Forming part of the DECORiTe range, the iTe CEMOX decorative screed finish system carries the iTe stamp of quality and reliability.

From the bottom up, the system incorporates the latest European technologies, ensuring a super-flat, super-smooth, non-slip surface that carries the well-known iTe guarantee. Deriving from a powder form, the iTe CEMOX decorative finish is custom made up per order and prepared for simple installation by accredited installers.

Simple and effective, iTe CEMOX derives from the typical Beton Ciré effect, delivering a unique, urban and contemporary style.

The Painterly DECORiTe screed finish system is of Italian origin and is installed by trained and accredited applicators.

The beauty of the DECORiTe Painterly Finish lies in each installation having its own individual character. The options are endless and limited only to your personal choice of paint. After selecting your own unique paint colours, each installation involves the hand-application of your preferred colours by qualified iTe installers. After sealing of this painterly finish, the result is a beautiful and durable screed surface that is totally unique to your installation.

DURALiTe Cement-Based Finishing Skim Coat, a revolutionary new product that's as much at home on exterior walls as it is indoors.

As its name suggests, this cement-based product has been developed for durability, whether you be working inside or out. Thanks to on-going innovation from iTe Products, skim coating is no longer a case of inside only.
