## SOLAR FARM FENCE (Japanese Type)

### SOLAR FARM FENCE (JAPANESE TYPE)

Avoid Theft or Damage to Your Valuable  
Solar Farm Facilities.

### PRODUCT DETAIL

### Features & Benefits

#### Brief Introduction

Solar farm fences from SKYHALL® are made from low-carbon steel wire with a welding strength of over 50%. The whole fencing surface is pre-hot dipped galvanized and then polyester powder coated to prevent it from rusting and corroding.

The solar farm fencing is bent in a semicircle at the top section. That in turn increases the transverse strength of the mesh. This special design is widely demanded by Japanese solar fields. That's why our solar farm fence is also called the Japanese type of solar farm fence.

All accessories of the solar farm fencing are made of 304 stainless steel and we use UV-resistant PVC caps to make the fences have a longer life.

### Protection Level

### Applications

### Functionalities

## SPECIAL DESIGN

The top of the solar farm fence is bent in semicircle thus effectively increasing the transverse strength of the mesh meanwhile enhancing its aesthetics. This Japanese type solar farm fence is quite popular with our customers.

## SUITABLE FOR ALL TERRAINS

Solar farm fence from SKYHALL® Fence is suitable for all terrains. So it's totally no problem for solar field projects in mountainous terrain, and the installation angle can be changed casually according to practical needs.

## AVAILABLE COLORS

All colors are available here for the solar farm fence, however, we recommend the Chocolate Brown of RAL8017 as a reference since it's extraordinarily marketable among our customers.

## EASY TO INSTALL

The post can be installed using a pile driver, which makes the fence installation much easier.

## SOLAR FARM FENCE (JAPANESE TYPE)
