- optimally applicable
- durable

- flame retardant and safe
- lightfast
- hygienic
- maintenance-friendly
- cost-effective
- can be supplied from stock

Vescom links functionality to appearance

Vescom develops, produces and distributes high-quality interior products for the international contract market: wallcovering, upholstery and curtain fabrics.

Our mission is clear within this context: to offer solutions for buyers who find the aesthetics as important as functionality.

Vescom stands for high quality. When it comes to technology, design and service. Distinctive designs and durable materials form the basis of our collections.

manufacturer and full service partner

Vescom is the worldwide full service partner for many companies and organisations in the area of interior products. Vescom controls the full production chain. From design and product development up to and including production, sales and distribution.

This working method offers buyers many advantages. Such as current product knowledge, quality products, fast delivery, competitive prices and the best service. Our products can also be supplied from stock.

active worldwide

In addition to the head office in Deurne (the Netherlands), Vescom has an extensive network of Vescom sales offices. In Europe but also in the Middle East, Asia, Latin America and the United States of America. Vescom works with distributors in other parts of the world. This ensures that we remain up to date with regard to international developments in the different markets and that we can continuously improve our service and know-how level for our customers locally and internationally.

Vescom (1971) is part of the Vescom Group. This combination of worldwide operating companies specialises in the development, production and distribution of high-quality interior products.

contract market collection

Vescom products are especially developed for the **contract market**. Primarily for the **hospitality, healthcare, office** and **education** sectors. There is a growing need for beautiful and attractive interior products in these markets. At the same time, functionality and quality continue to be of vital importance. Our products fit in with these developments.

Our wallcovering, upholstery and curtain fabric collections meet the high quality requirements that the contract market sets in relation to materials from a technical perspective. Especially in relation to **durability, flame retardancy, hygiene, installation, light resistance** and **abrasion**.

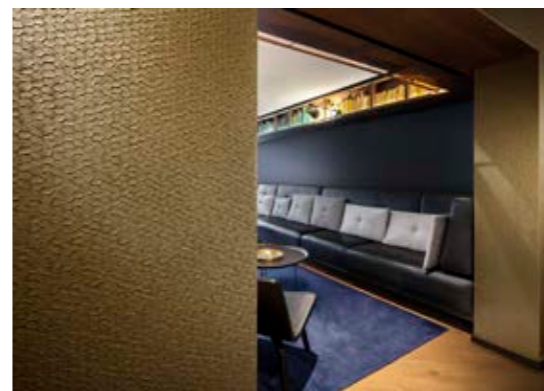

wallcovering

The wallcovering collection comprises **vinyl** and **textile** wallcovering. Vinyl wallcovering is a wall finish with functional properties and can be supplied in a large variety of colours, structures and designs.

Vescom's textile wallcovering reflects the interior's natural environment. With cotton, linen, silk and synthetic fibres, we offer a large variety of warm and widely applicable materials.

With **wallcovering+print** it is possible to **personalise** vinyl wallcovering: with your own images or designs of your choice, using our graphic design support team, a unique atmosphere can be created for every space. The **creative possibilities** are endless!

