

DISTINCTIVE FURNITURE AND HOME ACCESSORIES

2015

product

contents

*W*e at Press Up Industries have been working hard to grow our product range and those familiar with our goods will see that our products now cater for a broader base of customers. Among our new products on offer are our rust, porcelain and glass knob ranges, as well as a new contemporary range. We have also created a door handle and home accessory range. By developing these products we have been able to expand our business into areas where we previously had little representation. We have seen more and more kitchen manufacturers and installers using Press Up products daily with pleasing outcomes, largely as a result of our range growing in ways empathetic to their requirements. We are also now actively selling our goods via large retail outlets and specialist decorative hardware shops. It has been a busy time at Press Up and shows no signs of letting up as we manufacture new items to the requirements of our growing base of customers both locally and abroad.

It is the nature of your requirements that governs the direction of our business. As we are willing and able to manufacture to your specifications, the products emanating from these interactions often become a part of our range, solve a problem for you and lead us to new areas of the market. Hence, we value and appreciate the creative input from our customers. We invite you to continue to make us aware of the things we can make or do to minimise your cabinet hardware and home accessory challenges. We shall do our best to fulfil your requirements in this regard.

Press-UP

INDUSTRIES

*P*ress Up Industries is a wholly owned South African company based in Cape Town. The company was established in 1989.

Initially we developed a range of cabinet fittings suitable for furniture restoration or to be used on reproduction furniture.

We have subsequently added to our range extensively and we now offer a large selection of knobs, handles, drops, escutcheons etc, for contemporary furnishings and kitchen installations. We also offer door handles and other home accessories.

A growing demand for these high-quality, cost effective products has cemented our presence in the South African market place. We also proudly export our handles to numerous countries, including the USA, UK, Namibia and Zambia.

We have both the capacity and capability to supply our handles in large "bulk packed" quantities or in smaller volumes for the DIY enthusiast, restorers of furniture, kitchen manufacturers, retail outlets, decorators, architects and builders.

Our product is manufactured of die cast or spin cast zinc, pressed strip steel or brass and we can plate in house to a variety of finishes. We welcome any enquiry for new products which we can manufacture to your specifications, and undertake to deliver timeously worldwide.

We strive to conduct our business with pride, integrity and honesty and follow the principle of equal opportunity employment.
