RESIN-STONE CATALOGUE

PRODUCT OVERVIEW

Our premium imported acrylic stone panels offers a wide range of applications for interior applications. The products comprise a composite mix of resin and natural quartz or stone. Engineered to give a natural polished marble or granite effect, our panels come in a variety of styles, colours and styles to suit all interior styles and aesthetics.

Our panels offer a high degree of resistance to corrosion, water and staining, making them the ideal surface for decorative wall panels, back splashes, bar counter units and specialist wine wall displays. Due to their base material, our panels are easy to handle during manufacturing and install, making them the ideal alternative stone surfaces compared to traditional stone finishes!

MANUFACTURE AND INSTALLATION GUIDE

[CLICK TO WATCH OUR PRODUCT VIDEO HERE](#)

Resin Stone panels are lightweight and easy to cut and install, making them the ideal alternative stone surfaces compared to traditional stone finishes!

- Our panels can be easily cut and routed using standard joinery cross cut blades and routers
- Holes can be cut using a metal or wood drill bit and larger holes using a hole saw
- Edges can be sanded and polished for a smooth finish
- Mitered corners can be joined using quick-dry epoxy

PRICING AND NOTES

Please contact us for our current product price list and order form. Packaging, delivery and Installation is quoted separately on request.

Please contact us to arrange for one of our sales assistants to run through our range and pricing with you in Cape Town and Johannesburg or to collect a free sample pack to showcase to your clients.

Our showroom is based in Muizenberg, Cape Town and can be visited by appointment if you wish to view the panels in person.
