segmental fencing is the fastest and easiest way to mark the edges of one's property. It is an excellent choice for those who want a durable and inexpensive fence.

At SKYHALL® Fence, we make segmental fences from low-carbon steel wire with a welding strength of over 50%. Besides, double horizontal wires are welded to the fence to increase the transverse strength of the panel.

Segmental fencing is normally connected to the posts by claw clamps and anti-theft bolts, largely increasing their security level.

Protection Level

Applications

Functionalities

ANTI-CLIMB AND ANTI-CUT

The meshes of segmental fences are too small for fingers to stick in, let alone climb on. Double wire structure combined with dense meshes makes the fence extremely hard to cut.

ANTI-THEFT

Segmental fences are normally connected to the posts by claw clamps and anti-theft bolts, largely increasing its security level.

MATCHABLE FOR SECURE WIRE

The opposite welded segmental fence is compatible which means you can combine various secure wires to the top of fence easily.

AVAILABLE COLORS

All colors are available here for the opposite welding segmental fence, however, we recommend Dark Green of RAL6005, Granite Gray of RAL-7026, Telegrey 2 of RAL-7046, Beige of RAL-1001, and Silver as the reference colors since they're marketable among our customers.
