

OUR PLEDGE

IMMER BESSER

WELCOME TO MIELE

When our great grandfathers founded the Miele company, they had to ensure that they stood apart from the competition in order to guarantee success. There are effectively only two ways of doing this: either by being cheaper than the rest, or by being better than the rest. It is not really possible to be both at the same time. They decided to be better than the rest.

Numerous best-in-class awards and certificates attest to the fact that Miele has continued to renew its commitment to being "Immer besser" (forever better) over the past 120 years. However, the millions of satisfied customers around the world are perhaps our most important endorsement. At the heart of this success lies a continuity of values and goals which are typically only found in companies that have been family-run for generations.

It is in this sense that Miele has embodied first-class product quality and German engineering since 1899. Miele also stands in equal measure for respect, fairness and mutual esteem towards sales partners, customers, suppliers, employees and neighbours.

Buying a Miele is an environmentally friendly decision. We ensure this by using methods of production that save resources, as well as by producing appliances that set new standards in terms of their consumption of electricity, water, and detergent - and save you money at the same time.*

As directors and co-proprietors of the fourth generation of our business, we promise you that this will not change.

Marken Mich Builed Linkam

THERE ARE MANY GOOD REASONS FOR CHOOSING MIELE.

Since the company was founded in 1899, Miele has remained true to its "Immer Besser" brand promise. This means that we will do all that we can to be forever better than our competitors and forever better than we already are. For our customers this means the peace of mind of knowing that choosing Miele is a good decision – and probably the decision of a lifetime! Here

are six reasons you should choose a Miele:

MIELE QUALITY

For more than 120 years perfect results have been Imperative to us: You can rely on Miele. We are the only mentiockers in our beauth of technology to heat prochaste much an our wealthy meetings. kurbia dryane, chiavaninase, and passe to the equivalent of 20 years' use. We can thoroby offer you unique reliability and posses of eritori. Wite copheles with fallets continues mand the world remain irred to that bread and recommend blick to offers. Looking to the future, we will not exterior any companion. when it corres to the whibility معالك بالكناسات اعم يعتمكون

MIELE TECHNOLOBY

Likio sharie for functiving bedienings and uncolorit results continued with subtimus unergy communities. This applies to the hyginals and gerife case of your bundly, your flooring and your conclary we wall we when conjuring appropriate-cultury deligible. The key to this is a wealth of business was the control of sound the world.

MIELE CRAFTSMANSHIP Unit shock for the collemnship, contining whice, packing and a great deal of attention to deal. Both of our products is manufactured to the highest should assile subject to shippert quality.

gloves. From handles milled from a single piece of metal to matching gap dimensions across all product groups, each element is part of our journey to absolute perfection. Nothing is more important to us than that you enjoy Male for a long time.

controls including individual surface tests with

MIELE SERVICE

Miele customers enjoy preferential treatment, thanks to our fast and efficient after-sales service. If you need personalised instructions on appliance use, or professional cleaning of your appliances, Miele will gladly visit you at home to provide these services to you. We will always be there for you. That's a promise!

MIELE DESIGN

Minis ballows in clean line, finalism obganics and intellige hearing. Whether conscribing rolling selfich, checoal source controls on a high-secolation touch display, openings Minis in both casy and hear horizon sine will you find such a comparable range of carefully coordinated design lines and colour options, to self the recent chemic trickes furthers treate.

Whether the skyle of your kitches: Minis in the particle and ch.

In many countries, Miele is the most desired brand in its branch of industry. In its German home market, Miele was even voted

"Best Brand Ever" across all product branches. And the ownership of products from such a brand reveals much about its users: Miele customers have high expectations for the performance and the environmental friendliness of their domestic appliances.

People who buy Miele are quality conscious and have style!

Quality ahead of its time Symbols for warranty packages at a glance

Innovation

For us, every ground-breaking innovation is more than a cause for celebration. It's a challenge to create something even better. That's why we craft our own parts, forge our own iron. Even make the machines that make the machines. Because striving for perfection is in our DNA. We call it: Immer besser.