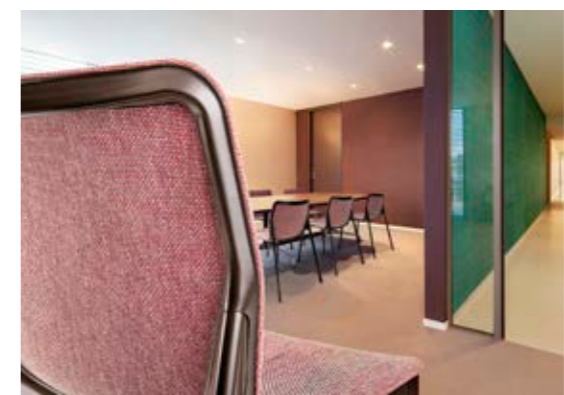

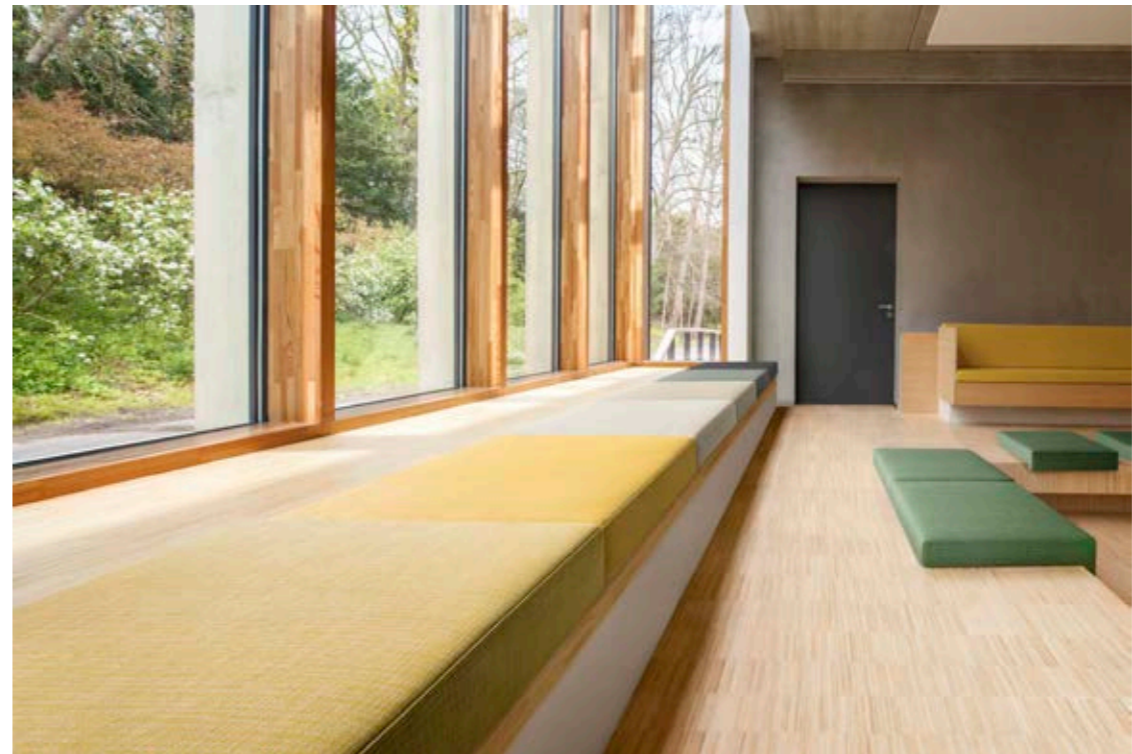

upholstery

The upholstery collection comprises a wide choice in flame retardant polyester, wool, mohair and vinyl qualities. The materials are flame retardant, durable, easy to use and colour-fast. A key characteristic of Vescom's textile upholstery is a combination of beauty and quality.

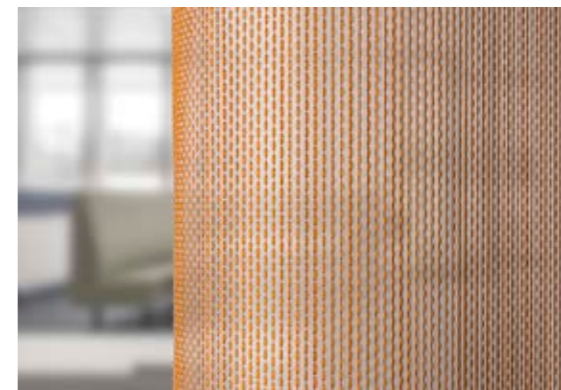

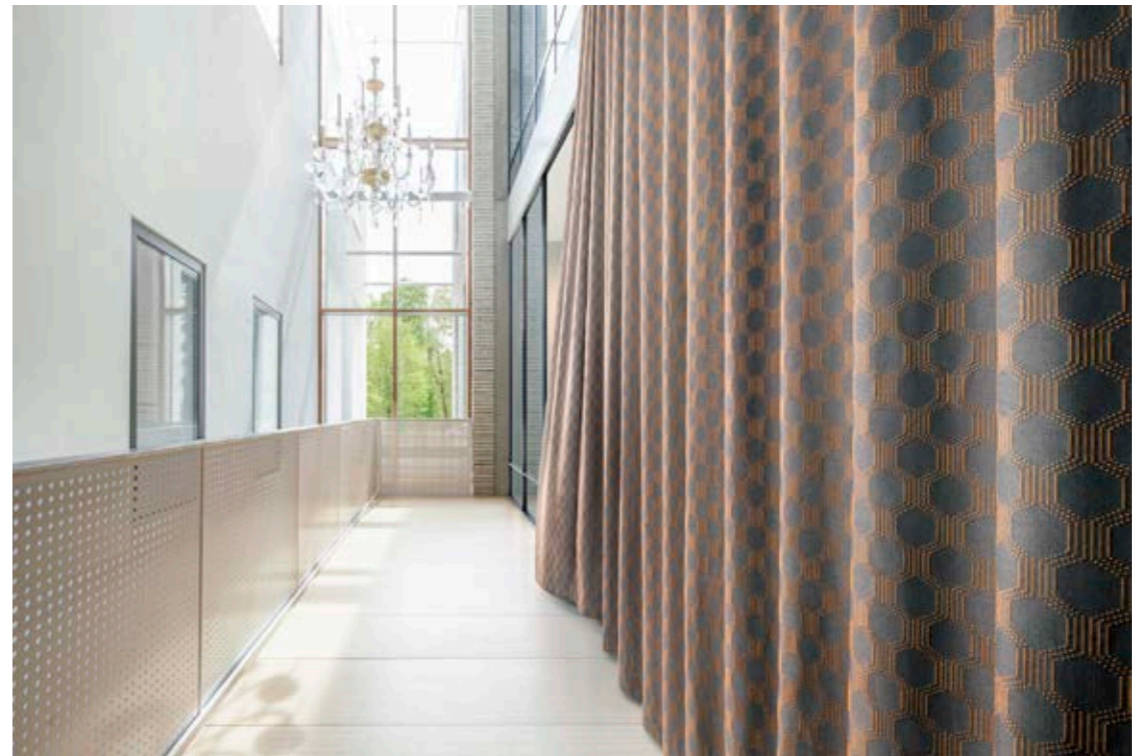

Functionality and originality. This distinguishes Vescom vinyl upholstery in the market. The products are hygienic, provide maximum protection against bacteria, dirt and grease and meet strict safety requirements.

