## LIGHTWEIGHT, CAPPED BAMBOO-PVC DECKING

Apex sets the standard for the most natural looking composite decking. Its ultra-lightweight bamboo foamed-PVC core makes for easy installation and workability. Apex offers class-leading fire and slip resistance, and exceptional low-maintenance, requiring only the most basic of cleaning for optimal longevity. Its protective cap is made from a resilient acrylic polymer coating, offering fade, scratch, and stain resistance. Apex provides long-term decay and weather resistance by resisting insects, moisture, and the elements. Apex is also an environmentally friendly alternative to timber, with holistically sustainable manufacturing and use of raw materials.

# CHOOSE SUSTAINABLE DECKING

## RENEWABLE RESOURCES & RENEWABLE ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products use solar power as part of our manufacturing process. We are fully committed to bringing you a product that's holistically sustainable.

Every Eva-Last outdoor range pairs recycled raw ingredients with bamboo for a stronger, more sustainable composite. Bamboo rejuvenates over 30 times faster than traditional hardwoods and it releases 35% more oxygen into our air. Eva-Last is internationally recognised for our commitment to the environment. We're proud of the work we do to promote environmental sustainability, and invite you to choose timber alternatives that are gentle on the Earth.