Standard warranty

2 years manufacturer's warranty.

By purchasing a Miele product, you have opted for durability, optimum user convenience and highest quality.

Delivery & Installation will be charged separately on products purchased with a standard 2-year warranty.

Performance

10,000 HOURS OF TESTING - THAT'S PROPER PROOF OF PERFORMANCE.

Where others are satisfied after a few rounds of testing, we go further for longer. Some car engines need 3000 hours of testing – we check our performance with up to 10,000. In fact, 30% of our development time goes into testing. Ensuring ultimate results – year after year.

Miele@mobile app App highlights

Miele@mobile app

The Michiganoble app offers a wide range of functions that enable you to monitor end operate your appliances to achieve the best possible results.

Regarding supplies, you are informed about the current status of your consumables and can order them conveniently visiths internet.

MobileControl

With MobileControl you can aslact a programme on your weating machine, tumble dryer, and dishwasher even if you are not at home.

Recipes

Here you quickly can find the right recipe for every occasion. Incorporated how-to videos make food preparation really easy.

Assistants

The interactive seststant recommends the most suitable wash or drying programme. This will ensure partiact results every time.

Miele Service

Any quantions? Using the Mistellimobile app, you can easily contact us directly by phone or e-mail.

OVEN KEY FEATURES

Ovens at a glance

Moisture Plus

Increasing the humidity in the oven optimises cooking of a variety of foods: Soft, delicious smelling bread with a shiny, appetising crust; bread rolls and croissants as delicious as those from the local baker; succulent, tender meat with a nicely browned crust; perfect oven bake; delicious soufflè and so much more.

FoodView

How is your bake doing? The camera in the oven compartment will show you what is happening wherever you are, using any compatible mobile device or tablet.

Pyrolytic cleaning

Pyrolytic cleaning is an automatic process in which residue in the oven is incinerated to ash at a very high temperature. This makes arduous scrubbing and abrasive cleaners a thing of the past. The pyrolytic self-cleaning feature turns all food residue to ash, which can be easily wiped clean from the oven surfaces without a trace.

MotionReact

You can control your oven without pressing a button. Approach the appliance and the oven compartment will automatically light up, or the display will switch on, based on your preference.

FlexiClip runners

The fully extending runners allow baking trays, baking and roasting racks and gourmet oven dishes to be completely pulled out of the cooking compartment and held securely in any position. So you can comfortably baste a roast, or turn food over for example, without the risk of burning yourself on the hot oven interior. Versatile use at every level.

TasteControl

Perfectly cooked: After a time-controlled process, the oven compartment is automatically cooled down to stop the food cooking.

PerfectClean finish

Cleaning made easy: Many components in your Miele oven, including the oven interior, baking trays, and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is quickly easily removed using water with a dash of washing-up liquid and a sponge.

Wireless food probe

Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. With the wireless food probe, there is no need to supervise the cooking process. It is very easy to use, and it is always at hand, as it is stored in the oven door.

What do the icons mean?

Microwaves at a glance

Popcorn Button

Prepare perfect popcorn at the touch of a button. Times and wattages are tailored to prepare a 100g packet of popcorn. The pre-programmed times can be modified to suit your personal taste.

Food Probe

The food probe allows for the customised and precise roasting of meat, fish and poultry by monitoring the core temperature. It also features a countdown indicator. No more need to supervise the cooking process.

Automatic Programmes

With electronically regulated programmes for over 100 international dishes, you can cook and bake cakes, bread, meat, etc. to perfection. No need to programme the mode, temperature or duration. In addition, the degree of cooking and the browning level can be adjusted.

Energy Efficiency

Miele appliances are exceptionally energy efficient. A large percentage of Miele cookers and ovens are categorised in energy efficiency class A+. This protects the environment - and your household budget.

Capacity

The ovens offer a 43-litre or a 46-litre cabinet, which offers ample space for both cooking and baking.

PerfectClean Finish

Cleaning made easy: Many components in your Miele oven, including the oven interior, baking trays, and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is easily removed using water with a dash of washing-up liquid and a sponge.

