## *Sizzler*

### - RETROFIT BRAAI -

The Sizzler Gas Braai can be used as a free standing braai placed on a counter, as an insert in a Built-In-Braai box, or as a mobile braai in conjunction with the Sizzler Mobile. The sizzler can also be used to convert an existing, built-in Charcoal braai to gas, or a combination of both.

This grill comes complete with Hot Rocks or Flame Tamers, as well as a Stainless Steel dust cover, and is intended for outdoor applications.

\*When installed in enclosed patio environments, the use of an Extraction System will be necessary.

- Available in 3, 4, 5 & 6 Burners
- LP Gas / Natural Gas Options
- Inland grade / Coastal Grade Stainless Steel
- Hot Rock / Radiants
- Various Accessories available

## - RETROFIT BRAAI -

MODEL	SIZE (A)	SIZE (B)
3B	575	525
4B	750	700
5B	925	875
6B	1100	1050

## INSTALLATION INSTRUCTIONS

**Built-In:** The Sizzler Gas Braai is a retrofittable, free standing Gas Braai, designed to fit into a recess cut into cabinetry, or replace wood burning grates in traditional Built-In-Braais. The Sizzler comes with a stainless steel dust cover included and is intended for outdoor use.

\*A recess formed into wooden/stone cabinetry housing the Sizzler Gas Braai, should be lined with fire retardant materials (e.g. ceramic blanket or vermiculite board).

**Mobile:** When used in conjunction with our Sizzler Mobile cabinet, a qualified gas installer should carry out the gas inlet conversion on your behalf.

Make sure to follow the Assembly instructions carefully to ensure safe assembly of the Sizzler Mobile Cabinet.

\*Please ensure you use a certified Gas Installer.

## *Hob Grill*

### - DROP-IN BRAAI -

\*The vent-plate & Extractor Hood in the image is not included (Braai Only)

Our streamlined Hob Grill adds a sleek, minimalistic design appeal to your entertainment area, opening up a world of flavour to your braaiing experience.

The Hob Grill is dropped into your counter top. A hinged stainless steel cover cleanly hides your grill away when you're done enjoying that great steakhouse taste.

The Hob Grill comes equipped with a flame failure valve for safe use in indoor kitchens.

\*For Indoor use please also see our Extractor Systems

- Available in 3, 4 & 6 Burner Sizes
- LP Gas / Natural Gas Options
- Inland grade / Coastal Grade Stainless Steel

3B	775	525	725
4B	950	700	900
6B	1550	525 (x2)	1500

## INSTALLATION INSTRUCTIONS

The Hob Grill is designed to be dropped into a counter top, with the appropriate amount of crossflow ventilation designed into the cabinetry, and a door to access the drip tray.

The counter top and cabinetry housing the Hob Grill should be lined with fire retardant materials (e.g. ceramic blanket or vermiculite).

Take care to ensure your permanent Gas Installation is fitted with Copper Piping for a minimum of 1 meter leading to the inlet of the Hob Grill.

\*Please ensure you use a certified Gas Installer.

## *Entertainer*

### - BUILT-IN-BRAAIS -

The Chad-O-Chef Entertainer built-in-braai is the ideal catering solution for any entertainment area.

An elegant stainless steel housing provides the perfect setting for your Chad-O-Chef gas grill.

Accompanied by our Sizzler gas braai, the Entertainer built-in-braai has ample room to braai up to two large steaks per burner, and the ability to add even more cooking options by adding our commercial strength Rotisserie Spit option.

While you're cooking, the Entertainer's bottom door doubles as a convenient work surface, as you sizzle up a storm.

- Available in 4, 5 & 6 Burner
- LP Gas / Natural Gas options available
- Inland grade / Coastal Grade
- Forced Draught or Natural Draught Extraction options
- Warmer Grid or Rotisserie Option
- Lightfitting Standard (All Units)

Stir Fry Pan

## INSTALLATION INSTRUCTIONS

The Entertainer Built-In-Braai is designed to be bricked into place once set on top of load bearing lintels. The lintels should be set at a height of 800-900mm (depending on your preferred height)

The **Forced Draught** option requires the addition of extractor components to ensure the removal of smoke from the Braai and is necessary where there is no space for a traditional chimney.  
\* Please see our website, for more info on Extractor components.

