# ABOUT THE RANGE

*At Wolkberg, we are passionate about elevating interior and exterior spaces. We are always innovating with our products, and the Adorn Range is a special edition to assist anyone in achieving spectacular wall and floor designs.*

*Inspired by brass elements found in older cities such as embellished brass manhole covers, brass drinking water outlets, vintage brass door handles, lamp posts, and sign plaques, our design minds were intrigued by the way the material ages in the open environment. Semi precious metals are all enhanced, and take on their own character due to weather, or wear and tear.*

*Wolkberg pursued a business driven by adaptation in order to keep our customers at the forefront of the competitive design industry. We chose copper as a branding element because it is timeless and patinas as it is exposed to the elements, this layer is protective and proof of resilience. With this in mind, it seemed only fitting to add copper as an Adorn Range option, and naturally stainless steel followed to offer three well known metallic colours; gold, rose gold and silver.*

*With this semi precious metal range we hope to give home owners, designers and architects the opportunity to create memorable moments in their designs that can last a lifetime.*

*The Adorn Range can be customised to your taste, keep it subtle and allow it to age naturally, or go over the top glamorous and maintain it regularly. The Adorn Range comes in a brushed or polished finish, the choice is yours. We also offer artificially aged versions of these material on request.*

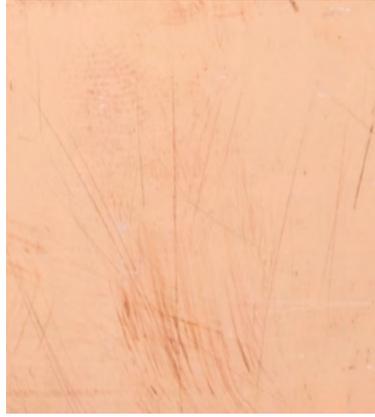

*Play, have fun and Adorn your home.*

# METALS & FINISHES

## SEMI PRECIOUS METAL OPTIONS

**BRASS**  
*"Gold"*

**COPPER**  
*"Rose Gold"*

**STAINLESS STEEL**  
*"Silver"*

## FINISH OPTIONS

**BRUSHED**  
*"Matte"*

**POLISHED**  
*"Reflective"*

These colour tones are an example of expected finish as our products are handmade and pattern/texture may vary between batches. The onus is on the client to confirm colours and finishes by looking at physical samples and completed projects.

# ADORN CLAD TILES

*Working with different materials and pushing boundaries on the application of these are what drives Wolkberg to discover new possibilities. An interest in old world brass fixtures lead the design team to play around with metals, and through this, the first products in the Adorn Range were our fully clad tiles.*

*The beauty of this Adorn option is the precision and attention to detail that goes into each handmade tile. When polished the tiles can look as if they have been dipped in gold, silver or copper. The metal flows over the edge of the tile shape as though it were molten lava. These fully clad tiles are elegant in their own right.*

*The benefits of the fully clad Adorn tile is that it is suitable for floors and walls. Semi precious metals are resilient and can last a lifetime, even with harsh wear and tear on a high traffic floor. The aesthetic is bold and daring, a solid, shining tile adds a moment of excitement to any design.*

*The future of the fully clad Adorn Range is bright with possibilities. We're not nearly done coming up with more additions.*