CleanSteel

Features are particular high-grade CleanSteel finish. This allows for easy cleaning and fingerprints are barely visible.

Controls

Convenient user-friendly control panels are operated quickly & intuitively by simply touching or swiping the clear text display.

STEAM COMBINATION KEY FEATURES

Combination ovens

Multi Steam

Optimum steam distribution via 8 inlets. The powerful steam generator ensures fast steam, as well as shorter heat up times. The distribution of steam around the cooking containers achieves faster uniform cooking result.

Automatic programmes

For cooking various types of food. Simplify your everyday tasks as the manual selection of temperature & duration is not required. With Automatic menu cooking, the temperature, cooking time and sequence in which dishes are added are automatically controlled. MenuCooking makes life easier by cooking 3 different food types at the same time.

HydroClean

Spotless: HydroClean cleans the oven compartment of your Miele combination steam oven fully automatically.

Capacity

No other steam oven provides as much space. With 3 to 4 cooking levels. Allowing you to cook a complete menu for several people in one process.

Combination cooking

You want food that is succulent on the inside, crispy on the outside? Combination cooking provides results entirely to your taste.

Automatic menu cooking

Cook several components at the same time: Temperature, cooking time & sequence are determined automatically.

Mix & Match

Delicious dishes in the twinkling of an eye: With Mix & Match you can cook different foods on one plate at the same time.

Wireless food probe

Customised and precise roasting of meat, fish and poultry by monitoring the core temperature. The countdown indicator makes it very easy to use. No more need to supervise the cooking process. The special highlight: It is always at hand, as it is stored behind the fascia panel.

Touch Control

All Miele Gourmet drawers are operated by controls under the flush glass fascia. For convenient use & easy cleaning. You can select 1of 4 temperatures within the temperature range of the chosen mode. Timers can be set and switches off automatically at the end of the programmed time.

Slow Cooking

Low temperature cooking is a professional method of food preparation, giving high quality, tender & juicy results when cooking meat. The meat can be sliced directly after cooking.

SoftClose

Using this mechanisim, the fully telescopic runners glide gently & quickly back into their original position. Crockery & dishes remain in their place, thus spilling is prevented.

Push2Open

Miele built in drawers without handles are perfectly in-line with built-in appliances. The drawer opens wide, making loading & operating easy. The drawers are easy to open by hand or if you do not have a hand free when carrying crockery, use your knee or elbow.

GOURMET DRAWERS KEY FEATURES

Vacuum sealer drawers

Food storage

Vacuum-sealed foodstuffs stay fresh for longer. They are stored in the PerfectFresh zone in the fridge on a temporary basis. However, once vacuum sealed, fish and vegetables stay fresh for longer, without compromising on taste or quality. Vacuum sealing protects food against freezer burn, or contamination via smell or flavour. Not least of all, bread remain fresh for much longer at room temperature once they have been vacuum sealed.

Re-sealing

After an evening in front of the TV with crisps and popcorn, there are often some opened bags that have not been finished. What should you do with them? The vacuuming drawer offers the perfect solution: It seals the original packaging gently and securely on setting 1. This means that foodstuffs are protected against contamination via taste or smell. So theyire just as fresh the next time around.

CleanSteel

All Miele appliances in stainless steel have a premium CleanSteel finish. This finish allows the surface to be easily cleaned without special detergents. Fingerprints are nearly invisible on CleanSteel.

Vacuuming

Ideal conditions for longer storage life. In the Miele vacuuming drawer the oxygen and air are removed from the vacuum bags. This creates the ideal conditions for the longer storage of foodstuffs and also the perfect preparation for sous-vide cooking in the steam combination oven. A choice of three vacuuming settings is available to suit your needs. Setting 3 is ideal for marinated meat, whereas setting 1 is perfect for delicate foodstuffs such as berries.

Marinating

Do you like your meat and fish to have a really intense flavour? Marinate your food in your usual manner and then vacuum seal it with the Miele vacuuming drawer. By vacuum-sealing the taste of the marinade is greatly intensified, since flavours do not oxidize. The herbs and spices can work directly and in a very concentrated form on the food.

