About

---

Our range is internationally  
designed by award winning  
German designer  
**Stefan Brodbeck.**

**Our chairs are made right here in SA** - creating jobs for South Africans, supporting the local economy, and playing an active role in skills development and giving back to the community.

All our office chairs are fully recyclable and 90% locally manufactured by our BEE Level 2 factory with black woman ownership.

95% of all chair components are recyclable. Most define it as a cradle to grave cycle.

**We define it as a cradle to cradle policy.**

The recycled plastic parts are reground and reused in complete lower end market chair products.

Our products carry long life span guarantees, reducing our carbon foot print. Our locally produced chairs minimise the carbon foot print by reducing the transport in the import process.

We believe in **investing in South Africa** and the employment of the SA work force.

We invested R50million over 5 years and today we produce **18 chairs ranges** with 54 variations.

Our factory employs **120 personnel**. This will increase via chair production.

We **export to most countries in Africa** as well as the UAE.

## **Buy one. Give one.**

Supporting education,  
one chair at a time.

For every office\* chair you buy,  
we will donate a school chair that  
is locally manufactured to a local  
school through our partnership  
with Adopt-a-School.

\*(This applies to the ALLY, ARC, CHARLY,  
CAPITANO, FILO, POP and YUTU chairs)
