

EXPANDABLE SAFETY BARRIER

Deploy Safety in Seconds.

PRODUCT DETAIL

Features & Benefits

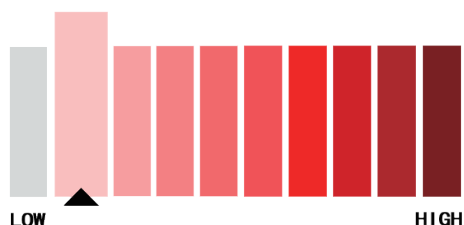

Brief Introduction

An expandable safety barrier, also known as an extensible safety barrier or extendable safety barrier, is a portable, retractable device designed to create a temporary physical boundary to manage crowds, define spaces, and enhance safety. It's suitable for any event that attracts the public, such as sporting, cultural events, concerts, trade fairs, public meetings, etc.

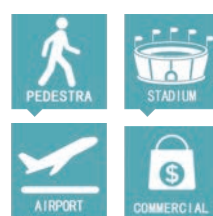

Skyhall offers extensible safety barriers in both aluminum and steel, providing durable solutions for diverse requirements. A variety of standard and custom sizes are available to suit any application. You may refer to the specification chart to find the right size for your practical needs.

Our extensible safety barrier is durable enough to withstand considerable pressure. It can unfold in one piece and moves easily thanks to the rubber wheels. When positioned, the wheel brakes engage with a simple press to secure the barrier firmly in place.

Protection Level

Applications

Functionalities

PORTABILITY

This type of expandable safety barrier is self-supporting and robust enough to withstand high pressure. Equipped with rubber wheels, it's lightweight and easy to move and redeploy as needs change.

EASY APPLICATION AND STORAGE

It can be unfolded in one piece up to 13 m and folds in 5 seconds by one person, making it quite easy to handle. There is no need to mobilize a dedicated team or staff. After use, the barriers can be conveniently folded and stored in a corner.

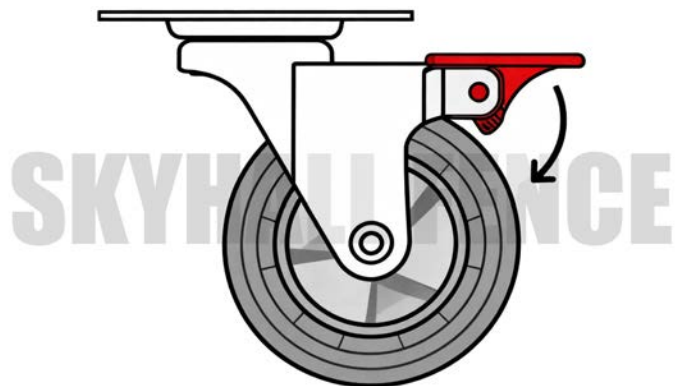

VERSATILITY

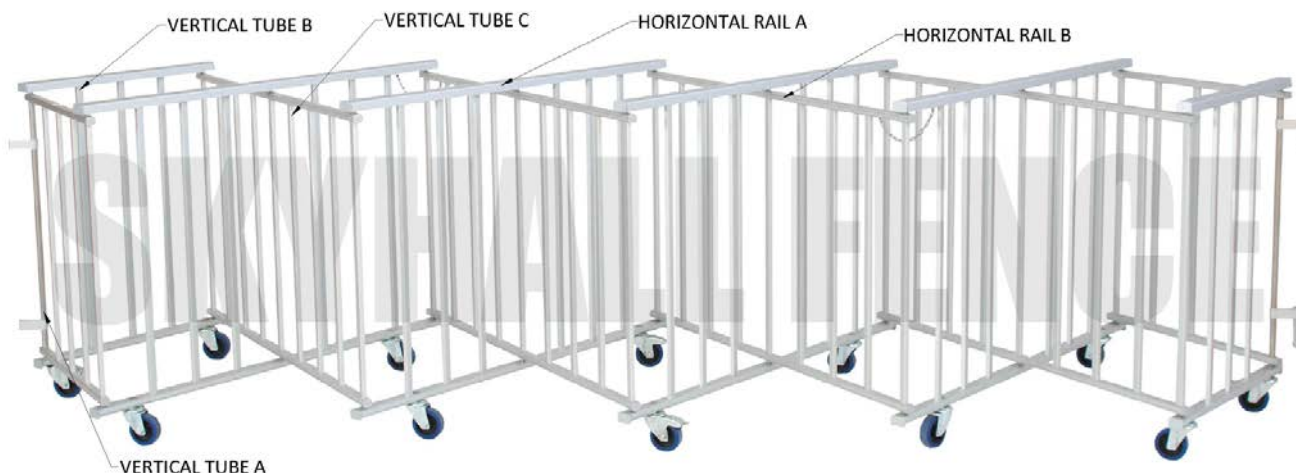

The extensible safety barrier can be quickly installed to deal with different situations where crowd and traffic gathers. You can use them for the delimitation of an area, crowd control, access filtering, and more.

LOCKING SYSTEM

For added stability, our barriers come with lockable braking wheels. A simple press of the brake secures them exactly where you need.

SINGLE BARRIER									
PATTERN NO.	DIMENSIONS (MM)	HORIZONTAL RAIL A(MM)	HORIZONTAL RAIL B(MM)	VERTICAL TUBE A(MM)	VERTICAL TUBE B(MM)	VERTICAL TUBE C(MM)	BRAKING WHEELS	NON BRAKING WHEELS	ACCESSORIES (MM)
SKH-1.10-3A	4050 x 1100	LENGTH:1500 WIDTH:60 HEIGHT:40 THICKNESS:1.6	LENGTH:1500 WIDTH:30 HEIGHT:30 THICKNESS:1.6	DIAMETER: 20 LENGTH: 866 THICKNESS:10	Length:926 Width:20 Height:30 Thickness:1.1	LENGTH:866 WIDTH:20 HEIGHT:30 THICKNESS:1.2	2	6	ELLIPTICAL TUBE LENGTH: 30 THICKNESS: 2 ROUND BAR LENGTH: 150 DIAMETER: 20