Easy-care interior

Easy cleaning guaranteed. The vacuuming chamber is equipped with seamless stainless steel sheets. This means that it is particularly easy to clean after use.

Vacuum bags suitable for food

Safety is a priority. Supplied with different sized plastic bags. They are food-safe, heat-resistant, boil-proof and tear-resistant and contain no plasticisers. Food is safely stored. Transfer of flavours is prevented. Additional vacuum bags are available to purchase from the Miele shop.

Generous usable area

Versatile vacuuming. The Miele vacuum sealing drawer is suitable for different bag sizes and containers. The interior space is big enough for all sorts of food from small portions, up to a maximum size of 250 x 350mm, and a height of up to 80mm.

Intelligent pan detection

Intelligent pan detection recognises where the pan is: With flexible cooking zones, the control elements simply move to where they are needed.

Con@ctivity 3.0

Your cooker hood responds automatically, and the extraction power is automatically adjusted to what is happening on the hob below, ensuring a pleasant room climate at all times. The appliances communicate with each other via WiFi. Con@ctivity 3.0 allows you to integrate the cooker hood and hob into Miele@home.

SmartSelect

Power levels can be selected directly via the number scale. The controls, highlighted in yellow, are easy to read from any angle. Ultimate convenience, as well as excellent legibility.

TwinBooster

All zones are fitted with a single or TwinBooster. If activated, the cooking zone will operate on full power, to enable rapid heat up times. The booster can be used on 2 cooking zones at once, ensuring ease of use for different pan sizes.

Keeping Warm Plus

Perfect for keeping food warm, for heating up cold food due to exact temperature control.

Thus resulting in perfectly heated food that doesnit burn.

Stop & Go

Allows for short breaks whilst cooking. The power output of all active cooking zones is reduced to level one & power is reinstated at the touch of a single button.

PowerFlex

Particularly versatile & flexible. Individual cookware such as large Pasta Pans or Oven dishes can all be used effortlessly without any problems, by selecting the ëbridgei function

Gas Stop Restart

This function makes use of electronics which recognises when the gas flame gets extinguished or if a pot boils over. Thus automatically reignites the gas flame. If this does not work, the gas supply is switched off immediately. Simple and safe.

ComfortClean

Fast cleaning: Remove the Pot rest & wash in the dishwasher. This makes cleaning particular easy, as well as saving time.

Quick Start

No need to press or hold down the control: All gas Hobs with electronic controls can be switched on easily and conveniently.

Special order only

Important Guide Lines When Ordering Extractors:

- 1. Decide whether you want a VENTED or RECIRCULATING model.
- 2. Determine counter height.
- 3. Determine ceiling height.
- 4. Minimum height for the gas hob to extractor is 65cm (models may vary check your brochure CD for full details).
- 5. Minimum height for the electric hob to extractor 45cm.
- Maximum possible height for both gas and electric hobs to extractor 70-75cm.
- Ceiling height to floor minus counter height minus min / max hob to extractor length equals the min / max height of extractor required.
- 8. If the required extractor length does not fit in with the min / max guide per extractor below, order a specialised extractor length.
- Specialised extractors are ordered on acceptance from the customer with full payment received.

OneTouch for Two

Preparation of one or two coffee specialities at the touch of a single button. This function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be produced at the same time.

EasyClick

Innovative and only available from Miele, the milk system simply clicks into place at the front and is easily removed.

Easily Removable Brew Unit

The brew unit is the heart and soul of automatic coffee making. It is easily removed and cleaned. This ensures perfect hygiene of the brew unit, producing coffee of the same high quality and longevity of your machine.

Comfort Door

Easy access: Convenient access to the bean container, water, and grounds containers, and drip tray.

CoffeeSelect

Our patented CoffeeSelect* ensures maximum enjoyment and top-quality coffee. There are three separate containers for different types of beans so each coffee speciality is prepared with the correct one. You can select the bean types manually or assign them permanently to particular drinks ñ giving you maximum flexibility.

