A dense colour to apply by spatula to dress walls and floors. Its colour shading is barely visible, but enough to give the effect of a living material, moulded, uniform and smooth with only a hint of spatula streaking.

Calce Maxi 60x120 - 24"x48" Naturale/Rettificato

Calce Maxi 60x120 - 24"x48" Naturale/Rettificato

A graphic reinterpretation of terrazzo flooring, to experiment with new approaches to planning and design. Created in the 15th century in Venice as a way of re-using marble, granite and quartz chips, mixed together with cement to form a single compound reminiscent of an uneven mosaic, it was often used both for its durability and its ability to create a "design".
