

222 SERIES HONEY COMB MESH

HONEY COMB MESH

All-Purpose Gabion Is a Great Helper for Infrastructure Maintenance.

PRODUCT DETAIL

Features & Benefits

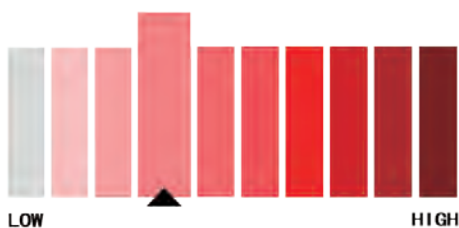

Brief Introduction

Gabion wire mesh, also known as honeycomb mesh, is a kind of metal wire woven mesh that is similar to hexagonal wire mesh but with bigger holes. Gabion mesh generally has 2 types of fabrication: double or triple twist fabric. This fabric structure makes it flexible and variable.

SKYHALL® Fence uses low carbon steel wire as the material for honeycomb mesh. The mesh surface is pre hot dipped galvanized and then PVC coated to provide durable, anti-corrosion performance.

Due to its high tensile strength, gabion wire mesh can also be used as a substitution for chain link fence.

Protection Level

Applications

Functionalities

ECONOMICAL

Honeycomb mesh is economical for several reasons. First, it needs little maintenance; Second, it's easy to install and no professional labor is required, thus saving you time and expenditure on installation. Third, this type of mesh can be applied for different uses, therefore you don't need to prepare extra fences for different projects.

PERMEABILITY

The permeable structure of gabion wire meshes allows the water to seep through while retaining the soil to the filled stones, therefore no additional drainage is required to relieve the hydrostatic pressures.

FLEXIBILITY

The gabion wire mesh is flexible to withstand unbalanced stresses while maintaining its structural integrity. And the flexibility enables gabion mesh to be installed in complex terrains.

VARIOUS WEAVING METHODS

Various weaving methods are available for the gabion wire mesh such as positive twisting, reverse twisting, two-way twisting, knitting before plating, plating before knitting, etc.

CONVENIENT TRANSPORTATION

It can be rolled up and wrapped with moisture-proof paper, which greatly reduces the occupied space and thus reduces the transportation cost.

AVAILABLE COLORS

All colors are available here for the hexagonal wire mesh, however, we recommend the following colors as a reference since they are well-accepted by most of our customers.

HONEY COMB MESH

MESH	WIRE		MESH
HEIGHT	MESH WIRE	SELVEDGE WIRE	MESH SIZE
1600			
1800	2.0	2.4	
	2.2	2.7	60*80
2000	2.4	3.0	80*100
	2.7	3.4	100*120
2200	3.0	3.9	
2400			
WIRE TYPE	HOD DIPPED GALVANIZED WIRE GALFAN WIRE GLUE + PVC COATED WIRE		

CUSTOMIZED specifications acceptable.