CupSensor

Ideal distance: The CupSensor recognises the rim of the cup and its motorised height adjustment automatically alters the position of the central spout accordingly.

Automatic cleaning

Your Miele coffee machine will take care of cleaning and descaling for you. Effortless removal of dirt and limescale: Miele takes care of cleaning and descaling your coffee machine, so that you can spend your time on more important things.

Only available on CVA7845 models.

AromaticSystem

The dynamic brew unit on Miele coffee machines expands when water flows in, allowing the coffee powder and the water to blend better.

ComfortClean

The ComfortClean system makes hygiene very easy. Many of the coffee machine components, such as the water container and waste container, can be cleaned in a dishwasher.

Coffee & Tea

Prepares 20 different types of hot drinks automatically. And the best yet: The individual preparation of various types of tea. Whether green or black, herbal or fruit tea, the water is always dispensed at the optimum temperature - for perfect tea flavour.

REFRIGERATION KEY FEATURES

MasterCool Fridges & Freezers

MasterCool

Welcome to Miele's Exclusive Refrigeration product.

High-end design and technology on a large scale. With the development of the large-capacity MasterCool appliances, Miele has new standards. High-end design, impressive innovations and inimitable convenience features are combined in refrigeration appliances of the highest calibre.

MasterCool - Push2Open

Miele MasterCool refrigeration appliances with the Push2Open function open as if by themselves. The opening system is activated by light pressure on the door. The door opens gently and allows you to reach inside and open it completely. Miele MasterCool refrigeration appliances with Push2Open do not need handles and can be perfectly flush-fitted and integrated into every kitchen and living environment.

Impressive lighting

BrilliantLight perfectly illuminates the interior cabinet of your Miele appliance – even if it is filled to maximum capacity. This is down to the high-quality LED strips in the side walls of your Miele MasterCool appliance. The light comes on gently as soon as you open the door, giving you a perfect view of your food.

MasterCool - IceMaker

Ice cubes for cold drinks! Ice-cool drinks professionally and quickly. The automatic IceMaker can produce up to 150 ice cubes a day.

MasterFresh

The drawers of your Miele MasterCool appliance provide the perfect climate for the gentle storage of your food. Thanks to the innovative MasterFresh function, the refrigerator temperature is particularly low, so that vitamins and minerals are preserved for a long time. The air humidity is also perfectly adjusted to suit fruit, vegetables, dairy products, fish and meat. This ensures that food stays fresh for up to three times longer.

60 WINE CONDITIONING

Refrigeration Wine Conditioning features

Push2Open

At the touch of a finger tip the door opens slightly. This allows it to be opened gently. The door closes just as softly to prevent any shuddering.

DynaCool

The intergrated fan ensures that air circulates evenly resulting in uniform temperature & humidity levels.

Sommelier Set

Sommelier set can accomodate decanters, glasses & open wine bottles. Used to keep bottles in their perfect temperature. The wine glasses can be chilled as well.

FlexiFrame

Just one movement: Move individual slats so that large wine bottles are easy to store.

DISHWASHER KEY FEATURES

Dishwashers at a glance

A world first: AutoDos with PowerDisk

Automatic dispensing for excellent results with integrated PowerDisk. Superior cleaning system, unparalleled freedom.

AutoOpen Drying

The dishwasher door automatically opens a fraction at the end of a programme cycle. This allows fresh, dry air to enter the dishwasher, and even challenging items such as plastics and glassware are perfectly dried. Special airducting protects the worktop from moisture.

Perfect Glass Care

Soft water enhances cleaning performance in a dishwasher, but is aggressive to glassware. Consequently, all Miele dishwashers feature Perfect GlassCare technology. This helps protect glassware and keeps stemware looking as good as new for longer.

3D MultiFlex tray

Stress-free loading: Ingenious adjustment options create space in the dishwasher, even for small items.

FlexLine baskets

Flexibility creates convenience: Easy adjustment and flexible loading for the best cleaning results.