curtain fabrics

The curtain collection consists of plain, patterned and translucent variations, black out and dim out fabrics. Thanks to innovations in flame retardant yarns, the collection has a more individual look in terms of structure, design, color and material expression.

Vescom also offers translucent acoustic curtain fabrics. Using these fabrics will reduce the reverberation, dampen noise and improves audibility in contract environments.

distinctive design

Vescom has been working with reputable designers for the development of varied and surprising collections since way back. This ensures that we can inspire buyers, architects and those applying our products again and again.

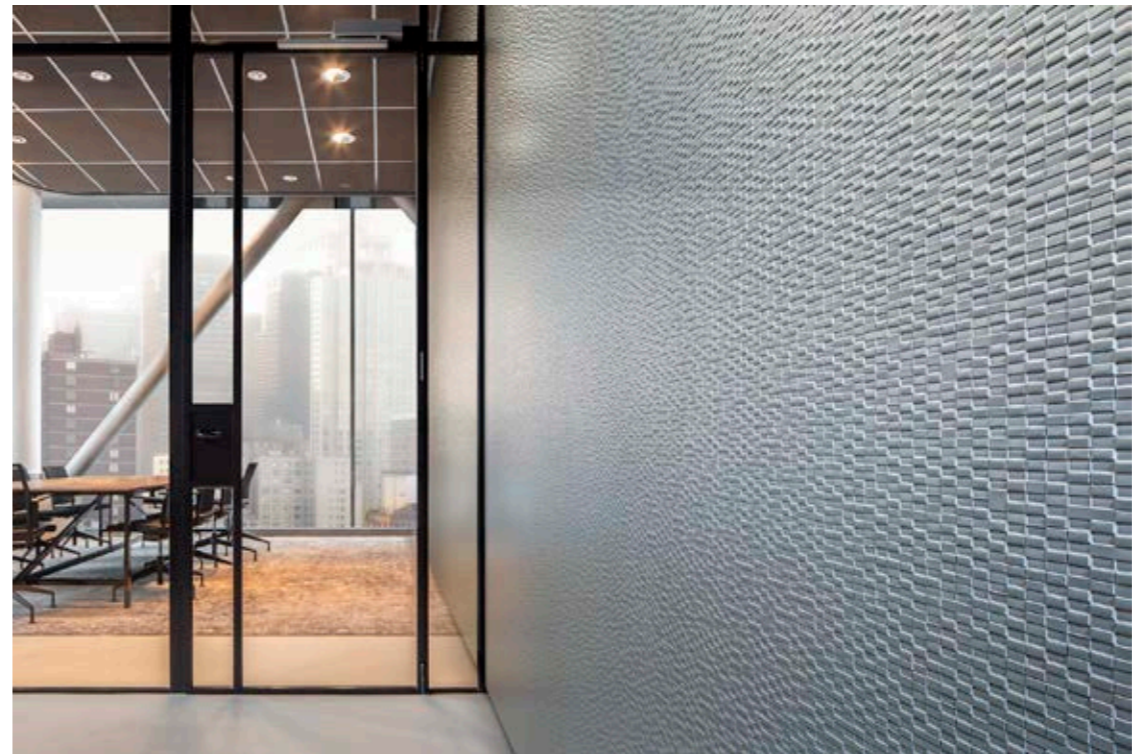

The Vescom collections are supplemented and updated continuously with new qualities, designs, structures and colours.

Vescom goes the extra mile

Quality and durability do not solely apply to products at Vescom, but also to the way they are produced. Vescom offers collections in which long-lasting choices can be made and products with Cradle to Cradle certification. The following is essential: our products have a very long service life.

looking after the environment

Vescom also produces while **burdening the environment as little as possible** and deliberately **separates and checks the disposal of residual fabrics**. This ensures we have a sustainable production process in place. **We consciously handle raw materials and limit energy and water consumption**. Vescom is ISO 14001 and ISO 9001 certified.

Vescom has been a member of Vinyl 2010 as from when it was established and continues taking the initiative under the new **VinylPlus** name because it believes that a durable development is important and it wishes to have the developments continue at a higher industrial and international level.

evolution in professionalism

Vescom aims at achieving continuity. The following applies in relation to our operational management and collections: no revolution but evolution. We continue to build on a tradition of **sound craftsmanship** and thorough **knowledge of the contract market**. Our focus continues to be on collections that fit in seamlessly in the modern contract market interior and, therefore, offer added value.