The **Natural Draught** option is a self-venting Built-In-Braai where there is space for a traditional chimney to be built.

\*The Entertainer Built-In-Braai cannot be retrofitted into an existing aperture. (See our Sizzler Gas Braai for retrofitting purposes)

## *Hybrid Braai*

- FREE STANDING BRAAI -

A first of its kind in South Africa, the Chad-O-Chef Hybrid Braai offers a 4-in-1 cooking experience, combining state of the art Gas burner design with a revolutionary Ember Drawer system.

The Hybrid Braai's Ember drawer allows one the option of wood, charcoal, gas or smoker chips to add that one of a kind bushveld flavour to any braai experience.

Once fired up, the Gas burners ignite wood and charcoal with-in minutes, meaning you don't have to wait as long before you can dig into that juicy steak.

- Available in 3 & 4 Burner Sizes
- LP Gas / Natural Gas Options
- Inland grade / Coastal Grade Stainless Steel
- Various Accessories available

## ACCESSORIES

Extractor System

Rotisserie & Dome

Stir Fry Pan

## INSTALLATION INSTRUCTIONS

The Hybrid Braai is a free standing unit, designed to be built into a cabinet. The cabinet housing the Hybrid Braai should still be lined with a fire retardant material before installation.

Take care to ensure your permanent Gas Installation is fitted with Copper Piping for a minimum of 1 meter leading to the inlet of the Hybrid Braai to ensure compliance with South African law.

\*Please ensure you use a certified Gas Installer.

## *Boma Braai*

### - FREE STANDING BRAAI -

Another first in South Africa, the Chad-O-Chef Boma Braai suavely combines contemporary European design, and advanced material knowledge, adding a juicy spin to your entertainment cooking methods.

The large central aperture allows you to add wood to the fire while cooking, so you can carry on the festivities uninterrupted. The Boma Braai's 8mm thick cooking surface retains and spreads heat evenly, searing steak and chops quickly and locking in moisture.

Make every stir-fry a spectical from all angles around the Boma Braai and get your guests involved in the cooking action.

- Corten Steel or Mild Steel design
- Large Central Aperture for adding wood whilst cooking
- Various Accessories available
- Large storage area for wood and fire-lighters

# Boma Braai

- FREE STANDING BRAAI -

## ACCESSORIES

Boma Rotisserie Kit

Boma Grid Extenders

Premium Spatula

Boma Scraper

Egg Rings - Square (4)

Skewers (6)

Canvas Cover

The MeatStick

## INSTALLATION INSTRUCTIONS

The Boma Braai is a free standing unit, designed to be loosely retrofitted into place in your outdoor braai area.

Take care to ensure your Boma Braai is placed on a level surface in order for the curved cooking surface to shrug excess fat and oils into the fire as designed.

The Corten Steel option takes time to oxidise naturally to the desired rustic effect, and is safe for coastal use as well, due to the material's ability to resist the penetration of rust.

## *Extractor Systems*

- EXTRACTORS -

Our Stainless Steel Extractor Systems are designed to extract the smoke generated by our Gas Braais and other appliances.

We manufacture various lengths of ducting, elbows, brackets and couplings, making it possible for us to supply an extractor system for almost any application.

Each system is compiled individually to suit your custom needs.

Our helpful staff are always keen to help you decide on the appropriate extractor components for your specific installation.

- Available in 4 Sizes
- Inland grade / Coastal Grade Stainless Steel
- Supplied complete with a grease filter, drip tray and light-fitting

1250	1250	510
1500	1500	760
1800	1800	1060

DUCTING EXIT : 200x200

## INSTALLATION INSTRUCTIONS

Our Extractor Systems come in **Top Exit** and **Rear Exit** configurations and are then further customisable by **Flexible** and **Rigid** flue configurations as well, to suit any orientation and application your home might require.

Various lengths of **Rigid** stainless steel ducting and elbows, allow for applications where the extraction system is exposed to outside elements. Our **Flexible** ducting allows for cost savings in internal chimney installations, where the ducting is subject to tighter bends and will not be subjected to the elements.