EcoPower technology

Saving water and energy: Cleverly designed water supply reduces consumption.

Knock2open

Open the dishwasher door will open automatically by simply knocking the furniture panel twice. This allows for perfect seamless integration into the kitchen cabinetry and eliminates the need for a door handle.

Quick PowerWash

Excellent cleaning performance. Unmatched synergy: The new dishwasher programme QuickPowerWash and the specially designed UltraTabs Multi, achieve the best possible cleaning and drying results for normally soiled crockery in only 58 minutes.

Dishwasher Detergents

For best results, use Miele Care collection

Ultra Tabs

Each dishwasher detergent tablet features a powerful enzyme formula and a three-layer construction that delivers superior wash results. They can be used with any brand of dishwasher.

Dishwashing Powder

Miele's ingredients dissolve proteins and starch in cold water and help remove persistent dried food. The special formula contains active oxygen for perfect results, and can be precisely dispensed thanks to the easy pour bottle.

Rinse Aid

Sparkling dishes and glassware come standard when you use Miele rinse aid! It's formulated to prevent long-term etching in glassware, and it can be used with any brand of dishwasher.

Dishwasher Salt

Miele dishwashers have a built-in water softener. This is especially critical in areas where the water source is found to be very hard. Salt dissolves during the cycle and ensures your machine delivers the very best results.

Powerdisc - for AutoDos dishwashers

PowerDisk All in 1 disc detergent for dishwashers with AutoDos. Miele's exclusive powder granulate, Automatic dispensing for approx. 1 month (20 cycles/disk) For Gen 7000 dishwasher with AutoDos.

LAUNDRY

WASHING MACHINE KEY FEATURES

Washing Machines at a glance

ProfiEco motor

Powerful and economical: Quiet, powerful energy-saving wash with Miele ProfiEco EnergySave motor. Long-lasting.

SingleWash

Efficient solution for individual items: Wash a favourite blouse faster, more economically and more gently than ever.

Spin Speed

You can alter the pre-set spin speed of a wash programme. At this high spin speed, the residual moisture level is only 43% or 44% after spinning, making subsequent tumble drying very economical.

Gold standard for virus hygiene

Hygienically clean: TwinDos and PowerWash reliably remove over 99.9% of viruses, such as Coronavirus for example.

Cap Dosing

Miele offers small portioned capsules that are simply placed in the fabric conditioner compartment for textiles requiring special care. The Miele washing machine automatically dispenses the contents of the Caps at the perfect point in time during the wash process.

Networking with Miele@home

Make your life smart: Thanks to Miele@home, you can cleverly network your domestic appliances for more options.

Hygiene

AllergoWash*: This option should be used where high standards of hygiene are required. More energy is used to lengthen temperature holding times and more water is used to increase rinsing efficiency. Dust mites and bacteria do not stand a chance with a higher water level and an extended temperature holding time.

SteamCare

Enjoy 50% less ironing after a wash programme, or as a separate smoothing programme. It gently removes creases from the most delicate items, and it is environmentally friendly.

TUMBLE DRYER KEY FEATURES

Tumble Dryers at a glance

Drum Load

Ranges from 1-7kg, 1-8kg & 1-9kg. Fewer creases, easier ironing: The honeycomb structure allows laundry to be dried gently and evenly.

EcoDry technology

The filter system and the maintenance-free heat exchanger keep energy consumption and run time low.

FragranceDos

Indicates if fragrance flacons can be used on the appliance. Freshness for all the senses: With Miele you not only have particularly bouncy but also beautifully fragrant laundry.

Perfect Dry

Always perfectly dried: PerfectDry detects the mineral content of the water and modifies the drying process.

HeatPump

Indicates if the appliance features heat-pump technology. Uses half as much energy as conventional condenser tumble dryers. Using a Miele heat pump dryer can considerably reduce not only your energy costs but also the burden on the environment. Complete delicate garment care with also particularly gentle drying.

Networking with Miele@home

Make your life smart: Thanks to Miele@home, you can cleverly network your domestic appliances for more options.

SteamFinish

Achieving perfectly tumbled textiles fast, this steam and heat smoothes your textiles before they leave the tumble dryer.

Steamer (B4826 Fashion Master) 10569390

Specifications

Ironing of hanging garments. Fitted with a removable brush. Can be used as an alternative to the iron.

Honeycomb structure soleplate

Perfect results: Steam on the honeycomb surface helps the iron glide smoothly and effectively over the laundry.

Non-stick soleplate

Perfect care: Sequins, prints, delicate fabrics and dark items are ironed without creating shiny patches.

Steam Jet

Very handy: Hanging clothes such as dresses, jackets or curtains are gently smoothed and freshened-up.

Guided first use

Just start: During start-up, the appliance guides you safely through the selection menu for language and water hardness.

4.0 Bar Steam Pressure

Professional ironing results due to 4.0 bar steam pressure

Vacuum Cleaners

Cordless Handstick Range

3in1 concept

Ultimate flexibility for any situation. Enjoy the ultimate in flexibility: The PowerUnit of your Miele Triflex HX2 vacuum cleaner can be positioned at the top or bottom. This enables you to get under flat furniture easily or to vacuum large areas effortlessly. The PowerUnit can also go solo in an instant: The perfect way to vacuum the car seats or sofa in next to no time. As you can see, the configuration concept of the Triflex HX2 adapts to suit your needs perfectly.

Maximum range

All kinds of possibilities: whether you need to vacuum underneath low furniture or get the dust off the ceiling, with the Triflex HX2 PowerUnit positioned at the top you have maximum flexibility. It makes it really easy to get under beds or cabinets with the vacuum cleaner \tilde{n} for a perfectly clean home.

Effortless

Perfect for large areas: Position the PowerUnit at the bottom of your Miele Triflex HX2 vacuum cleaner. This is a really convenient way of vacuuming large rooms or areas - such as long hallways or spacious living rooms. This lightweight design makes your vacuum cleaner really easy to hold and in case you need to take a break from vacuuming, it also features a self-standing function.

Easy handling

You just want to vacuum some crumbs off the couch or free the car seats of dust? With the solo PowerUnit its an absolute breeze: It detaches really easily and can be used independently of the suction tube and Electrobrush. It is always at the ready - saving you time, while still cleaning efficiently.

Fresh Air

With the HEPA * Lifetime Filter, you can create a hypoallergenic zone with your own four walls. It captures and filters 99.99% of all microscopic particles and allergens - removing them from the air. As a result allergy sufferers will be less affected by pollen or household dust.

Electric brush Multi Floor XXL

Cleans beautifully: The Electrobrush for the Miele vacuum cleaner is 28cm wide, allowing you to clear large areas of dust in next to no time. At the same time, the special airflow concept ensures powerful suction. The intelligent brush immediately detects the type of flooring: As soon as you start vacuuming carpets, the power increases automatically.

Versatility always on board

Miele cylinder vacuum cleaners are equipped with three high-quality, standard attachments: upholstery nozzle, crevice nozzle and dusting brush. They are stored dust-free inside the appliance or on a Vario-clip, and they are always conveniently within reach

Cat & Dog | Allergy

For true pet lovers. Thanks to its special accessories, it is ideally suited to cater for the requirements of housholds with pets. The Allergy vacuum cleaner offers the highest hygiene requirements. Ideal for people who suffer from allergies & sinus problems.

Active Airclean

The Activated Charcoal filling ensures that any smells or bad odours from the dustbag are absorbed before it leaves the cleaner, and the exhaust air is always fresh. Odour Absorbtion allows for effective filtration with timestrip filter replacement indicator.

Hygiene

Miele vacuum cleaners offer exceptional filtration based on a multi-stage system. It consists of the innovative Miele HyClean dustbag, motor protection filter and Miele exhaust filter. The interaction of these components ensures that more than 99.9% of fine dust is filtered. So you can breathe with ease!

HEPA AirClean filter

With Miele, you can choose from three different exhaust filters. The HEPA AirClean filter retains even the smallest particles. The timestrip lets you know when the filter should be changed.

Vortex Technology

The Vortex technology produces an enormous flow velocity of more than 100km/h. Combined with the specially designed floorhead and the aerodynamic air flow, the bagless vacuum cleaner achieves first-class cleaning performance. This ensures that both coarse and fine dust are separated in an outstanding manner.

HEPA Lifetime Filter

With the HEPA lifetime filter, up to 99.99% of the smallest particles of fine dust and allergens are retained by the system. Perfect for people who suffer from allergies.

ComfortClean

Special sensors measure the air throughput of the GORE CleanStream fine dust filter and automatically activate the ComfortClean self-cleaning function as needed. To complete this, the appliance switches off for about 20 seconds. The ComfortClean function can also be activated manually.

Hygiene Lifetime Filter

The Hygiene lifetime filter features very high dust retention capacity and collects 99.98% of all fine particles. This is the type of hygienic cleanliness that you want for your home.

Click2open

The dust container can be removed by pulling it upwards by its handle. The container is then opened by pressing the "Empty" button. Once open, the collected dust simply drops out

Top class suction in the smallest of spaces

Superior cleaning performance

All bagless vacuum cleaners from Miele have a 3-stage filtration system. On the Boost CX1, air passes through the following filters: Dust container with Vortex Technology, fine dust filter and exhaust filter.

Dust container with Vortex Technology

The compact design ensures extremely low airflow and guarantees that the Boost CX1 achieves excellent dust separation. As a result, a very large proportion of soil remains in the dust box. Finer dust is held back by the next filtration stage, the fine dust filter.

Precise and nimble with TrackDrive

Miele Boost CX1 is easy and precise to manoeuvre yet remains nimble and able to turn on the spot.

Quality

It is also tested for a life cycle of 20 years. In very many respects, Miele quality tests surpass the requirements independent test institutes.

RX3 Scout - Arriving 2nd Quarter 2022

3D Smart Navigation

Intelligent navigation - 2 front cameras enable high-precision 3D object detection for comprehensive cleaning.

120 min non-stop

Thanks to a powerful lithium-ion battery, the Scout runs for longer on a single battery charge. If the battery charge is not sufficient, the scout returns to the base station for recharging. It will then continue cleaning from the location where it had stopped fully automatically.

Home Vision HD

Real time viewing: Encrypted live image transmission from the front camera to a mobile device in HD quality.

Quattro cleaning power

Efficient suction system for every floor Strong on carpets and hard floors: 4-stage cleaning system with 4 cleaning modes for perfect dust absorption.

Corner brush

Clean everywhere: The swivelling 20-armed side brushes protrude over the device and reach every corner.

CONSUMABLES

CARE COLLECTION KEY FEATURES

For best results use Miele care collection

UltraWhite Powder

For brilliantly white laundry. The powerful formula with its high active oxygen content ensures optimum wash results and brilliantly white laundry.

CapDosing

The perfect addition for special applications convenient capsules: Dispense special detergents, fabric conditioners and additives using single use capsules.

Reproofing Agent

Ideal for sports clothing and waterproof clothing. The Miele proofing agent provides effective retention of breathability, as well as wind- and dirt-resistance for all outdoor textiles.

UltraColor Detergent

For vibrant colours special protection components and care materials leaves colours radiant and helps your clothing retain its brightness even after numerous laundry cycles.

TwinDos

Both liquid detergents are automatically dispensed at the optimum time during the programme. Best liquid detergents system available on the market for coloured or whites fabrics.

Outdoor Detergent

For high-quality outdoor clothing. The lanolin contained in the detergent acts like a soothing bath for the membrane. It remains elastic and flexible and retains its complete functionality.

Fragrance Flacon

The new Miele flacons envelop your laundry with a pleasant fragrance during drying. The flacon is simply fitted into the easily accessible fluff filter and distributes an unobtrusive fragrance evenly onto your laundry.

Sportswear

For breathable sportswear. Neutralises unpleasant odours. Cleans and retains the brilliance of colour. Perfect for fleece & lycra fabrics.
